SENATE—*Thursday, May 15, 1986*

(Legislative day of Monday, May 12, 1986)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

God of justice, truth and compassion, many voices are heard on Capitol Hill—sometimes they come in torrents, sometimes sporadically—some are loud and demanding—others speak softly and humbly. Many, whose rights are most often neglected, are voiceless.

Midst all the jumble and jangle, help us to hear the "still small voice" of the spirit of God. Grant, Righteous Lord, that voices will not prevail simply because they are noisy or impressive or authoritarian or because they speak only for selfish interests. Grant that the voices of truth and justice and love may prevail. And help us, Lord, to be aware of the voiceless, who have no advocate. May we remember that we will most likely hear them: the oppressed, the poor, the forgotten and forsaken, if we listen to the voice of God. In the name of Him Who was compassion incarnate. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The able majority leader, Senator DOLE is recognized.

Mr. DOLE. Mr. President, I thank the distinguished Presiding Officer, Senator THURMOND.

SCHEDULE

Mr. DOLE. Mr. President, first I would indicate that under the standing order the leaders have 10 minutes each, followed by special orders in favor of Senators BYRD, HAWKINS, CRANSTON, COHEN, PROXMIRE, PRESSLER, GORE, MCCONNELL, and BIDEN for not to exceed 5 minutes each.

Following routine morning business, which will expire at 11 o'clock, we will then turn to the Uniformed Services Retirement Reduction Act, S. 2395, and following that we will turn to S. 2180, the Federal Fire Prevention and Control Act. I advise my colleagues that votes can be expected throughout the day and perhaps into the evening. As we stated yesterday, we will not be in session on Friday. On Monday, if there are rollcall votes, they will not occur before 3 p.m.

FINANCIAL ASSISTANCE TO FARM BORROWERS

Mr. DOLE. Mr. President, yesterday I introduced a concurrent resolution calling on member institutions of the Cooperative Farm Credit Institution to take all possible steps to continue to provide financial assistance to their farm borrowers, many of whom are facing severe financial difficulties. The resolution also asks the Farm Credit Administration to exercise forbearance in its regulatory policies, similar to the approach announced several weeks ago by Federal regulators for commercial agricultural lenders. I point out that I have been joined in this effort by 60 of our 100 colleagues, and I think many more will cosponsor the resolution. Democrats and Republicans are cosponsors. It is bipartisan.

I have attempted for several weeks to obtain unanimous consent to consider this resolution, but there has been an objection. It is being discussed this morning in the Senate Agriculture Committee. In fact, I have had a brief visit with the distinguished Senator from Iowa [Mr. HARKIN], who has had a hold on the resolution or objected to bringing it up. He has indicated that if Mr. Naylor, one of the nominees being considered this morning in the Agriculture Committee, indicates that it will serve some purpose, he might be willing to join us in passing this resolution.

I understand that, in its present form, this resolution is acceptable to the administration. In addition, I intend to ask nominees to the Farm Credit Administration Board to endorse these provisions.

Yesterday the House voted 407 to 0 on a nonbinding resolution urging the Farm Credit System to restructure problem loans where possible, rather than foreclose. So, it seems to me, there is widespread concern that Congress express its view to the Farm Credit System, and that we should do so soon. I hope that whatever problems Senators on the other side of the aisle might have with my resolution could be discussed, so that the Senate might act expeditiously on the measure.

My resolution is straightforward. It expresses the sense of Congress that Farm Credit System institutions should take specific actions to help their farm borrowers through the current period of high indebtedness and tight cash-flow. Among these actions would be participation in Farmers Home and other Government guarantee programs to provide credit to farmers who will otherwise not qualify for operating loans for planting 1986 crops; staying with a borrower as long as there is a reasonable possibility of the farmer working out of financial difficulties; using loan restructuring programs that provide for adjustment in principal and interest payments to enable borrowers to service their obligations; restructuring and making concessionary adjustments on loans if the cost of doing so to the institution is less than the cost of foreclosing, and there is no reasonable alternative course of action; and assuring that eligible borrowers and family members of defaulting borrowers have the opportunity to bid on property subject to foreclosure; and, we ask that these policies be administered while recognizing the need to follow sound credit practices that protect the interest of shareholders and maintain the sound reputation of Farm Credit System securities in the financial markets.

Finally, this resolution calls on the Farm Credit Administration to adopt flexibility in its regulatory policies, similar to the agreement announced by the other Federal regulators in dealing with commercial agricultural banks. An increased but still responsible level of forbearance is vital if member institutions of the Farm Credit System are to stay with their borrowers.

I hope and trust that both the Farm Credit System and the Farm Credit Administration would use the provisions of this resolution as guidelines for helping farmer/borrowers out of their current problems.

So there are a number of features that I think will be very helpful. I would like to pass the resolution, if not today, certainly next week.

NO VISA FOR ARAFAT

Mr. DOLE. Mr. President, there is some rumor around that PLO leader Arafat may be coming to the United States to visit the United Nations on June 6. It disturbs me that we seem to keep the door open for people like Arafat to come and spread their poison either at the United Nations or anywhere in the United States. His and the PLO record on terrorism, I think in the view of most Americans,

is rather clear cut. They have been active participants. I believe it is an insult to Americans who have been the victims of terrorism around the world that we have to sit back and listen to people like Mr. Arafat, especially in a forum like the United Nations, which is supposed to be dedicated to civilized behavior. I have asked my staff to look into the legalities of the visa situation, whether or not there is any way to prevent the issuance of a visa to Mr. Arafat, and I expect to say more on that either later this week or early next week.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. SYMMS). Under the previous order, the Democratic leader is recognized. The Senator from West Virginia.

Mr. BYRD. Mr. President, I thank the Chair.

AGENDA

Mr. BYRD. Mr. President, before the distinguished majority leader has to leave the floor, might I ask again for the record what the outlook is for today as to rollcall votes—it was the understanding on yesterday that there could not be any session on Friday—and if the distinguished majority leader could indicate what might be the outlook for Monday at this point. If today is the last day of session this week, our colleagues on both sides—I know my colleagues on this side—would very much appreciate the majority leader's outlook for today and Monday and beyond if possible at this time.

Mr. DOLE. In response to the distinguished minority leader, we will not be in session tomorrow. I do expect votes today. I am advised by the chairman of the Armed Services Committee there could be two or three votes on the so-called retirement bill. There could be a vote or two on the bill that follows that which deals with daylight saving time. But if we do not complete that at some reasonable hour this evening, we will just carry that over until Monday. I do not expect a late session this evening. Hopefully we could conclude by 6 o'clock or shortly thereafter because the bill that will be pending is not that urgent. We would resume consideration of that bill on Monday unless the supplemental appropriations bill is available. I will try to determine that from the distinguished chairman, Mr. HATFIELD.

If there should be rollcall votes ordered on Monday, they would not occur until after 3 p.m., and we will stick by the rule of no votes after 6 p.m. on Monday.

On Tuesday and Wednesday, I assume, we will be tied up with the supplemental appropriations bill.

As previously announced, we will adjourn for the Memorial Day recess the evening of the 21st, Wednesday.

We have had a discussion, and it might be well to announce that when we return on the 2d of June, we will convene at 2 p.m. I think that will satisfy the concerns on both sides and will enable Members to be here at that time.

□ 1010

Mr. BYRD. Mr. President, I thank the majority leader for his clear enunciation of the program for today and with respect there being no session on tomorrow, and his clear statement with respect to Monday, Tuesday, and Wednesday, as well as the emphasis that the major bill before the Senate will be the supplemental appropriations bill, before the Senate goes on the Memorial Day recess.

I thank the majority leader.

Mr. DOLE. I think we have made it clear that initially we had been scheduled to return on the 29th and be here on the 29th and 30th. But we decided that that would not be the good use of our time, so we will not be in session on the 29th and 30th of May.

Mr. BYRD. I thank the majority leader. I agree with him that it would not be a good use of the time.

MEDICARE HEARINGS

Mr. BYRD. Mr. President, I would like to remark on a subject dear to my heart and crucial to the well-being of millions of elderly Americans. I speak of the Medicare Program.

On June 3, 1986, the Senate Finance Committee will conduct hearings on the Medicare Program's prospective payment system. According to the committee's chairman, Senator PACKWOOD, the hearings will examine allegations that Medicare's prospective payment system is resulting in premature hospital discharges and a growing unavailability of appropriate posthospital services such as home health care and skilled nursing facilities.

I am pleased that such hearings are being conducted, because I share the committee's concerns. If Medicare's prospective payment system is adversely affecting the health and well-being of America's elderly citizens, then Congress must devise the remedies necessary to ensure continuation of quality health care for the 28 million elderly citizens served by Medicare.

Many of my distinguished colleagues will remember that before Congress enacted Medicare in 1965, many of our elderly citizens did not receive proper health care. They often did not go to a doctor, either because they could not find one nearby, or because they could not afford the cost of a physician's services. For example, in 1958, 52 percent of Americans who were 65 years of age or older did not see a physician—not even one time that year.

Medicare changed all that. Now, almost 80 percent of the elderly see a physician at least once a year and over 93 pecent of our elder citizens have some regular source of medical care. And most receive this care not in hospital emergency rooms, but in the offices of private doctors and comprehensive medical clinics.

Medicare has brought our elderly citizens into the mainstream of American health care. Medicare has eliminated the most shameful differences in the quality of health services available to those elderly who are poor and not so poor.

This success of Medicare was guided by a special vision of Congress. When Congress first authorized Medicare, it made some very difficult decisions and demonstrated some very strong commitments. For example, Congress decided that all of our elderly citizens should receive uniformly high quality health care. As a means of guaranteeing this, Congress required all hospitals and other health care facilities participating in the Medicare Program to adopt nondiscriminatory admission policies.

In addition, Congress was determined that its bold vision of a first class, fully accessible health care system would not be undermined by skeptical providers of health services. So Congress worked with these providers and brilliantly fashioned a piece of legislation that both institutionalized its vision and assured effective cooperative relations between the Medicare Program and the Nation's providers of health services.

Mr. President, Congress repeatedly has reaffirmed its commitment to a Medicare Program that works for our elderly citizens. Among other important adjustments we have made in the program since its inception, we have legislated program reforms that curtailed Medicare Program costs, increased the solvency of Medicare's trust funds, limited beneficiary premium expenses, and extended coverage to disabled persons and to health maintenance organizations.

As a result of such reforms, notable changes have occurred in Medicare's financing structure. For example, during the 20-year period from 1966 to 1986, the maximum annual worker's payroll contribution for Medicare's hospital insurance—that is, part A—increased over 2,200 percent, from $23.10 to $534.60. And enrollees' monthly premiums for Medicare's supplementary medical insurance—that is, part B—have increased over 415 percent, from $3 to $15.50.

But despite these reforms, there remains a significant difference between the rate of increase in Medicare expenditures and the rate of growth of

the Nation's aggregate taxable payroll. Per capita health costs for persons 65 years and older increased 525 percent during the 15 years between 1965 and 1980.

It has been repeatedly noted that Congress must develop proposals to ensure the financial solvency of Medicare. But these must be thoughtful, carefully crafted, comprehensive proposals that achieve the proper balance between costs and quality care. These proposals must maintain that kind of cooperative relationship between Government and health providers which is absolutely essential if Medicare is to work.

Mr. President, I believe the more disturbing aspects of the current Medicare Program illustrate the need for the careful investigation and review that is being undertaken by the Senate Finance Committee. I strongly support this effort.

We on the Democratic side of the aisle have repeatedly and unequivocally demonstrated our commitment to the fundamental purpose of the Medicare Program—to provide comprehensive, accessible, affordable, quality health care to our elderly citizens. I believe Democrats will demonstrate such commitment in the future, and I pledge my efforts to such ends.

I am sure that such efforts will receive bipartisan support, because this program affects people of all colors and races and all parties. I want to express my appreciation to the Finance Committee for the work it has done, is doing, and will continue to do with this extremely important program.

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The minority leader has 5 minutes remaining of the leadership time, plus 5 minutes on a special order.

Mr. BYRD. Mr. President, I ask unanimous consent that I may reserve the remaining time under the leadership order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. As to the 5 minutes that I have remaining on a special order, I yield that to the distinguished minority whip for his use or for his yielding to any other Senator who may need such time.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR CRANSTON

The PRESIDING OFFICER. Under the previous order, the Senator from California [Mr. CRANSTON] is recognized for not to exceed 5 minutes, plus the 5 minutes that the minority leader had yielded to him.

HUMAN RIGHTS IN SRI LANKA

THE CASE OF RAMANUJAM MANIKKALINGAM

Mr. CRANSTON. Mr. President, Ramanujam Manikkalingam graduated last June from MIT with a bachelor's degree in physics. Because Ram was committed to using his scientific education in his homeland, Sri Lanka, he returned there last July.

On March 27, Ram Manikkalingam disappeared from his home in Colombo, Sri Lanka.

When he vanished from his house without his shoes or wallet, his family and friends feared the worst—that he has been taken into custody by the government. For weeks, the Sri Lankan security forces denied he was being detained.

After a month without word of his whereabouts, Sri Lankan officials finally admitted that Ram was taken into custody, allegedly on April 23. The authorities claim his arrest occurred on or about this same date, April 23, although Ram was last seen on March 27.

This is most significant, because Ram is alleged to have committed criminal acts on April 17, almost 3 weeks after his family believes he was taken by the security forces. When Ram's mother was finally allowed to see him on May 2, Ram confirmed that he had been in custody since March 28.

Although he has not yet been formally charged with any illegal activities, unconfirmed rumors report that he was arrested for a curfew violation. This type of treatment frequently occurs in Sri Lanka, according to numerous reports from human rights groups and individuals. Members of the Tamil minority in that country have suffered arbitrary arrests, arbitrary killings, torture, and long-term incommunicado detention for real or alleged separatist activities.

"Disappearances" were first reported in 1983, and particularly since 1984. Amnesty International has received an increasing number of reports that families of people reported to have been arrested by the security forces are unable to establish the detainees' whereabouts. In many cases, officials deny knowledge of the arrest or detention. Reports of these activities have sharply increased.

In its January 1986 report, the United Nations working group on enforced or involuntary disappearances stated that it had transmitted to the Sri Lankan Government 194 cases of enforced or involuntary disappearances.

Ram is, by all appearances, another such case. Ram was an active member of the ADP Fraternity—many of whose members have contacted my office in recent weeks to express their deep concern for Ram's welfare.

I have also received word from Ram's brother, Sudarshan, currently a student at Hampshire College, that Ram is scheduled to appear before a board this Friday, May 16, as a result of his mother's direct plea to the Sri Lankan Attorney General. This board has the power to release him.

Ram's many friends, relatives, and supporters in the United States are not trying to make a political issue out of his detention. They ask only that he be promptly charged and that, if he is not released, that he receive a fair and speedy trial.

I strongly urge Sri Lankan President Jayewardene and Attorney General Shiva Pasupathy to insure that Ram receives fair treatment on Friday and that if he is not released by the board tomorrow that he be formally charged and receive defense counsel.

If he is not released by the Minister of National Security on Friday, I urge President Jayewardene to see that Ram receives a prompt and fair trial, and receives full access to all necessary medical care in the interim.

□ 1020

RECOGNITION OF SENATOR COHEN

The PRESIDING OFFICER. Under the previous order, the Senator from Maine [Mr. COHEN] is recognized for not to exceed 5 minutes.

S. 2453—ENHANCEMENT OF CAPABILITIES TO COMBAT TERRORISM

Mr. COHEN. Mr. President, I rise today to introduce S. 2453, a bill to enhance the ability of the United States to combat terrorism and other forms of unconventional warfare.

A new form of warfare has emerged in recent years, a form of warfare that we have not properly understood, and that we have not effectively deterred. This war has not been openly declared, but is being waged across the globe. It takes the form of terrorist attacks and guerrilla insurgencies.

In both cases, the objectives and modes of operation are similar. Terrorists and guerrillas, both operating from sanctuaries, seek to attract media attention, to instill fear, to undermine the stability and prosperity of target governments, and in some cases to drive a wedge between the United States and its allies.

The dimensions of this problem are clear, as is the threat to U.S. interests. Currently, over 40 nations and 4 million people are engaged in some form of armed conflict. In our own hemisphere, there are nine active insurgencies, in addition to serious problems created by drug-traffickers and other armed subversive groups.

International terrorism has now reached epidemic proportions. In 1968, the year that statistics on terrorism

were first compiled, there were 20 fatalities worldwide attributed to terrorism. Last year, there were over 900 deaths resulting from terrorism. At the same time, guerrilla forces, often actively nurtured and supported by the Soviet Union and client states, continue to undermine stability in various parts of the world. While the threat to U.S. interests from a single insurgent movement or terrorist incident may be small, the cumulative impact of these assaults is potentially devastating.

This situation has highlighted a relatively new term in the lexicon of war: "Low-intensity conflict." Such conflicts—irregular battles and attacks perpetrated by irregular armies and individuals—are a lethal product of a world in which ideas and beliefs are pushed on the world's consciousness by grisly acts of violence.

Hence, while the United States must remain well-prepared to deter nuclear and conventional warfare, the day-to-day challenge for the foreseeable future seems destined to fall in that gray area between millenial peace and all-out war. This places a premium on our ability to conduct "special operations"—missions carried out through forces which must be specially trained and equipped to engage in this new type of conflict.

The task is difficult but by no means impossible. Israeli successes in special operations are legendary. The British, too, have had marked success in this area. They have defeated Communist insurgencies in Malaya and Oman. They stormed the Iranian Embassy in a counterterrorist operation in 1980, killing all of the terrorists involved without the loss of life to any of their military personnel or civilian hostages. The British also demonstrated the value of special forces during the Falkland Island campaign, destroying Argentinian aircraft on the runway at Pebble Beach, capturing the South Georgia Islands, and operating behind Argentinian lines, gathering intelligence and harassing and demoralizing the Argentinian defenders. Despite the intensity and duration of the Falkland Islands conflict, British special forces suffered only one loss to enemy fire.

The United States, by contrast, for all its resources, has suffered repeated setbacks. During the mission to rescue the U.S. merchant vessel *Mayaquez* from Cambodia, we lost more men than we saved. The Iranian hostage rescue mission ended in confusion and disaster. In the Granada operations, which pitted overwhelming U.S. forces against a tiny island nation, disturbing questions have been raised by the unexpected difficulty of our victory, including the failure of some of our special forces to achieve their objectives.

I do not believe that this record is attributable to persistant bad luck or an inadequate caliber of men in the armed services. In my view, we have not been effectively organized to fight the most likely battles of the present or the future.

U.S. special forces are scattered among the armed services, underfunded, and misunderstood. There are serious problems in the way we are organized to conduct the planning of special operations and provide the necessary personnel and equipment. The United States also lacks the necessary coordination among different Government organizations to implement a coherent strategy for combating unconventional warfare.

In short, we are not well organized for unconventional conflicts—and it shows.

The legislation I am introducing today will not solve all these ills. We must, however, go to the root of the problem and revamp the organization on which our special forces are built. We must also address problems in the coordination of our military, political, and economic efforts.

The bill would establish a joint military organization for special forces, create a structure within the National Security Council to coordinate planning for low-intensity conflict, and establish an office in the Defense Department, headed by a high-level official, to ensure that funding needs and policy considerations related to low-intensity warfare are factored into United States planning.

The need for greater integration of U.S. special forces is evident from historical experience. As retired Army Maj. Gen. John K. Singlaub noted about the ill-fated mission in Iran, "We tried to bring disparate units from all over the Armed Forces, from all over the world—and then put them into an ad hoc arrangement to do a very complicated plan." Under these circumstances it is not surprising that the mission failed. Six years later, we still do not have an adequate combined special forces capability.

In 1984, a Joint Special Operations Agency [JSOA] was created to provide greater coordination. However, it only "advises" the Joint Chiefs of Staff. As such, it does not have the authority necessary to function effectively. The Army has established the Joint Special Operations Command, but this is essentially a single-service operation which cannot achieve the effective integration of different service elements.

The chief Pentagon official responsible for special operations, Noel Koch, has continually emphasized the inadequacy of the current organizational structure. In a recent interview, Mr. Koch noted, "We need to create something that doesn't depend on the mercy of the existing services . . . something that makes special operations function jointly."

Given the politically sensitive nature of special operations, we need a clear and uncluttered chain of command and control from the highest level. We also need forces that integrate personnel from each branch of service and which, when possible, are deployed close to potential areas of operation.

This legislation addresses these needs through the establishment of an organization with elements from each of the military services—a "unified command" in military parlance—to conduct counterterrorist operations and prepare special operations units for deployment near potential operating areas. I believe that such a structure would greatly improve the efficiency and effectiveness of U.S. special forces in a number of ways:

PLANNING

In the attempt to rescue U.S. prisoners of war at Son Tay, North Vietnam, and in the Iranian rescue mission, our Military Establishment formed commissions to produce plans and achieve interservice coordination. After months of planning, both missions failed. With a unified command for special operations, we would have a self-contained multiservice organization that could perform similar missions more quickly and efficiently. The missions would be planned and carried out by personnel with special operations backgrounds and training. In short, a unified command would bring operations and planning together under one roof.

INTELLIGENCE SUPPORT

A unified command would help ensure the receipt of timely intelligence—a serious problem at present. It could also help to facilitate the flow of information in the opposite direction, since intelligence collection is one of the principal tasks of special forces.

MORALE

Special operations are regarded as a virtually dead-end career path. Only last month, the Army bypassed all of its special forces personnel and selected an armor officer to head the Joint Special Operations Agency. The message seems to be clear—if you want to get ahead, don't serve in special forces. It is my hope that a unified command for special forces will increase promotion opportunities for special forces personnel and the desirability of serving in this demanding career field.

The successes of the Israeli Army in special operations, such as the Entebbe raid, are well known. What is less well known is that there is not a single general in the Israeli Army that has not served in special forces.

In addition to problems of command and control, U.S. special forces suffer from inconsistent and often inadequate funding.

The average age of our special operations aircraft for transporting troops and equipment to crisis areas is in

excess of 20 years, and the status of these aircraft is further degraded by the extraordinary stresses they are subjected to, including low-altitude flying and landings on unimproved runways. In January of this year, the Armed Services Committee received testimony that 6 years after the failed Iranian hostage rescue mission, the United States still does not have the capability to perform a similar mission. In fiscal year 1985, despite the guidance of the Pentagon's civilian leadership, the Military Airlift Command placed special forces airlift 59th on its list of priorities.

Inadequate funding for special forces is not a problem unique to the Air Force. As one special forces officer stated last year in an article in Military Review, the professional journal of the Army:

> The U.S. Army still does not regard guerrilla warfare, insurgency and counterinsurgency as unique and is unwilling to devote resources to our most likely form of involvement. The state of preparedness for this role is at its lowest state in 20 years.

This bill should help remedy the funding problems which have hampered our special forces capability by establishing an Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict. As a member of the Defense Resources Board, the new Assistant Secretary would be able to give special operations forces the advocate they need in decisions affecting personnel and equipment.

In addition, under the provisions of the Defense Reorganization Act now before the Congress, the four-star general who commands the unified command for special forces would be reporting to a strengthened Chairman of the Joint Chiefs and his Vice Chairman, who would have greater responsibility for preparing the national strategy and budget.

These factors will not guarantee that special forces receive everything they want, but they will guarantee that special forces have their day in court.

The Vice President's Task Force on Combating Terrorism issued its report recently, calling for, among other things, a new National Security Council position to strengthen coordination of our national counterterrorism program. The legislation I am introducing today calls for the establishment of a Deputy Assistant to the President for National Security Affairs for Low-Intensity Conflict and a coordinating board for low-intensity conflict within the National Security Council. These initiatives, in my view, are necessary to ensure that counterterrorist and counterinsurgency operations are properly integrated into the overall framework of U.S. policy.

Mr. President, the Reagan administration deserves credit for its initiatives on special operations, including the recent increases in the number of troops, equipment, and dollars spent. Despite these efforts, however, serious problems remain.

As a member of the Senate Select Committee on Intelligence and the Senate Armed Services Committee, I have had ample opportunity to examine the threat to our country from unconventional warfare and our ability to respond to this threat. In my view, we are not adequately prepared to fight the most likely battles of the present or the future.

Simply increasing the funding that we devote to special operations and low-intensity conflict will not solve this problem. We must also take immediate steps to repair a flawed organizational structure that leaves special operations forces at the mercy of interservice rivalries and a military bureaucracy in which support for special operations runs counter to mainstream thought and careers. We also need to more effectively coordinate the efforts of the various civilian institutions which have roles to play in low-intensity conflict. I hope that my colleagues in Congress, the stewards of our national security in the administration, and the American people will support this effort.

Mr. President, I would like to say before yielding the floor to my colleague from Georgia that I have the privilege of serving on the Armed Services Committee and the Select Committee on Intelligence with the Senator from Georgia. I think we both share the view that this threat is increasing; that we are ill prepared to deal with it; that time has not been a factor in our favor; that we are no better prepared today than we were 6 years ago to carry out an Iranian rescue-type mission. Noel Koch, the man who has been assigned the responsibility for beefing up this capability, is reportedly prepared to resign. He made the statement not too long ago that our military bands are in a higher state of readiness than some of our special operations forces. That is not an exaggeration, and Mr. Koch would not make that statement without some basis in fact.

This may not be the most perfect form of legislation to accomplish our objective. We have just gone through a major reorganization of the entire Department of Defense. But no one is paying sufficient attention to this problem. And if it takes legislation—which may not be the best route to achieve it, since it should be done by the executive branch—I am prepared to push the legislation.

But it seems to me, Mr. President, that this problem is going to intensify, and we are going to have mounting casualties. And if we continue to experience confusion, and lack a coherent plan, then I think we will have abdicated our responsibility by our failure to take action.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2453

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONGRESSIONAL FINDINGS

The Congress finds—

(1) that the threat to the United States and its allies from unconventional warfare, including terrorism and insurgency, is increasing each year at an alarming rate;

(2) that although the United States must continue to maintain and improve its strategic and conventional forces in order to deter aggression and protect the security of both the United States and its allies, the use of force by the United States since the end of the Korean conflict has increasingly been in response to guerrilla insurgencies against allies of the United States and against terrorist attacks directed at the United States;

(3) that the use of armed force by the United States in the foreseeable future will most likely be in counterterrortist, counterinsurgency, and other unconventional operations;

(4) that the capabilities needed to respond to unconvential warfare are not those traditionally fostered by the Armed Forces of the United States;

(5) that the Department of Defense has placed an overwhelming emphasis on planning and preparation to fight a large scale war and, as a consequence, units assigned counterterrorist, counterinsurgency, and other special operations missions have not been adequately supported, particularly in airlift capability;

(6) that the Department of Defense has not given sufficient attention to the tactics, doctrines, and strategies associated with those combat missions most likely to be required of the Armed Forces of the United States in the future;

(7) that problems at command and control have repeatedly beset military forces of the United States engaged in counterterrorist and counterinsurgency operations and other low intensity conflicts;

(8) that such problems were evident during the Mayaguez incident, the Iranian hostage rescue mission, the Grenada operation, and the Beirut peacekeeping mission;

(9) that the establishment of a unified command for special operations would help to eliminate problems of command and control;

(10) that a unified command should be assigned responsibility for coordinating the planning of special operations and for the joint training of units whose principal missions involve counterterrorism, counterinsurgency, or other special operations;

(11) that a unified command should also exercise operational control over units whose principal missions involve special operations when such units are not assigned to other commands;

(12) that the establishment of a unified command for special operations will create promotional opportunities thereby removing a barrier which has deterred many officers in the past from pursuing careers in the field of special operations;

(13) that establishing a unified command for special operations will facilitate the exchange of information between special operations units and other commands and agencies of the United States;

(14) that a unified command for special operations will enhance civilian oversight of special operations and provide the Chairman of the Joint Chiefs of Staff and civilian authorities with a greater diversity of military advice and options;

(15) that the Secretary of Defense has placed increased emphasis on increasing the capabilities of the United States to respond to terrorism, insurgency, and other unconventional warfare threats, but while some progress has been made, the persistence of inadequate service support for units assigned counterterrorist, counterinsurgency, and related special operations missions further emphasizes the need for organizational reform;

(16) that the creation of an Assistant Secretary of Defense for Special Operations and Low Intensity Conflict and a unified command for special operations would greatly improve the effectiveness, funding levels, readiness, force structure, and command and control of special operations forces; and

(17) that greater coordination of policies with respect to unconventional warfare operations is greatly needed within the National Security Council.

SEC. 2. ESTABLISHMENT OF ASSISTANT SECRETARY OF DEFENSE FOR SPECIAL OPERATIONS AND LOW INTENSITY CONFLICT

Section 136(b) of title 10, United States Code, is amended by inserting at the end the following new paragraph:

"(7) One of the Assistant Secretaries shall be the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict. He shall have as his principal duty the overall supervision of special operations and low intensity conflict affairs of the Department of Defense.".

SEC. 3. REQUIREMENT FOR ESTABLISHING A UNIFIED COMMAND FOR SPECIAL OPERATIONS FORCES

Section 124(a) of title 10, United States Code, is amended—

(1) by striking out "and" at the end of clause (1);

(2) by striking out the period at the end of clause (2) and inserting in lieu thereof a semicolon and "and"; and

(3) by inserting after clause (2) the following new clause:

"(3) establish a unified command for special operations forces, unless the President determines such action is not in the national interest.".

SEC. 4. ESTABLISHMENT OF COORDINATING BOARD

Section 402 of the National Security Act of 1947 (50 U.S.C. 402) is amended by inserting at the end the following new subsection:

"(e) The Council shall establish within the Council a coordinating board to be known as the 'Board for Low Intensity Conflict'. The Board shall have as its principal duty the coordination of low intensity conflict policy for the United States.".

SEC. 5. SENSE OF THE CONGRESS REGARDING THE APPOINTMENT OF A DEPUTY ASSISTANT TO THE PRESIDENT FOR NATIONAL SECURITY AFFAIRS FOR LOW INTENSITY CONFLICT

It is the sense of the Congress that the President should establish within the Executive Office of the President the position of Deputy Assistant to the President for National Security Affairs for Low Intensity Conflict. It is further the sense of the Congress that the President should designate such Deputy Assistant as the chairman of the Board for Low Intensity Conflict established under section 402(e) of the National Security Act of 1947 (50 U.S.C. 402(e)), as added by section 4 of this Act.

Mr. COHEN. Mr. President, I yield the floor to my colleague, the Senator from Georgia.

Mr. NUNN. Mr. President, what time is remaining under the special order?

The PRESIDING OFFICER. The Senator from Maine has 2 minutes remaining.

Mr. NUNN. Mr. President, I rise to support the bill just introduced by Senator COHEN. I am pleased to be a cosponsor.

Mr. President, I will just take a very brief period of time. First, I wish to congratulate the Senator from Maine for putting his finger on a very serious problem. The question is often asked, Why is Congress micromanaging the operations of the Defense Department? The reason is because the executive branch is not managing it, and that is a regrettable statement of fact. Congress should be a board of directors. This legislation should not be necessary but, in fact, it is necessary because we have to get the attention of some people in the executive branch, particularly in the Department of Defense, and make them understand that the Congress of the United States knows that this problem is being neglected.

The Senator from Maine has done an outstanding job of bringing this to the attention of our body. We have just gone through a major reorganization bill. We delegated a broad amount of authority to the Secretary of Defense under that bill. There may be some details in this legislation that might contravene at least the philosophy of the reorganization bill, so we are going to have to proceed cautiously as we examine this legislation.

□ 1030

But the Senator from Maine is exactly correct in saying that we have a serious problem. We are not better equipped now than we were 6 years ago to carry out an Iranian hostage-type rescue mission, primarily in the transportation area. The Air Force has been, in my opinion, dragging its feet in terms of dealing with the problem of transportation of special operations forces. They are now beginning to do better at it. I am hopeful that this improvement will be something that is not just a short-term trend.

It is really regrettable that we cannot report to the American people that the situation is improved. But it has not. Last year I sponsored an amendment to deal with these problems, which was included in the authorization bill. This amendment was simple and direct. It requires the Secretary of Defense to certify that he is providing sufficient funds in the fiscal year 1987 5-year defense plan to meet his own guidance to the military departments so as to ensure that the special operation requirements of the war-fighting commanders in the field are met by 1991. We finally received that certification on April 1, 1986. It took a long time to get it because the fiscal year 1987 5-year defense plan submitted in February fails to meet the guidance of the Secretary of Defense. The problem here is not the Secretary of Defense's guidance. It is very clear the problem is that no one has carried out the guidance. The Secretary has not required it to be carried out. The services have not budgeted sufficient resources to meet the Secretary's guidance, and evidently the Secretary was not prepared to change the services' plans to see that it did.

That situation now appears to be changing somewhat. The Secretary has finally forced the services to comply with his own policy guidance in the 5-year defense plan. This is a positive step forward, and is long overdue.

On the negative side, however, I think we ought to note that the commitment to meet these requirements is still in the future because the certification calls for no changes in the pending budget request. In other words, all of the improvements that are going to be made in this particular area are going to be in the outyears, as we call it, after the fiscal year we are dealing with now. That will not take place until 1991.

I think it is a sad state of affairs when we have the kind of problem we had 6 years ago with transportation of special forces, and yet 6 years later, after spending billions and billions of dollars, we still cannot report to the American people that we are in better condition than we were then.

So I congratulate the Senator from Maine. I look forward to working with him on this in the Armed Services Committee. We are going to be in conference with the House on legislation in this overall area. I think it is important that he has taken this leadership step. I am proud to be a coauthor with him of this amendment.

Mr. President, Senator COHEN has accurately recounted the recent history of employment of our special operations forces and the problems we have experienced. Let me add some of my own thoughts.

In my view, the most likely use of force by the United States in the foreseeable future is by our special operations forces. The threat that we face from terrorism and other forms of low intensity conflict mean that we must be prepared to deter, and respond if necessary, with special operations forces. In some instances, we must be ready to respond in a matter of hours which puts an extreme premium on

operational readiness. In addition, democratic forces around the world are being challenged by insurgencies and we must have special operations forces that can assist in meeting that challenge.

Finally, our special operations forces must be prepared to play their vital role in a major war. Too frequently, Mr. President, we think of special operations forces only in their capacity to combat terrorism or to engage in counterinsurgency. We forget that they will perform extremely important missions to augment our conventional forces in a war. For example, special operations forces were the first American forces ashore in Grenada. In future such operations it is likely that they would perform a similar role.

Mr. President, this year the Committee on Armed Services held several hearings on the capabilities of our special operations forces. We learned about serious deficiencies in this area, both in terms of the readiness of those forces and the resource levels allocated to support them. We learned that our warfighting commanders in the field did not have the capabilities they needed. After one particularly alarming hearing Chairman GOLDWATER and I wrote to the Secretary of Defense.

Mr. President, I ask unanimous consent to have that letter printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit No. 1.)

Mr. NUNN. In that letter we stated:

> We are particularly concerned that six years after the tragedy at Desert One [the Iranian hostage rescue mission], we appear to have made few significant improvements in this essential capability.

This is a disgrace. After the massive commitment of defense resources over the past 5 years we are not as prepared as we should be to fight some of the most likely conflicts we face. Because many of the capabilities in this area are sensitive, I cannot go into the specific details of the very serious deficiencies.

The administration has maintained that revitalization of special operations forces is one of their most important policy objectives. On October 3, 1983, then Under Secretary of Defense Paul Thayer issued a memorandum directive to the military departments which outlined this key policy objective:

> U.S. national security requires the maintenance of Special Operations Forces (SOF) capable of conducting the full range of special operations on a worldwide basis, and the revitalization of those forces must be pursued as a matter of national urgency.

The memo went on to issue some specific policy directives. Two merit attention here.

> Necessary force structure expansion and enhancements in command and control, personnel policy, training, and equipment will be implemented as rapidly as possible and will be fully [emphasis in original] implemented not later than the end of Fiscal Year 1990.

And

> Each Service will assign SOF and related activities sufficient resource allocation priority and will establish appropriate intensive management mechanisms to ensure that these objectives are met.

Despite the clear and unequivocal direction, we know from our hearings and examination of the budgets that the services have not followed this guidance. The Secretary of Defense has failed to insist that the services follow his own guidance. And quite frankly, the stated goal of having the capability 10 years down the road isn't exactly what I call a high priority, especially considering the woeful lack of readiness in certain key assets that has existed in the past several years.

For these reasons, I sponsored an amendment to deal with these problems, which was included in last year's defense authorization bill. My amendment was simple and direct: it required the Secretary of Defense to certify that he has provided sufficient funds in the fiscal year 1987 5-year defense plan to meet his own guidance to the military departments so as to insure that the special operations requirements of the warfighting commanders in the field are met by 1991.

We finally received that certification on April 1, 1986. It took a long time to get it because the fiscal year 1987 5-year defense plan submitted in February fails to meet the Secretary's guidance, and evidently the Secretary was not prepared to change the service's plans to see that it did.

Fortunately, that situation has changed. The Secretary has finally forced the services to comply with his own policy guidance. The services have been directed to make major adjustments in their plans for special operations forces. This is a positive constructive step forward that is long overdue in my opinion. I do want to note, however, that the commitment to meet these requirements is still in the future, because the certification called for no changes in the pending budget request. All the increases are scheduled for future years and much of the capability still will not be in place in 1991. The challenge we now face is to insure that the services do not walk away from this latest directive.

The primary culprit in this sad story, unfortunately, is the Air Force, because the Air Force has the major procurement programs required to support the defense guidance. I state here that the Air Force, at least in the past, has failed to award priority to this key mission. The facts are compelling.

Special operations aircraft are among the oldest in the Air Force inventory. The average SOF aircraft is over 20 years old. This average will increase virtually year-for-year until the next decade.

The current readiness of the special operations aircraft is disappointing. The precise numbers are classified. But it is telling to note that by a very large margin, Air Force tactical fighter squadrons are consistently more combat ready than are special operations squadrons. These special operations squadrons are crucial to our counterterrorism capability and the low readiness state in this area is a shameful indictment of Air Force priorities.

During the past 4 years the Primary Special Operations Airlift Program has been the Combat Talon Program. The Combat Talon Aircraft is a modified C-130 transport, fitted with special systems designed to support long-range covert insertion and removal of special operations forces. During the past 4 years there have been eight program managers. The program has been repeatedly stretched out.

This is a very sad history of the Air Force's commitment to special operations forces. Let me say to my colleagues, that I chose the word "history" explicitly, because I believe the Air Force has come to realize the very serious nature of our requirement for special operations forces and has made recent changes to improve our capabilities.

I hope in coming months that we will start to see signs of improvement. Prior to March 1983, Air Force special operations elements were spread across several Air Force commands. This resulted in fragmented logistics support, a lack of long-range planning, no practical commonality between aircraft subsystems, and poor overall reliability and maintainability.

In March 1983, these elements were consolidated under the Military Airlift Command and efforts are underway to improve the situation. They established a new branch for special operations logistics at MAC headquarters. A large number of immediate quick fix programs have been or are being implemented. This is good news. But it is not enough.

MAC still consistently places other major new starts as a higher priority than its special operations forces and SOF modernization. Indeed, much of the SOF modernization plan remains unfunded in the Military Airlift Command's list of priorities.

Mr. President, at the core this represents a model case study of why we need to reorganize the Department of Defense. Senator COHEN recently wrote an excellent article in Armed Forces Journal International on the

state of our special operations forces. In that article he noted:

Special Operations Forces (SOF), as indicated by the U.S. experience during the Grenada and Iranian rescue missions, are one aspect of the defense establishment that is most assuredly broken and must be fixed.

It is evident that the ills which beset SOF are in part a microcosm of the ills that occasioned the overall Senate Armed Services committee staff report on defense organization. [T]he United States still lacks joint military institutions capable of effectively integrating the forces of the different Services in combined operations.

The services do not give very high priority to special operations forces because they do not consider them major missions and do not require massive resources. The service's are more interested in preparing to fight the next world war, not the current ongoing war against state sponsored terrorism. And despite the fact that the administration has placed special operations forces as one of the Nation's highest priorities, it has failed to insist that the service's follow that national guidance.

Because these are the forces we are most likely to employ in the near term, how they perform will have an impact on our national security far beyond the scope of any operation. Our entire Armed Forces—and hence our military capacity—will be judged on whether these forces succeed or fail. If they succeed, the perception of American forces as strong and highly competent will be reinforced. If they fail, the world will conclude—wrongly, in my view—that the United States is a big bungling giant that cannot conduct effective military operations. We cannot afford to leave the world with this perception and unless we improve our current abilities we run this risk.

After the Vietnam war, funding and support for special operations dropped dramatically. Units deteriorated, equipment was not replaced, officers were not promoted and morale sank to rock bottom. In the late 1970's, that began to change. The growing threat of terrorism began to shake us out of our lethargy. The tragic failure of special operations forces at Desert I in the Iranian hostage rescue mission was the most dramatic evidence of the serious shortcoming of our special operations forces.

In the wake of the failure of the Iranian rescue mission, first President Carter and then President Reagan, began to put increased emphasis on the reinvigoration of our special operations forces. The Joint Special Operations Agency was created in the office of the Joint Chiefs of Staff, and the Joint Special Operations Command was created at Fort Bragg. A number of memoranda and directions were written, and more money was provided.

However, this is not enough. We discovered in the operation in Grenada that the integration of special operations forces into combat operations conducted by regular units was not as smooth as it should be. We know from other examples that the command and control over these forces is not adequate. We know that readiness levels of key units has been spotty at best. Confusion often reigns, particularly in their relationship to the unified commanders in the field.

Senator COHEN has explained the purposes of this bill and I will not repeat them. However, let me say that I believe that the President should consider creation of a unified command for special operations forces. That is probably the most important step that he can take, particularly because the DOD reorganization bill recently passed by the Senate, gives increased authority to unified commanders.

I also support the other provisions in Senator COHEN's bill; namely, the creation of a senior official on the NSC staff, a coordinating body within the National Security Council, and the designation of an Assistant Secretary of Defense, all with responsibility for special operations and low intensity conflict. We do not need to create an additional Assistant Secretary of Defense position because the reorganization bill we just adopted provides for several Assistant Secretaries of Defense, but does not specify their titles in law. Thus, the Secretary of Defense has flexibility to designate one of those Assistant Secretary of Defense positions as the Assistant Secretary for Special Operations and Low Intensity Conflict.

I have some reservations about the wisdom of placing these, all of these requirements in law. As Members of the Senate know, the DOD reorganization bill recently enacted by the Senate seeks to give the President and the Secretary of Defense as much flexibility as possible in organizing the Department of Defense. In addition, we were very aware of the President's constitutional responsibilities as Commander in Chief. Therefore, the reorganization bill does not specify any unified or specified commands in law. Moreover, it does not specify any Assistant Secretaries of Defense except one, the Assistant Secretary for Reserve Affairs.

Notwithstanding these concerns, Mr. President, I continue to believe that Senator COHEN's bill deserves serious consideration by the Armed Services Committee. I believe the administration should move in the direction suggested by Senator COHEN's bill and that it should be the focus for debate on these important issues, both in the Congress and in the public.

[EXHIBIT No. 1]

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC, January 29, 1986.

Hon. CASPAR WEINBERGER,
Secretary of Defense,
Washington, DC.

DEAR CAP: The condition of our Special Operations airlift assets continues to be a matter of considerable interest to our Committee. We are particularly concerned that six years after the tragedy at Desert One, we appear to have made few significant improvements in this essential capability.

It is discouraging to note that today we have exactly the same number of MC-130 Combat Talon aircraft (14) and AC-130 A/H gunships (10/10) as we had at the time of Desert One, and two fewer HH-53 Pave Low helicopters than we had in May, 1980 (7 today, compared with 9 in 1980).

The apparent failure of the Department of Defense to overcome existing shortfalls in a timely fashion raises serious questions regarding the Department's ability to establish priorities.

Section 152 of the Fiscal Year 1986 Defense Authorization act was passed in an effort to assist the Congress in performing our oversight responsibilities in this area. As you know, that provision requires the submission to Congress of a plan for meeting both the immediate and near-term airlift requirements for the Joint Special Operations Command (JSOC) and special operations forces of the Unified Commander-in-Chief. Section 152 also requires a certification that the funds needed to meet these airlift requirements are included in the Fiscal Year 1987 Five Year Defense Plan.

This airlift plan will be a critical element in our deliberations on the Fiscal Year 1987 Defense Authorization bill. We request that you take whatever steps are necessary to ensure its timely delivery.

With best wishes,

BARRY GOLDWATER,
Chairman.

SAM NUNN,
Ranking Minority Member.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 5 minutes.

WHY SECRETARY HICKS SHOULD BE FIRED

Mr. PROXMIRE. Mr. President, the biggest military and fiscal decision the Congress must make in the next few years is whether or not to proceed with the strategic defense initiative or star wars. This decision will hinge primarily on its technological feasibility. If it is realistic to expect American scientists to design a system that will largely protect this country from a Soviet nuclear attack, the Congress will proceed. If not, we will not. The central question is, How do the great majority of Members of the Congress who are not physicists and who have almost no scientific training or experience make this decision in which technology is crucial? Answer: We rely

heavily on the judgment of scientists who can speak their minds objectively and honestly. Our decision will be no better than the truth of the scientific advice we get.

Will Congress be able to rely on the scientific community to give us this truth? An article that appeared in the Washington Post by Fred Hiatt reports that it is going to be very hard for us as we make that decision to get the truth we must have.

Donald Hicks is the Under Secretary of Defense for Research and Engineering. Secretary Hicks has the central role in determining precisely who gets the billions of dollars in research money expended each year by the Department of Defense. For the coming year, that will total the astonishing sum of $44.4 billion. In fact, Secretary Hicks' defense research and development represents a mammoth one-third of all the research and development spending in the United States, public and private, for all purposes. No one speaks with anything even close to the force and power that Mr. Hicks can summon when he speaks to the American scientific community.

So, what has Mr. Hicks told the scientific community loudly and publicly? He has bluntly said that those who oppose the Reagan administration's military policies should not receive Federal grants for basic research from the Defense Department. Here is what Secretary of Defense for Research Hicks told Science magazine, and I quote directly:

> If they want to get out and use their roles as professors to make statements, that's fine, it's a free country. But freedom works both ways. They're free to keep their mouths shut * * * I'm also free not to give the money.

And, during Secretary Hicks' confirmation hearing last July, he told the Armed Services Committee he is "not particularly interested" in giving basic research funds to scientists who are "outspoken" critics of SDI or star wars.

Mr. President, what this means is, if a university or a corporation is employing a professor who speaks his mind and speaks out on star wars, that is it. There goes the contract. There goes $1 or $10 billion. Obviously, an awful lot of professors are going to be intimidated by this kind of treatment.

Mr. President, in this Senator's judgment Secretary Hicks should be fired forthwith. And I mean today. He should be fired for two reasons: First, Secretary Hicks is announcing that the billions of dollars in military research will not be awarded on the basis of merit or quality. Research contracts will be awarded on the basis of support for this administration's military position. This means that the quality of research—not simply in the star wars program but in all military programs will be less. It means that independent minded scientists who speak their minds freely on any military program can forget about contributing their genius to our national defense in any capacity at all.

Mr. President, one of the reasons why American technology leads Soviet technology in so many respects is because our scientists have been free to speak their minds whether they are right or wrong. Out of the debate and clash of expert opinion has come scientific advances including military advances far superior to the Soviet technology which is the product of Soviet scientists who keep their mouth shut when they disagree or lose their jobs.

Second, the Hicks policy is designed to shut the Congress and the American public out of an understanding of the objective, unbiased opinion of our best scientists. This policy will seriously handicap this Congress today. But that's only the beginning. As time goes on, it will get worse, much worse. Here's why: The administration is proposing an immense increase in research on star wars. Over the next few years this program alone is likely to absorb $25 billion and perhaps twice that much in research money alone. Money talks; $25 billion will shout. We can't do much about that. What we can and must do is to make sure that money does not, to use Secretary Hicks' words, shut up American scientists and keep them from giving both the Congress and the American public their expert views. Many Members of the Congress have feared that once the star wars program got under way the momentum of its huge spending would carry all before it, sweeping scientists and Members of the Congress along as they seek some of the billions of dollars for their State or their university or corporation. But Secretary Hicks has added a new and more menacing dimension. The money Congress appropriates for military research will not just talk in the usual way. It will be much worse. It will slap a "Do Not Open" gag over the mouths of those American scientists whose honest judgment Congress has a right and a duty to know.

Mr. President, I ask unanimous consent that the article to which I referred in the Washington Post be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 13, 1986]

OFFICIAL SEEKS LIKE MINDS IN "STAR WARS"

(By Fred Hiatt)

The Defense Department's research director has angered and worried some of the nation's top scientists by stating that researchers who oppose Reagan administration policies should not receive federal grants for basic research.

"If they want to get out and use their roles as professors to make statements, that's fine, it's a free county," Donald A. Hicks, under-secretary of defense for research and engineering, told Science magazine in a recent interview. But "freedom works both ways. They're free to keep their mouths shut. . . . I'm also free not to give the money."

Hicks' comments to Science echoed a position he presented to the Senate Armed Services Committee during his confirmation hearing in July. At that time, Hicks said he is "not particularly interested" in giving basic research funds to scientists who are "outspoken" critics of the administration's Strategic Defense Initiative (SDI), the controversial "Star Wars" program aimed at finding a defense against nuclear missiles.

Sidney Drell, a Stanford University physicist who is president of the American Physical Society, said basic science grants should be awarded on the basis of quality, not political views.

"I must say I was dismayed and I found it chilling to find the suggestion that political loyalty to Defense Department programs would be used as a criterion for support of basic research by the Department of Defense," Drell said. "After all, they control something above 72 percent of the federally supported research and development work in this country."

Philip Anderson, a Nobel Prize-winning physicist at Princeton University who is leading a scientists' campaign to shun SDI-related research, said he was "incredulous" at Hicks' statement.

"It's a form of thought control that is so far from what has ever been done in the research-granting area that it's hard to believe."

John M. Deutch, provost of the Massachusetts Institute of Technology and frequent contributor to Pentagon advisory panels, said he had a "very strong reaction" to Hicks' comments. Deutch said he has known and respected Hicks for many years, when Hicks was a Northrop Corp. executive.

"I do not understand the report in Science," Deutch said. "My expectation is that he will be a steward of federal funds without regard to the personal political views of any principal investigators."

In his interview with Science, Hicks said he "probably would not stand in the way" of awarding a grant to a critic whose work was vital to the Defense Department.

"I'm just saying that for someone who is not vital, who is showing that he is not really a supporter, I don't see why I should make his life easier," Hicks said. "He's made ours tougher".

Asked for comment yesterday, Hicks said through a spokesman that he was quoted accurately in Science, but that his statements represented a "hypothetical opinion" and not policy. Science reporter R. Jeffrey Smith said, however, that Hicks did not call his opinions "hypothetical" during their conversation and that in a more recent interview Hicks restated the view.

Robert L. Park, a University of Maryland physicist and spokesman for the physical society, said it is "ironic" that Hicks' comments were published April 25, the day of the Chernobyl nuclear power plant accident in the Soviet Union, which Parks called "a frightening reminder of the risks of suppressing expert debate over government policy."

THE MYTH OF THE DAY: IMMIGRATION TO AMERICA IS AT AN ALL-TIME HIGH

Mr. PROXMIRE. Mr. President, the myth of the day is that immigration to America is at an all-time high.

As you can see from this chart, there has been a significant increase in the last decade in the number of immigrants coming to our shores. Much of this increase is represented by the political asylum we have granted to refugees in that period as well as an increase in the number of legal immigrants. But the whopping increase we have faced in the number of illegal entrants to this country, sneaking across our borders, has been legitimate reason for concern.

But it is important to keep this recent increase in historical perspective and that is just what Courtenay Slater, a former senior economist with the Joint Economic Committee and now president of CEC Associates, has done in an article in the March issue of American Demographics magazine.

Instead of focusing on the last decade of this chart, Dr. Slater asks us to look at the entire period since 1920. While foreign-born residents comprise 7.5 percent of our population today that is far below the 8.8 percent they represented in 1940 or the 13 percent they represented in 1920.

While there is no question that we need to address the policy issues raised by the unprecedented rise in illegal immigration to this country, we need to take a hard, sober look at the available data before responding to the often emotional nature of this debate. Dr. Slater has examined the impact of immigration, both legal and illegal, on job opportunities in areas such as Los Angeles and has provided an important perspective to this debate.

I ask unanimous consent that her article be reprinted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DON'T KNOCK IMMIGRATION

The rise in the number of immigrants coming to the United States in recent years, especially illegal immigrants, is widely viewed as a national problem. But immigrants make up a smaller share of the population today than they did in 1940. The foreign born are about 7.5 percent of U.S. residents today, compared to 8.8 percent in 1940 and over 11 percent in 1930.

The proportion of the population born in another country reached its low around 1970, when only 4.7 percent of Americans were foreign born. The increase since then reflects the recent wave of new immigration—both legal and illegal. Although the total proportion of foreign born is well within the range of past experience, new immigrants' proportion of all foreign born is higher than it has been since early this century.

The new immigrants come primarily from Asia and Latin America, a marked shift from earlier periods when the majority of immigrants came from Europe. Of the 14 million residents identified as foreign born in the 1980 census, 5.4 million had entered the United States before 1960. Europeans accounted for well over half these long-time residents, while Asians made up only 6 percent, Mexicans 8 percent, and other Latin Americans just 5 percent. Among those who came to the U.S. between 1975 and 1980, however, Asians accounted for more than one-third, Mexicans for over 20 percent, and other Latin Americans for about 17 percent, while Europeans made up only 12 percent.

Though recent immigrants are from different parts of the world than earlier ones, they came to the United States for the same reasons as immigrants in the past—for economic and political freedom. Within the United States, they live where they think jobs are available and where others from their homeland are living. This results in geographic concentrations of immigrants. Of 2.2 million Mexican-born individuals counted in the 1980 census, 1.3 million were living in California, 498,000 in Texas, and 168,000 in Illinois. Sixty percent of Cubans were living in Florida, 78 percent of Dominicans and 54 percent of Jamaicans in New York State. One-third of Asian immigrants were living in California.

THE ILLEGALS

The Census Bureau estimates that slightly over 2 million illegals were counted by the 1980 census—one-half of whom were from Mexico. The results of several recent studies suggest that about 1 million illegals were not counted by the 1980 census, mostly recent arrivals, with over one-half of them from Mexico.

Illegal immigrants live in the same places as legal immigrants. About three-quarters of the illegals counted in the 1980 census were in 12 metropolitan areas and one nonmetropolitan area: Los Angeles-Long Beach, Anaheim-Santa Ana-Garden Grove, San Francisco-Oakland, San Diego, Riverside-San Bernadino-Ontario, and San Jose, California; Houston, Dallas-Fort Worth, and nonmetropolitan Texas; New York City, Chicago, Washington, D.C., and Miami.

Notably absent from this list are the Texas border cities, which do not have large numbers of permanent illegal residents. They do have large numbers who cross the border every day—legally and illegally—to work in the U.S.

Except for Chicago, all the areas with large illegal populations are found on the East and West Coasts and along the southern border of the United States. Elsewhere in the country, there are few areas with large numbers of illegals.

Most illegals are recent immigrants. Among all the foreign born counted by the 1980 Census, 60 percent had lived here ten years or more. Among illegals, only about one-fourth had been here that long and nearly one-half had been here less than five years. This high proportion of recent entrants among illegals reflects not only the increased numbers of illegals coming to the U.S. in the 1970s, but also the fact that many who came here years ago have since returned to their home countries.

Since 1980, the number of illegal residents has been growing by an estimated 100,000 to 300,000 a year, according to Census Bureau studies. If there were 3 million illegals living here in 1980 (2 million counted in the census and 1 million missed), the net increase since then would bring the total number of illegals in the U.S. today to between 3.5 and 4.5 million. While the exact number is uncertain, there is enough evidence from recent studies to say with confidence that the estimate of 3 to 5 million is closer to the true number than are the much larger numbers that often have been cited in the past.

Even at 3 to 5 million, the illegal population is large. But not that large in comparison to the 18 million foreign born in this country (including the illegals), or in comparison to the total U.S. population of 240 million. Since the foreign-born population, and especially the illegal population, is highly concentrated in a few metropolitan areas, the national problems created by the new immigrants may not be as staggering as is often alleged.

ECONOMIC IMPACT

One reason for the widespread concern over immigration is the belief that immigrants take jobs away from American workers. Immigrants, especially the illegals, are prepared to work hard for low wages. Employers thus find immigrant labor attractive, often preferring immigrants to native-born workers.

On the other hand, the availability of lower-cost labor may draw new industry to an area, creating jobs. In addition, immigrants are consumers as well as workers, and growing consumer markets means more jobs.

But do immigrants create more jobs than they take from native-born workers? While no definitive answer is available, recent studies by the Urban Institute suggest that immigration's impact is more positive than negative.

Among all the metropolitan areas in the nation, Los Angeles has the highest proportion of recent immigrants. Mexicans are the largest single group of foreign born in Los Angeles. There were 700,000 Mexican immigrants counted in the 1980 census in Los Angeles County, of whom 456,000, or 65 percent, had arrived since 1970. The average educational level of these recent Mexican immigrants is low; only 22 percent of those aged 25 and over had completed high school. Their knowledge of English is limited, with about two-thirds of adults speaking English poorly or not at all. If an influx of low-skill, low-wage immigrant workers displaces native-born workers, then the flow of Mexicans into Los Angeles must have cut into domestic employment, raising unemployment rates.

Yet the Urban Institute's researchers found "no evidence of an immigration-induced increase in unemployment in the Los Angeles metropolitan area." While the national unemployment rate was rising from 4.9 percent in 1970 to 7.1 percent in 1980, unemployment rates in Los Angeles fell. Labor force participation rates in Los Angeles exceed the national average, and black workers in Los Angeles upgraded their occupational status between 1970 and 1980.

Underlying the progress was an employment increase of 645,000 jobs, including a 113,000—or 14 percent—increase in manufacturing jobs. This compares with only a 5 percent growth in manufacturing employment nationally. Immigration did not prevent, and may well have spurred, employment growth in Los Angeles during the 1970s.

Urban Institute researchers also examined the relationship of Hispanic immigration to black unemployment rates in 247 metropolitan areas across the country. They found no evidence linking increased unemployment of native-born black workers to immigration.

What the researchers found, however, was that the flow of immigrants into Los Ange-

les occurred simultaneously with a reduced flow of low-wage workers to Los Angeles from other parts of the United States. The researchers do not know whether this was because immigrants were taking the low-wage jobs, or because Americans became less interested in moving to Los Angeles for some other reason.

The jury is still out on whether immigration reduces the national pool of job opportunities for low-wage workers. But because there is no evidence that recent Hispanic immigration has systematically led to black unemployment, and because the metropolitan area with the most immigration showed stronger than average employment growth and falling unemployment rates, the argument that immigration takes jobs away from native-born workers begins to look weak.

Some areas of the United States are characterized today by distressingly high unemployment, but other places have labor shortages—especially of less-skilled, low-wage labor. American companies continue to relocate manufacturing plants in countries where labor costs are lower. Perhaps it is time to stop seeing immigration only as a problem and to start asking how immigrants can help to meet our nation's need for workers.

RECOGNITION OF SENATOR PRESSLER

The PRESIDING OFFICER. Under a previous order, the Senator from South Dakota [Mr. PRESSLER], is recognized for not to exceed 5 minutes.

REPORT ON U.S. RELATIONS WITH THE SMALLER STATES OF EUROPE

Mr. PRESSLER. Mr. President, several months ago I initiated a study of the smaller states of Europe in my capacity as chairman of the European Affairs Subcommittee of the Senate Committee on Foreign Relations. The focus of this investigation was the U.S. relationship with these small states. I became interested in this issue over a year ago, when in January 1985 I visited two small states in South Asia: Bhutan and Nepal. At that time, I became concerned that these states were not receiving adequate attention in United States diplomatic relations, largely due to their small size and the presence of India as the major regional power.

□ 1040

I was also impressed by the 1984 report of our distinguished colleague, Senator PELL of Rhode Island, on the struggle of the small state of Sikkim to retain its cultural and political identity in the face of Indian power.

On the premise that many small European states could be important actors in European and international affairs, I decided to examine United States relations with the Principality of Andorra, the Republic of Cyprus, the Principality of Liechtenstein, the Grand Duchy of Luxembourg, the Republic of Malta, the Principality of Monaco, the Republic of San Marino, and the State of the Vatican City. Although Cyprus is larger, it was included in the analysis.

I wrote to the leadership of these states, and asked them each to respond to the following questions:

First. How would you characterize or evaluate the quality of your relations with the United States? Are there problems of which we should be aware?

Second. Would you please identify any areas in which you believe improvements would be desirable in these relations?

Third. Concerning treaties with the United States, do you have specific concerns, problems, or desires for possible changes?

Fourth. Would you be able to offer advice or recommendations on the enhancement of your relationship with the United States?

To date, I have received responses from His Royal Highness Prince Hans-Adam, the Hereditary Prince of Liechtenstein, and from Mr. Hans Brunhart, the Head of Government of Liechtenstein. His Royal Highness Prince Rainier has also responded, as has Mr. Giordano Bruno Reffi, the Secretary of State of San Marino. Prime Minister Karmenu Mifsud Bonnici of Malta sent his Executive Secretary to Washington, Mr. Maurice Abela, to discuss the Maltese response. I also personally visited San Marino in April to attend the ceremony observing the change of the two Captains Regent and to discuss United States relations with the San Marino Government. I also visited Monaco on that same trip, and personally discussed many issues with Prince Rainier. Mr. Spyros Kyprianou, the President of the Republic of Cyprus, also responded in writing.

Mr. President, I would like to briefly share the results of these communications. Hans-Adam, Hereditary Prince of Liechtenstein, responded in an extremely throughtful fashion. He indicated that Liechtenstein's relations with the United States are excellent, and that any small problems that have occurred in the past have been "quickly solved in a very informal way." Indeed, Prince Hans-Adam indicated that "considering the excellent relations between the two countries, we have difficulties in identifying any area where these relations could be further improved." He did suggest, however, that there is room for private initiative, and mentioned that Liechtenstein had arranged for the largest art exhibition ever to leave his nation. It was open to the public at the Metropolitan Museum in New York from October 1985 through the end of April 1986.

Prince Hans-Adam did make one request: an appeal for United States support should Liechtenstein decide to apply for membership in the United Nations. The Prince believes that Liechtenstein could support U.N. initiatives in favor of human rights, democracy, and free trade.

Liechtenstein's head of government, Hans Brunhart, concurred with the Prince's response. He emphasized that Liechtenstein's engagement in foreign policy is primarily concentrated on multilateral cooperation in Europe. Liechtenstein has a special interest in the Conference on Security and Cooperation in Europe [CSCE] and its followup conferences, where the United States and Liechtenstein have the opportunity to work together on human rights and other important issues.

During my conversations with Prince Rainier of Monaco, I found that he has strong views regarding the issue of small states and their relations with the United States. Prince Rainier emphasized that Monaco and the United States have longstanding ties of family, friendship, and commerce dating back to 1874. He indicated that Monaco's reputation as a "true friend of the United States can never be questioned," and that it has "cooperated intimately" with the United States, "especially when crucial votes are involved in an international meeting." Prince Rainer stated, however, that:

> Although I have been more than pleased to fully cooperate whenever a request for assistance is received from the Government of the United States, I am presently most concerned and disappointed to learn that the United States will no longer be represented in the Principality from Nice.

The Prince argued that the closing of the United States consulate at Nice would be a "false economy" that would inconvenience the 500 Americans who live in Nice as well as the 150,000 Americans who visit the Cote d'Azur annually. Prince Rainier indicated that as a Chief of State himself, he understands the need to conserve resources, but that he hopes that the United States is not "sending a signal of lessening of interests in this area of the world."

I also met with San Marino's Secretary of State for Foreign and Political Affairs, Hon. Giordano Bruno Reffi. Mr. Reffi wrote that relations between the United States and San Marino are long standing and very friendly. Mr. Reffi also argued that the smaller states of Europe are in a position—

> To offer a solid moral and idealistic contribution in the biggest of battles undertaken by the United States on the international scene.

Precisely because the very existence of small, neutral nations must be based on the ideal of peace, Mr. Reffi believes that these states must be sincere upholders of human rights and liberty. As a consequence, he feels that:

The larger nations might do well to call for the cooperation of the smaller at the international level, in pursuing those longed-for aims of establishing and maintaining peace, and creating internal regimes that fully respect the liberty and the rights of the individual.

Mr. Reffi cites the "long, useful, and fruitful activity" of smaller neutral and nonaligned states in the Conference on Security and Cooperation in Europe as indicative of the effectiveness of smaller European states in "playing mediative and conciliatory roles between opposing factions, both encouraging and creating the opportunity for dialog." It is in this context that San Marino is evaluating the possibility of joining the United Nations, and hopes for United States support.

Mr. Spyros Kyprianou, the President of the Republic of Cyprus, stated that United States-Cypriot relations are on a "very satisfactory level," with "common values of democracy, respect for human rights, a free enterprise system, freedom of the press, and independence of the judiciary * * *." Mr. Kyprianou also indicated his government's deep appreciation of United States aid to Cyprus. However, he also stated that the Turkish invasion took place with United States arms, and that the United States remains in a positive position to play "a decisive role in remedying the injustice done to Cyprus as a result of the 1974 illegal Turkish invasion * * *"

Mr. Karmenu Mifsud Bonnici, Prime Minister of Malta, sent his personal representative, Mr. Maurice Abela, to meet with me in Washington. We had a very fruitful discussion of Malta's role in the Mediterranean, its aspirations for greater involvement in European consultative bodies, and its desire to work for peace in the Mediterranean.

Mr. Chairman, now that I have briefly summarized the official responses from some of the European states that I contacted, I would like to report the results of my investigation of the role of small states.

WHAT IS A SMALL STATE?

For more than 30 years, analysts have wondered how the dozens of small states that have become independent since World War II affect the international system. Unfortunately, the effects of these states are sometimes easier to assess than their nature. In 1968, noted British historian Hedley Bull wondered "whether, however viable the small state might be in international politics, it really presents a viable subject of study."

It appears that "the" small state is as meaningless a category as "the" international system, which varies with time, its members, the type of threat, and differing power alignments. Thus, for the purposes of this analysis, I have focused on states with a population of less than 1 million, and with an area of less than 1,000 square miles—the larger area of Cyprus and Luxembourg are the only exceptions.

I found that the smallest states of Europe are atypical in comparison with the dozens of small states in Africa or Central America, or even those in Europe. For example, the smallest states of Europe can be contrasted with Holland or Denmark, which are definitely small, but which have more influence in determining international economic and political issues, and sometimes even military issues, such as the recent deployment of United States intermediate range missiles. Outside of Europe, high-visibility, high-leverage small states such as Israel, Taiwan, and Hong Kong exert great military, economic, and or diplomatic effects far beyond their size and indigenous capabilities. The smallest states of Europe do not have that sort of impact.

Nevertheless, life in these smallest states offers major compensations for a lack of major world political impact. Andorra, for example, has no prisons, no taxes, and has never gone to war. Liechtenstein has no army, and has no unemployed. Luxembourg's over 100 foreign banks have turned the capital, a medieval fortress, into a global financial center, and there have been no strikes since 1942, during the German occupation. San Marino is the world's smallest and oldest independent republic; it had its own constitution by the 10th century. Monaco's land mass is less than 2 square miles, yet it has a global tourist reputation and is one of the safest places on Earth. The Vatican City possesses only one citizen for life, the Pope; no one owns property there except the Pope, and no one pays taxes. In Malta, life expectancy is 73 years, and the largest employer is the nonpolluting firm of Wrangler Blue Jeans. These attributes sketch out the unusual nature of the smallest states of Europe.

The smallest states of Europe do not exhibit many of the characteristics of small states studied in the academic literature. For example, the international system is now sufficiently different from the pre-World War II period that the small states of Europe are no longer weak states at the mercy of great powers. Before and between the two World Wars, small European states pursued an illusory search for neutrality guarantees that were wiped out by German invasions and the policy of appeasement. Indeed, Luxembourg's foreign policy from 1867, when the Treaty of London was imposed upon it to end an alarming test of strength between Napoleon III and Bismarck, to 1945 was so oriented toward neutrality that the principle was institutionalized in its 1868 constitution.

HOW DO THESE SMALL STATES AFFECT THE INTERNATIONAL SYSTEM?

These states no longer are viewed as the "shoals" of the international system that might draw the unwary great power into a power vacuum born of their weakness and their inability to settle their differences. As noted above in the statements by leaders of these small states, their relations with the United States are excellent, but hardly intertwined. The main foreign policy focus of these smallest European states is their immediate region, and not international affairs in general. Indeed, these small European states are almost all pacific, on good terms with their neighbors, and some are only now beginning to consider joining the United Nations.

This is not to say, of course, that they cannot make important contributions to the international system. The vast changes of the past 50 years in war, technology, communications, industry, agriculture, population, mass education, and international organization have inevitably altered the means of political conflict and cooperation. The great political philosopher Raymond Aron has said that in contrast to 1919, the entire world now takes part in international politics, although the two superpowers have risen like Popocatepetl and Ixtaccihuatl above their surroundings. In this vastly altered setting, the smallest states of Europe have a worthwhile role to play.

The smallest states of Europe offer three types of international contributions that could set the tone for small states elsewhere in the world: Active involvement in international consultative bodies and human rights issues, and participation in cooperative defense arrangements. Despite its size, at least one state has enormous clout. The Vatican's unique status as leader to nearly a billion of the world's faithful offers it unusual opportunities for mediation and reconciliation, involvement with which even the most abusive totalitarian states must reckon.

The other states are also actively invovled, although on a smaller scale. For example, San Marino takes an active interest in CSCE and a variety of human rights issues, and the Principality of Monaco belongs to 12 international bodies, including Intelsat, the International Hydrographic Union, and UNESCO. Luxembourg, the second largest of these small states, abrogated the wavering and uncertainty of its 80-year old neutral status and approved the United Nations Charter without reservations. Similarly, it played an important role in developing a system of security based on mutual assistance, first through accession to the Brussels Treaty of 1948 and then the North Atlantic Treaty [NATO] the following year.

The rapid growth of international organizations has given even the smallest states both life and a voice on international affairs. Indeed, the new small states are close to a majority in the United Nations and each enjoys the rule of one nation-one vote (although there is weighted voting in the Security Council and some specialized agencies). Small states make up an important part of other key bodies, such as the Eighteen Nation Disarmament Committee that urges the smaller states to sign the Non-Proliferation Treaty. Half of the members of the European Economic Community, the largest economic bloc in the world, are clearly small, as are most of the European Free Trade Association members.

SUMMARY CONCLUSIONS

If the contributions of small states in general were as constructive as those of the smallest states on the European continent have been, then their net contribution to international politics would be substantial. Unfortunately, most small states often tend not to emulate their sister states in Europe, with their emphasis on pacific settlement, mutual security enhancement and defense, human rights, consultation, mediation, and diplomacy.

It is only through the vigorous pursuit of these qualities that the small states of Europe can safeguard their future. For if the past is any lesson, periods of impending war and war itself wreak havoc with small states. For ruthless larger powers, vulnerable small states standing alone have always seemed easier to defeat than woo. In this century, small states in Europe have been illegally seized by the Soviets, such as the three independent Balkan states; others like Poland and Yugoslavia saw 6 percent and 11 percent, respectively, of their populations killed in World War I alone. Others lost important territory and exchanged masters, but not the status of satellite, such as the Eastern European states.

The strength of an approach oriented toward pacific settlement, mutual security, and human rights has been an effective one for the smallest states of Europe. While there have been over 200 outbreaks of violence in the world since the end of World War II, largely a result of the proliferation of small states, and while there have been two major military invasions, the imposition of martial law, and great suffering behind the Iron Curtain, there has been no armed conflict on the Western European continent since World War II. Of course, the continuing division of the island of Cyprus remains unresolved while Turkish troops garrison the northern section of the republic. With the serious exception of Cyprus, it is in this relatively calm and prosperous environment that I hope our friends, the smallest states of Europe, will continue to thrive.

RECOGNITION OF SENATOR GORE

The PRESIDING OFFICER. Under the previous order, the Senator from Tennessee [Mr. GORE] is recognized for not to exceed 5 minutes.

STRATEGIC DEFENSE INITIATIVE

Mr. GORE. Mr. President, yesterday, in the second of this series of speeches on the strategic defense initiative, I began to explore that program's implications for arms control and vice versa. Today, I will continue upon that theme.

The fundamental purpose of arms control is to diminish the risk of war by limiting—through negotiations—two dangerous phenomena: "arms race instability" and "crisis instability."

Arms race instability exists when competition in the development and deployment of weapons intensifies to such an extent that it becomes a major source of political tension.

Such instability exists when the arms race gains momentum from a cycle of response and counterresponse, action and reaction. Arms race stability, by contrast, exists when the competition is slowed and provocative surges of development or deployment on either side are avoided.

Crisis instability is a tendency for imbalances in the military forces of either side, whether real or perceived, to become driving factors in the behavior of governments in the midst of political or military confrontation.

It exists when the relationship between the arsenals of the two superpowers confers a kind of first-strike advantage or a premium to the nation striking first to either of the superpowers. Crisis stability, by contrast, exists when neither superpower can gain even a hypothetical advantage from launching a first strike.

Although the language describing these two phenomena is technical and even academic, what it describes is human enough. In the nuclear age, arms control assumes that the greatest risk of war is by miscalculation, rather than design. Arms control further assumes that the major source of catastrophic miscalculation would have to be fear: fear powerful enough to drive governments into nuclear war.

Our Government fears circumstances in which some unintended vulnerability can be politically exploited by the Soviets, to the detriment of our vital interests. Beyond that by orders of magnitude, it is the fear that national survival itself might be upset should some critical form of vulnerability go undetected or unattended.

One of these fears is political, and the other is mortal, but they overlap in at least one major area. And that is our fear that the Soviet Union might acquire a first-strike capability. That is to say, an ability—be it only theoretical—to attack us so effectively as to physically block or psychologically inhibit our ability to retaliate.

It is precisely in this area—the fear of a first-strike capability—that the strategic defense initiative works most effectively against the objectives of arms control. Even if a perfect defense were possible, or a near-perfect defense, the construction of such a system is not an overnight affair, but a process that could take decades, particularly, if we put it up as a series of installments as is currently advocated.

□ 1050

During this time, each side must inevitably see the effectiveness of its own nuclear forces diminishing, while the effectiveness of the other side's forces is growing. Human nature dictates that result. When military planners consider how they might fare under attack, they inevitably will assume the worst performance for their defenses and the best for the opponents' offenses; and, if they contemplate launching an attack, then they will assume the best for the other side's defenses, and the worst for their own offensive forces.

The result is that even the mere prospect of defenses can feed a cycle of response and counterresponse contributing to both arms race and crisis instability. Moreover, if this is true for the President's long-term version of SDI, then it is bound to be much more vivid in the case of what I have been calling SDI II: The emerging program for a space-based defense of our ballistic missiles as a crash project for the 1990's.

How can there be any other expected and natural consequence than a double arms race, pitting offense against defense, as each side tries to preemptively compensate itself for the other's programs. Our Secretary of Defense makes it very clear that our response to Soviet defenses of this sort would be to expand our offensive forces on a crash basis. Why should it not be the same from Moscow's perspective?

After all, where nuclear weapons are concerned, capabilities matter far more than intentions. And I would amend that by saying that it is not only observed capabilities, but the fear of first-strike capabilities that matters most of all. Arms control exists to deal with that kind of fear. It must now, unfortunately, contend with the potential of the strategic defense initiative to make the fear of a first strike worse than ever.

Mr. President, I shall return to the arms control implications of SDI in another speech. Tomorrow, however, I plan to address its implications for our national security.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR HAWKINS' SPECIAL ORDER

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. GOLDWATER. Mr. President, today I shall read Senator HAWKINS' special order entitled "Mexico: A Sorry Tale of Drugs, Graft, and Corruption."

MEXICO: A SORRY TALE OF DRUGS, GRAFT, AND CORRUPTION

Mrs. HAWKINS. Mr. President, this week, Senator Helms, chairman of the Western Hemisphere Affairs Subcommittee of the Senate Foreign Relations Committee, has been conducting a series of hearings on U.S. relations with Mexico. He could not have chosen a more appropriate time to inquire about what is going on there. As he so aptly described the stiuation: "We see a condition of flight from Mexico. We see a flight of capital. We see a flight of workers. We see a flight of drugs." And Senator Helms observed: "These events are affecting the United States deeply. We cannot sit back passively."

Billions of dollars have fled Mexico in the last 3 years. Mexican citizens are making incredible investments in U.S. real estate and other ventures. They are buying big houses and expensive automobiles, and making large bank deposits in this country and Switzerland. The Mexican economy is in disarray. Unemployment is rising, exports are falling, and revenues from oil are tumbling, reflecting the decline in prices on the world market. With the drop in oil prices, Mexico is unable to keep up with interest payments on its foreign debt.

I completely agree with Senator Helms that "Mexico's socialized economy is exploiting the Mexican people" and that a way has to be found out of this chaos and if we can, we should help our neighbor. But the neighbor has certain responsibilities also and those responsibilities include the obligation to help itself and to help us.

The aspect of the Mexican problem that concerns me most is the flight of drugs. Narcotics trafficking spells degradation and misery in the consuming country. Its offspring in the producing country is corruption and breakdown of the social order. Senator Helms cited as an example of the violence that drug trafficking can lead to the peasant massacre last month in Oaxaca in southern Mexico. Some 500 drug traffickers massacred 80 peasants who were trying to recover the bodies of four compatriots who had been killed the day before for speaking out against drugs. Mindless, senseless violence engendered by the knowledge that the authorities would do nothing about it. They, too, are afraid unless of course they have been bought off. The month before, in March, drug traffickers killed 17 policemen in the same area.

Elliott Abrams, Assistant Secretary of State for Inter-American Affairs, testified that "the problem of drug-related corruption is a common occurrence in every drug producing, transiting or consuming nation . . . Like a cancer, the corruption induced by those in the drug traffic must be removed." Abrams warned that the hour is already late and the traffickers' influence in the Mexican Government may become so strong "it is hard or impossible to root it out."

Another witness at the hearings, David Westrate, Assistant Administrator of the Drug Enforcement Administration, said there has been some improvement in the Mexican program to spray herbicides on marijuana and opium poppy fields in recent weeks. But he emphasized that corruption makes it unlikely that "progress can be made in the short term" in investigations and prosecutions of Mexican drug trafficking.

Heavy guns were also fired at corruption in the Mexican Government and bureaucracy by U.S. Customs Commissioner William von Raab. Von Raab blasted what he termed "a massive and ingrained corruption in the Mexican law enforcement establishment . . . all the way up and down the ladder." Von Raab also sounded a warning: "Until it is corrected, we will never solve the problem."

How high corruption reaches is anybody's guess. It has already been noted that Miguel Felix Gallardo, a notorious trafficker wanted in connection with the murder of DEA agent Enrique Camarena last year, was a house guest at the ranch of the Governor of Sinoloa. There has been speculation that Gallardo has also been a guest of the Governor of Sonoro state. Customs Commissioner von Raab declined to confirm that, but he said that the Governor owns four ranches that are believed to grow marijuana and opium and these ranches are under the protection of the Federal Judicial Police. Asked about whether relatives of Mexican President Miguel de la Madrid are involved in drug trafficking, von Raab responded that he could not comment on that "at a public hearing."

This, Mr. President, is the sorry state of things in Mexico. It is sad, very sad indeed.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m., with Senators permitted to speak therein for 5 minutes each.

NEW GI BILL

Mr. MURKOWSKI. Mr. President, I am taking this opportunity today to voice my strong opposition to the premature termination of the new GI bill. A proposal to end this educational program was contained in the President's fiscal year 1987 budget request for the Veterans' Administration.

The new GI bill was enacted on October 19, 1984, after long and arduous negotiations between House and Senate passed versions. The program is a 3-year pilot which began on July 1, 1985. My distinguished colleague and friend, SONNY MONTGOMERY, chairman of the House Veterans' Affairs Committee, was instrumental in the passage and enactment of this important piece of legislation. He recognized the importance that educational benefits would have on the recruitment of high quality youth into our Armed Forces, and more importantly, into critical skills, such as, combat arms. From his tenure and experience on both the Veterans' Affairs Committee and Armed Services Committee, he was well aware of the precipitous decline in the number of service age youth during the latter part of this decade and of the need to establish a program that would not only attract college bound youth to military service, but to ensure that they would complete their obligation of duty honorably. Pay and upfront bonuses alone would not accomplish these purposes. A properly designed educational program on the other hand could do so.

The new GI bill was enacted as a 3-year pilot program to see if this new approach would be a model worthy of adoption as a permanent program. Herein lies the key to my opposition to the termination of this program at this time. It is important that this test program be allowed to run its course. How else can we accurately determine if an educational program such as the new GI bill should continue?

There are those who opposed its creation from the start, and now wish to end the test in its very first year of implementation. The fact is, the conferees did work out a test program, albeit with much difficulty and I believe that a premature end to this test would violate the principles on which this agreement was hammered out.

The Veterans' Educational Assistance Program [VEAP] was the predecessor to the new GI bill. Unfortunately, VEAP encountered many problems and was generally considered to be a failure. The Army did not meet its recruiting objectives between 1977 and 1979 during the time VEAP was available. Many people believed that a more comprehensive education program would help with recruitment problems. A 1983 Army Research Institute Study found that 32 percent of category I and category II (highest level) recruits placed money for college as the most important reason for enlisting.

It became apparent that a replacement benefit was needed. Throughout our military history, educational programs have been an essential part of readjustment to civilian life. Since 1944, the Nation has provided its veterans with the means to obtain an education upon separation from active duty. In 1944, the original GI bill provided education benefits to the veterans of World War II and similar benefits followed for veterans of the cold

war period following Korea and the Vietnam era.

The General Accounting Office [GAO] reported in March of this year that:

First, Army statistics show a marked recruiting improvement as a result of this new program; second, the Military Service Program managers believe that a return to VEAP would have a negative impact on their ability to attract quality recruits; and third, participation in the new GI bill is already considerably higher than the VEAP Program it replaced.

Because the new GI bill was launched after much painful negotiation, it must be given a chance to run its 3-year course. I will oppose its early demise. I will also oppose changing the ground rules of the basic pilot program in midstream.

Once the test has been run and the results are in, it will then be appropriate to evaluate the GI bill's successes and failures and propose any modifications or enhancements if indicated by the report on the results of the pilot program.

In the meantime, I urge all my colleagues to join me in wishing this program well and living by the rules we ourselves established—to allow the full time to elapse before any changes are made to a program provides an opportunity for a college education for all our Nation's peacetime veterans.

DEFENSE SPENDING

Mr. DOLE. Mr. President, I ask unanimous consent to place in the RECORD an excellent article written by the distinguished Senator from Indiana, Senator QUAYLE, concerning defense spending.

In this article, Senator QUAYLE puts the defense spending controversy in the right context. He points out that, contrary to a great deal of propaganda, the President's defense spending requests have been drastically cut in recent years, to the extent that last year's spending was a reduction in real terms over the previous year—the first time that has happened in 15 years. He also dispels the notion that defense spending is responsible for our massive Federal deficits, pointing out that nondefense spending growth outpaced defense spending increases by more than 7 to 1 over the past 20 years.

Mr. President, coming up with a fiscally sound budget that meets our real national security needs is one of the greatest challenges facing this Congress. Senator QUAYLE's article is essential reading for any Senator who wants to approach this challenge rationally.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HACKING AWAY AT DEFENSE

(By Dan Quayle)

After weeks of painstaking give and take, the U.S. Senate on May 2 voted 70-25 to approve a budget for the 1987 fiscal year that meets the Gramm-Rudman-Hollings deficit target in a responsible manner—by further reducing domestic spending, by curbing the amount of new revenues, and by sustaining the investment we must make to safeguard our national security.

A majority of Senate Republicans and Democrats voted for the compromise budget package, which calls for the bare minimum we should allocate for defense spending $301 billion.

At long, last, the U.S. House of Representatives is preparing its version of the 1987 budget. Given that the House Budget Committee has now reported a plan that cuts new military spending authority from this year's level of $287 billion to $285 billion—and that House Republicans are proposing $292 billion for defense in 1987—I think it's time to set the record straight on defense spending.

As a candidate for re-election, I recognize the political advantages of railing against the Pentagon. With the electorate still reeling from spare-parts "horror stories," anyone calling for defense cuts is on politically safe ground.

But before members of the Congress begin the stampede to see who can cut defense the most, they should consider carefully the consequences of hacking away at defense for the fourth consecutive year.

Last year the Congress cut $36 billion from the president's defense request. For the first time in 15 years, that produced a defense budget with negative real growth (6 percent less than the preceding year's budget). While the budget the Senate has approved for 1987 provides $19 billion less than the president requested for defense , it at least allows for enough growth in defense spending to cover inflation costs: But the defense levels being discussed by both House Democrats and Republicans would, if adopted, yield two consecutive years of negative defense growth just eight months after Congress committed itself to maintaining 3 percent *real growth* for defense in both 1987 and 1988. Some commitment!

Some members of Congress have encouraged the popular but spurious notion that growth in the defense budget created the deficit and must therefore be slashed. That idea is directly contradicted by the facts. During the last two decades (during which most of our national debt was amassed), for every dollar of growth realized in the defense budget, non-defense programs grew seven dollars. That's right: non-defense growth (including all domestic and entitlement programs) outpaced defense spending increases by more than 7-to-1 over the past 20 years. Defense spending did not create the deficit.

It will surprise some members of Congress to learn that the defense budgets proposed by the president will actually decline as a share of gross national product over the next four years. From a high of 6.4 percent of GNP in 1985, the defense share declines steadily until it levels off at 6.1 percent in the years 1988-90. Since 1940, only during the 1970s have we maintained a lower average share of GNP for defense (6 percent) than would be maintained under the Reagan defense budgets (6.2 percent). And all of us remember the calamities brought about by that "decade of neglect" as we systematically underfunded our defense requirements. We are paying today for our shortsightedness of the 1970s.

The question is not whether we can afford to spend 6.2 percent of GNP for defense, but whether we can afford not to. A second year of severe defense reductions will have serious long-term consequences. They include:

Slowing our conventional and strategic force modernization.

Dramatic cuts will lead to program stretch-outs delaying the delivery of new equipment to the inventory. Our forces, already at a numerical disadvantage, will gradually lose their qualitative edge as Soviet technological advances continue. Critically important but expensive programs such as the Advanced Tactical Fighter, Advanced Tactical Aircraft, MV-22 Osprey (JVX), LHX light helicopter, and C-17 airlift programs—all designed to maintain our technological advantage—will likely be terminated under further defense cuts. Our inability to maintain adequate conventional forces will compel a greater reliance on nuclear weapons. The capabilities of our strategic forces and our national military communications, warning, and surveillance systems will be diminished, shifting the delicate balance between the United States and the Soviet Union.

Prospects for meaningful arms control agreements will be reduced.

Many of the staunchest advocates of defense reductions are also the most vocal in support of arms control agreements. Yet by slashing the defense budget, we hand the Soviets results they could not hope to achieve at the negotiating table. Such unilateral reductions only encourage Soviet intransigence and delays: why negotiate at all when the U.S. Congress is willing to hand over one concession after another for nothing in return?

Defense cuts will jeopardize procurement stability and drive up costs.

Efficient production rates and vigorous competition cannot be maintained in a declining budget. Defense cuts will force a return to sole-source procurements and stretched-out, uneconomical production rates for aircraft, ships, tanks, missiles, and other weapons systems.

One of the Packard Commission's key recommendations is simply this: if you want to cut the cost of defense, stabilize the budgeting process.

Defense cuts will jeopardize readiness and sustainability.

Invariably, when major defense reductions are made, a significant share is taken from the Operations and Maintenance accounts and other areas that directly affect readiness and sustainability. The rapid spendout rates of these accounts produce attractive outlay "savings" unlike the slower spending procurement accounts. These reductions in flying hours, training days, steaming hours, spare parts, and munitions may contribute to solving short-term budgetary problems, but in the long run will cost us dearly.

Must we repeat the cycle that led to the defense crises of the late 1970s when we had ships that couldn't sail, aircraft that couldn't fly, and a "hollow" Army filed with Category IV recruits (those having the lowest aptitude for military service)?

Will we have to wait until another Desert One disaster awakes us and the headlines shout "U.S. Military Unprepared" before we realize we have skimped just a little too much in our attempt to buy defense "on the cheap"?

Investment in national security is the insurance we pay for our freedoms. Freedom is America's most cherished commodity, and we ought to be willing to pay for it.

TAXPAYER INDEPENDENCE DAY!

Mr. HATCH. Mr. President, Tuesday, May 20, marks "Taxpayer Independence Day." As you know, the Tax Foundation annually calculates the day of the calendar year when taxpayers are finally earning money for themselves and not for local, State, or Federal Government, and this year it is May 1. I commend the foundation for reminding us of the burden of Government taxes, but I feel that we should also recognize the additional burden of the spending incurred beyond the revenues received by the various government treasuries.

I have expanded on the Tax Foundation computation because the real burden of Government spending is better measured by adding Government borrowing to total taxes collected. The Tax Foundation uses total tax receipts in its calculation, but excludes borrowing by the Government. This Government borrowing is not an insignificant amount, particularly when one considers that the taxpayer will have to work an extra 19 days to pay for Government spending financed by borrowed money. Current borrowing is the equivalent of future tax liabilities to pay interest in future years just to cover this year's expenses, so in an economic sense it is the same as the explicit tax burden.

Government borrowing is analogous to an individual's borrowing via MasterCard, with the exception that the Government's balance due is astronomical in comparison. The net interest payment on this national MasterCard bill is currently estimated at $148 billion. While the interest payment is staggering, the national debt of nearly $2 trillion—the sum of years of borrowing—is without question a debt which will not be paid back in our lifetime, nor our children's or grandchildren's lifetime.

What is the impact on individuals, commerce, and the overall health of the economy from all this taxing, borrowing, and spending by "Big Brother"? Taxes and borrowing of the magnitude found in the recent Senate-passed fiscal year 1987 budget will smother business expansion as the Government exhausts capital needed by the private sector to translate creativity and initiative into invention and employment. Taxing and borrowing will suppress the free market drive to improve productivity. Spending will be the demise of this great democracy if we in Congress fail to stem the heavy flow of the spending spigot.

"Taxpayer Independence Day" is a reminder that Government spending, and the uncontrolled growth in this spending, will cause the average taxpayer to work 140 days this year to pay the sum of all taxes he or she owes to Government. How many days will the taxpayer have to work next year to meet his or her tax obligation? Taxing and borrowing are vices which perpetuate the growth of uncontrollable spending, yet many Members of Congress view taxing and borrowing as the panacea for difficult budgetary problems.

TESTIMONY OF DR. TELLER ON SDI

Mr. STEVENS. Mr. President, on Friday of last week the Defense Subcommittee heard testimony on the strategic defense initiative from Dr. Edward Teller. Dr. Teller's testimony was sought by our subcommittee because of his great expertise in the field of nuclear weapons development and management of large-scale research and development programs. As we all know, Dr. Teller participated in the Manhattan project, the development of the hydrogen bomb, and in the founding of the Lawrence Livermore National Laboratory.

Dr. Teller's remarks were very useful to us—and I might add—made extemporaneously. Dr. Teller emphasized that it will be difficult to attract high quality young scientists and engineers to work on the SDI Program if funding levels are constrained. Dr. Teller also noted that many of the basic technology for strategic defense applications comes from the open Soviet literature. He also made strong endorsements of the SDI Program and the work being done by Lieutenant General Abrahamson.

Dr. Teller's written statement is also of great interest to us. It summarizes the background of President Reagan's decision to start SDI, the purpose of SDI, Soviet strategic defense developments, funding requirements, and the prospects for realistic and effective means of strategic defense.

I recommend reading this most important statement from Dr. Teller on the SDI Program, and request that it be inserted into the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PREPARED STATEMENT OF DR. EDWARD TELLER

SUMMARY

Shortly after the discovery of fission, forty-seven years ago, it became clear to me that development of weapons of mass destruction based on nuclear energy had become inevitable. From that time on it became increasingly clear to me that in a new and more dangerous age scientists had to play their role in making it clear to free people what their dangers are and in what way these dangers may be avoided or diminished. My dedication to this effort took final shape when I heard President Roosevelt's response to Hitler's invasion of the lowlands in 1940. He challenged scientists to work on the weapons without which freedom would perish. At that time Roosevelt had been informed of the possibility of atomic explosions.

Forty-three years later President Reagan made a similar appeal which was based, according to my knowledge, on years of careful consideration. He challenged scientists to find methods of defense against weapons of mass destruction.

Following Roosevelt's appeal the atomic bomb was developed in little more than five years by the joint effort in the United States by scientists from several countries. The war effort, both in radar and in nuclear weapons, was so intense that publications on pure science dwindled to a small fraction of what they are in peacetime. While we were working so did Nazi Germany and Soviet Russia. It is not easy to judge which of the two made more progress, but the Soviet Union tested a nuclear explosive in the late summer of 1949, much earlier than had been generally expected. Our own wartime record led to the result that the first atomic bomb did not become available to a dictatorship, but a democracy. In this way the war was ended and American power was used to help recovery both among our competitors and among or former enemies. Had the bomb first been developed by a dictator, his absolute power would have been extended over the world.

After the successful Soviet test of a nuclear explosion some of us argued that our work during the war had been incomplete and that with a moderate amount of additional work a thermonuclear weapon could and should be developed. Many scientists argued at that time that if we did not develop the hydrogen bomb neither would anyone else. It is now clear from the publications of Sakharov [1] that he, the inventor of the Soviet hydrogen bomb, had been drafted to work on that super weapon a year and a half before the thermonuclear debate started in the United States. President Truman made the decision to proceed with work on the hydrogen bomb and fortunately we finished work on that subject a short time before the corresponding Soviet success.

Today we are engaged for a third time in a similar competition with the Soviet Union, but there are two differences. One is that in the two earlier competitions weapons of aggression were developed. On this occasion we are looking on President Reagan's initiative for methods of defense against aggressive instruments of mass destruction. The second difference is that, while on two earlier occasions we started from a technological advantage, in the field of defensive weapons the Soviets have worked diligently for two decades while our own efforts have been meager and hesitant. Indeed, in contrast to our wartime effort, few academic scientists participate in our work.

The Strategic Defense Initiative should be properly called Strategic Defense Response. According to President Reagan's instructions we start with a vigorous research effort which is not in conflict with the letter or spirit of any treaty. A number of dedicated scientists are participating in this effort and we are seeking the collaboration of our allies. Agreements are taking shape with England and Germany. Further collaboration looks hopeful with Israel, Japan, and Italy. Eventually, President Reagan has

[1] Sakharov, Andrei D., "Sakharov Speaks" (Knopf, New York, 1974), p 30.

suggested that the art of defense should be shared with the whole world including the Soviet Union.

THE PURPOSE OF SDI

It is a mistake to believe that we are pursuing a plan for an impenetrable shield protecting the United States. Our purpose is to deter war by making the success of aggression less likely, thereby, we can contribute to deterring aggression. While we are in research it is important to maintain the effectiveness of our offensive deterrent. As the research is successful, we can emphasize a defensive deterrence and a more stable basis for peace. Such policy is surely in consonance with the feelings of the American people, and modern developments show that it is technically the sound direction to pursue.

Defense will become practical only if it is effective. Feasibility is not the only criterion. It is also necessary that defense should be less expensive in effort and money than countermeasures. It should also be less expensive than a compensating increase in instruments of aggression. Research on defense performed thus far encourages us that these aims can be attained. Soviet protests are further evidence that they do not consider defense as an unimportant or infeasible activity.

The purely economic criterion cannot be met quantitatively in the face of uncertainties. In case of any doubt we should do what is affordable to enhance the chance for peace.

Early concrete successes could be of great importance, even if the successes are partial. Thus, tactical defense against short range missiles would be important for our allies, could decrease the threat of submarines to the United States, and would serve as a first step toward a more total defense of the United States.

Predeployment in space appears to be difficult because according to the current situation it seems at present more expensive to launch a satellite than to shoot it down. The question, however, needs to be included in the present research phase because the Soviets may well pursue this possibility, because launching of satellites could become less expensive and finally because destruction of satellites could be made more difficult by any of several methods.

The defensive program on which we are embarking is a broad one and it is unreasonable to determine at this time any particular plan of deployment. My experience with research and specifically with research on defense is that new initiatives lead much farther than was originally planned. This was true in atomic explosives, in electronics, in computer development, and in the magnificent space enterprise.

SOVIET DEFENSE

The Soviet Union started on the strategic defense of Moscow at least two decades ago. By now they have upgraded their system. Probably two layers of defense are presently available, and such defense can be carried out with the help of appropriate nuclear explosives which will do no damage on the ground and are adapted to destroying incoming missiles. This "terminal defense " is made more easy because light and cheap decoys are slowed down and burned up as they reenter the atmosphere.

The Soviets have ample opportunity to train their people in terminal defense. They also may have prepared components for a dozen or more sites that they plan to defend. Such defenses could be put in place in the Soviet Union in less than a year.

The one particularly expensive and time-consuming element in this type of strategic defense is the big radar system. Such radars have been limited in the ABM Treaty of 1972; the Soviet Union had disregarded these limitations. The well-known example is the radar at Krasnoyarsk. When this instrument is completed the Soviets will be in the position to use terminal defense in an effective way for the whole of the Soviet Union, with the exception of the easternmost tip of Siberia.

Rockets are most vulnerable in their boost phase while they are accelerated. The fragility of this stage has been tragically demonstrated in the recent Challenger accident. The Soviet Union has been working on various instruments of defense that could attack rockets in their boost phase or in mid-course. In my opinion, the most important of these are various kinds of lasers. According to estimates published by the Pentagon,[2] the Soviet Union has spent on the appropriate high-intensity lasers at least a billion dollars annually for several years. Our planned laser budget has not reached this level as yet. The Soviets have also deployed an effective prototype at the test site Sary Shagan, located in Siberia on the shore of Lake Balkash. This establishment appears to be far ahead of any American experimental laser facilities.

The x-ray laser is a novel variety of laser whose energy penetrates into the skin of the attacked missile, but which can act only in space or in the uppermost fringes of the atmosphere. As a defensive instrument, it probably will have to be popped up when an enemy launch is noticed. Our own efforts in that field have been stimulated by Soviet publications which stopped abruptly in the late 1970s.

Lasers may be the most effective directed energy weapons which are not weapons of mass destruction but can be used to destroy aggressive weapons at definite locations at great distances. Other weapons of this kind are electron beam weapons and neutral particle beam weapons. These also can be used to discriminate between decoys and rockets. The Soviet Union has lead the way in both these developments.

Still another important development which could be useful both in the terminal phase and in space are rockets guided to their high altitude targets from ground launch points. The Soviet Union has developed several generations of these. Some of them have been used in the 1972 war in the Middle East. The much more modern SA-12 is probably highly useful in missile defense as well as conventional air defense.

A POSSIBLE SCENARIO

I do not believe that the Soviet Union plans to attack us. It is, however, obvious that Russian imperialism and the expansion of Russian influence did not come to an end when the czars were deposed. In the Persian Gulf, in Central America, or elsewhere conflicts may arise and a Soviet nuclear strike could become possible. The best way to diminish this danger or to eliminate it is to make its success improbable. Predictions cannot be made reliably, but it is useful to consider a possible scenario.

Assuming that the Soviets plan to launch a nuclear strike, they may establish instruments to prevent our retaliation and deploy them in Cuba and on ships or submarines in the Atlantic and Pacific. The Soviets would expect our retaliation and with simple instruments from satellites or ground-based radar they could observe the launching of our retaliatory missiles. Upon such an American launch, Russian instruments could be popped-up. These could be mirrors to reflect and direct high intensity laser light or they could be x-ray lasers driven by nuclear explosives. The latter are novel developments and at the present time we cannot judge whether they will be relatively unimportant or exceedingly useful.

When both our retaliatory rockets and the Soviet instruments have reached a 50 or 100 miles altitude, the Russian instruments will be in a line-of-sight with our retaliatory missiles. Our missiles will be still accelerating and, therefore, highly vulnerable. Most of them could be destroyed in the boost phase.

The Soviets have a triple chance to render our retaliation harmless: preventive strike on our missiles, destruction of our missiles in the boost phase as described above, and terminal defense as discussed in the previous section. Under these conditions, the Soviets may be tempted to attack. The primary purpose of SDI is to discourage attack. Its secondary purpose is to limit the effects of attack if it should occur nevertheless.

THE AMERICAN ADVANTAGE

The United States has one potential advantage over the Soviet Union. Our computers are far better developed than theirs. This gives us a great potential advantage in battle management.

However, as long as we have no defensive instruments to manage and as long as we do not perfect the appropriate computers to serve in the battle management, this advantage will not be realized.

Battle management is a full-scale nuclear war will be obviously difficult. This is particularly true if we are caught by surprise and, since the United States will not execute a first strike, we must be prepared to absorb a massive and elaborate attack. Therefore, it will not be easy to realize the full advantage that our advanced computer technology can give us.

THE NEEDED BUDGET

The President has asked for a little less than 2% of our military budget to spend on SDI research in fiscal 1987. This is certainly not as much money as the Soviets will spend on the same general purpose in the same period. Considering the fact that in true defensive measures we are late comers, this requested amount is desperately needed.

Our efforts on SDI are of recent origin and one cannot expect that in spending money in this direction no mistakes will be committed. It is, of course, necessary that Congress review both spending and progress. It seems to me very difficult to earmark funds for special expenditures. Directing research by those who do not participate in it in a direct manner has always proved to be difficult and in the long run unrewarding. At the same time, constructive criticism and advice are of high value.

The SDI efforts proceed under exceptionally difficult circumstances. The present leader of the project, Lt. General James Abrahamson, is eminently suited for this task both in his technical knowledge and in his organizational efforts. His performance is without parallel in my four-and-one-half decades of experience in such matters.

OBSOLESCENCE OF AGGRESSION

Our government has taken the initiative to collaborate on defense with our friends

[2] "Soviet Strategic Defense Programs," released by the Department of Defense and Department of State, October 1985.

and allies. The President has stated that the end results should be shared even with the Soviet Union.

The purpose of rendering weapons of mass destruction "impotent and obsolete" can be accomplished by international cooperation which is directed in general against aggression and at the moment more specifically against the launching of aggressive rockets, particularly when great numbers of rockets are launched at the same time. We are beginning to succeed in finding methods of defense against such instruments.

Our flexibility in seeking cooperation from other nations in any form in which we can obtain it is both unprecedented and encouraging.

One should not expect that aggression will become impotent and obsolete overnight, but as we demonstrate step-by-step that defense can be made less expensive and more effective than aggression, everyone will be convinced in his own interest that defense is preferable. In this gradual way the threat of aggression, the most dreadful concomitant of technological development, can indeed be lifted from mankind.

At this time the Soviet Union enjoys a monopoly in defensive weapons and also in most of the research leading to such weapons. They do not intend to lose this monopoly; hence, their opposition to SDI and their lack of interest in sharing information.

As we make progress toward realistic and effective methods of defense and as we gain participation of more and more nations in this effort, the interest of the Soviet leaders will increase. The Soviets have already returned to the conference table. They proved in the past to be flexible and also open to accept reasonable peaceful compromises where such can be had without danger to themselves.

Due to the open discussion generated by the democratic process at home and abroad, it is becoming perfectly clear that the purpose of SDI is not to isolate America, not to obtain superiority over the Soviet Union, but to preserve peace for ourselves and for everybody else. This was the announced purpose of our President on the 23rd of March 1983. It should be a non-partisan issue.

During the Second World War I participated in practically all phases of the Manhattan Project which was an effort to avert the most terrible consequences to which this war might have led. The challenge today is to avert a third world war. I believe this deserves the full support of Congress. The large majority of the American people have already demonstrated their support.

TRIBUTE TO ROBERT L. HADDAD, NATIONAL SMALL BUSINESS ACCOUNTANT ADVOCATE OF 1986

Mr. KENNEDY. Mr. President, today I rise to recognize the outstanding achievements of Robert L. Haddad, a tax partner at Price-Waterhouse in Boston, who has been named National Small Business Accountant Advocate of the Year by the U.S. Small Business Administration. He will be honored in Washington, DC, during National Small Business Week, May 18-24, 1986.

As a valuable member of my small business advisory task force, chairman of the tax committee and a director of the Smaller Business Association of New England [SBANE], Bob Haddad has contributed his considerable expertise on tax issues affecting small business. He is widely respected for his dedication, committing his energies, in addition to his extensive responsibilities at Price-Waterhouse, to assist members of Congress recognize the impact of proposed tax reform legislation on the Nation's 15 million small businesses.

Last year, Bob Haddad testified before the Senate Small Business and Finance Committees to express the position of small businesses across our Nation—the need to simplify the existing tax system and to achieve an equitable distribution of the tax burden on all corporations. In his testimony, Bob Haddad explained that the Nation's small businesses would experience the brunt of the tax increase proposed by the Reagan administration. He testified as to the effect that the payroll tax and the proposed elimination of the graduated tax rates would have on small business, supported the continuation of industrial development bonds and emphasized that the proposed taxation on fringe benefits would harm New England small business disproportionately as a result of the labor-intensive nature of our region's industry. His advocacy on these and many other issues has been a tremendous contribution to the recent progress achieved to realize a reformed and equitable tax distribution system.

In my home State of Massachusetts, more than 99 percent of the businesses are small enterprises with less than 500 workers. It is reassuring to know these businesses have an articulate and knowledgeable advocate in Bob Haddad.

Today, I am pleased to commend Bob Haddad for his tireless advocacy on behalf of small business in Massachusetts, New England and across our Nation. The small business sector is critical to the economic health of our Nation—the strength of small business lies in the energies of people like Bob Haddad.

TESTIMONY OF DR. MARTIN J. HOFFERT ON SDI

Mr. STEVENS. Mr. President, the Defense Subcommittee held an outside witnesses hearing last week on the strategic defense initiative and heard testimony from Dr. Martin Hoffert, representing the Science and Engineering Committee for a Secure World. This committee, composed of prominent scientists and engineers from around the country, was formed in support of the Strategic Defense Initiative Program earlier this month.

Dr. Hoffert's appearance marked the public debut of the Science and Engineering Committee for a Secure World. This group of respected scientists and engineers will undoubtedly have a very positive and important impact on the level of debate on the SDI Program in this country. It will also help serve as a conduit for transmission of open, scientific information on strategic defense research and technology development to the Congress and the public at large.

At our hearing I personally requested this committee to provide us with background information from unclassified literature on the nature and extent of Soviet scientific efforts in strategic defense research predating the creation of the SDI Program by the President.

I ask unanimous consent that Dr. Hoffert's written statement, as well as a statement from the committee and a partial listing of its membership, be placed into the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TESTIMONY OF DR. MARTIN J. HOFFERT, REPRESENTING SCIENCE AND ENGINEERING COMMITTEE FOR A SECURE WORLD

Mr. Chairman and distinguished members of the Committee, it is a pleasure and an honor to be here today to discuss an issue of major significance to the survival of our planet. I want to express my Organization's appreciation for the opportunity to present our views to you.

The Science and Engineering Committee for a Secure World is a recently formed group of distinguished scientists and engineers, about 80 in number now, but certain to increase significantly in the future, who strongly endorse the Strategic Defense Initiative research and development program. This is our first public appearance. We are confident that there are thousands of scientists and engineers across America and elsewhere who agree with us that it is unscientific and unwise to hastily oppose the promising Strategic Defense Initiative proposal at this early stage of its research and development, and who believe that the concept of developing a defensive system to protect our people from a nuclear attack makes good common and good moral sense.

Our acting Chairman is Dr. Fred Seitz, former president of the National Academy of Sciences and President Emeritus of Rockefeller University, who sends his regrets that another obligation has prevented him from appearing here today.

The Committee will actively work to inform the media and the public about the nature and importance of the Strategic Defense Initiative for America's future peace and security.

I will now present to you the Committee's policy statement on SDI.

STATEMENT ON SDI BY THE SCIENCE AND ENGINEERING COMMITTEE FOR A SECURE WORLD

At present the American people, by past government policy and to some extent by previous limitations of science and technology, have essentially no defense whatsoever against a nuclear missile attack or even a single accidental launch. The U.S. can only respond to an approaching Soviet first strike by killing millions of Soviet citizens in revenge, or by doing nothing.

Not only America, but the whole world lives with the fear and insecurity caused by the unstable balance of nuclear terror. This "balance" rests on the premise that both the U.S. and the Soviet Union follow the controversial doctrine of Mutually Assured Destruction—a doctrine rendered increasingly obsolete by powerful new Soviet missiles and technological advances on both sides.

The genius of American scientific and engineering professionals helped, however well meaning, create this world of nuclear terror. But today scientists and engineers from America and around the world have the opportunity to play a positive and critically important part in reducing and perhaps eventually eliminating the threat of nuclear war by means of America's Strategic Defense Initiative program.

As professionals trained in scientific methodology, we believe that the feasibility of a promising scientific or technical proposal should not be judged in advance of proper research, experimentation and testing. Therefore, we believe that the Strategic Defense Initiative should not be hastily, unscientifically or ideologically rejected without this necessary thorough evaluation to determine its feasibility, its effectiveness and its practicality—which is the very purpose of the SDI program.

Indeed, we ask our fellow scientists and engineers, is it not our responsibility as professionals and as concerned human beings to utilize our talents and energies now to see if we can render the nuclear threat militarily ineffective and therefore obsolete?

New technological breakthroughs have significantly increased the prospect that the U.S. can successfully devise effective systems which will destroy attacking Soviet nuclear missiles long before they can come close to their targets in America, Europe or elsewhere. Included are such things as electronic miniaturization, super computers, infrared sensors, "rubber mirrors", greatly enhanced laser beam power, the scramjet concept, and optical synthetic aperture imaging. These and other recent scientific and engineering achievements are providing the world with the possibility that the nuclear superpowers can move away from reliance on the threat of using nuclear weapons designed for the mass destruction of humanity in order to maintain security, and instead to reliance on defensive weapons designed to increase stability in periods of crisis, to protect countries from attack, and to save lives.

The Strategic Defense Initiative (SDI) undertaken by President Reagan and the Congress seeks to utilize such new technological means to turn America's strategic military policy away from the unreliable, outdated MAD doctrine and its death dealing nuclear missiles, to a Mutually Assured Survival policy based on new, life protecting defensive systems.

As such, SDI embodies a strategy surely ethically superior to the MAD policy, as well as a concept of strategic deterrence that is very likely more sound from a military standpoint.

By developing the defensive means to shoot down Soviet (or other) nuclear missiles or warheads in space or the atmosphere before they explode on earth, SDI is intended to significantly increase America's deterrence to a Soviet nuclear attack, as well as to eliminate the danger from an accidental launch. Even a less than 100% perfect defense system could nonetheless render an attack militarily ineffective, and therefore greatly reduce the probability that an attack would ever be launched in the first place. In the quite unlikely event that an attack did occur, strategic defenses would tremendously reduce the loss of life and damage that would otherwise result without any such defense system in place.

In addition, the technology being developed by the SID program could also readily be utilized to help provide successful defenses against bombers and cruise missiles, as well as shorter range nuclear missiles.

SDI is not designed to cause a war in the heavens, as some charge, but to prevent nuclear war on earth. It would not lead to the militarization of space, which was already militarized by the first sputnik satellite and the first ICBM. Instead, SDI is intended to render space and the atmosphere militarily useless for nuclear missiles—to stop nuclear weapons in space so they cannot hit the earth.

The fact that the Soviet Union began serious research, development, and testing of advanced strategic defense systems some 10 years before the U.S., and is continuing to expand its offensive nuclear capabilities, makes the Strategic Defense Initiative more accurately a response to this Soviet effort and buildup.

Furthermore, even without additional technological advances on its part, growing evidence indicates that the Soviet Union is producing the capability, in violation of the ABM Treaty, to rapidly deploy a non-exotic strategic defense system of antiballistic missile (ABM) missiles. This defense system could be effective against a ragged U.S. retaliation in response to a Soviet first strike on U.S. nuclear weapons. It is estimated that the Soviet Union could deploy such a system by the early 1990's or sooner, regardless of whether the U.S. proceeds with its SDI. (See "Soviet Strategic Defense Programs", Departments of State and Defense, October 1985, etc.) Such a development could significantly enhance the Soviet Union's nuclear blackmail capability and tempt it in very dangerous new ways.

These developments make the case for America's SDI effort an even more compelling one. Indeed, it can be argued that it is imperative for America's continued security and for world peace that the SDI Research and Development program proceed with all deliberate speed.

At the same time, we believe that in the long run the most realistic and best path towards international stability, better U.S.-Soviet relations, and world peace is likely to be found in the United States and the Soviet Union engaging in a mutual transition from offensive strategic weapons to defensive ones, aimed at the flight corridors of potentially approaching nuclear weapons, rather than at human beings. Such a change in policy would vastly increase real security for both countries and therefore considerably reduce fear and mistrust on both sides.

For the above reasons, therefore, it is our judgment that the Strategic Defense Initiative program is worth pursuing and deserves the full support of the scientific community, Congress, and the American people.

Under the less restrictive interpretation of the ABM Treaty of 1972 which the U.S. government has stated is the correct one, the necessary testing of potential defensive systems can and should be done so that Congress has the required information about the effectiveness of particular systems in order to make a sound decision concerning eventual deployment.

If Strategic Defenses prove to be feasible and practical after careful testing and assessment of cost and effectiveness—particularly in relation to possible Soviet counteractions—and in light of Soviet SDI programs, we recommend that a new ABM Treaty be negotiated which embraces Stratetic Defenses, and also equitable, verifiable reductions in offensive nuclear weapons. Such a treaty should encourage mutual deployment of defensive systems so that the era of Mutually Assured Survival, instead of Destruction, can be ushered incooperatively.

In the absence of Soviet agreement to such a new treaty, and in view of the extensive Soviet work on advanced strategic defenses and Soviet violations of the current treaty, U.S. withdrawal from the Treaty—in "the supreme interests" of the American people (as provided for by use the terms of the Treaty itself)—and deployment of its own strategic defenses should be seriously evaluated. Unilateral U.S. compliance with the existing treaty would serve neither America's interests nor the world's.

In conclusion, as professional scientists and engineers, we want to express our earnest hope that history will record that in our day America's and the world's best scientific and technical minds sought to develop the technology which helped humanity move back from the nuclear precipice—and succeeded. We can do no less.

SCIENCE AND ENGINEERING COMMITTEE FOR A SECURE WORLD

The Committee was formed in support of the Strategic Defense Initiative program to develop effective, deterring protection from a nuclear attack for the U.S. and its allies. It was recently established (May '86), with some 80 scientists and engineers as founding members. (See attached list).

It will seek to inform the public about the Strategic Defense Initiative and will undertake the following effort:

(1) Demonstrate to the public that there is significant support for SDI from informed, respected and articulate scientists and engineers.

(2) Establish a responsible academic, scientific and engineering base of support for the Strategic Defense Initiative program.

(3) Maintain contact with and supply information to the media relating to SDI and our activities.

(4) Provide the media and others with a timely source of interviews and speakers concerning SDI and related issues.

(5) Communicate with fellow scientists, engineers and science and engineering groups, etc. on a regular basis.

(6) Sponsor factual reports and professional conferences concerning SDI and related issues.

(7) Prepare and publish critiques of materials by opponents of SDI in terms of errors, omissions, bias, faulty reasoning, etc.

Dr. Fred Seitz, former president of the National Academy of Sciences and president emeritus of Rockefeller University, is the acting chairman of the group.

Listing of the Founding Members of the Science and Engineering Committee for a Secure World (organizations listed for identification only):

Dr. Fred Seitz former President of the National Academy of Science, President Emeritus of Rockefeller University.

Prof. Arthur Broyles, Dept. of Physics, University of Florida.

Prof. Martin Hoffert, Chm,. Dept. of Applied Science, New York University.

Dr. Eugene Wigner, Dept. of Physics, Princeton University.

Prof. Robert Jastrow, Dept. of Earth Sciences, Dartmouth.
Prof. Fred Singer, Dept. of Physics George Mason University.
Prof. Robert Clack, Emeritus, Nuclear Engineering, Kansas State University.
Dr. Edward Teller, Hoover Institution, Staford University.
Dr. Hugh Ellsaesser, Atmospheric & Geophysical Sciences, Lawrence Livermore National Labortory.
Prof. Kenneth Bell, Dept. of Chemical Engineering, Oklahoma State University.
Dr. Emma Brossard, Director of Policy Analysis, Center for Energy Studies, Louisiana State University.
Dr. Hans Mark, Chancellor, University of Texas System.
Dr. Alvin Weinberg, (former Director, Oak Ridge National Laboratory), Institute for Energy Analysis, Oak Ridge Associated Universities.
Dr. John A. Wheeler, Dept. of Physics, University of Texas.
Dr. Robert McCrory, Dir. Laser Energetics, University of Rochester.
Walter Cunningham, former Astronaut, Houston, Texas.
Dr. Edward Lozansky (Physics), Dtr, The Sakharov Institute, Washington, D.C.
Dr. Robert Whitelaw, Dept. of Mechanical Engineering, Virginia Polytechnic Institute.
Dr. Harold Agnew, former Director, Los Alamos National Laboratory, San Diego, CA.
Dr. Evgene Shustorovich, Quantum Chemistry, Rochester, NY.
Prof. R. H. Miller, Aeronautics and Astronomy, M.I.T.
Dr. Merle Potter, Dept. of Mechanical Engineering, Michigan State U.
Dr. Gough Cooper Reinhardt, Physicist, and Arms Control consultant, San Leandro, CA.
Dr. William Nierenberg, Scripps Institution for Oceanography, University of California, San Diego.
Dr. William Orthwein, Dept. of Engineering, Mechanics, and Materials, Southern Illinois University.
Dr. Rudolf F. Kazarinov, Physics, Solid State Electronics, AT&T Bell Laboratories.
Dr. Donovan H. Van Osdol, Department of Mathematics, University of New Hampshire.
Dr. Elmer Hansen, Ph.D., Asst. Prof. Mechanical Engineering, University of Florida.
Ralph Burgess, Research Engineer, MIT.
Professor Harry Gatos, Dept. Material Science & Engineering, MIT.
Prof. Lev. B. Levitan, Ph.D., College of Engineering, Boston University.
Eugene Ustorovich, Ph.D., Dr. SCI, Theoretical (Quantum) Chemistry, Rochester, NY.
Gary Kellogg, M.S., P.E., Regional Engineer, Universal Engineering Testing Co.
Dr. Hans Coll, Ph.D., Electrical Engineering, University of Colorado.
Robert K. Squire, Ph.D., Physics, Eagle Research Group, Inc., Arlington, VA.
Prof. Petr Beckmann, Ph.D., Electrical Engineering, University of Colorado.
Nicholas Zumbulyadis, Ph.D., Physical Chemistry, Rochester, NY.
Dr. John J. McKetta, Jr., Dept. Chemical Engineering, University of Texas.
Raphael G. Kazmann, Prof. Emeritus Civil Engineering, Louisiana State University.
Dr. Raymond J. Krizek, Department of Civil Engineering, Technological Institute, Northwestern University.
Dr. Harvey Smith, Department of Mathematics, Arizona State University.
Dr. Bernard Piersma, Department of Chemistry, Houghton College.
Dr. Robert Breffler, Physics Consultant, Santa Fe, New Mexico.
Gilbert Stubbs, M.A.E.E., Aerospace Engineer, Wellesly, MA.
Dr. Joseph Douglass, Electrical Engineering, Falcon Associates, McLean, VA.
Dr. Bernell Stone, Computer and Systems Analysis, Georgia Institute of Technology.
Samuel Cohen, Nuclear Engineering Consultant, Los Angeles, Calif.
Al Worden, former Astronaut, M.S. Aeronautics, Instrumentation Engineering, Orlando, Florida.
Dr. Yuri Tuvim, Mechanical Engineering, Boston, Massachusetts.
Dr. Joseph Weber, Department of Physics, University of Maryland.
Dr. Igor Levin, Computer Science, Washington, D.C.
Dr. Carl Gottschall, Jr., Department of Chemistry, University of Colorado.
Dr. Marcello Alonso, Physics, Director, Fla. Inst. of Technology, Research and Engineering.
Dr. Wojciech Slusarek, Chemistry, San Diego, Calif.
Dr. Thomas Dillon, Chemical Physics, San Diego, California.
Dr. Dixy Lee Ray, Marine Biology, Former Governor, State of Washington.
Prof. David Kottick, Dept. of Physics, Purdue University.
Prof. Rolf P. Scharenberg, Dept. of Physics, Purdue University.
Dr. Robert Budwine, Physicist, Lauwrence Livermore Laboratory.
Prof. Neal C. Gallagher, School of Electrical Engineering, Purdue University.
Prof. Paul Coleman, Institute Geophysics, Planetary Physics, UCLA.
Margaret Renton, Systems Engineer, Systems Control Technology, Inc.
Prof. Gabriel Miller, Dept. of Applied Sciences, New York University.
Hon. John H. Morse, M.S. Aeronautical Engineering, Former Deputy Asst. Sec'y of Defense.
Dr. Cornelius Leondes, Engineering and Applied Sciences, UCLA.
Prof. Fred Decker, Emeritus, Dept. of Physics, Oregon State University.
Dr. Jerry Pournelle, Aerospace Engineers, Board of Directors, L-5 Society.
Perry Anthony, Research Assistant, High Energy Physics, Fermi National Accelerator Laboratory.
Dr. Joseph Goldman, Dept. of Physics, American University.
Dr. Fred Samson, Director, University of Kansas Medical Center, Kansas City, Kansas.
Dr. Henry Miranda, Physicist, Optics Space Instrumentation, Bedford, Massachusetts.
Dr. William R. Havender, Genetics, Specialist in Environmental Carcinogens, Berkeley, Calif.
Prof. Sami Beraha, Dept. of Mathematics, Queens College, New York.
Dr. Kenneth Watson, Scripps Institution for Oceanography, University of California, San Diego.
Prof. John McCarthy, Dept. of Computer Science, Stanford University.

NATIONAL POLICE WEEK—GREENBELT POLICE DEPARTMENT

Mr. SARBANES. Mr. President, the policemen and policewomen of this Nation put their lives on the line every day to protect our citizens; and it is fitting and proper that we take time to reflect on the enormous contributions made by these dedicated officers.

On May 17, 1986, the Greenbelt Police Department and the Beltway Plaza Mall Merchants Association will once again join together to commemorate "National Police Week." This annual observance has become a noteworthy and exciting tradition in Greenbelt, and 1986 will be no exception. The Merchants Association and the Greenbelt Police Department have scheduled a very special day to bring attention to this yearly event.

Highlighting the scheduled ceremonies will be an appearance by the star of the television series, "Miami Vice," Mr. Don Johnson. Mr. Johnson will be honored for his efforts in connection with National Police Week.

Mr. President, I know the citizens of Greenbelt join me in commending the Greenbelt Police Department, the Beltway Plaza Merchants Association, and Mr. Don Johnson for their efforts in bringing recognition to National Police Week and America's law enforcement officers.

EXPERTS TESTIFY ON SDI

Mr. STEVENS. Mr. President, the Defense Appropriations Subcommittee recently conducted a hearing on the strategic defense initiative in which we heard testimony from outside experts. Former Defense Secretaries Robert McNamara and Harold Brown offered their views as to the political and technical feasibility of accomplishing the SDI objective as enunciated by the President.

On Friday, April 11, the New York Times reported that the former Secretaries strongly opposed the strategic defense initiative and urged the fiscal year 1987 funding of no more than $2.5 billion for the program.

I ask unanimous consent that the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MCNAMARA AND BROWN QUESTION MISSILE DEFENSE

(By Charles Mohr)

WASHINGTON, April 10.—Two former Secretaries of Defense suggested today that the pace of research in defenses against long-range missiles be slowed and that spending for them be cut.

The former Secretaries, Robert S. McNamara, who served in the Kennedy and Johnson Administrations, and Harold Brown, who served in the Carter Administration, also said they believed the cost of building and operating an antimissile defense could reach astronomical proportions without providing effective protection.

Mr. McNamara and Mr. Brown testifed before the Defense Subcommittee of the Senate Appropriations Committee on the Reagan Administration's request for $4.8

billion in the fiscal year 1987 for an antimissile shield. Administration officials say the program is aimed at making possible an "informed decision" by the early 1990's as to whether to begin full-scale development and ultimate deployment of a missile defense.

CONCERN OVER SPECTACULARS

The two former officials said they doubted the wisdom or utility of such a schedule, and Mr. McNamara suggested that spending be limited to about $2.5 billion.

In purely technological terms, Mr. Brown said, a sizable spending cut "wouldn't hurt it and it might help."

Mr. Brown, a physicist who is a former director of the Livermore National Weapons Laboratory in California, said he was concerned that expensive technology tests, which he called "spectaculars" designed to bolster Congressional and public support for the program, might be conducted at the expense of basic research.

Both witnesses said they supported basic research on technologies related to missile defense, partly as insurance against the possibility that the Soviet Union would use similar research and then abandon the 1972 treaty limiting antimissile systems.

However, Mr. McNamara suggested that the schedule and character of the Administration's program might encourage Soviet leaders to assume that the United States would deploy a missile defense system, thus encouraging the abrogation of the treaty and an expanded race in nuclear weapons.

COST SEEN AS VERY HIGH

Defense Department officials have declined to give Congress even tentative estimates of the cost of a missile defense system. In answer to questions, however, Mr. Brown and Mr. McNamara suggested that the cost of developing and operating such a system would be very high.

Mr. Brown said it might cost $100 billion just to put weapons, sensors and other components of an antimissile system into space.

With continued research, development and maintenance costs, the former Secretary said, a deployed system might require an annual budget ranging from $100 billion to $200 billion.

Mr. McNamara suggested that limited defense of missile silos and some other military installations by ground-based interceptor rockets could cost $300 billion.

Both witnesses expressed doubt that a system effective enough to offer much protection to the civilian population could be devised.

FOCUS ON FEASIBILITY

The question of whether an antimissile shield was feasible occupied much of the hearing.

Both Mr. Brown and Mr. McNamara stressed that to be workable a defense system must not only be able to shoot down missiles or warheads in tests but also must be militarily operable and able to survive if attacked, effective against enemy countermeasures and worth the cost per unit of defense.

"That has not been proven," Mr. Brown said.

He said his own visits to research centers showed that caution about the technical feasibility of an antimissile shield "was not universal, but very widespread."

He also said it would be "very hard" to build a system that could survive a nuclear attack, but added that it was not "completely unequivocal" that such survivability was impossible.

Mr. STEVENS. Mr. President, this is a somewhat incomplete account of what was discussed at the hearing. Both Secretaries McNamara and Brown supported continued SDI research. Their specific objections addressed the pacing of the SDI research effort and potential arms control implications. Although the New York Times reported Secretary McNamara's statement that spending be limited to about $2.5 billion, they neglected to add the context in which this suggestion was made. Quoting Secretary McNamara:

I maintain and believe that the technical experts will support this, that a very strong SDI program, strong enough to serve as a strong bargaining platform and strong enough to explore all the desirable technical avenues out of opportunity can be supported at $2.5 billion.

In a similar vein, former Secretary Brown addressed the impact of our arms control negotiating position if SDI funding were reduced significantly. Secretary Brown stated that "a major decrement in funding, halving in the funding by Congress would certainly make the negotiating process more difficult." When asked from what base Brown considered this impact to occur, he stated:

Yes, cutting it in half (FY 1986) or even cutting this year's in half. The Soviets are clearly looking at what the Congress will do. They are now pretty sophisticated. This is new style Soviet leadership. They watch what the Congress does. They try to influence Congress. They try to influence public opinion. They would certainly like to see the strategic defense program, about which they worry for some good reasons and some bad reasons, decrease without having to pay anything for that. If the Congress were to level it or decrease it, that would certainly reduce the price they might be willing to pay.

Secretary Brown primarily addressed himself to the technical feasibilities and the ability of a research and development program, like SDI, to efficiently utilize funds appropriated. While he did conclude that budget growth much in excess of 25 percent might be excess to the technical ability to use such resources, this position argues favorably for a level of funding approximating $3.5 billion for SDI related research. When discussing the level of funding which could be efficiently utilized, former Secretary Brown stated "if you are now at $2.7, and that is not expenditures, that is obligational authority, 25 percent would be say $3.25 to $3.5 billion."

Secretary Brown also commented on the effect reductions in SDI funding would have on our arms control negotiations. He argued, accurately, I might add, that perturbations in the budgetary resources dedicated to this research are not particularly relevant as long as the thrust of the President's initiative remains intact to keep the Soviets at the bargaining table. With regard to the SDI funding level, Brown stated:

If Congress were to level it or decrease it, that would certainly reduce the price they—the Soviets—might be willing to pay. On the other hand, the difference between appropriating $4.8 billion and $3.3 billion is not going to be seen by them as greatly reducing their concerns.

The New York Times faithfully reported McNamara's and Brown's criticisms, but failed to mention the comments by these experts pertaining to the impact on the arms control negotiations. I do not believe the views of the two former Secretaries of Defense argue against congressional support for SDI. At a minimum, Secretary Brown's testimony supports a level of funding between $3.25 billion and $3.5 billion as sufficient to ensure an efficient management of the SDI program and keep the SDI issue on the table at Geneva.

□ 1100

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is now closed.

UNIFORMED SERVICES RETIREMENT COST REDUCTION ACT

The PRESIDING OFFICER. The Senate will now resume consideration of S. 2395, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 2395) to establish a revised retirement system for new members of the uniformed services, to revise the method of determining cost-of-living adjustments under the revised retirement system, and for other purposes.

The Senate resumed consideration of the bill.

Mr. GOLDWATER. Mr. President, yesterday a hold was put on this piece of legislation and we did not learn of the withdrawal of that hold until late last evening. Consequently, the two members of our committee who would handle the personnel problem are off on different duties, so it probably will be another 20, maybe 30 minutes, before I feel adequately capable of going forward with this piece of legislation. So if anybody wants to utilize the time in between now and then, I will be very happy to yield that time to them.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. I know the Senator from Illinois has an amendment he is going to propose to the military retirement bill. Would the Senator want to utilize this time? We have about 20 minutes of down time now while waiting on a couple of Members to come over and manage the bill. Would the Senator from Illinois wish to go ahead and discuss his amendment now? We would

prefer not to lay it down; we would like to have the opening statements first and proceed in an orderly fashion, but we would like to expedite it by going ahead and having him discuss his amendment if he chooses to do so.

Mr. SIMON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. I thank the Senator from Georgia and the chairman of the committee, Senator GOLDWATER. I would be pleased to discuss my amendment for a short time right now. I do not think it is an amendment that should require lengthy discussion. It is fairly simple. And then when we get to presenting the amendment, I will maybe use another 3 minutes so Members will understand what the amendment is at that point.

What my amendment does is relatively simple. It changes the bill so that we give the full cost-of-living increase to those who enlist after the effective date of the bill but does not compound the cost-of-living increase.

Now, what does that mean? Let us say that you retire and you get $100 and there is a 5-percent cost-of-living increase. Then you get $105. The second year, if there is a 5-percent cost-of-living increase, we now calculate on the basis of $105. What I do is go back to the $100 base to calculate the second and succeeding years. Eventually, while you give the full cost of living, by not compounding you do two things. One is you save a significant amount of money. You save about a billion dollars a year, according to CBO, 20 years from now, and the second thing you do that I think is equally significant is you have a deflationary factor. Compounding becomes dangerous when we have inflation. Now, I hope we do not have inflation any time in the future. But the reality is none of us know whether or not we are going to have inflation. And so this amendment is one which says we are going to give you your full cost of living but we are simply not going to compound it.

Ninety percent of military retirees take a second job after they retire. The average retirement age for enlistees is 39. It is 42 for officers.

What we do through this amendment is save a significant amount of money without impairing enlistments. And I would point out that the Congressional Budget Office—and I have to say I do not know how they calculate these things, but however they calculate it, they say we might reduce enlistments 8,000 personnel a year. In terms of a 2.2 million armed service, that is almost a nonexistent factor. In fact, I do not think it is going to impair enlistments at all. I do not think that when people enlist in the Army, Navy, Air Force, Marines, or Coast Guard, they ask, "Are you going to compound my cost-of-living increase?" I do not think it is a factor.

□ 1110

Here is a very practical way for us to save a billion dollars a year down the road and at the same time have an anti-inflationary impact. So I hope my colleagues will permit us to go ahead. I do not think it works an unfairness on anyone.

While people in the military are not being overpaid, it is still a heck of a lot better than when I was a buck private in the Army. As I recall, we got $75 a month. But there are advantageous. Unlike other branches of Government or other systems, the military does not pay into their retirement plan.

The basic argument is simply this: We do not discourage people from enlisting. We save some money. We do not work an unfairness on anyone.

The argument can be made: Why do it on this program and not on other retirement programs? The reality is that I think we should be looking at this on all retirement programs. But it becomes much more significant in the military retirement program because you have so many years. If the average enlisted person retires at 39 and lives to be 79 or 75, you have 35 to 40 years of compounding. So it becomes a very costly thing.

We are spending a lot of time around here trying to figure out how we can save money. Here is a practical way of saving money without doing harm to anyone.

We are not going to save money this fiscal year; we are not going to save money next fiscal year. But, according to CBO, starting next year, we will save about $1 billion a year and not cause harm to anyone. I hope we can move in this direction, and I think we will do a favor for the Nation when we do, and not impair the military one iota.

So I hope my colleagues will adopt my amendment when we get to that point in the discussion here.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MURKOWSKI). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1110

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, what is the order of business?

The PRESIDING OFFICER. The bill is presently open for amendment.

Mr. GOLDWATER. Thank you. That is S. 2595?

The PRESIDING OFFICER. The Senator from Arizona is correct.

Mr. GOLDWATER. Mr. President, on April 16, the Armed Services Committee voted to report to the Senate a bill to alter the military retirement system for personnel entering the service in the future. I want to emphasize that—in the future. Those people who are now in service are what we call grandfathered. This legislation will not affect them a bit. I lay before you today that bill.

□ 1130

I will briefly explain its major features. First, the bill would reduce the multiplier used to determine retired pay from 2.5 percent per year of service to 2.1 percent for each of the first 20 years. Thereafter, the multiplier would be 3.1 percent for each year after 20 years of service up to a maximum of 75 percent of the average high-three of basic pay at the 30-year-of-service point. Additionally, the bill will change the cost-of-living adjustment formula for those who come under the bill to provide annual cost-of-living adjustments of a percentage amount of the change in the Consumer Price Index minus 1 percentage point. At the 40th anniversary of service, when retirees begin to reach old age, the retired pay will be restored to the level it would have been if full CPI cost-of-living adjustments had been paid. The bill would continue to provide for cost-of-living adjustments of CPI minus 1 thereafter.

Mr. President, I do not like bringing this kind of bill to the floor. I said last year when my committee decided to start work on the military retirement system, that the men and women in uniform should not have to be the ones to suffer from cuts in the defense budget. It does not take much tampering with military retirement before people in uniform begin to vote with their feet. The real harmful effect of tampering with retirement is that it is your most qualified people who get the picture first—those that you need the most if our Armed Forces are going to be ready to defend the Nation.

But at the same time, Mr. President, Congress has been talking about cutting military retirement for 10 years or more. The real harm we do to morale in the Armed Forces by talking about military retirement cuts may well outweigh the harm we will do by actually making changes to the system, if that will be the end of it. I hope that if this bill is enacted, we will hear no more about cutting military retirement because I promise you that there is only so much you can expect military personnel to take, and we are getting close to that point.

Mr. President, Senator WILSON, the chairman of the Manpower and Personnel Subcommittee, and Senator GLENN, the ranking minority member

of that subcommittee, have both spent a full year working on this issue. They both have operated on the assumption that Congress must be fair to military retirees and that fairness is far more important than how much can be cut out of military retirement. Neither of them was especially happy with the bill that came out of the full committee and I know they plan to offer an amendment to make some minor changes to the bill. Mr. President, I want to commend both Senator WILSON and Senator GLENN for their service and hard work on this issue. I look forward to hearing their comments and to listening to the debate.

Mr. President, I have just one more thing to say. There is presently a requirement that military retirement reform be completed by June 1—I repeat, June 1—or the Secretary of Defense will have to start removing hundreds of thousands of military personnel from active duty and the Reserves. How we got ourselves into this mess is just another example of the way we operate around here. Now we can either debate military retirement and make decisions and go to conference before that June 1 deadline, or we can let this bill become bogged down. I hope we will not do that because if we do, we may find that this bill is not on the fast track that everyone seems to think it is on. I am not going to say anymore about that; it is up to you. But it would be a real shame if the Senate sits here and helps dismantle the finest and most ready military force we have ever had because we cannot restrain our urges to attach amendments to this bill.

Mr. President, Senator NUNN is here, and I would like to ask if he has any comments to make before we call on the chairman and the ranking member.

Mr. NUNN. Mr. President, I support this bill. As the chairman has already described, I do so reluctantly. No one likes to deal with the subject of reducing any kind of retirement benefits. I think it ought to be stressed, though, clearly and loudly, that this bill does not reduce the benefit of any military retiree who is already retired, nor does it reduce the benefit of any active duty member today. This bill is entirely prospective in nature. It will affect the benefits of those who join the service after the date of enactment.

It does not affect the benefits of any in service today. So it certainly should not affect retention. It should not affect retention one iota because it is prospective in nature. It is one of those things we have to do as part of our unpleasant duties to get the budget under control.

This mandate to save $2.9 billion originated on the House side. It came out of conference last year. Our conferees, after a great deal of debate, decided to come to this figure. We came to it in good faith with the House. I feel, as a member of this committee, we have an obligation to save this money based on the authorization bill last year. So we are doing what our law requires.

There may or may not be amendments on the floor offered which would reduce the savings in this bill. If there are amendments that reduce the savings, I would have to say in advance that I intend to oppose those and I intend to vote against them, not because they do not have merit but because we would not be fulfilling our duty here. We talk about doing something about the deficit. Now the question is: When it comes down to it, are we going to do it? So if there are amendments—and I hope there will not be—that would reduce the savings that we have in this legislation, I will feel duty bound to oppose those amendments.

I thank the chairman for yielding to me. I want to say that Senator GLENN and Senator WILSON have done an outstanding job in dealing with this difficult subject. They have had long hearings, and I have been in some of them as a member of the Manpower Subcommittee. This is one of those bills that is not easy to handle. You have an awful lot of people involved and a lot of emotion involved in any kind of retirement changes. They have done, I think, a very commendable job, and I congratulate both of them for their outstanding leadership. I know they will be handling this bill on behalf of both the Republican and Democratic side of the committee this morning.

Mr. DIXON. Mr. President, I wonder if I might make just a brief statement before my distinguished friend from California goes ahead with respect to what he and the Senator from Ohio want to do.

Mr. President, as has been pointed out by the distinguished chairman of the Armed Services Committee and the ranking member, we spent a considerable amount of time in committee devoted to this subject matter. The distinguished Senator from California and his colleague on this side of the aisle, the distinguished Senator from Ohio, had certain different ideas about what ought to constitute the method by which we treated military retirement in this bill. All of that was carefully considered in the committee.

Regrettably, the numbers in either of their alternatives did not meet the guidelines that we were directed to conform to this year. As a consequence of that, it was my motion in the committee, Mr. President, that ultimately resulted in this bill being reported to the floor in the form that it is in now.

I would simply like to bring this to the attention of the Members of the Senate. Last year, in the fiscal year 1986 DOD Authorization Act, Congress took steps designed to require DOD to submit to Congress legislative proposals to change the military retirement system. The act placed a ceiling on the total amount of dollars that could be obligated from the military personnel appropriation accounts in each service for basic pay and retirement accrual costs in fiscal year 1986. This ceiling on obligations was $2.9 billion, or 16 percent below the level required by present retirement entitlements, basic pay rates, and force size requested in the fiscal year 1986 defense budget for military basic pay and costs.

In order to live within this obligation ceiling in fiscal year 1986, DOD must either make reductions in the size of the current military force or Congress must reduce the fiscal year 1986 military retirement accrual charge by changing the current military retirement entitlement for future retirees.

As a consequence of that, Mr. President, what we have here—and I think all of us have expressed that we have it here with some reluctance—is a bill that meets that $2.9 billion threshold requirement. For that reason, it would be the intention of this Senator, as a member of the committee, to support the chairman of the committee and the ranking member and others who I think will oppose various amendments that would adversely affect the adoption of this bill in its present form.

□ 1140

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Mr. President, more than a year ago I offered an amendment during a meeting of the Armed Services Committee, an amendment to the 1986 Defense Authorization Act, to set in motion a comprehensive review of the military retirement system. I did not offer that amendment purely for the purpose of saving money, although as you have heard we have been under an injunction to do just that: to save money, to reduce retirement, and to reduce the Federal deficit.

I did not offer that amendment or that request for a pursuit of this subject, the investigation, of how we might perform retirement purely because I thought the system was overly generous. That was not my motive. I pursued it and sought an amendment to the system because I thought that men and women who dedicated a career of service to the Nation in uniform deserved a fair and equitable retirement system when completing that career.

It was not purely to reduce funds that this investigation had been undertaken. Rather, it was time to undertake a complete review of military retirement as part of the larger com-

pensation program of the All Volunteer Force; to determine if it was appropriate to reduce the level of dollars spent for military retirement in light of the increases and improvements that have been made in other segments of the military compensation system, and to determine if some retirement dollars could be focused more on up-front compensation—in other words, if there might not be a more realistic shift more repsonsible to the needs of military personnel and their families at the same time that we sought to make changes to, in part, relieve that budget deficit.

The first direct result of that investigation and the amendment that I offered at that time was to make it possible for Congress to authorize a 3-percent pay raise for military personnel effective October 1, 1985, rather than January 1, 1986, as had been proposed to the amendment.

The second result was that the Manpower and Personnel Subcommittee which I chair, and which my friend, the distinguished Senator from Ohio, as the ranking member, conducted a detailed and lengthy review of the military retirement system. That review began with 2 days of hearings during which the subcommittee heard from Members of the Senate, from the Department of Defense, from each of the military services, from the General Accounting Office, and from the Congressional Budget Office as well as from a number of interested organizations and individuals.

Following those hearings, the subcommittee reviewed the major studies of military retirement which had been conducted over the past 15 years. These studies included those of the President's fifth quadrennial review on military compensation; the President's private sector survey on cost control, better known as the Grace Commission; the Defense Manpower Commission; and the President's Commission on Military Compensation, better known as the Zwick Commission.

Additionally, the subcommittee received a proposal drafted by Senator SIMON, as well as two proposals drafted by the Department of Defense as required by the Department of Defense Authorization Act of 1986.

Among the issues raised by these studies and proposals, and reviewed by the subcommittee were:

First, whether there should be an early withdrawal or lump-sum feature included in the system;

Second, whether there should be an integration or retired pay with the Social Security benefit earned as a result of military service;

Third, whether there should be an early vesting feature added to the system;

Fourth, whether the immediate annuity of 20 years of service should be retained or whether that annuity should be available only after 25 or 30 years of service;

Fifth, whether the full Consumer Price Index cost-of-living adjustment formula should be changed;

Sixth, whether there should be different retirement formulas for officers and enlisted personnel;

Seventh, whether the high 3 years' average basic pay should be retained as the basis for computing retired pay;

Eighth, whether the present system could be reduced in any manner without having unacceptable adverse effects on the number of high quality personnel who would voluntarily elect to remain in the service and make it a career;

And, ninth, whether the present system could be reduced in any manner and still provide a fair and equitable retirement system for those who dedicate the most productive years of their lives to serving the defense of our Nation in uniform.

Through this past year, and in fact since 1979, the Department of Defense and the military services have almost constantly asserted that no changes could be made to the present system without unacceptably harming the All Volunteer Force and without unfairly treating those who would retire under any changes in the system. After a year's study of all these issues, I do not agree with those assertions.

I might say that the single exception to that is that some within the Navy have themselves a volunteer plan very similar to the fifth quadrennial review. It is deserving of serious attention. Regrettably it has not yet enjoyed that attention. But I will say more on that later.

But the question, Mr. President, is can the military retirement be changed and the retirement benefits for those entering the service in the future—again, like those who have preceded me, I underscore "in the future"—be reduced without treating those personnel unfairly and without unacceptably reducing the number of personnel who will wish to continue to make the military a career?

The bill before the Senate today is an effort to reduce costs. It reduces costs. It will reduce the total cost of military retirement by more than 16 percent or about $2.9 billion a year if it does not undergo amendment. And those are in 1986 dollars, and uses 1986 actuarial procedures.

Mr. President, I believe that reductions can be made in the military retirement system in a way that will not be unfair, and in fact it is possible by a change that we are not considering today regrettably to do so in a way that distinctly advantages the military family, the military retiree, both officer and enlisted.

I also believe that military retirement, were it correctly viewed, could be truly reformed. Unfortunately, the bill before the Senate today which you have heard already damned with faint praise by the chairman, and you will hear it damned with faint praise by others—the ranking member from Georgia has expressed something less than wholehearted support for it. He is right. This is not an easy or a pleasant process.

The bill before the Senate today does not in my view represent the kind of reform that we really should have before us. It represents a reduction in benefits, and the argument is that the reduction in benefits can be made without unacceptably damaging the services, without persuading enough who otherwise might make it a career to change their minds.

But I do not think it is really reform even though I think that claim is probably valid. Only time will tell. We make these judgments based on actuarial projections. The projection is that this pending proposal for a reduction in benefits will have a relatively small effect.

□ 1150

But I think that we have not completed this business and will not when we have acted on this bill today. Real reform requires additional effort. I say that what we are doing today is unfortunate because we did have an opportunity to bring about meaningful reform of the structure of the military system which would have saved the taxpayers about $2 billion a year in 1986 dollars while providing a retirement option that I am convinced would have been truly attractive to our military personnel.

Such reform could have been accomplished by a proposal first described by the President's fifth quadrennial review of the military compensation and which incorporated a lump-sum payment which would have vested at the 20th year of service point.

Under that proposal, military members who served at least 20 years would become entitled to lifetime monthly payments of almost 25 percent less than under the present system. What would have made it attractive to them was the offsetting advantage that they would have received in a lump-sum payment. In order to offset the negative effects of the substantial reduction in monthly retired pay, military members who served at least 20 years would be entitled to a one-time payment of three times annual basic pay for enlisted personnel and two times annual basic pay for officers.

I repeat, this could have been achieved and could be achieved at a savings to the taxpayers of $2 billion per year.

Under today's pay scales, it would provide a lump-sum payment for en-

listed retirees at the time of retirement amounting to $57,000; for officers, $83,000.

Mr. President, that sounds like a lot of money, but the overall result of the change would be an 11-percent reduction in the overall cost to the Nation of military retirement. But unlike almost all the other proposals for changing military retirement over the past 10 to 15 years, including the bill pending before the Senate today, this proposal would have not only made substantial savings in military retirement costs; it would have substantially improved retirement for military personnel. This proposal would have fulfilled many of the needs identified by our military personnel as critical to them at the time that they make the transition from active duty to retirement. It would have permitted them to enjoy an ability to finally be able to afford to buy a home after having moved 12 to 15 times during a 20-year military career. That is the average, 12 to 15 times during a military career.

It would have allowed them to enjoy an ability to attend school and gain professional training for a second career immediately after retirement but while still supporting a family in order to make that transition and turn military skills into truly marketable civilian skills. It would have provided the retiring father or mother an ability to establish a small business after retirement in order to continue to support a family when one's military skills practiced for the last 20 to 25 years do not easily translate into the civilian employment market.

It would have permitted the retiree the ability to send children of college age to college, and to do so while making this difficult transition.

It is in this transition period that the greatest need actually exists. This has been the repeated consistent testimony of the representatives of virtually every organization that has come before this subcommittee.

Mr. President, I found it surprising and in fact regrettable that while this approach to military retirement was endorsed by some of these very organizations, the Noncommissioned Officers' Association of the United States and the National Association of Military Families, it was strongly opposed by each of the services. I say this is regrettable because rather than support a proposal which I believe would be welcomed by a vast majority of the men and women in uniform, the services elected to interpose their own political judgment as to what would be possible, politically, and on that basis made the decision to oppose what was clearly a highly desirable alternative to not only what is being proposed today but to what the Departments themselves propose in response to a requirement of the 1986 authorization bill.

It is regrettable that they chose to do so, Mr. President, because their political view was predicated on a view of Congress that I hope is wrong. What they thought, to put it in simplest terms, was that the 25-percent reduction in monthly pay would become a fact but not the lump-sum payment. They were afraid that that figure of $57,000 for enlisted retirees and $83,000 for officers would seem like too large a figure to be politically palatable to people running for reelection.

Well, perhaps they are right. I hope they are wrong.

It is clear that it is an idea whose time has not yet come and that more time needs to be taken in order to sell this proposal, which would save the taxpayers money and provide for that very difficult transition the necessary funding to allow far greater options than can be enjoyed by the current military retiree.

But the view of the services was that if Congress were to be persuaded to enact such a proposal it would ultimately renegotiate on the lump-sum portion.

Mr. President, I find several things regrettable in the scenario that has unfolded in this year.

First and most important, it is regrettable that in this year we will miss the opportunity to truly reform military retirement while saving the American taxpayers billions of dollars.

Second, it is regrettable that the services felt it appropriate to take that view because by doing so they have been guilty, in my judgment, of a self-fulfilling prophesy; they have in fact contributed to this alternative which, in my judgment, is distinctly second best and perhaps third best.

It is necessary that we act for the reason the chairman mentioned. If we do not act, then by virtue of the so-called Johnston amendment to the appropriations measure of last year the Secretary of Defense, as of the first of the next month, is compelled to discharge hundreds of thousands of uniformed personnel, a result which no one intends and no one desires.

I find it regrettable that we are placed in this position.

Fourth and finally, I regret that the services may have been right and that at least in this year Congress is not ready to really reform military retirement in the way that it deserves and is focusing instead purely on cost reductions.

Mr. President, I yield to no man or woman on this floor in my sense of urgency of the deficit reduction. I have told my administration that I thought they were spending more time than they should on tax reform and less than they should on deficit reduction. I made a rather unscheduled appearance on this floor in the wee hours of one morning last year to demonstrate exactly how important I felt it was to bring about deficit reduction.

But, Mr. President, there are ways to bring it about that are more responsible than others. I would suggest to those who may wish to bring amendments today that would have the effect of savaging military retirement that they are engaged in an unwise course and it remains unwise and they cannot justify it even if they attempt to do so in the name of deficit reduction.

Having said that, Mr. President, let me turn to the bill now before the Senate.

It is my intention in the coming year to work to bring about a consensus in this Congress so that the view that has been reflected on the part of the services will be proved wrong, so that we can bring about true reform. But that is not what is before us now. What is before us now is the exigency to act before the first of the month in a way that will, in effect, reduce the cost of military retirement and do so in a way that is as responsible as possible, given the limited framework in which we are compelled to operate.

□ 1200

Having said all that, Mr. President, let me turn to the bill now before the Senate. On April 16, 1986, the Committee on Armed Services voted to report to the full Senate the bill before you today. The provisions of this bill will make changes in the military retirement entitlement structure, which if they had been enacted at the beginning of this fiscal year would have reduced defense budget authority, defense outlays, and Federal budget authority each by $2.9 billion. Since this bill does not reduce military retirement for those persons already retired or even for those now serving in the uniformed services, it has no short-term effects on Federal outlays. Let me repeat that again, there will be no short-term effects on Federal outlays because the bill does not reduce retirement for those already retired—they are grandfathered—or already serving in the uniformed services. They are grandfathered.

It has no short-term effects on Federal outlays.

Let me repeat that: There will be no short-term effects on Federal outlays, because the bill does not reduce retirement for those already retired or already serving in the uniformed services.

For those who enter the service after the bill is enacted, their military retired pay at 20 years of service would be reduced from the present 50 percent of the high 3 average of basic pay to 44 percent of that high 3 average. Each year of service after 20 years would add 3.5 percent to that high 3 average, up to a total of 75 percent of

the high 3 average at the 30-year-of-service point.

Additionally, the bill would alter the cost-of-living adjustment formula for those entering the service after enactment of the bill. Presently, the law provides for a once a year cost-of-living adjustment reflecting the full change in the Consumer Price Index. Under the bill, this would be altered by providing that the annual adjustments would be the percentage change in the Consumer Price Index less one percentage point. Under this revised formula, the retired pay base will be restored one time, at the 40th anniversary of service—the 40th anniversary of the date of entering the armed services—to the point it would have been if full CPI increases had been in effect. Finally, as now pending before the Senate, the bill would provide for CPI minus 1 thereafter. Shortly, I will join with Senator GLENN and others offering an amendment to this one particular segment of the bill to provide full CPI cost-of-living adjustments after the 40th anniversary of service when military retirement has truly become an old age pension like Social Security.

Mr. President, I shall support this bill's provisions on military retirement reluctantly, with the amendment I have just described, which Senator GLENN will set forth at greater length. It is a step in the right direction. I would have preferred a different step and indeed, I do intend to pursue a different step. But this one will save the taxpayers billions of dollars in the future while still making it possible to retain the high-quality career force that we need.

Mr. President, in closing, let me say that I think it is important to end the debate about reducing military retirement, in order to reduce the kind of uncertainty that has led to people leaving the service, perhaps under a misapprehension, but nonetheless because of the kind of lingering uncertainty that inevitably accompanies this protracted debate. Yet, as seriously as I take that point, as emphatically as I hope to make it to my colleagues when we have brought about true reform, I tell the Chair that we have not yet reached that point. We need to act today on the pending proposal. I hope we will adopt only the Glenn-Wilson amendment. I hope that we will not be compelled to resist a great many amendments that would undo the work of the subcommittee.

I simply remind those who have heard this statement that we came to this not unanimously, but after a protracted and very careful study of a number of other efforts, the efforts of many who had studied this subject in great detail over a period of years.

Many high-quality personnel have left the service because it appeared that Congress would decimate the retirement that has been a part of their expectation in addition to the satisfaction they have received from years of dedicated service in uniform to their Nation.

While I intend to continue to work for no-cost improvements in military retirement, and specifically for the addition of a feature providing for a long-sum payment option, I shall resist those additional efforts that seek to savage retirement or which seek to add to it that which will provide for irresponsible cost increases. I think that what we have before us is a step in the right direction. I urge that we get on with it so that we may get on with the other business before this body.

We owe to the uniformed personnel of this Nation a debt of gratitude that we made clear in part by the way in which we deal with retirement. We owe no less to our Nation than to see to it that we have that kind of quality All-Volunteer Force with reasonable expectations predicated upon the service they have done.

Mr. President, I yield now to the distinguished ranking Member, the Senator from Ohio [Mr. GLENN].

The PRESIDING OFFICER (Mr. EAST). The Senator from Ohio is recognized.

Mr. GLENN. I thank the Chair.

Mr. President, I am pleased to join my colleague, the distinguished Senator from California [Mr. WILSON], in bringing to the floor the Uniformed Services Retirement Cost Reduction Act of 1986.

Having said that, I would have preferred that no such bill be brought to the floor at all, that no changes be made, because I think the military retirement program has been working well as an incentive for recruitment and retention. The Pentagon preferred no changes and I preferred no changes, but that is not part of the ground rules under which we operate.

Mr. President, we have an enormous national debt. The Senate Armed Services Committee was proscribed, like other committees, on what our role would be in trying to bring that debt under control. Our subcommittee was given the onerous task of cutting out of military retirement some $2.9 billion.

I would have preferred a measure that I proposed in committee that would have cut $2.1 billion out of military retirement, because $2.9 billion was an arbitrary figure. This figure was not based on anything except prorating down to the different committees what we thought could be cut. It had no basis in what might happen to recruitment retention, and morale. Picking a figure out of the sky is no way to attain our goals. But these are the ground rules under which we are operating.

This legislation is the culmination of over a year's careful study and analysis by the Manpower and Personnel Subcommittee of the Armed Services Committee, by the Department of Defense, and by the Congressional Budget Office and the General Accounting Office.

It has been studied and analyzed by the Department of Defense, the Congressional Budget Office, and the General Accounting Office. Not everyone involved in this process supports the bill in the form in which it appears before the Senate today. There are changes I would like to see made in the bill. As a matter of fact, as the distinguished Senator from California has indicated, we shall probably have an amendment to the bill today relating to the cost-of-living allowance mechanism. But, as reported by the Armed Services Committee, this bill represents the very carefully considered consensus opinion of the Armed Services Committee on the issue of military retirement reform.

□ 1210

This bill will make prospective changes. I emphasize the word prospective, which means that nobody in the service right now will be affected by whatever we do. This bill will apply to new people coming in, and therefore will only have an effect on those people 20 years out when this bill takes effect. But we still have to put the money for the retirement accounts in between now and then.

But I repeat, all the concern that has been expressed in service publications, magazines, and expressed to us personally on the committee and to me personally in my office by people in the military now or those retirees who think we are about to gut their retirement system that they depend on, they have nothing to fear because this bill is prospective only.

This bill makes prospective changes to the military retirement system that will allow us to continue to properly man our military services and still provide an equitable retirement system for military members. It will also reduce the future costs of the military retirement system.

I indicated that I will probably offer an amendment to one part of the bill. I believe, however, that the overall bill is well crafted and sound; it is the best job we could have done, and I will support it. I urge my colleagues to do likewise.

Mr. President, I want to take a few moments to briefly describe the current military retirement system. Today, military retired pay is calculated on the basis of the active duty basic pay of the highest grade held times 2½ percent for each year of service. There is no retirement vesting—in other words, there is no qualification required to be put on the retired rolls and receive pay—prior to 20 years of

service. You cannot retire earlier than 20 years. But after 20 years of service a service member becomes eligible to receive 50 percent of his or her basic pay—not total active duty pay, just basic pay. That retirement pay then continues to increase 2½ percentage points for each additional year of service above 20 years to a maximum of 75 percent of basic pay for 30 or more years of service.

The difference between the amount that is received while a person is on active duty and what he or she receives upon retirement is not that well understood by most people. Total pay while you are in the service includes not only basic pay for the rank held, but also a quarters allowance and a subsistence allowance. Now, these forms of pay have a tax advantage in that they are nontaxable.

In addition, many people in the service who are on hazardous duty earn flight pay, submarine pay or hazardous duty pay of one kind or another. This is also not considered part of basic pay.

Now, basic pay for a retiree is normally somewhere between 65 and 70 percent of the total compensation that person received while on active duty receiving full pay. So it is not a matter of receiving so much a month and multiplying it by the multiplier I just described and classifying these people as living high off the hog. That is not the case. We are talking about a percent of that total and it is only the basic pay that is considered when we are talking about computing retirement pay.

Prior to 1980, military retirement pay was calculated on the basis of the basic pay of the military member on the day of retirement. Now, this gave rise to some things that probably were not so good because we had many so-called tombstone promotions—promotions given to people in the last few months of their career which would raise their retirement pay.

Now, that was changed in 1980. In 1980 a change was enacted which required that military retirement pay from that time on would be calculated on the basis of the average of the high 3 years of basic pay for individuals entering military service after September 8, 1980. That change alone was estimated by the Department of Defense to have reduced the future costs of military retirement by some 13 percent. I supported that; I think that it is reasonable not to make so-called tombstone retirements and increase retirement pay arbitrarily, whether deserved or not. That happened in too many cases.

Military retirees now receive one cost-of-living adjustment, or COLA, each year, which under current law must be equal to the annual COLA for Federal civilian retirees. Military retirement is a noncontributory system. However, while on active duty, military members contribute to the Social Security system and thereby earn Social Security retirement benefits. But these two systems are entirely separate. The receipt of military retirement pay has no effect on one's Social Security benefits, nor does receipt of Social Security have any effect on one's military retirement benefits.

In analyzing the military retirement system, it is very important that people understand that this system serves a dual purpose. First, it is an integral part of the military compensation package and serves as a retention incentive to encourage people to stay in military service. If we were to cut out retirement pay, what incentive is there to give a full 20 years of service to the Federal Government? It is not always a pleasant life. It may involve combat. It may involve long periods of time away from your family—it does for most military members. I know that all too well. I spent several years overseas and almost had to get reacquainted with my wife when I came back.

You put up with some things which are not very pleasant. So you need an incentive to get people to stay in the military at least 20 years. That is one purpose of the retirement system.

But, Mr. President, the military retirement system is also an important forced management tool. Through retirement and separation the military services keep the age, skill, and experience levels of their forces in balance with the force profile—the force requirements necessary for them to carry out their national defense mission. That is a highly important difference between the military career and the civilian career.

Now, there have been two major criticisms of the military retirement system over the years. The first is that the system as a whole is too expensive. OK, fine. I am one who wishes we did not need a single nickel spent for military service, equipment, retirement, or anything else. I wish we lived in a perfect world. But, unfortunately, we do not. The system is expensive.

I saw some figures just a couple days ago that some 63 percent of our military dollars appropriated goes for personnel compared to the 9 percent the Soviets spend on personnel. So is it expensive? You bet it is. But it is expensive to live in a democracy, too, and that is one of the things we have to consider here.

Critics argue that with the increases in military compensation under the All-Volunteer Force military, retirement benefits are higher than necessary to retain military members in sufficient number to man the career force of the military services. These critics also argue that bonuses and special pay targeted to personnel with critical skills are a more cost-effective retention tool than across-the-board retirement benefits.

The second criticism is that the current retirement system provides a large incentive for military members to retire after 20 years and does not provide sufficient incentive to encourage military members to stay in service for longer careers. Well, there are arguments to counter these criticisms.

For a number of years military retirement has been described as deferred compensation for the unique hardships of military life. I agree with that. When I was in the service that is exactly the way we looked at it. We did not look at retirement as something that was a freebie at the end of a career. You looked at it as though you were putting up with some deprivation and inconveniences. At that time, you put up with lower pay than our civilian counterparts because you had a decent retirement system to look forward to and it was regarded as deferred compensation.

□ 1220

In addition, military retirees remain subject to recall to active duty.

Finally, the military manpower management system is based on the need for a youthful and vigorous force and therefore must continue to have a mechanism like the 20-year retirement to keep the force from becoming too old or too stagnant.

Are people going to stay in for 20 years when they know that many of them will be bounced out because of this requirement to keep a young and vigorous force? The 20-year retirement keeps them in that long, but it also lets them know that they are subject to being weeded out.

So we do keep that young and vigorous force which the military must have. In that respect, it is different from almost every business in civilian pursuits, because that requirement to have the physical activity and the strength and vigor to pursue a military career is something that is not equalled, that I know of, in the civilian ranks.

Frankly, Mr. President, I am more in sympathy with the arguments in support of the current military retirement system than I am with the traditional criticisms of the military retirement system. Over the years, the current military retirement system has served the Nation well. Today we have a well-trained, capable and professional military force, and the military retirement system is one of the tools—not the only one—that have allowed us to build and sustain this force.

But I am also a realist, Mr. President. I think there is a strong consensus within the Congress to reform the military retirement system. It has been building for some years. Those of

us on the Armed Services Committee with the responsibility for legislative oversight of defense manpower recognize this consensus. The bill before the Senate today represents our effort to balance the Congress' desire to reduce the future costs of military retirement with our need to recruit and retain qualified men and women in our military services.

LEGISLATIVE BACKGROUND

Before discussing the details of the committee's proposal, I would like to briefly summarize the legislative process that resulted in this bill reaching the floor today and that requires us to complete action on a conference report so the President can sign it before June 1. That is a big order.

Last year, in the fiscal year 1986 Defense Authorization Act, Congress required the Defense Department to submit to Congress legislative proposals to change the military retirement system.

Section 666 of the fiscal year 1986 Defense Authorization Act placed a ceiling on the total amount of dollars that could be obligated from the military personnel appropriation accounts in each service for basic pay and retirement accrual costs in fiscal year 1986. This ceiling on obligations was $2.9 billion, or 16 percent below the level required by present retirement entitlements, basic pay rates, and force size requested in the fiscal year 1986 defense budget for military basic pay and costs. In order to live within this obligation ceiling in fiscal year 1986, the current fiscal year, DOD must either make large reductions in the size of the current military force or Congress must reduce the fiscal year 1986 military retirement accrual charge by changing the current military retirement entitlement for future retirees.

Section 667 of the fiscal year 1986 Defense Authorization Act required the Secretary of Defense to submit to the Congress two legislative proposals to change the military retirement system which, if effective on October 1, 1985, would achieve the required $2.9 billion in savings. Section 667 required that one of these proposals could not obtain savings by changes to the current cost of living allowance [COLA] adjustment mechanism for military retirement. This section also required the Secretary of Defense to report on the recruiting and retention impact of reductions in military retirement accrual costs ranging from $1.8 billion to $5.4 billion in fiscal year 1986, including the $2.9 billion options in the actual legislative proposal.

Mr. President, last year I opposed the idea of picking some savings target out of the air that would force us to make changes to the military retirement system without knowing what the impact of the changes might be. I was overruled by the full Senate on this issue. However, throughout our consideration of this issue, we have tried to determine what was best for the military services and the country without picking a savings target in advance.

In other words, I felt that in this area it is important that we not just whack away with a giant figure we are going to cut out, without knowing what the retention rates were going to be or what the effect on recruiting might be.

One responsibility that the Federal Government has is to keep our people alive, independent, and free; and that consideration is not amenable sometimes to the normal rigors of cost accounting. So, just to pick a figure out of the air and say that we will meet it, without considering what the retention or recruiting rates would be, is putting the cart before the horse.

In addition to these sections of the fiscal year 1986 Defense Authorization Act, the fiscal year 1986 Defense Appropriations Act included a provision dealing with fiscal year 1986 military retirement accrual costs. Section 8103 of this act provided that after May 1, 1986, obligations from the fiscal year 1986 military personnel appropriation accounts shall not exceed a rate in excess of the rate required to limit total obligations to the obligation ceilings established in the fiscal year 1986 Defense Authorization Act for fiscal year 1986. In the absence of legislation reducing future military retirement accrual costs by May 1, 1986, section 8103 would have required the Defense Department to begin reducing the military strengths of the services by several hundred thousand personnel in order to live within the current obligation ceilings on the fiscal year 1986 military personnel appropriation accounts.

To avoid a military manpower crisis in the Defense Department, on the same day it ordered reported the bill before us today, the committee ordered reported another bill extending the May 1 deadline in section 8103 of the Department of Defense Appropriations Act, 1986 for 1 month to June 1, 1986. This measure was attached to House Joint Resolution 220, which passed the Senate on April 23, 1986. It was agreed to by the House on April 29, 1986, and subsequently signed by the President.

We only have a short reprieve, however. We must complete action on this bill and get a conference agreement to the President by June 1, or the Defense Department will have to begin the onerous process of laying off hundreds of thousands of military personnel.

DEFENSE DEPARTMENT PROPOSALS

Mr. President, the Defense Department submitted the report required by section 667 of the fiscal year 1986 Defense Authorization Act to the Congress on November 15, 1985. This report included two legislative proposals that would change the military nondisability retirement system. Each of these proposals would have resulted in a reduction in military retirement accrual funding of $2.9 billion if they had been enacted into law by October 1, 1985. However, in transmitting DOD's report to the Congress, Secretary Weinberger indicated that the Defense Department was opposed to any changes to the current military retirement system.

The committee's review of military retirement began with 2 days of hearings on the Defense Department's report to the Congress. During these hearings, the committee heard testimony from witnesses from the Department of Defense and from each of the military services. The committee also heard testimony from witnesses from the General Accounting Office and from the Congressional Budget Office.

Following these hearings, the committee conducted a thorough analysis of the two legislative proposals to change the military retirement system submitted by the Defense Department. The committee also reviewed the major studies of the military retirement system conducted over the last 15 years.

COMMITTEE RECOMMENDATION

The committee bill recommends adoption of the so-called combination change to the military retirement system included in the Defense Department's report to the Congress. The term "combination" refers to a change in both the structural part of the system and a change in the current cost-of-living allowance formula.

□ 1230

The changes proposed by the committee are easy to explain and understand. For individuals who first enter military service after the date of enactment of this change, this proposal would provide 44 percent of the retired pay base, high 3 at 20 years of service instead of the current 50 percent, rising to the same 75 percent at 30 years of service that is available today. Instead of an annual full CPI COLA this proposal would provide an annual COLA of CPI minus 1 percentage point until the retiree's 40th anniversary of service. At that point the monthly payment would be restored to what it would have been had the retiree received a full CPI COLA from the time of retirement. However, after the one-time restoral the annual COLA will still be 1 percentage point less than the CPI increase for the remainder of the retiree's life.

Later on in this debate, Mr. President, Senator WILSON and I will offer an amendment to this COLA mechanism that will provide a full CPI COLA after the restoral at the 40th

anniversary of service rather than reverting to CPI minus 1 percentage point as provided in the committee bill.

At this point, I would like to emphasize a critical factor in the bill. The changes, as I said before and I would like to emphasize again, the changes in the committee bill are completely prospective, and would not affect the retirement benefits of anyone serving in uniform today. They will not change any factors as far as retirement benefits go for those already retired. Only those people who enter military service after the bill is enacted into law will be affected by these changes.

Another important factor to note is that the changes would apply only to nondisability Active duty and Reserve retirement benefits. The committee proposal has the effect of reducing the multipliers for Reserve retirement proportional to the reductions proposed for Active duty retirees. The change in the COLA mechanism also would apply both to Active duty and to Reserve nondisabililty retirement benefits. However, disability retirement benefits and survivor benefits would not change from current law under the committee proposal.

Mr. President, the committee bill achieves a reasonable and appropriate level of savings in future military retirement costs through a balanced combination of reductions to the retired pay multipliers and to the current COLA mechanism. This bill will result in annual savings of 16 percent in future military retirement costs. If it had been enacted on October 1, 1985, it would have saved the full $2.9 billion in fiscal year 1986 retirement accrual costs anticipated in the fiscal year 1986 Defense Authorization Act. However, the changes proposed by the committee do not cut as deeply into the base of military retired pay while unrealistically leaving the full annual CPI COLA intact as would the second, so-called structural change included in the DOD report, or as would the bill passed by the House which is based in substantial part on a structural approach.

The committee bill will encourage military members to stay in service beyond the 20-year point by steepening the slope of military retirement benefits between 20 and 30 years of service. However, this change does not reduce the 20-year benefit to the point that it is no longer a meaningful and equitable benefit for the more arduous enlisted skills and ratings.

Finally, Mr. President, it is important to note that all of the Defense Department witnesses who testified before the committee indicated that if Congress is going to enact legislation reforming the military retirement system, they would prefer the combination change included in the November 1985, DOD report to the Congress, which is the basis for this legislation.

Mr. President, the military retirement system has been the subject of debate for a number of years. The continuing uncertainty about the future of military retirement benefits has undermined morale in the Armed Forces, led many of our fine young men and women in uniform to pursue careers elsewhere, and created an atmosphere of distrust for the Congress by our service personnel. Through all the talk, they have not known what they could rely on into the future. So it may well be that this uncertainty has had more adverse effects on retention in the Armed Forces than would the changes to military retirement now recommended by the committee. In reporting this bill to the Senate, the committee intends to end the long debate over the appropriate level of benefits provided under the military retirement system so that we need not revisit the issue.

Mr. President, I hope the Senate can act expeditiously on this bill so that we can go to conference with the House and get a final bill to the President before the June 1 deadline. It is important to take all the dissention away from this. It is important to take the uncertainty away from it. It is very important to both the military services and the Nation that we do so and we do so promptly.

Mr. President, I yield the floor.

AMENDMENT NO. 1959

(Purpose: To express the sentiment of Congress regarding postponement of the award of a certain contract by the Department of Defense)

Mr. HARKIN. Mr. President, I have an amendment I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Iowa [Mr. HARKIN], for himself, Mr. DIXON, and Mr. GRASSLEY, proposes an amendment numbered 1959.

Mr. HARKIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

At the end of the bill add the following new section:

SEC. 13. CONGRESSIONAL POLICY REGARDING POSTPONEMENT OF A CERTAIN DEPARTMENT OF DEFENSE CONTRACT.

It is the sense of Congress that the Secretary of Defense should postpone the final award of a contract with respect to Defense Construction Supply Center Solicitation numbered DLA700-85-B-4-4607 (for the purchase of 178 crawler tractors) until Congress has enacted legislation authorizing appropriations for the Department of Defense for fiscal year 1987.

Mr. HARKIN. Mr. President, I am joined by my colleague, my neighbor from Illinois, Senator DIXON, and also my colleague from the State of Iowa, Senator GRASSLEY, in offering this amendment to S. 2395, the Uniform Services Retirement Cost Reductions Act.

I also want to thank my colleague from Illinois [Mr. SIMON] for permitting me to proceed, even though he has been sitting here patiently waiting to bring his amendment up.

Mr. President, this amendment, which is similar to a concurrent resolution approved unanimously by the House 2 days ago, expresses the sense of Congress that the Secretary of Defense should defer the final award of a contract for procurement of 178 Crawler tractors until the Congress completes consideration of the Defense Authorization Act for fiscal 1987.

The Department of Defense is prepared to award a $7.9 million contract for these tractors to Fiat-Allis North America, Inc. However, the Government of Libya holds a 15-percent ownership in Fiat SPA, the corporate parent of Fiat-Allis North America, and what would happen is the ultimate benefit from this award would go to the nation of Libya. I might also point out that Libya has two members on Fiat's board of directors.

So, Mr. President, this decision not only undercuts our campaign against international terrorism, but directly contributes to the loss of American jobs.

At the same time the Defense Department is prepared to offer this contract to Fiat, the American firm that was the low bidder on this contract—the next low bidder underneath Fiat—J.I. Case, Inc., has announced it is going to close three American plants, costing over 1,500 American jobs.

Two of those plants are in the quad cities area, Rock Island, IL, and Bettendorf, IA. The plant in Bettendorf now builds the same tractors the Defense Department has decided will be built by Fiat, whose parent company is, in turn, owned 15 percent by the Government of Libya. I do not think, Mr. President, we can underestimate the impact of this plant closure on the city of Bettendorf or on the city of Moline, IL. Case is Bettendorf's second largest employer, with about 650 production and salaried workers now on the job. The plant shutdown was the latest blow to an already devastated economy in the eastern area of Iowa, where unemployment has been in double figures for most of the 1980's.

□ 1240

So, Mr. President, how can we possibly justify sending the sons of those workers to fight a war against terrorism and against a terrorist regime that is being financed with their own taxpayers' dollars? How can we mount an

international campaign against terrorism while we are contributing to financing that same terrorist regime we are bent on defeating?

All this amendment would do is ask the Secretary of Defense to defer the award of this contract until the Congress completes its consideration of the Defense Authorization Act where I understand the Armed Services Committee is considering a proposal to preclude the awarding of this contract to Libya.

We all want to send a message to the administration, to our European allies, and to our own citizens that we are serious about terrorism, that we are serious about Qadhafi, that we are serious about economic sanctions, and that we are serious about making Libya the kind of pariah nation that it in fact is.

So, Mr. President, we want to ensure that our U.S. defense dollars do not end up in the coffers of Mu'ammar Qadhafi. I hope Senators will support this amendment which was unanimously adopted by the House just 2 days ago.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. DIXON. Mr. President, I rise in support of this amendment by my colleague, the distinguished Senator from Iowa. I have a bill presently pending, S. 2152, which is before us at this time in the Acquisition and Policy Subcommittee of the Armed Services Committee in which we provide that in the future, every company that attempts to do business with any agency of the U.S. Government must make a public disclosure of any interest held in the foreign company by any hostile nation.

The facts in this situation are that Fiat of Italy is 15 percent owned by Libya, and two members of the board of directors of Fiat are Libyans. In this circumstance, 178 small bulldozers would be purchased by the Marine Corps from Fiat unless we stop this contract.

I am very pleased, Mr. President, with the position taken by the Secretary of Defense the other day when Secretary Weinberger indicated that they were going to make every attempt to prevent the execution of this contract. I would just like to relate to my friends in the Senate the experience we had in the Acquisition Subcommittee on the day that the hearing was held on S. 2152.

The subcommittee was chaired by the chairman, the distinguished Senator from Indiana, Senator QUAYLE. Senator WARNER was there that day, the Senator from Virginia. Senator LEVIN of Michigan and myself were there. Senator QUAYLE has a similar bill to mine now pending in that subcommittee.

Certain members of the administration appeared before our subcommittee, and testified about the legislation. Frankly, they indicated there is some need for some kind of legislation. And I am happy to tell the Members of the Senate that I believe Senator QUAYLE and I have fully agreed on a bill that will accommodate the points of view of both of us so that we will have legislation that will be offered on the defense authorization bill that we both have agreed upon that I think addresses the problem for the future, and simply says in the future that any company that wants to do business with any agency of the U.S. Government has to make a full disclosure of any interest, or any substantial interest owned by hostile nations, and then the agency of government has to make a full report on that to the jurisdictional committees of the House and Senate before any contract would be entered into with at least a 30-day notice, so the Congress can take necessary steps in the future to prevent this sort of thing from happening.

I thought the interesting thing, Mr. President, when we had this subcommittee hearing a week or so ago was this: One of the representatives of the Defense Department who appeared before us as a witness said to us that they thought they had no legal authority to cancel this contract notwithstanding the known 15 percent interest by Libya in the company which would profit from this contract, to which my colleague from Michigan, Senator LEVIN, replied to the witness, "Are you telling me that we have the constitutional right to bomb Libya but we do not have the constitutional right to refuse to enter into a contract with a company that has a substantial interest owned by Libya?" The witness found that quite difficult to explain to us. I think every member of the subcommittee felt that there was no sensible explanation for that position.

So I hope we pass this resolution as a sense of the Congress—this has already passed the House—that supports the position of the Secretary of Defense, Mr. Weinberger, that we should not proceed with a contract that would benefit Libya.

I might say, Mr. President, for the information of the Members of the Senate, the interest owned by Libya is worth well in excess of $2 billion, and perhaps as much as $3 billion.

The President has asked our allies to present sanctions against Libya. We have presented our sanctions against Libya, and I think it would be a strange anomaly for us to now suggest that we ought to enter into a contract to buy 78 bulldozers from a company that has a 15-percent interest owned by that country which is hostile to the interests of the United States of America.

So I certainly urge my colleagues to support this resolution.

I think if we are calling upon economic interests in our country to cease and desist from doing business with Libya, if we are asking our allies to do the same, we ought not to sanction this kind of a contract.

I urge my colleagues to support the resolution.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. GRASSLEY. Mr. President, I rise in support of the amendment being offered by my colleague from the State of Iowa [Mr. HARKIN]. This amendment is identical to a concurrent resolution that passed the House of Representatives this past Tuesday. Briefly, the amendment expresses the sense of Congress that the Secretary of Defense should suspend the award of a contract for the sale of 178 bulldozers to the Marine Corps. This contract has been awarded to Fiatallis, a wholly owned subsidiary of Fiat of Italy.

For my colleagues who might not know, but who would be interested in knowing, the Government of Libya owns 15 percent of the Fiat Co. In addition to owning a substantial share of Fiat, Colonel Qadhafi is represented on Fiat's board by two representatives.

Mr. President, I believe that Congress ought to carefully weigh any transaction at this time that would have the effect of financially benefitting Libya. This amendment does not prohibit the contract from going through, it merely delays it until after Congress has completed consideration of the fiscal year 1987 defense authorization bill in order to give Congress an opportunity to consider the implications of the purchase more carefully.

I commend my colleague from Iowa for offering this amendment, and I am pleased to join him as an original cosponsor of the amendment. I urge the adoption of the amendment.

Mr. WILSON. Mr. President, this amendment deals with matters that are under the jurisdiction of the Defense Acquisition Subcommittee rather than the Manpower and Personnel Subcommittee. I am told that the chairman of that subcommittee, Senator QUAYLE, is enroute to the Chamber.

We could, I suggest, do one of two things. If that is agreeable with the Senator from Iowa, we could simply, by unanimous consent, temporarily lay aside his amendment to take it up later in the day.

The PRESIDING OFFICER. Is that the request the Senator is putting?

Mr. WILSON. I ask unanimous consent.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. WILSON. Mr. President, as I understand it, the pending business is the bill itself.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. WILSON. I thank the Chair.

Mr. GLENN. Mr. President, if the Senator will yield, might I ask a question, please?

Mr. President, did the distinguished Senator from Illinois submit his amendment or just make his statement?

Mr. SIMON. I made a statement. But I have not submitted the amendment, and I did not want to do that until the Senator was here.

Mr. GLENN. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

AMENDMENT NO. 1960

(Purpose: To amend the cost-of-living provisions applicable to the retired pay of persons who first enter the uniformed services on or after the date of enactment of the new program)

Mr. SIMON. Mr. President, I offer an amendment. It is at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. SIMON] proposes an amendment numbered 1960.

Mr. SIMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, beginning with line 17, strike out all down through line 3 on page 12 and insert in lieu thereof the following:

"(B) shall increase the retired pay base of each member and former member of the armed forces entitled to such pay who first became a member of a uniformed service (as defined in section 407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Reduction Act of 1986, other than a member or former member retired for disability under chapter 61 of this title, by the same percent by which the retired pay of members and former members referred to in clause (1) is increased.

"(2) Increases in the retired pay of a member or former member referred to in paragraph (1)(B) shall be cumulative and may not be compounded.

□ 1250

Mr. SIMON. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMON. Mr. President, let me stress what is contained in the basic bill. We say that for anyone who enlists after the effective date of this bill, the military retirement system will be changed slightly. What my amendment does is, instead of the COLA minus 1 percent or the CPI minus 1 percent, to say you get the full cost-of-living increase, but that it not be compounded.

There are two reasons for doing that. One is the savings you make. The second is it restricts the inflationary impact.

It is a somehow much easier thing to get into a lengthy debate on this floor, Mr. President, on a specific, one-time savings. But when we talk about entitlements, we make minor changes and we can save infinitely more than we do on most of the one-time savings.

The amendment that I offered back when I was a Member of the House was adopted and resulted in the creation of the housing component of the Consumer Price Index, which ultimately will save billions of dollars for this Government. I think it got about three lines in the Wall Street Journal and that was about it. These are not dramatic things, but in the long run they have tremendous impact.

Let me just say I do not want to harm the system. I do not want to do harm to the military nor to my colleagues, Senator WILSON or Senator GLENN, who I understand will oppose my amendment.

The present military system is a very costly one. In addition to the obvious costs, there are hidden costs.

For example, I served in the Army for 2 years. That goes on my congressional retirement. That is not counted as a cost of military retirement, but, in a sense, it is.

There are a variety of hidden costs.

The average enlisted person retires at the age of 39. The average military retiree lives about another 35 years. When you compound the cost-of-living increases for 35 years, you are talking about huge expenditures by the Federal Government.

What do we mean when we say we do not compound? Let us just say that the retiring pay was $500 a month and the cost of living increase was 5 percent. What you do now is you pay $525.

What I would say is you pay the full $525. In the second year, if there is a 5-percent increase, you base it not on $525, but you base it on the original $500 base.

Only 12 percent—and I stress this to my colleagues—of those who enter the military ultimately do retire. So we are not talking about something that has a huge impact.

It is very interesting that on my amendment, which will save $1 billion a year—not tomorrow, not next year, but starting 20 years from now—the Congressional Budget Office estimates, and I do not know how they calculate these things, that there will be 8,000 fewer people who would enlist out of a total force of 2.2 million. Frankly, I do not think even the 8,000. I do not think when someone who is 18, 19 or 20 walks into the enlistment office to enlist in the Army, Navy, Air Force, Marines or Coast Guard they ask, "Am I going to get the full cost of living? Will it be compounded?" I just do not think that is the fact.

The reality is that 90 percent of those who retire take another job. So it is not a retirement for retirement only that we are talking about.

The present system was inaugurated, and the Presiding Officer, I think, along with me, and a few of the other Senators remember, when pay in the Army was $21 a month. The chairman of the Armed Services Committee can remember when that pay was $21 a month. When I was in the Army it was $75 a month.

So we established a very generous retirement system, as we should have.

I guess the final question, and I do not want to prolong this, is, what harm will be done if we go ahead on this and we save $1 billion a year?

CBO says you might have 8,000 fewer people. If you took one-tenth of that $1 billion and added some bonuses for people for reenlisting or enlisting, you would more than make up for that 8,000.

So, in fact, there is no harm done and we can save $1 billion.

So we have two effects: One, we save $1 billion a year, plus, we have a deflationary factor. Indexing is, in and of itself, inflationary, whether it is indexing of tax rates or indexing of any of the retirement systems, or anything else. Frankly, in theory I have to say I would favor doing away with indexing but it just is not going to happen. But here we can get ahold of something without doing any harm to the armed services and we can save $1 billion a year.

I hope we have the courage and the good sense to do it.

I heard the Senator from Georgia, Senator NUNN, say we all like to talk about saving money but when it comes down to doing it; we do not seem to be willing to do it.

Here is a practical way of saving $1 billion a year with no harm whatsoever to the Armed Forces of this country or the retirees. Again, it applies to no one in the service now. It applies to no one who is a retiree now. It applies to those who enlist after the effective date of this bill.

I hope we will have the good sense to adopt this amendment.

Mr. WILSON. Mr. President, before addressing the amendment of my friend from Illinois, I wonder if he would agree that we might temporarily lay aside his amendment. Senator QUAYLE has arrived in the Chamber now. I believe we can quickly deal with the amendment offered by the Senator from Iowa. If that is agreeable to the junior Senator from Illinois——

Mr. SIMON. I have no objection.

Mr. WILSON. Then I make that unanimous-consent request, Mr. President, that we temporarily lay aside the amendment of the Senator from Illinois and turn to the amendment offered by the Senator from Iowa.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 1959

Mr. QUAYLE. Mr. President, I rise to clarify where we are concerning the disposition of this defense construction supply center solicitation, which is the purchase of 178 crawler tractors. The lowest bidder on this solicitation was Fiat-Allis.

Mr. President, this issue has been one that has been of intense concern to me and the Senator from Illinois, Senator DIXON, who also is on the Armed Services Committee and who attended the hearing we had on this. Libya owns 15 percent of Fiat's stock and this has raised a lot of serious questions on why this contract would be awarded to that business, even though it is the low bidder.

□ 1300

I believe that it certainly is the sense of the Senate, which this resolution expresses, that we would not want to award any contract to any business if that business is controlled or owned by Libya or any other nation that supports terrorism. I believe that position is one that the Senate certainly wants to go on record on.

I can assure my colleagues that this position is shared by the administration. In our hearing on Senator DIXON's legislation, the Senator from Illinois, myself, the Senator from Michigan, and the Senator from Virginia all violently opposed the awarding of a contract that would, in fact, benefit Libya. There was no disagreement from the Under Secretary for Policy, Dr. Ikle, or the Assistant Secretary of State, Dr. William Schneider. Both voiced concerns identical to those we expressed.

At issue today is the Harkin amendment, which basically says it is the sense of Congress that we shall postpone the final award of this contract until Congress has enacted legislation authorizing the appropriations for the Department of Defense for fiscal year 1987. I can tell the Senate that the Defense Department is going to do a lot better than that, because I had a conversation with the Secretary of Defense this morning on this issue and he told me in no uncertain terms that he, as Secretary of Defense, has in fact denied the awarding of this contract to Fiat-Allis. He has denied the awarding of this contract even though Fiat-Allis was the low bidder, under the national security clause of the contract. That is a standard clause in any contract that goes before the Department of Defense.

The Secretary of Defense indicated that he is denying this contract on the national security clause and he has the authority to do this.

Therefore, Mr. President, the issue before us is really moot. The issue is not terribly relevant. I can understand that the Senate wants to express its feelings on this particular issue, and I have no desire to thwart that intention that the resolution speaks toward. But I do want to point out that, as of now, the Secretary has, in fact, denied the contract. There is no reason to fear that this issue can possibly come back up after the appropriations bill or the authorization bill, because I can tell my colleagues what the Secretary of Defense feels and said: That he is simply not going to award any contract to a business that has the potential of benefiting a country like Libya or any other country that has state-supported terrorists. That is his unequivocal position. It is a position I strongly endorse. I believe the entire body would support that decision.

(Mr. GRAMM assumed the chair.)

Mr. QUAYLE. Therefore, Mr. President, I wish only to clarify the issue before us. I have no opposition to the resolution. I think the resolution is very straightforward, but I do want to point out that this decision has already been made. It has been made by the Secretary of Defense. It is a decision that was made in the last few days. Therefore, I just point this out for the membership so that they know this issue is not really a matter of controversy. There is no controversy on this issue. It has, in fact, been settled. I simply wanted to point that out.

I express my deep appreciation to my colleague from Illinois, the senior Senator, Mr. DIXON, who has been very active on this committee. As a matter of fact, he is one of the instigators of these hearings. He and I are working on legislation to clearly define the authority of the Secretary of Defense to deny any similar future contracts. It is our opinion that he already has this authority, but we want to make certain that we are not going to allow business to go to companies that are controlled or owned by state sponsors of terrorism.

With regard to Fiat-Allis, a contractor that wants to continue to do business with the Department of Defense and with other businesses in this country, I hope they can work themselves out of this particular predicament they find themselves in. I have talked to members of that company. They have referred to the problem that Libya invested in their firm a decade ago. At the time the company was desperate for foreign investment. That is in the past. We have to deal with the present. The present situation, unfortunately, is that 15 percent of the company is owned by Libya. Therefore, they are going to have to do something about it.

There are a lot of things that can be done. You can actually freeze assets. You can figure out a way to get the stock out from under Fiat-Allis. There are all sorts of possibilities of things that can in fact be done to alleviate and get this contractor, which does business within this country, out from under their present cloud. Until such steps are taken, there is absolutely no way that this contract will be let to a business that has that kind of relationship with Libya.

Again, I just want to underscore that the Secretary of Defense has, in essence, said that this contract has been denied, it will be denied. Therefore, the resolution is simply going to be the sense of the Senate expressing its will but it will not be terribly relevant to the contract that has been disputed over these last few weeks.

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The distinguished Senator from Arizona, the chairman of the Committee on Armed Services, is recognized.

Mr. GOLDWATER. Mr. President, knowing there are a number of our colleagues who are unavoidably detained, which will mean that we have to put off any voting for not too long a time, I thought I might take advantage of this little lull so that I could make more clear to the man in uniform the fact that he is not affected by what we are doing on the floor today.

Military retirement has always been one of the bright spots of the uniformed man's life. It has gotten sort of our of hand, not through any purposeful action on our part but just as a result of actions that we have taken that we felt would be helpful but which have not been.

It has always been the custom in our military that when a man signed up, he knew that if he kept his nose clean and he was going up the enlisted man's ladder and he reached the highest point that he could in that, that little rung at the top of the ladder is always silver. He knew that he could retire with a pension into which he had paid no money.

It was the same way with the officer. He went on duty as a second lieutenant knowing that if he did everything right, if he did not stumble, he would retire as a lieutenant colonel, a full colonel, or even a general, and he would have coming to him a retirement fund, again into which he had paid no money, but which we as American citizens from the time of George Washington have been willing to pay him out of gratitude for his willingness to serve.

It was George Washington who said at one time that every free man owed something in the line of service, whether it be in uniform, whether it be in the church, whether it be in teaching, whether it just be in general service to his fellow man.

□ 1310

I think this has always guided the American, and I think it has been a very wonderful guidance. I do not think any other country in the world has been as responsive to their feelings of their debt to freedom as have the Americans.

Oh, we have always had those people who have bitched and screamed about putting on a uniform and going off to war, but it was a very small percentage of them, and in spite of them, we have managed to win every war we have ever fought but two, and we hope that those two will be the last two we ever lose.

What we are finding today that is very objectionable, especially to those of us who have made the military more or less a life's work, is the fact that we are losing good men at an age that we do not want to lose them. If we get down to the serious work of trying to write a retirement program that will do away with this, it is going to take a long time, it is going to take some drastic changes in all of our thinking. But I think, for example, of losing the Chief of the Air Force sometime in the next few days. He is 55 years old. That is a young age. I can say that now without any trouble. But I can recall when I was in a corporation. I looked on 55 to 60, 65, as a very, very productive age. A person had learned enough to be valuable to the company just as a general officer today who has reached the four-star rank, or three-star rank, or two, has become very, very valuable to his service because of his expertise. Yet, they go out, and what do they do? They go home and try to find something to do or they take employment someplace else. The same way with the enlisted man. We allow an enlisted man to serve 20 years and he can get out at age 40, 42, or 45 or 46. I see my good friend JOHN GLENN sitting over here, and I think he would agree with me that when he taxis an airplane up to the line and complains about something that does not work, he would rather see some gray-haired old guy with a monkeywrench than an 18-year-old boy who does not know what a monkeywrench is. This is another thing that is happening to our services all the way through. We are getting rid of people who are too young, especially the enlisted man who is forced to leave at a young age, at an age when many, many men are beginning to look for employment in our markets, and they are finding it difficult.

I am hopeful that in the coming years, not just the Armed Services Committee of the Congress, the House and the Senate, but the Pentagon will apply some real thought to this idea of retirement so that we are going to be able to keep people in the service a long time and therefore better all the services.

I think the older a person gets the better he gets, with some exceptions. I may be one of them. But age has nothing to do with ability. Age has nothing to do with mental ability. I have known morons at 32 years of age and some of the smartest people I have ever known were in their nineties. But when we force people to get out of our military service who have just reached a productive age, whether they are enlisted or officer, I think we are wrong.

I know there is an inclination on the part of the Joint Chiefs to correct this. I know there is a desire on the part of the present Secretary of Defense to correct this. I know of no general officer who is in command anyplace who wants to get out because he is feeling old when he is in effect is not old.

I really make this statement today for two purposes. One, to assure and reassure the man in uniform that he is what we call grandfathered. He is already in. There is no way we can touch him. He is going to get the retirement that was promised to him. But for the man who is enlisting tomorrow or graduating the day after tomorrow from our academies or ROTC, they have to take another hard look at retirement where they previously did not have to worry about it.

I think we can provide a retirement service comparable to civil service, comparable to what we live under here in the Congress, where we pay a certain amount of our income every month to retirement. I think that is a fair way to do it and I think it is allowed under the military now after retirement.

I close by pointing out how ridiculous this whole thing has gotten. One of my best friends, who was a lieutenant general in the Army, retired getting $18,000 a year. I know many, many noncommissioned officers who reached the rank of sergeant and retired after 58 who now make more retirement money than that lieutenant general who in his military life after West Point earned three stars. This points out the kind of crazy system under which we work.

Mr. President, I apologize for taking the time of the Senate. I know others want to speak, but somehow it seems that when it comes time to vote around this place, there is more darned things going on downtown than up here. Maybe we ought to offer tea or ice cream or crumpets about this time of the day and they could stay away from downtown. There is nothing down there that we have not seen before. There is a lot of work going on up here, and our Members should be here. I would much rather be home doing something else, but we are here.

I urge my colleagues to start paying attention to the duties of the floor, get here on time so they can vote, get here on time so we can have meetings of committees, and get here on time so we can get the business of the country handled.

I thank the Chair, and I suggest the absence of a quorum.

Mr. QUAYLE. Will the Senator withhold?

Mr. GOLDWATER. I will.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. The pending business is the amendment offered by the Senator from Iowa, and I think the Senator from Indiana has quite adequately addressed that issue and made clear that the idea embodied in the resolution that is contained in the amendment of the Senator from Iowa has in fact been dealt with, so I see no point really in prolonging the debate and am prepared to accept that as an amendment on behalf of the majority.

Mr. GLENN. Mr. President, let the RECORD show that the minority also agrees with the amendment.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 1959) was agreed to.

Mr. WILSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WILSON. Mr. President, while we have both Senators QUAYLE and DIXON on the floor, I would ask the further indulgence of our colleague, Senator SIMON, of Illinois, in that we address another issue that I understand the Defense Acquisition Subcommittee has that is an agreed to matter.

The PRESIDING OFFICER. The Simon amendment is currently under consideration.

Mr. WILSON. Now, Mr. President, I ask unanimous consent that we temporarily lay aside the Simon amendment for the purpose of dealing with the matter to be proposed by the Senator from Indiana.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Indiana.

AMENDMENT NO. 1961

(Purpose: To establish the position of Under Secretary of Defense for Acquisition)

Mr. QUAYLE. Mr. President, I send an amendment to the desk on behalf

of myself and the Senator from Illinois.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Indiana [Mr. QUAYLE], for himself and Mr. DIXON, proposes an amendment numbered 1961.

□ 1320

Mr. QUAYLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

SEC. 13. UNDER SECRETARY OF DEFENSE FOR ACQUISITION

(a) CREATION OF POSITION.—Section 135 of title 10, United States Code, is amended—

(1) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) There are two Under Secretaries of Defnese, one of whom shall be the Under Secretary of Defense for Acquisition and one of whom shall be the Under Secretary of Defense for Policy. The Under Secretaries of Defense shall be appointed from civilian life by the President, by and with the advice and consent of the Senate.";

(2) in subsection (b), by striking out the second sentence; and

(3) in subsection (c), by striking out the second sentence.

(b) EXECUTIVE SCHEDULE II PAY GRADE FOR UNDER SECRETARY OF DEFENSE FOR ACQUISITION.—Section 5313 of title 5, United States Code, is amended by adding at the end the following new item:

"Under Secretary of Defense for Acquisition.".

Mr. QUAYLE. Mr. President, this is a very simple amendment. It is an amendment that we dealt with on the military reorganization bill. However, the military reorganization bill is going to take some time before it becomes law. We have to go to conference with the House of Representatives. It is hoped that this bill will become law much quicker.

In essence, this amendment establishes the position of Under Secretary of Defense for Acquisition. I want to pay my respects for the origination of this amendment to the Senator from Illinois, who has been in the forefront throughout this whole debate on procurement reform and dealing with the Packard Commission on calling for the Under Secretary of Defense for Acquisition. As a matter of fact, it was Senator DIXON who came before our Subcommittee on Defense Acquisition and testified to the need to have an Under Secretary of Defense for Acquisition.

Mr. President, this is a simple amendment because it only establishes the Office of Under Secretary of Defense for Acquisition. It does not do anything beyond that. It does not get into who is going to report to him. It does not get into a lot of the particulars about this Under Secretary of Defense for Acquisition. Those matters will be heard and deliberated before the full Armed Services Committee when we go to markup next month. As a matter of fact, next week we will have a hearing on the issue on the Office of Testing and Evaluation and its relationship to the Under Secretary of Defense for Acquisition. This will be an additional hearing that my friend and colleague from Michigan, Senator LEVIN, requested. We hope to hear from other Senators who are interested in this issue. It will be resolved before we take it to the full committee. Those will be the details of this Under Secretary of Defense for Acquisition.

It has been requested by the Packard Commission to move this amendment forward today. It establishes the office; it establishes it at a level 2 position. They want to get on with the program. If we do not have this office established, their recruitment, their idea of putting somebody on the job, will be delayed.

So this will be an attempt to create the position of Under Secretary of Defense for Acquisition, created now in this legislation, which is on a very fast track to becoming law. By having it on a fast track, it will be a clear indication to the Department of Defense that they can get on with the recruitment and can put that person in place and start some acquisition, reforms that are vitally necessary.

This is a straightforward amendment. It was dealt with in the military reorganization bill, Senator DIXON's amendment. It will be dealt with in more substance on the defense authorization bill. But I think it is important at this time that we just create the position at a level 2.

Again, I pay my high respects and gratitude to Senator DIXON for all the hard work he has done on this issue. He has taken the lead on the issue, he has testified, and he has worked with us in trying to sort out the details of how this Under Secretary is going to function. He has worked with the Packard Commission and Members of the Senate on this issue. Credit for the creation of this acquisition position really belongs to him and all the work he has done. I want the record to show that, in no uncertain terms. If it had not been for this hard work and diligence, I am sure we would not be here in a bipartisan matter. This amendment has strong bipartisan support. It is supported on both sides of the aisle. I presume it will be accepted, and it is in the spirit of trying to do something in a bipartisan way to improve our acquisition system.

I believe the Packard Commission said, candidly and clearly, that we can do a better job; and one of the ways we can do a better job is to give the authority, the power, the responsibility, and the accountability to this new Under Secretary of Defense for Acquisition. We will know who is responsible for some of the problems that go on. We will now have accountability as to where we can go to get information on how we can make our procurement more efficient. It is a tough job. He is going to be responsible for 15 million procurement transactions a year. Certainly there will be mistakes. We are all human. But at least we will have a place we can go to find out why mistakes occurred.

I think the Senator from Illinois has pointed out time and time again the usefulness and the need for this Under Secretary of Defense for Acquisition. I am glad to be a part of it today and offer it on this fast track vehicle, so that we can have procurement reform and more efficiency not only in the letting of the contracts and the efficacy of those contracts, but also the whole cycle of procurement, from the concept stage through to the full-scale production and seeing the systems going out to the field for their use.

Mr. DIXON. Mr. President, I want to express my profound appreciation to my warm friend, the distinguished Senator from Indiana, who has chaired the Subcommittee on Acquisition with such distinction. That subcommittee, I think everyone knows by now, has been a very productive subcommittee, responsible for legislation I had the honor of sponsoring in the past session involving the Competition in Contracting Act, responsible for all the significant work we have done in this session. I am indebted to my friend, the distinguished Senator from Indiana, for his bipartisan cooperation on many occasions in connection with this and other legislation.

Every Member knows that the Armed Services Committee was in markup for over a month on the DOD reorganization bill. We dealt with 80 amendments to that bill and finally determined by a unanimous vote, 19 to zero, that we agree in principle to an Under Secretary of Defense for Acquisition. We then decided that we would submit to the Subcommittee on Acquisition, chaired by the Senator from Indiana [Mr. QUAYLE], the whole issue of how this should be done.

We have had a great many hearings in that subcommittee. When the DOD authorization bill comes along, we will be prepared to flesh out completely everything involving the line authority of the Under Secretary of Defense for Acquisition, how he controls procurement and acquisition absolutely in the office of the Department of Defense, and the other provisions that are pertinent to this issue.

For now, however, it is important to adopt this amendment. We already put most of the language in this amendment on the DOD reorganization bill we passed a week or so ago, by a vote of 95 to zero. So every Member who has looked at this issue and heard

it discussed voted in favor of what we are doing here.

What we are doing here is providing for the Under Secretary of Defense for Acquisition, in this bill, which will be on a faster track, and we are providing for the Under Secretary of Defense for Acquisition to be at a level 2 position. That is important, because it places the Under Secretary of Defense for Acquisition at level with the Deputy Secretary and at the same level with the three service secretaries. We will provide later for his primary authority in acquisition matters over these service secretaries. But in this amendment we make the necessary provision to give him level 2 salary status. That is important, because it reflects the wishes of the Packard Commission and because of the Secretary of Defense and others have indicated to us that they want this done as soon as possible so that they can put a person in this important position of Under Secretary of Defense for Acquisition.

So I thank my colleague from Indiana, my warm friend, for his support. I thank the Subcommittee on Acquisition and the Committee on Armed Services for their support.

I urge the adoption of this amendment, which will hasten our ability, in short order, to provide for a new Under Secretary of Defense for Acquisition in the Department of Defense, in the very near and foreseeable future, at a level 2 status, to do this very tough job of acquisition and procurement for the Department of Defense.

The PRESIDING OFFICER. Is there further debate?

Mr. WILSON. Mr. President, there is no further debate, I believe.

I only say that I think that both the Senator from Indiana, the chairman of the Defense Acquisition Subcommittee, and the ranking member, the Senator from Illinois, are to be congratulated on the successful work that has gone into the portions of the reorganization bill that the Senate passed earlier, the legislation that bears the name of our distinguished chairman.

□ 1330

I think today the Senator from Indiana and the Senator from Illinois have improved their handiwork. I agree with the contention that this new post is necessary and that it be given the full authority required to do the job. It is an immense job and one that should have with it the requisite authority.

On behalf of the majority, there are no objections and we will gladly accept this amendment.

Mr. GLENN. Mr. President, it is my understanding that David Packard, who headed up this commission, was very concerned about this. This does not involve whether it will or will not be a position, it is a matter of timing, speeding up getting someone, getting someone started, getting the person on duty. The fact that this authorization for this position was on the reorganization bill, which will take a little more time to get through, was of some concern. And that is the only reason this is being transferred to this bill. It is not any new authorization. It is just to put it on a faster track so we can get that person on the job and on duty.

With that understanding, the minority agrees with the proposal.

Mr. NUNN. Mr. President, I wish to echo what has already been said by the Senator from California and the Senator from Ohio. This is a good provision. I appreciate very much the Senator from Illinois' and the Senator from Indiana's sponsoring the provision. It is the same provision we had on the defense reorganization bill. It has some technical amendments to it that were not on the defense reorganization bill that are absolutely essential for the negotiations to begin toward hiring this Under Secretary for Acquisition. So I think it is very important we put this on this legislation.

I might add, I am delighted the Senator from Ohio is optimistic about this retirement bill moving through conference very rapidly. I hope he is correct on that. We do have differences with the House on it, so we will have to see that develops. But right now it does appear that this retirement bill may be on the fastest track and reorganization, hopefully, will be right behind it.

Mr. GLENN. Will the Senator yield?

Mr. NUNN. I am glad to yield.

Mr. GLENN. My reason for that comment was we are under the June 1 restriction of getting this through conference and signed by the President by June 1. That is about as fast a track as you can go on.

Mr. NUNN. I hope we meet that deadline.

Mr. GLENN. I hope we do, too.

Mr. WILSON. Mr. President, I ask unanimous consent that I be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment.

The amendment (No. 1961) was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WILSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1960

Mr. WILSON. Mr. President, it is my understanding the pending business is the Simon amendment.

The PRESIDING OFFICER. The Senator is correct. The pending business is the Simon amendment.

Mr. WILSON. Mr. President, I thank the Chair.

I rise with no great pleasure to express my total opposition to what is clearly a well-intended amendment but one that I think would have an unintended and really insidious effect. I mean no disrespect whatever to my colleague, the junior Senator from Illinois.

I do reject the characterization that he has made of this amendment as a simple cost-of-living adjustment in the cost-of-living formula. It is a good deal more than that. After only 2 years under what he proposes as an amendment to the formula, there is no longer any real connection between the cost of living and the retired pay level resulting under the formula. And that is because what he has done is chose as the baseline the year in which retirement is entered. Thereafter, in contrast to virtually every other provision I can think of that seeks to provide a cost-of-living adjustment, he would use that base-year year after year. There would not be a reflection of the reality of inflation and what it has done over a period of years in adding to the cost of living. And that results, very simply, whether intended or not, in the greatest possible unfairness.

I think that, to put it in the clearest terms, to provide just one example, what this means is that the annual military retirement annuity of an enlisted member 25 years after this retirement in real terms would be worth only 66 percent, or two-thirds, of what it was worth at the time of retirement. Thirty-five years after retirement, the enlisted retiree's annuity would be worth exactly half, 50 percent, in real terms of what it was when he retired.

Now that, I repeat, is simply unfair. And I am unaware of any precedent for this kind of treatment.

I think Senator GOLDWATER, the distinguished chairman of the Armed Services Committee, in his brief comments a few moments ago, made clear why the United States owes a special debt of gratitude to those who have chosen to wear the uniform of the armed services for enough years so that they can call it a career. It seems to me that, by focusing purely upon the cost aspects of retirement, what the Senator from Illinois has done is to go in precisely the wrong direction. He has in fact given special treatment, or would give special treatment, but treatment of the wrong kind.

Senator SIMON was invited to and did testify before the Manpower and Personnel Subcommittee about his proposal. At that hearing, Senator SIMON discussed this very same formula, the one that he is now offering in this amendment. I think I can say that the members of the subcommittee at that hearing unanimously rejected

this formula as being unfair and inequitable. The subcommittee spent more than a year considering various options on military retirement. And although the members of the subcommittee were fully aware of this proposed formula, no member suggested that members of the Armed Forces who spend an entire career in uniform should be asked to bear this type of cross.

Mr. President, I have not seen nor have I heard of a proposal to add such a formula to any other retirement system—not civil service retirement; not congressional retirement, surely; not judicial retirement, not veterans' benefits, not Social Security. Why then should it be appended to the retirement system of those who have worn military uniforms for the United States?

Mr. President, we have lines of people waiting to sign up for jobs in the civil service. There is apparently no shortage of those who are willing to become employees in the Federal service. We have no such lines, Mr. President, of those waiting to become members of the armed services. We have done better in recent times, certainly, in recruiting and in retention. I hope no one deludes themselves that that has been easily achieved. It is because this body and the other have conscientiously set about trying to provide a compensation which in all aspects, including the most important aspect of retirement, would induce the kind of volunteers of a quality that are required to produce an All-Volunteer Force.

Mr. President, I would suggest to you that this is not the kind of change that we owe to those people who are not standing in lines but who are willing to come and stand watch over the Beirut Airport or spend months at sea, spend months separated from their families and loved ones; those who move 10 to 12 to 15 times in a 20-year career. I do not think that we are being just to them when we say that we will, as they grow older and move into that period of life when they really require an old age pension, reduce their retirement in the critical aspect of cost-of-living adjustment to 50 percent of what it was on the day that they retired.

I suspect that it is very likely not exaggerated if we say that it threatens a sharp reduction in the All-Volunteer Force if we ask those in uniform to bear the brunt of such a sharp reduction. It would save money. There is no question about that. I give full measure to the Senator from Illinois on that.

The measure that is before us, not his amendment but the basic underlying bill, will cut retirement by $2.9 billion a year and his would cut it by $3.9 billion. Mr. President, we could cut it still further. We could do away with retirement.

Now, I will simply say that too many times in the past and in the recent past we have asked the military to bear the brunt of cost savings.

□ 1340

This is asking too much. This amendment was fully heard at the time Senator SIMON came before the committee. It was considered thoroughly, and it was thoroughly rejected. That is what should happen again at the appropriate time. This amendment should be tabled.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I, too, strongly oppose Senator SIMON's amendment to this military retirement reform legislation. I admire greatly the Senator from Illinois. I wish it was not necessary to oppose this. He is a very active Member of the Senate, and very concerned about expenses and cutting expenses. I share that concern with him. We worked together on issues in the past. But I have to depart from this amendment which he has proposed.

I oppose it for two reasons:

First, I think it cuts far too deeply into the future retirement benefits of military members.

Second, and more importantly, most of the additional savings in this amendment relative to S. 2395 are made at the expense of the most vulnerable group of military retirees, those in their 60's, 70's, 80's, even some living into their 90's; and that is when they would be cut the most—just at a time when they need help more than ever before.

Mr. President, the committee bill as reported would save about $2.9 billion on an annual basis in fiscal 1986 military retirement accrual costs. This means we will save approximately 16 percent of future retirement costs from those people who enter military service after the date of enactment, and this is a prospective bill. Do not forget, as our distinguished committee chairman, Senator GOLDWATER, stressed a little while ago, and Senator WILSON and I expressed earlier. I am sure there will be some who have not heard us yet. This bill does not affect anybody in the military now. It affects only those who come in later on, and who come in after enactment of this bill.

When they begin to retire 20 years from now, and when you add the savings in this bill today and the savings we achieved in 1980 by moving to the average high 3 years of basic pay as the base for retired pay, the total reduction in future military retirement costs from these two changes is 27 percent.

If you are a potential enlistee in the military services today, and you are concerned about what your retirement may be, what are you to think? Do you think you are going to be given the same opportunity that has been there in the past as a good, attractive package to get people into our military, and our All-Volunteer Services? What do people think about this?

You cannot continually cut away at military benefits and expect those people to still sign up out there, and still have some of our best people going into the military. We do not want people in the military who cannot do anything else. We want some good people in the military. But you cannot continue getting good people if you are going to severely cut their retirement benefits.

The Simon amendment would result in annual fiscal 1986 retirement accrual savings of $3.9 billion as opposed to the $2.9 billion that I mentioned, and $1 billion more than the committee bill as reported. This would equal a reduction of 21.4 percent in future retirement costs. When added to the effect of the high three changes in 1980, the total reduction in future military retirement costs would be almost 32 percent—nearly one-third.

I cannot stand here today and honestly tell my colleagues that we know precisely what the impact of the Simon proposal will be in terms of retaining people. I do not know that. I cannot tell you with any certainty. Our retention models that we have, the computer modeling used to predict how military members would react to this change just are not precise enough that I can stand here and tell you with any real degree of confidence what the retention effect of the Simon amendment would be relative to the committee bill. But I would hasten to add that just plain common sense tells us that you cannot reduce military retirement benefits by almost one-third without hurting the retention of the qualified, the best qualified, and the most capable service members.

I think, Mr. President, the manner in which the Simon amendment achieves the additional savings over the committee bill would exacerbate the negative retention impact of this proposal. Military members know a bad deal when they see one. The regressive cost-of-living allowance or COLA formula in the Simon amendment I feel is a very bad deal for the individual military members, especially if he or she hopes to achieve a ripe old age and long life because that is where it is going to hit them the hardest.

Mr. President, if we adopt the simple COLA for military retirement benefits in this amendment the people who will bear the brunt of the savings will be military retirees in their 60's, 70's, 80's

and 90's. That is when they get impacted the most. In fact, we have a diagram here that compares what would happen under this Simon proposal with other proposals, the committee bill and the one that Senator WILSON and I will propose probably later this afternoon. I will give some examples a little bit later.

As a result, under current law, and under the committee bill the annual COLA is compounded; that is, each year the base against which the COLA is applied includes the effect of all previous COLA's. That is what keeps people's buying power, and their living standards constant. But this would no longer be true under Senator SIMON's COLA formula. Under his proposal the annual COLA would be applied only to the base amount which the retiree received at the time he retired regardless of how long he lived or how many COLA's he received. In other words, his effective buying power starts eroding and going downhill constantly from his age of retirement on.

As a result, under the Simon amendment the military retiree's annual retirement pay would drop significantly below what most of us would consider full inflation protection after 25 or 30 years' retirement, and just when they need it the most—65, 70, or up, however long they live.

Let me illustrate with an example. Let us take the military retiree who leaves the service at age 40 after 20 years of service. It is not uncommon. Let us assume this is an enlisted man. Let us assume his annual retirement pay at the time he retires is some $10,000 per year. The COLA formula in the committee bill as reported provides an annual COLA of 1-percentage point less than the CPI increase with a one-time restoral of the base at the 40th anniversary of that person's entry in the service. He may retire at 20. Nothing happens until he gets out here at that 40th anniversary. Under this committee formula when our enlisted retiree reaches age 65 he will receive in constant dollar terms 95 percent of the amount he received when he retired at age 40. However, under the Simon COLA formula at age 65 the annual annuity of our enlisted retiree in legal terms would be only worth 66 percent, two-thirds of what it was when he retired at age 40.

If our enlisted retiree is fortunate enough to live to age 75 he will find the real value of his annuity is exactly half of what it was when he retired.

Mr. President, the COLA formula in the committee bill evenly spreads out the savings from the reduced COLA formula among younger and older military retirees. But if the amendment that Senator WILSON and I intend to offer is accepted, the savings from reduced COLA's would be made only at the expense of military retirees below age 58 to 62.

So the COLA formula proposed by Senator SIMON just does the opposite by achieving the largest amount of savings from the older military retirees. I find it difficult in my own mind to justify a COLA for military retirement that requires the greatest sacrifice from the most vulnerable group of military retirees.

I do not know whether the Senator would be willing to apply this same standard to Social Security. Would we apply it to civil service retirees? Would we put it on other veterans' benefits? Even banks give compound interest. They do not say when you put money in your bank account that it is simple interest from then on. Why should we expect our military retirees to take the brunt of something that no one else is taking? We are not applying this to Social Security. We are not applying it, as I understand it to railroad retirement, civil service benefits, or other veterans' benefits.

So, Mr. President, this regressive, simple COLA formula proposed today for military retirement does not apply to other Federal retirement programs, and with very good reason.

□ 1350

We should not adopt it for the military retirement system.

I urge my colleagues to oppose this amendment. At the appropriate time I will move to table.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Mr. President, first, let me commend my colleagues. Senator WILSON chairs the subcommittee which held the hearings. I think it was about a year ago that I stood up with an amendment to the retirement system. The chairman of the full committee, Senator GOLDWATER, agreed that hearings would be held. Senator WILSON said that hearings would be held.

I hate to differ with one of my heroes, one of the heroes of many Americans, Senator GLENN. Every time I see that small capsule that he went up into space in, I am amazed at the man who would get into that little thing. I have long admired his work here in the Senate.

But the reality is, as the distinguished Presiding Officer, Senator GRAMM knows, because he has had some practical experience in this, talking about saving money in the abstract everybody is for. As soon as you start getting specific, then all of a sudden we are going to have to step on some toes.

And what are the realities? What I am asking for is simply that we not compound the cost-of-living effect, that it would have a full impact on it.

The Senator from California says there is an incidental effect, and that this is the same bill that I presented to the committee.

Frankly, I would like to pass the same bill that I presented to the committee. The bill that I presented to the committee did not go nearly as far as Mr. Grace suggested we ought to go. The bill I presented to the committee said you had to serve 25 years instead of 20 years in order to retire. I do not call for that here, though frankly, if someone else would offer the 25-year requirement, I would vote for it. I still think it is sound.

But we do not make that change.

I recognize there is a recruitment value in 20 years rather than 25 years.

It is very difficult to find any recruitment value in the compounding of the retirement. As I said before, I just do not believe anyone walks into a recruitment office and says, "Are you going to compound my cost of living when I get to the point of retirement?"

CBO says, of 2.2 million people in the Armed Forces, we might lose 8,000 with this amendment. I frankly do not know whether they are right or wrong.

I would stress to my colleagues, indexation is in and of itself inflationary, and when you compound it you add to the inflationary impact.

As to the harm done to retirees, I would point out two things: One, the present system was established when military pay was much, much, much smaller than it it today. Second, two-thirds of those who retire are now getting other jobs, and everyone who retires now is covered by Social Security. Only 12 percent of those who enlist ever get to the point of retirement.

I would underline the point that my two colleagues have made here already: This is prospective. It does not apply to anyone who is in the armed services at the present time.

My good friend from Ohio says, What Social Security?

There is this tremendous difference, my friends. That is, in Social Security the normal payments are ended 9 years after a person retires. Compounding does not have the problem that it has when you live 35 or 34 years after you retire. Then, when you retire, you are talking about massive losses to the Treasury.

My good friend from Ohio says, when you have a bank account, that is compounded.

The difference on the bank account and the retirement is you compound on the bank account when you have the money in. You do not compound when you take the money out. We are talking about taking the money out and still compounding. That is the inequity here.

One of my colleagues said every other system compounds. The reality is, virtually no system in the private sector has cost-of-living indexing. It is only, for all practical purposes, the governmental systems that have that.

The effects of compounding are clearly inflationary.

When it is said that this action would be unprecedented, we are living in times when we are going to have to take unprecedented actions.

The Presiding Officer introduced a bill that was unprecedented. I voted for it because I thought it was needed.

If something is right and it makes sense, we ought to do it.

Finally, when it is said we owe a debt of gratitude to those who serve in the Armed Forces, believe me, I could not agree more. I have been one of those who has fought for veterans' benefits, for health benefits, for other things, and I will continue to. But those of us who had the honor, and it was an honor, to wear the uniform of our country, we serve—those of us who wore the uniform of our country—best by seeing to it that the economy of this country stays in good shape. One of the things we have to do is to get our fiscal house in order. Here is a practical, simple way of saving $1 billion a year starting 20 years from now, when studies show that there will be virtually no impact at all on recruitment.

The question is, Do we have the courage to cast a vote that is going to save $1 billion a year? I hope we have the courage to do it. I hope we will resist the motion of my friend from Ohio to table this amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. GLENN. Mr. President, I agree that people do not walk into a recruitment station and inquire about retirement benefits. But I will tell you when they start looking at them. They start looking at them after they have been in the service for a few years. Then they think, "Should I get out? Should I begin another job? Should I retire now, with no retirement benefits, after serving for 4 or 5 years?"

Then they think, "I like this. I am getting good experience and I am proud to serve my country. Maybe if I stay in for 20 years, it is not a bad idea. They have a pretty good retirement system."

That is when people start thinking about what the retirement system situation may be. That is when how we treat retirement becomes very important. I think it is a rare person who walks in and makes the retirement program that is presented at the recruiting office a major issue in whether they sign up or not. That would be rare. I would agree with the Senator on that.

At the same time, I would say that I think it is flat wrong to set up a situation where we decrease the standard of living, when we make it worse the longer that person lives after retirement.

What we are talking about is keeping the buying power, a reasonable standard of living, that the retirees thought they were getting, thought they were signing up for, and thought their Government had a contract with them that would be honored.

To have a proposal like this that would apply only to military retirees, those who have already made greater sacrifices than most people in the country—I agree with the Senator completely on that—and then ask them to sacrifice more in retirement, even, than other retirement systems is really the nub of this whole thing. It really is a factor, keeping people in, keeping that experience in, through a good retirement program. But are we dealing fairly with these people when we say we will let their buying power, their standard of living, decrease and become worse the longer they live and apply that only to military retirees and to no one else?

□ 1400

Mr. President, I move to lay the amendment on the table.

The PRESIDING OFFICER (Mr. COHEN). The question is on agreeing to the motion to lay the amendment on the table.

Mr. SIMON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Illinois. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Florida [Mrs. HAWKINS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Maryland [Mr. MATHIAS], the Senator from Oregon [Mr. PACKWOOD], and the Senator from Wyoming [Mr. WALLOP] are necessarily absent.

I further announce that, if present and voting, the Senator from Florida [Mrs. HAWKINS] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Florida [Mr. CHILES] and the Senator from Montana [Mr. MELCHER] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 86, nays 7—as follows:

[Rollcall Vote No. 100 Leg.]

YEAS—86

Abdnor	Bradley	Danforth
Andrews	Bumpers	DeConcini
Armstrong	Burdick	Denton
Baucus	Byrd	Dixon
Bentsen	Chafee	Dodd
Biden	Cochran	Dole
Bingaman	Cohen	Domenici
Boren	Cranston	Durenberger
Boschwitz	D'Amato	East
Evans	Johnston	Pryor
Exon	Kassebaum	Quayle
Ford	Kasten	Riegle
Garn	Kennedy	Rockefeller
Glenn	Kerry	Roth
Goldwater	Lautenberg	Rudman
Gore	Laxalt	Sarbanes
Gorton	Leahy	Sasser
Gramm	Levin	Simpson
Grassley	Lugar	Specter
Harkin	Matsunaga	Stafford
Hart	Mattingly	Stennis
Hatch	McConnell	Stevens
Hatfield	Mitchell	Symms
Hecht	Moynihan	Thurmond
Heflin	Murkowski	Trible

NAYS—7

Eagleton	Metzenbaum	Zorinsky
Long	Proxmire	
McClure	Simon	

NOT VOTING—7

Chiles	Mathias	Wallop
Hawkins	Melcher	
Humphrey	Packwood	

So the motion to lay on the table amendment No. 1960 was agreed to.

□ 1420

Mr. GLENN. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1962

Mr. GOLDWATER. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. GOLDWATER] proposes an amendment numbered 1962.

At the end of the bill add the following new section:

Section . Denial of funds for T-46 trainer aircraft program.

Of the funds appropriated for "Aircraft Procurement, Air Force" for fiscal year 1986, none may be obligated or expended for the procurement of the T-46 trainer aircraft.

Mr. GOLDWATER. Mr. President, this is a rather short amendment. I do not like to call it simple, because no amendment is simple. It applies to the T-46 aircraft trainer.

Mr. President, there is no question that last year, the Senate and the House, the two bodies acting together, approved the acquisition of the T-46 Program. But the Air Force has terminated the T-46 Program.

The decision was first made by the Secretary of the Air Force, Verne Orr. It was reaffirmed by Secretary of the Air Force Russ Rourke, reaffirmed by Secretary of the Air Force Edward Aldridge, and confirmed by Secretary of Defense Caspar Weinberger. They want no funds in the fiscal year 1987 budget for the T-46.

The current Air Force trainer, the T-37, can be extended from 15,000 to 18,000 hours at no cost; and for only $200 million, the service life of the T-37 can be extended to 25,000 hours. By comparison, the T-46 Program will cost more than $3.5 billion for development and procurement and will have a life cycle cost in excess of $6 billion.

The Air Force intends—and this is very important—to procure the T-46 data package but will defer procurement until sufficient funds are available to support the program. When such funds are available in the early 1990's—in other words, when we can afford it—following the procurement of other major systems currently in production, the Air Force will be in a position to procure the T-46 aircraft.

The Senate budget resolution reduces the President's request for defense expenditures by $20 billion.

Some programs must inevitably be terminated as a result of such drastic action and reductions.

Mr. President, we are faced with further reductions. I can only guess now at them, but they will be something in the neighborhood of $25 billion or $30 billion. So there are going to be a lot of reductions in the military. The Air Force decision to terminate the T-46 is proof that the Pentagon can terminate programs.

Mr. President, for those who wonder why the T-46 has been terminated when both bodies accepted the aircraft last year, I want to describe briefly why, and I will do it in as much layman's talk as I can.

The aircraft is made by the Fairchild Aircraft Co., which made the A-10, made many of our other fine aircraft. But the Fairchild Aircraft Co. has gone through some changes in personnel, mostly in the production end of it, the direction end of it, the ability to supervise the manufacture of a rather sophisticated small airplane. Let us see what happened.

The first aircraft that was delivered to Edwards Air Force Base had a wing incident angle improperly manufactured, causing imbalanced flight which could not be trimmed out, and they had to rerig the ailerons.

Mr. President, as a pilot, if you have anything wrong with the main spar that requires any work at all, you have an airplane that is in trouble. The main spar is the most important part of an aircraft, and if there is any weakness or tendency to twist or break, you are in trouble.

There was miscalculated drag and weight of the aircraft, which has significantly reduced the range. The aircraft may require inlet redesign to meet specifications. The inlet is where the air comes into the engine. It is not anything big, but it is a manufacturing procedure that will take quite a bit of thought and redesign. It is referred to by the test pilots as the "flying speed broke."

The aircraft looks like it was built with a hammer. The panel seams are mismatched, and large gaps are evident between the panels.

The aircraft was grounded—and this is the important part, because all these other items occurred before what I am going to read now—the aircraft was grounded on May 5, 1986, due to severe structural vibrations and wing flutter. The wings were observed vibrating 12 to 18 inches at 8 hertz. A hertz is one cycle, so they are talking about eight cycles per second. A vibration of 12 to 18 inches in a wing that is not very big—probably from here to the end of that desk—might shake the pilot to death when he saw that thing going like that.

This airplane is not due to refly until the end of the month at the earliest. I had every intention of going out over the Memorial Day weekend and having a flight in it. But if it is still doing these things, I will just get in the cockpit and look at it.

The aircraft has no adequate stall warning and will need a stall warning system integrated into the aircraft prior to production.

They had to resize the longitudinal trim tab to meet trim requirements.

Mr. President, as I have said to everybody who has approached me on this, the decision has been made by the Secretary of the Air Force and by the Secretary of Defense that this airplane is not coming into the inventory this year.

We are trying to keep what became of the A-37. We call it the T-37. It is a small jet trainer that has done yeoman service, and it has life left in it. But by the time we get the money and get ready to produce a new training aircraft, which we hope will be by 1990, 1991, or 1992, we will have finished with the use of the T-37, and we will then go ahead with an aircraft built something like the T-46.

□ 1430

So, Mr. President, I am offering this amendment. I have nothing else to say about it, unless somebody wants to ask questions.

Mr. THURMOND. Will the distinguished Senator yield to me?

Mr. GOLDWATER. Yes.

Mr. THURMOND. Mr. President, I rise in support of the amendment by the able and distinguished chairman of the Armed Services Committee. I talked to the Secretary of the Air Force last night. He told me that they do not need this plane and they do not want this plane. And as tight as finances are, why should we impose something on them that the Air Force does not want? We will have hardly enough time to raise the money for the things they do want. It seems to me this amendment ought to be adopted without delay.

Mr. GOLDWATER. I thank my friend from South Carolina.

That is all I have to say. I yield the floor.

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. Mr. President, I rise to strongly oppose the amendment offered by the distinguished chairman of the Armed Services Committee which will delete funding for the T-46A Air Force trainer in fiscal year 1986.

Mr. President, this amendment is not germane to this bill. Congress has duly authorized and appropriated funds for the T-46. This amendment is in effect, a rescission. It is a unilateral rescission, Mr. President. The procedures for rescissions are rather specific. The Senate and House Appropriations Committees have to agree to a rescission. The fact is Mr. President, that, both of these committees, as well as the House Armed Services Committee, strongly support the T-46.

The Air Force continues to need a new trainer. For 7 years, the Air Force lobbied Congress heavily to fund a new trainer. They should not abandon it now.

We are not trying to force upon the Air Force a trainer it does not want or need. In fact, this is an issue of fiscal responsibility. It will be more cost effective to keep the T-46 production line going, possibly at a reduced rate, than to stop it now. Although the Air Force is, like all services, experiencing tight budget constraints, canceling the T-46 is shortsighted, The Air Force admits that, in the near future, they may have to rebid the T-46. Rebidding is estimated to cost taxpayers an extra $1 billion more than keeping the program going now. A reduced production line for the T-46 in fiscal year 1987, an option that the manufacturer of the T-46A has suggested, would have a minimal budgetary impact in comparison.

Mr. President, my staff personally visited Edwards Air Force Base where they are testing the flight of the T-46. The Air Force Training Command there said they loved and wanted the T-46. It is performing well at Edwards. The Air Force cannot and will not deny that.

I met with General Gabriel, Chief of Staff for the Air Force and other Air Force personnel on this matter. They are not saying this plane does not perform well. Their only problem is in terms of prioritizing expenditures of dollars.

I have to admit my distinguished colleague was absolutely correct when he indicated there were many problems with respect to the production. There were serious problems. But, the Air Force will admit, Mr. President, that

those flaws have been substantially corrected.

I recognize this is a case where reasonable people can disagree. But I have to suggest to characterize the plane as not being fit and worthly of production is not the case. The question is whether we undertake to build this trainer now or whether we deny our young Air Force pilots the modern, effective, and efficient trainer they deserve. We also have to ask whether we want to lose the productive capacity of the Fairchild Republic facility.

For fiscal year 1987 the administration has asked for increased funding for highly advanced aircraft. The increase for the F-16 and C-5B aircraft alone totals over $600 million over this fiscal year. The Air Force has put the new generation trainer low on its priority list. I have to question that move, Mr. President. Not only does it effect the quality of our young Air Force pilots, but it will effect their safety as well.

The current trainer, the T-37, is 30 years old. It does not have the pressurized cabin to permit all-weather training. It does not have the side-by-side seating for student and instructor training. The T-46 has both features and the T-46 consumes 66-percent less fuel and costs 30-percent less to operate and maintain.

Again, I would suggest, Mr. President, that we go ahead with the T-46 Program, that we possibly do it on a reduced production level, that we not jeopardize the strategic production capabilities of the Fairchild Republic facility, and that we save the taxpayer's money by putting into service a much more cost-effective trainer.

Mr. President, the House Armed Services Committee, and both Defense Appropriations Committees strongly support the T-46A Program. The T-46A Program can—and should—proceed.

The T-46A is a successful aircraft that deserves the support of the Air Force and Congress.

Mr. President, I strongly oppose the amendment, notwithstanding the fact that I have deepest respect and admiration for the chairman of the Armed Services Committee who has always been a strong supporter of the Air Force as well as a strong national defense.

Thank you, Mr. President.

Mr. GOLDWATER. Mr. President, I will be very brief. I have been a pilot for 57 years of my life. And they say there are old pilots and bold pilots. Well, I am an old pilot. I quit being a bold pilot a long time ago.

But, Mr. President, this airplane, from the first one delivered, has had troubles. I have been to Edwards. I have talked to the test pilots. In fact, I have a test pilot on my staff. While he did not fly this aircraft, he flew the 14's and the 15's. Nevertheless, he reports that, yes, when the airplane was flying without these bugs that I have listed that just came to my attention the night before last, there was not anything too wrong with the airplane. As I say, when you have got a main spar that might act up, I do not want any part of that airplane.

But when we find out that it was grounded on May 5 and it will not refly until the end of the month at the earliest, it means they have got some problems. Frankly, they do not know what is causing this structural vibration and wing flutter.

I talked to the representatives at Edwards. I talked to the men who have been test flying it. They say, "We do not know what is causing it, but we are not going to fly that airplane while it has that flutter." Because when you get a flutter of 8 hertz or 8 cycles a second, anything can happen. And we do not want anything happening to a plane that is training the young men of this country.

So, Mr. President, I am insisting on a vote or the passage or the acceptance of this amendment, anything to get it on the books.

Mr. GLENN. Mr. President, we have some people on our side of the aisle that were interested in speaking on this proposal. I believe they are on the way to the floor. We are checking right now. I have no statement to make myself.

Does the distinguished manager have a statement? If not, we will put in a quorum call.

Mr. WILSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1440

Mr. WILSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1963

(Purpose: To make technical corrections in the bill)

Mr. WILSON. Mr. President, there are technical amendments at the desk. They have been agreed to by both sides. They are to cure purely typographical errors.

The PRESIDING OFFICER. There is a pending amendment at the desk.

Mr. WILSON. I ask unanimous consent that we temporarily lay aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from California [Mr. WILSON] proposes an amendment numbered 1963.

Mr. WILSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 9, line 21, strike out the quotation marks and the second period.

On page 9, between lines 21 and 22, insert the following:

"(D) 'retired pay' includes retainer pay.".

On page 10, line 8, insert "Cost" before "Reduction".

On page 10, line 23, insert "Cost" before "Reduction".

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. GLENN. Mr. President, as I understand it, these are mainly clerical amendments as much as anything else. They are just technical. I am sure it does not change the intent or the content of the proposal at all. We would be glad to accept them.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from California.

The amendment (No. 1963) was agreed to.

Mr. WILSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WILSON. Mr. President, I suggest the absence of a quorum.

I withdraw that.

AMENDMENT NO. 1962

Mr. GLENN. Mr. President, on the pending amendment by the distinguished Senator from Arizona, I am putting out a hot line on our side to make sure there are not other people who want to speak for or against this since it came before us rather suddenly. I understand the Senator from New York wishes to speak. I will have a report on that hot line by the time he finishes.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank the Chair.

I thank my distinguished friend from Ohio for the opportunity. I have to be at about nine different places at the moment when I am on the floor to speak in opposition to the amendment.

First, I would ask unanimous consent that a statement by Senator CHILES of Florida be included in the RECORD at this point. He, too, is concerned about this proposal.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. CHILES. Mr. President, I am concerned about this amendment to deauthorize fiscal year funding for the Air Force T-46A trainer.

Earlier this year Secretary of the Air Force Russell Rourke announced a decision not to seek production funds in fiscal year 1987 for the aircraft. Although the Air Force admits the T-46 has performed satisfactorily in the flight test program, Secretary Rourke cited manufacturing problems, schedule delays, coupled with budget restraints as reasons for the decision.

I understand from reliable sources that the problems which forced the Air Force to suspend progress payments last year have either now been corrected or are in the final process of being corrected.

The Air Force had planned to request $548 million in fiscal year 1987 for the T-46A and purchase 650 planes over the life of the program. Under current plans, the Air Force will only buy the first lot of 10 T-46A's, continue to use the 30-year-old T-37's for undergraduate pilot training for the near term, and restart the T-46 program in the 1990's.

While I feel the Air Force should have primary input in making these types of decisions, I have to question the way this particular one was made, since Air Force representatives have testified time and time again in the Defense Appropriations Subcommittee of the need for replacing the aging T-37 aircraft as the Air Force's primary trainer. In fact, Secretary of the Air Force Verne Orr stated in testimony before our committee 2 years ago that "* * * The T-46 trainer, a trainer that we desperately need, because our trainers are T-37's and very, very old* * *". There is no question of the requirement to build a new trainer. The only questions are when and by whom.

The American taxpayer has made a substantial investment in the RDT&E of a next generation trainer for the Air Force. To cancel this program now when these aircraft are about to go into production just doesn't make good sense to me. Especially when it appears the selected alternative to continuing the T-46 program will cost an additional $900 million. The T-46A represents an important new asset in the Air Force inventory. With the T-46's ability to train new pilots quickly, effectively and at reduced costs in maintenance and fuel savings, our defense posture should be significantly improved.

I can understand the reasoning behind the Air Force's cancellation of this program for the time being, in hope of a better future budgetary climate. But, quite frankly, I don't think this will happen, and in the long run we are going to be saddled with an outdated, less capable Air Force trainer and new program startup costs whenever the T-46 program is recompeted, not to mention costs associated with the cancellation. It seems to me that this could result in a bigger waste of money.

The Air Force has taken significant and important action. It has signaled the prime contractor that it will not tolerate nonperformance. The contractor has responded by making a significant investment of its own to correct prior deficiencies. Now Congress and the Air Force should closely work together to determine whether the contractor can perform and a quality aircraft can be produced at a reasonable cost.

Clearly, in the 1987 budget cycle, Congress will have an ample opportunity to review the Air Force decision and take appropriate action. I think this is the better option than going ahead at this time and deauthorizing an existing program which just several months ago Congress authorized and appropriated funding for.●

Mr. MOYNIHAN. Mr. President, I think we know the likely outcome of any amendment offered by the distinguished, revered, and respected chairman of the Armed Services Committee on this floor today. I have talked with him many times in private about this matter. I am altogether sympathetic to his efforts to strengthen the Air Force, and yet we are facing the constraints of the Gramm-Rudman legislation. These two forces have met on the wings of the T-46 trainer.

I have been informed that the Secretary of Defense has stated that under no circumstance will any money be spent on this program in this year's budget because it would divert funds needed more urgently elsewhere. I question the priority of buying more and more fighters while training our pilots in aircraft that are older than they are.

And the fact that this will kill Fairchild Republic is simply an incidental aspect of a decision being forced on the Air Force in consequence of the constraints which we placed upon ourselves last fall. But it is not incidental to me. I opposed Gramm-Rudman at the time because an event such as this would surely come and we would end up making serious mistakes, because we had put ourselves in the position of having no alternative, but conveniently having an excuse.

On more than one occasion in that debate I recalled John F. Kennedy saying to govern is to choose, and I found myself saying that this was the abdication of choice, and that it would end up with events such as this. I fear we have lost the ability to choose the best and most cost effective trainer for our pilots.

The facts are that the Navy—excuse me, the Air Force—needs a new trainer. The facts are that the Cessnas will reach the limit of their useful life toward the end of the eighties, and that a new trainer would have to be brought on line soon. That is indisputable.

Mr. GOLDWATER. I advise my friend from New York with whom I have discussed this matter once or twice that it is an Air Force trainer. It is not a Navy trainer. I will have to admit that we were all for it a year ago, and we voted for it in conference. But there has been some things happen that I have enumerated, and I have enumerated to my friend from New York. But since I talked with him, there have been some other things happen. In fact, I wanted to go with the airplane but it cannot be until after the end of this month. It has developed a structural vibration and a wing flutter. They do not know what is causing it. I have talked personally with the director of training. But it vibrates about 12 to 18 inches, and it is a very short wing. To have a vibration cycle of that size is most disturbing.

□ 1450

The Air Force intends to continue research and development, not of a gigantic nature. They have not asked for funds for that. But they intend to procure the T-46 data package and defer procurement until such funds are available. On sufficient funds, we have not been cut over $20 billion in the military department. The House is planning another $8 billion cut, and an additional $25 billion cut.

When we get through, what we are looking at is probably something around $50 billion to $60 billion.

I think this is just one of the programs that will be cut.

We do have a training airplane that I will admit is a little bit old. It is not too old. But at the expenditure of $200 million, not billions, we can get 25,000 hours out of the T-37 trainer.

The Air Force desires that when funds are available, probably in the early 1990's, they will follow procurement of other major systems currently in production and the Air Force then will be in a position, if they care to, to buy the T-46.

As I have said to both the colleague of the Senator and to him, if he can change the mind of the Chief of the Air Force, if he can change the mind of the Secretary of Defense, I am not standing here and saying personally it is an airplane we should not buy. I am just repeating the decisions of those people who have to buy it and use it.

I voted for the darn thing but I can see now where I was wrong.

Mr. MOYNIHAN. Will the Senator yield?

Mr. GOLDWATER. Yes.

Mr. MOYNIHAN. I do not think he was wrong at all. I think he was acting under the constraints that have been set by Gramm-Rudman. The budget was cut $20 billion here and in the

House it will be $50 billion or $60 billion. I stood on this floor for 5 days predicting what would happen and it is happening. I would like to say this to the Senator from Arizona, and he knows this much better than I: The present trainers are very old craft. To spend $200 million to stretch them another 5 years is all right, though I have seen higher estimates, but this is a plane that has long been scheduled to be replaced. There is no guarantee that delaying the purchase will save money. And it will, I think, cost us money. The T-37 is a 25-year-old plane. There are certain weather conditions in which it cannot be flown, but the T-46 can. The T-46 has a greater ceiling, allowing more training flights in the same airspace. The T-46 can provide adequate training hours for pilots who will fly such costly aircraft as the F-15. The T-37 cannot.

Is it not the case that in the 1990's, as the chairman said, the Air Force will have to go forward with new trainers, and likely it will be very much this model? Fairchild will not survive to bid again on its own trainer if we kill the program here today.

Mr. GOLDWATER. Getting back to the Navy, the Navy bought a new trainer and there was no problem with it. It is not too unlike the T-46, but it works. The T-37 which the Senator refers to happens to fly right near my home. It is a very dependable airplane. It will only require $200 million to make it fly all the time that we are going to need a training airplane to fly between now and the 1990's.

I can tell my friend from New York that if he thinks this is a cut, he has not seen anything yet.

Mr. MOYNIHAN. I have not seen anything yet. I recognize that.

I say to my friend from Arizona he is acting under duress of a kind he should not face. I say this will end up with two things: We will train pilots for the next 5 years in aircraft that will not provide adequate training for the fighter planes they may be asked to fly in combat, and, second, in the end these planes will cost twice as much as they would if we get the bugs out of them, the flutter that they had a problem with, and go ahead with the program.

Mr. President, the Air Force has publicly announced its decision not to exercise its option for the second lot of 33 aircraft and reconfirmed that it will not seek funds for fiscal year 1987 for budgetary reasons. The T-46 design and performance has met with increasing satisfaction, but for the flutter I am confident will be fixed. The Air Force has acknowledged a need, within a finite period, to acquire a new primary flight trainer to replace the T-37 fleet, which was first flown in 1954 and which, in terms of the existing Air Force inventory, is almost entirely of 1950's design vintage. A modified version of the T-37 was rejected by the Air Force in the 1982 competition for the new primary trainer which led to the T-46 award. As late as 1984, Air Force Secretary Orr described the Air Force's need for the T-46 as "very desperate," and its eventual procurement on the basis of the T-46 prototype and data package, from whatever manufacturer, is almost certainly forthcoming.

If the production run is delayed for budgetary reasons, penalties to the taxpayers will be dramatic. I understand Air Force officials presented to the Secretary of the Air Force on March 18 a report indicating an increase of approximately $900 million can be expected for a 5-year delay in T-46 procurement. Fairchild believes the Air Force estimate can be rougly broken down as follows:

Inflation effects, $600 million;

T-37 inspection, $50 million;

Stop/start inefficiencies, $250 million, and

RDT&E changes, $50 million.

In addition, if the T-37 is minimally modified, but not reengined, during any interim period, another $200 million would be added.

I understand there are many factors which would add significant cost to the T-46 program if production is interrupted and then restarted 5 years later with a new prime contractor. In addition, the Air Force estimate may understate these stop/start inefficiencies.

Tooling concepts, manufacturing procedures, and material handling methods are unique to particular prime contractors. Although the basic aircraft configuration of the T-46 could remain the same, the detail design and construction would change significantly to accommodate the manufacturing procedures of a new prime contractor. Hence, new detail and assembly tooling, along with new planning and instructions for fabricating detail parts and assembly, would be required. Without regard to differences in production methods, costs and risks will increase as procured parts and equipment items are no longer available and new parts and equipment have to be developed and qualified.

In summary, the cost of reprocurement of an existing T-46 design by a new prime contractor is likely to add an additional $250 million to the Air Force's $900 million estimate in order to cover the added efforts described above.

The term "hiccup" is used within the industry to describe the additional costs incurred by a stop-start procurement process. As such, "hiccup" procurements are the costliest versions of procurement stretch-outs which are themselves increasingly criticized as imprudent and highly expensive means of acquiring weapons systems. It is critical to note that the T-46 issue does not involve a priority decision to forego or restrict a weapon system, such as with the Sergeant York missile, the Bradley Fighting Vehicle, or the number of MX placements, in which a hard decision is made, on priority or other grounds, to cancel or reduce a procurement. Rather, because a new primary flight trainer must be acquired by the Air Force in the reasonably near term, adding $1 billion to the cost of eventually acquiring a replacement trainer fleet merely stretches out the procurement at a grossly unacceptable incremental cost.

A billion dollars is a high cost for the "pay me latter" strategy implicit in the present term concellation of the T-46, on which the Air Force has already spent $600 million. Indeed, a strong case can be made, and has been made by the Air Force, that for a variety of reasons there is an immediate need for the T-46.

I am confident that Fairchild can produce top quality aircraft at the price it agreed it would. To kill the program and the company because the Air Force insists on spending its limited funds on more fighters would be an abdication of our responsibility to see that defense dollars are spent wisely. Perhaps it is cheaper over the next 5 years to upgrade the T-37's than to proceed with the T-46. But over 20 years, continuing the T-46 program is the most cost-effective course, and I urge my colleagues to support it.

I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GOLDWATER. I might say to my friend that the aircraft that the young cadet advances to from the T-37 is a T-48 made by Northrup that will be flying still in the year 2021. I will admit I will not be around.

Mr. MOYNIHAN. I view with great alarm that proposition and, in fact, I ask that it be struck from the record.

Mr. GOLDWATER. I will leave it in. I would say I would be wrong if I thought any different. Why the hell anybody would want to stick around this place that long, I do not know. [Laughter.]

Mr. MOYNIHAN. Mr. President, that concludes my remarks.

CANCEL PRODUCTION FUNDS FOR T-46

Mr. DOLE. Mr. President, the Senator from Kansas is in wholehearted support of this amendment. While the press has tried to portray this matter as a battle between the Kansas and New York congressional delegations, let's keep in mind here that what we are really talking about here is good government.

The Air Force awarded the T-46 contract in 1982 to Fairchild Industries—over my objections, it might be added.

The Senator from Kansas felt at the time that the proposal by Cessna was superior to the Fairchild proposal. But that would have been water under the bridge—if in fact the contract had been performed satisfactorily and within budget. But Mr. President, that has simply not been the case.

Difficulties with the T-46 contract have been well documented by Senator GOLDWATER. The design is faulty, and the entire manufacturing process has been fraught by continual pitfalls. Plain and simply, the airplane simply doesn't fly properly. Among other things, the wing vibration on the plane is so severe that it has been grounded yet again.

The Air Force has announced, and reaffirmed, its intention of cancelling production of the T-46 contract. Given the condition of the contract, and given the condition of the Federal budget it would have been difficult for them to have done otherwise.

No funds were requested by the administration for fiscal year 1987. And the Air Force has again indicated its interest in completing certain research and development functions, but in halting production of the plane. This amendment would simply ensure that no further production of the T-46 occur.

Frankly, the Senator from Kansas is not 100 percent convinced that we absolutely have to procure the data package and complete the R&D on the T-46. Advocates of that approach—and there are many in Congress and in the Pentagon—seem to feel that our budget problems will just fade away. It is argued that sometime in the 1990's when budget funds are available, we can resume production of the T-46. It seems to me we ought to go all the way and cancel the entire program, production and all, and that when we redefine our trainer needs at sometime in the next few years, we can simply start over.

But, Mr. President, let's at least make sure we make the right decision here and prevent further production of the T-46. We have serious budget problems around here. The Defense Department portion of the overall budget is substantial—too high by some standards, not high enough to others. But we must make sure that we spend these precious defense dollars wisely. And here we have an opportunity to cancel a poorly executed contract that would end up costing the taxpayers more than $6 billion before it is all said and done. And again: the Air Force itself doesn't want to complete the production.

In this case, a perfectly acceptable scenario is available to the Air Force: Extending the life of the existing trainers at a tremendous cost savings to the Government. This is not the preference of Cessna Airplane Manufacturing Co., by the way. They have offered to spend their own money developing a new technology T-37 to meet the needs of the Air Force over a longer period of time. The T-37's will not last forever, but they have had a tremendous record to date. At such time as the Air Force can again seriously address trainer needs through the rest of the century, they should not overlook allowing the T-37 suppliers to update the T-37.

Mr. President, the Air Force decision to terminate T-46 production is a sign that they are willing to examine their own programs and take responsible action. Their decision will help establish additional credibility, and should be applauded.

In my view, if Congress were to reverse the Air Force, and to force upon them a program they don't want, our own credibility would be seriously undermined in the defense area. This is a simple amendment which would halt T-46 production. This action is long overdue. We simply cannot waste additional taxpayers' money producing T-46 airplanes.

Again, this is not fundamentally a dispute between Kansas and New York. It is a simple question of good government versus bad. T-46 production must be brought to a halt. Let's get on with it.

The PRESIDING OFFICER. Is there further debate?

The Senator from Ohio.

Mr. GLENN. Mr. President, we have put out a hotline request for anyone else who wanted to speak pro or con on this proposal. We do not have an answer back yet. I think we will have it in a few minutes. If no one else wishes to speak, I would suggest——

Mr. GRAMM. Mr. President, I had not intended to speak but I sense the refrain from an old song called Gramm-Rudman. In response to that refrain, since we have to wait anyway, I would like to make a few remarks.

Mr. GLENN. We have our answer back now. So when you are finished we will vote.

Mr. GRAMM. I have accepted the fact that for the next 5 years when the first sergeant at Fort Hood does not have enough money to order toilet paper or the street department does not have enough to repair potholes there will be two magic words to excuse everything. Those two magic words will generally be Gramm-Rudman. We here in the Senate know that it is really Gramm-Rudman-Hollings. The media leaves his name off because they like him better.

The basic truth is that the T-45, namely, an aircraft for the Navy, is on track, doing well, performing well, and will be built. The T-46, a companion ship, as a new trainer for the Air Force, is not doing well, is not performing well. In an era of tight budgets we have had a decision made not by one Secretary of the Air Force, not by two, but by three, with the new Secretary-designate, Secretary Aldridge.

These three Secretaries of the Air Force have all concluded that this plane does not perform up to standard and under the budgetary circumstances should not be built.

There are a lot of reasons that we can always give for continuing a program and we all find ourselves in a position of having to make those arguments from time to time. As I listened to them, I wondered if Jesse James ever had a trial and somebody had shown up and said, "I am not saying anything about Jesse James. I am not saying what he did was right. But don't you realize that he bought a lot of bullets, he bought a lot of rope, he bought a lot of blankets, and if you hang him you are going to have an economic impact on the general store and the community."

That is the same single-entry bookkeeping we have all become accustomed to in the political process.

The truth is not spending the money here on the T-46 will not be money that will be lost. An aircraft manufacturer has problems—and I can go through and read all of the problems that have been listed by the Air Force and they are numerous but I do not think that will change many people's minds. The money will not be lost if we do not spend it. We can spend it on the advance technology bomber. We can spend it to reduce the deficit. We can give it back to the working men and women of America. All of those are preferable uses to building the T-46.

I am hopeful that we will adopt an amendment offered by the one man here who clearly has looked into it in detail, who has the interest of our military services and their objective of preserving peace and freedom in mind probably as much or more than anyone in this body.

□ 1500

I hope that we will decide to support his amendment.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Is there further debate?

The Senator from Ohio.

Mr. GLENN. Mr. President, the indications on our side of the aisle are that no one wishes to speak either pro or con on this. I might add my own personal statement, however.

As I understand it, this item is covered in a bill we have acted on in the Senate Armed Services Committee. This is part of a package of things that we are unauthorizing, even though we have previously authorized this particular airplane. As I understand it, this is part of a proposal that it will be unauthorized but it has not been submitted to the floor yet. In

effect, this is acting in advance of submission to the floor. Is that correct, Mr. President?

Mr. GOLDWATER. Mr. President, that is correct. The Senator will remember there were four items. One was the matter of ships, one was the matter of $200,000 for the air defense aircraft flyoff. One was the T-46, and the other was the Navy tankers. Those four we expected to debate on the floor but we have taken the T-46 as an example. We do have the right to deauthorize. The Secretary of Defense can say no to anything we bought.

The PRESIDING OFFICER (Mr. SPECTER). The Senator from California.

Mr. WILSON. Mr. President, I am unaware of anybody desiring to speak further on this matter on our side.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the amendment of the Senator from Arizona [Mr. GOLDWATER]. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Minnesota [Mr. DURENBERGER], the Senator from Florida [Mrs. HAWKINS], the Senator from Maryland [Mr. MATHIAS], the Senator from Oregon [Mr. PACKWOOD] and the Senator from Wyoming [Mr. WALLOP], are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Florida [Mr. CHILES] and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 79, nays 14—as follows:

[Rollcall Vote No. 101 Leg.]

YEAS—79

Abdnor	Garn	McConnell
Andrews	Glenn	Melcher
Armstrong	Goldwater	Metzenbaum
Baucus	Gore	Mitchell
Bentsen	Gorton	Murkowski
Biden	Gramm	Nickles
Bingaman	Grassley	Nunn
Boren	Harkin	Pell
Boschwitz	Hart	Pressler
Bradley	Hatfield	Proxmire
Bumpers	Hecht	Pryor
Burdick	Heinz	Quayle
Byrd	Helms	Riegle
Chafee	Hollings	Rockefeller
Cohen	Humphrey	Roth
Cranston	Inouye	Rudman
Danforth	Kassebaum	Simon
Denton	Kasten	Simpson
Dixon	Kennedy	Stafford
Dodd	Kerry	Symms
Dole	Lautenberg	Thurmond
Domenici	Leahy	Trible
Eagleton	Levin	Warner
East	Long	Wilson
Evans	Lugar	Zorinsky
Exon	Matsunaga	
Ford	Mattingly	

NAYS—14

Cochran	Johnston	Sasser
D'Amato	Laxalt	Specter
DeConcini	McClure	Stevens
Hatch	Moynihan	Weicker
Heflin	Sarbanes	

NOT VOTING—7

Chiles	Mathias	Wallop
Durenberger	Packwood	
Hawkins	Stennis	

So the amendment (No. 1962) was agreed to.

□ 1520

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WILSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DURENBERGER. Mr. President, I am recorded as having missed rollcall vote No. 101, on the Goldwater amendment to prohibit obligation of funds for the T-46 trainer. I support the amendment and would have voted for it were I here.

Unfortunately, in my capacity as chairman of the Intelligence Committee I was involved in a closed meeting in a secured area of the committee, which does not have the normal bells and equipment which tell us when votes are occurring. We fall back on a human warning system, which in this case failed. For that reason, I was unaware of the fact that a vote was taking place and did not come to the floor to record my vote.

While my vote would not have made a difference in the outcome, I regret deeply that due to these special circumstances my vote was not recorded.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senate will be in order. The Senator from California is recognized.

Mr. WILSON. Mr. President, I appreciate the Chair's insistence upon order.

At this time we are prepared to offer what is probably the next-to-the-last amendment; and for the purpose of offering it I yield to my colleague and partner in this effort, the distinguished ranking minority member of the subcommittee, the Senator from Ohio.

AMENDMENT NO. 1964

(Purpose: To provide for full cost-of-living increases in the retired pay of certain persons after completion of 40 years as a member of a uniformed service)

Mr. GLENN. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Ohio [Mr. GLENN] proposed an amendment numbered 1964.

Mr. GLENN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12, strike out lines 1, 2, and 3 and insert in lieu thereof the following:

"(B) After the retired pay of a member or former member has been recomputed under subparagraph (A), increases in such member's retired pay shall be made in the manner prescribed in paragraph (1)(A) rather than in the manner prescribed in paragraph (1)(B).

Mr. GLENN. Mr. President, Senator WILSON, Senator HAWKINS, Senator KENNEDY, Senator DENTON, and I are offering an amendment to this military retirement reform legislation to restore full inflation protection for the annual cost of living allowance, or COLA, for old-age military retirees.

Under current law, military retirees receive an annual COLA equal to the percentage change in the average of the Consumer Price Indexes [CPI] for July, August, and September over the averaged indexes for the same 3 months of the previous year.

Under S. 2395 as reported by the Armed Services Committee, the annual full CPI COLA under current law would be changed to an annual COLA of the annual change in the CPI minus 1 percentage point, with a one-time restoral of the base at the 40th anniversary of entry in the service.

What that means is that none of this would apply now, with what is proposed under this bill, until at least 40 years from the date of enactment of this legislation. The 40th anniversary of entry into the service would be when this would apply.

In other words, when a military member retires, his or her annual COLA would be 1 percentage point less than the annual increase in the CPI. When the retiree reaches his or her 40th anniversary of service—generally age 58 to 62—his or her retired pay would be restored to what it would have been if he or she had received an annual full CPI COLA from the time of retirement. However, under the committee bill, after this one-time restoral of the retired pay base, the military retiree would continue to receive an annual COLA of 1 percentage point below the change in the CPI.

□ 1530

Mr. President, our amendment is very simple: it would provide that after the one-time restoral of the retired pay base at the 40th anniversary of service—after approximately age 60—military retirees would receive a full CPI COLA each year instead of the COLA of 1 percentage point below the annual CPI change in S. 2395 as reported. In other words, my amendment would ensure that military retirees would continue to receive full inflation protection for their pensions during their old age just as they do today.

This amendment is simply a matter of equity.

Retired military members remain subject to recall to active duty. Our

military manpower mobilization plans call for all of the military services to make extensive use of this important group of former military members in times of emergency. But when the military retiree receives the one-time restoral of his retired pay base at his 40th anniversary of service—at an average age of 60—he no longer can be considered reasonably to be on retainer pay and subject to recall to active duty as he was previously. At this point he becomes an old-age annuitant similar to anyone else receiving an old-age pension.

The COLA formula of 1 percentage point less than the CPI increase in S. 2395 as reported means that the military member's retired pay would be reduced in real terms during his most vulnerable years. A 75-year-old military retiree, for example, will have suffered a 16-percent real decline in the value of his retired pay as a result of the COLA formula in the committee bill. And the longer he lives, the greater the decline in the purchasing power of his annuity. In effect, if he lives 30 years, that would be a 30-percent reduction over what his buying power was, and those declining years occur at a time when he would need it the most and can least afford to have it cut back. So that is a catch-22 situation if I ever heard of one.

Mr. President, as long as we continue to provide full CPI COLA protection for Social Security recipients, I think we should do no less for the men and women who made a career of serving their country in uniform.

I would repeat something that has been said often here today, and that is that none of this legislation applies to current retirees; none of it applies to people currently in the military. This is prospective. It would be the new retirement proposal for those who would be signing up after the bill is passed.

Military retirees below the normal retirement age of approximately 60 would continue to receive less than full inflation protection for their annuity. But our amendment guarantees full inflation protection for military retirees in their old age.

Mr. President, I repeat again the amendment under this bill would be effective 40 years from the date of enactment. We want to protect the people who are interested in their retirement for the future. We want to let them know that we are interested in their retirement and we are working to protect it.

To get to the bottom line budget figures, what this does with this amendment would permit us to save $2.1 billion, as opposed to the target of $2.9 billion that has been suggested to us in committee. But those objectives we were given in committee have not been that sacrosanct in other committees. And I think to try and take out our budget problems on the backs, or planning, at least, of taking it out on the backs of military retirees in the future is the wrong way to go.

We do not know what impact this would have specifically on retention or on original recruitment, as I said earlier when we were discussing other aspects of the proposal that we have been debating here today. But to me, this is fairness and it is equity. I urge my colleagues to adopt this amendment.

Mr. WILSON. Mr. President, as chairman of the Manpower and Personnel Subcommittee of the Armed Services Committee, I join with my friend and colleague, Senator GLENN, the ranking minority member of that subcommittee in offering this amendment to insure that military retirees in their old age are neither forgotten or left without full protection from the ravages of inflation.

Our amendment is quite simple. The committee bill provides for a number of years following retirement the cost-of-living adjustments made in military retired pay will be the percentage increase in the Consumer Price Index less 1 percentage point. Now, I agree with this formula and so does the ranking minority member, the Senator from Ohio, because most nondisability military retirees are then still at an age when they are quite capable of earning other income. However, the committee bill also provides that after providing a one-time restoral to retired pay base at the 40th anniversary of service, that further cost-of-living adjustments will also be the Consumer Price Index minus 1 percentage point, and it is on that particular point with which we disagree, that feature, that take away in their old age, past the age of earning other income, of the full cost of living.

Mr. President, there is a lot of misunderstanding of the military retirement system. Perhaps it would be more accurate to say that the glass is about one-eighth full. There is very little understanding of it. Some who have virtually no knowledge of, or desire to learn about, the military retirement system think of it as an old-age pension, pure and simple. They think of it as some sort of a social welfare program. Well, nothing could be further from the reality.

First, military retirement is an integral part of the personnel management system of the Armed Forces. It is an instrument of controlling size and an instrument of recruitment and retention. And I think people really need to understand that. People must have a reason to voluntarily elect a career in the military, to subject themselves and their families to 20 to 30 years of the uncertainties and in many cases the dangers of military service, if we are to succeed in adequately managing our armed services with the kind of quality Volunteer Force that we currently enjoy.

Second, military retirees make their retirement the old fashioned way—they earn it. It is not a gift. It is not a dole. It is not a social welfare program. It is true that over a period of years we have improved compensation, as we desperately needed to do, because we had reached a time when the decline in our armed services reflected a decline in compensation. Well, it is true and we should be pleased and a little bit proud that we have cured some of the defects in a system that was discouraging quality people from choosing a military career.

But the point is that even though we have improved compensation, we cannot afford to rest upon our laurels. There is still a gap—and I might say a growing gap—between what young enlistees in the services can earn in military compensation and what they could be earning on the average in the civilian sector.

In a time when compensation was less generous than now, in a time when it was not at all generous, the retirement system was looked upon as deferred compensation, as a necessary adjunct to the kind of rather modest pay that Active duty personnel received in order to allow them the prospect of some security when their Active duty was completed.

Now some argue that personnel retire from the military at too young an age. Well, we are well aware in the subcommittee that the 20 years of service which we seek as the immediate goal of the career force that we hope we gain does allow them to go into a second career. Disincentives to 20-year retirement have been very much the subject of our concern and we have sought to eliminate them. There are many who will serve, and whom we should desire to serve, more than 20 years, and the bill before us takes into account the difference between the size of the force that we need to serve 20 years and that which we seek to retain for a full 30 years.

□ 1540

We recognize it by rewarding at a more handsome rate of compensation those who remain past 20 years of service. But our real concern is that we are able to attract a sufficient number of people of the quality that we require for this All-Volunteer Force to see to it that we can adequately man for 20 years all of the services to the requirements that are in their judgment not yet fully manned. But we must assure that we are able to attract the right kind of people to remain at least 20 years—the kind of career NCO's and the kind of junior officers who will become seasoned professional military leaders.

Let me suggest to my colleagues that there are many in the military who perform duties which we should not demand be performed for more than 20 years. Those that require a particularly high degree of physical activity come obviously to mind.

While I would agree that we do not wish to keep some for longer than that, there are many who perform critically needed administrative and technical duties, and increasingly technological duties in an increasingly technological Air Force, Navy, Army, and Marine Corps who should be urged to serve longer than 20 years. We do not say that for some of the combat soldiers and sailors who spend years in the field or on board ships away from their families.

Mr. President, military personnel deserve their retirement. I do not think it is unfair that we ask that they supplement their military retirement pay while they are young enough to do so, and young enough to have a productive second career as scores of productive citizens in our economy. But at some time in their lives, military retirement pay becomes the primary sources of their income in their old age when they can no longer continue in a second career.

Mr. President, at that time when they are no longer active wage earners, military retirees need to be given full protection for inflation. This bill with this amendment would continue to make that important distinction between the time in the life of the military retiree when he is fully capable of earning added income to supplement his retired pay, and that point at which he is entirely dependent or may be entirely dependent upon that retired pay, and whatever cost-of-living adjustment has been made to it.

That is why Senator GLENN and I support the formula that says that for the period prior to that 40th anniversary restorer, the COLA adjustment will be at the Consumer Price Index minus 1 percentage point. It is why we also insist that there should be full coverage thereafter because we are then dealing with people who are no longer able to earn an income to supplement their retirement pay.

The amendment before the Senate will provide that old age protection by providing that cost-of-living adjustments after the 40th anniversary of service, normally at about age 60, will be the full amount of the change in the Consumer Price Index—the full amount of inflation.

Mr. President, this is a fair amendment. It is fair to military retirees. It is fair to the American taxpayer. With the Glenn-Wilson amendment, the pending legislation will still save $2 billion a year from the retirement accounts. It will assist the Senate in conference with the House on military retirement in assuring that the outcome of that conference is fair and equitable while still saving these billions of tax dollars.

Mr. President, I strongly urge this amendment be adopted.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. GRAMM. Mr. President, I rise in opposition to the amendment.

Mr. President, I am in every way swayed and convinced by every argument that has been made here by the distinguished chairman of the subcommittee and by the ranking member. I think the argument for paying the full COLA is a good argument, and it is one that I am in great sympathy with. There is, however, a fundamental problem with this amendment.

The problem is that when we wrote the armed services authorization bill for fiscal year 1986, we wrote into that bill a requirement that there be a change in a law in such a way as to achieve $2.9 billion worth of savings. So we have heard very good and strong arguments for this amendment, but they are irrelevant to the question that is before us. And the question that is before us is a simple question. When we wrote the defense authorization bill for fiscal year 1986, we committed ourselves to achieve savings of $2.9 billion—not $2.1 billion that would be achieved as a result of this amendment, but $2.9 billion.

Having claimed those savings, we went ahead and spent that money in our authorization bill so that to come back now and not achieve the commitment we have made is to basically betray a commitment that is written into law to achieve $2.9 billion in savings in the military retirement program.

Mr. President, if this were an amendment to restore the full COLA on the 40th anniversary of the induction into the military, and it were going to be paid for by eliminating some other portion of benefit so as to be neutral in terms of our $2.9 billion commitment, I can assure you, Mr. President, and my colleagues that I would vigorously support it.

But the amendment is not simply to pay the full COLA starting on the 40th anniversary of induction, and meet the $2.9 billion. The amendment is to eliminate $800 million worth of savings. Having made the commitment in the authorization bill, I do not see how we now can in good faith go back and not meet that commitment. So as strong as the arguments are that are being made for our failure to meet the commitment, those arguments should have been made when we were here on the authorization bill. Those arguments are not relevant to the debate today. The debate today is about how we are going to fulfill a commitment we made in law in the defense authorization bill for 1986.

As appealing as this amendment is, as popular as it would be in my State, this amendment violates the commitment that this Senate and this Congress made, and therefore if we are to have any credibility in terms of our legislative actions, if we are to address the deficit problem that looms large and imperils the security of the Nation, we are going to have to take the very unpleasant and unpopular path of rejecting this amendment.

I know in the defense authorization bill that we asked the Defense Department to give us proposals that were related to other levels of savings. But that request was in the form of a study. The commitment in the authorization bill could not be clearer. It is a commitment to $2.9 billion worth of savings.

This amendment lowers those savings from $2.9 billion to $2.1 billion. No matter how popular it may be, this is the wrong thing for us to do. This is another example of where we have to take the long road, bite the bullet, and I think we have to reject this amendment.

I am happy to yield to the Senator from Illinois.

Mr. SIMON. I commend my colleague from Texas. I want to say I could not agree with him more. The reality is, and I think we have to stress this again, that we are not talking about anyone in the service now. We are not talking about anyone who is retired now. We are talking about prospectively those who come in.

Let us be candid. This thing has been a sacred cow that everybody is afraid to tackle. We are not going anywhere near as far in my opinion in this amendment, in the basic proposal as we ought to. When you talk about an $800 million savings, that is for 1 year. This is a year after year after year cost that we are going to add if we accept this Glenn-Wilson amendment.

I hope we do the thing that makes sense, that is a little tough for us, and that may cause a few letters to us that we do not like. But we have to get ahold of this deficit. Here is a practical kind of answer that we have to come up with.

□ 1550

I commend my colleague from Texas and I hope we defeat this amendment.

Mr. GRAMM. I thank the Senator from Illinois. I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I, too, want to commend my colleague from Texas in connection with the remarks he has made.

As a member of the Armed Services Committee, I attended all of the markup sessions concerning this sub-

ject matter. My colleague, my friend from Texas, and myself were very much involved in this process in the committee.

I think the Members of the Senate ought to understand that at one point in time in the committee we had two alternative plans concerning military retirement savings, one by the distinguished Senator from California, who is the chairman of the subcommittee, and another one by the distinguished Senator from Ohio, who is the ranking member of the subcommittee.

Each of those plans failed to meet the $2.9 billion savings requirement that this Senate and the Congress imposed upon itself. I want to stress that, that this Senate and the Congress imposed upon itself by its vote in the last DOD authorization bill.

The distinguished chairman of the subcommittee and the distinguished ranking member worked very hard on this problem. They are to be congratulated on their concern about the military retirement system and their concern to try to effect some savings. Frankly, the ultimate compromise that these two distinguished colleagues of mine have agreed upon does effect some savings.

But I think this point has to be understood. It falls short of what we directed ourselves to do. It does not achieve the $2.9 billion savings we are required to achieve. So it fails on that ground.

I think beyond that we ought to understand that the bill before us, the bill we are asking our colleagues to vote on here in the Senate, is a bill that we have worked very closely on with the Department of Defense to achieve the amounts of the savings directed in the last authorization bill.

This is not a product of the members of the committee or, for that matter, the subcommittee. It is not a product of the Senators on the Armed Services Committee. It is a product that the staff has crafted after close consultation with the Department of Defense, service chiefs, and others, and reflects not what they like. Mr. President, I do not mean to represent to this Senate that this is what the military folks would like; but it represents what they have indicated to us they can live with to achieve that $2.9 billion savings.

Why do I think it so important that we pass the bill?

We are called upon time after interminable time in this place to make all kinds of cuts. We are asked at every turn to make all kinds of hard choices.

We recently passed the Gramm-Rudman-Hollings legislation that imposes substantial reductions in the deficit in the future, through 1991, when the deficit, if we follow that course, will be eliminated.

I say it is a serious mistake to shrink from that task as this amendment is presented to us today by our distinguished friends. I have the highest regard for them, but we have something here that is the final act in compliance with something we have already done. We have something here that the Department of Defense, in effect, has signed off on. We have something here that the committee, after very careful hearings, very lengthy hearings, finally marked up by a vote of—and I do not want to misrepresent this fact, and I will be subject to correction—I believe everyone on the committee voted for it but the two distinguished Senators who are offering this amendment.

I am advised it was finally a voice vote in the committee. I remember very well that most members were there that day and everyone knew what was taking place. My recollection is that the distinguished Senator from California and the distinguished Senator from Ohio asked to be recorded in the negative. But I think the committee well knew and, with the exception of those distinguished Senators, approved in principle everything that was taking place there.

This is not a pleasant thing to do, quite obviously, but I think it is a necessary step.

My distinguished colleague from Illinois pointed out this is not just $800 million the first year. This is $800 million as far into the future as the eye can see. I think it is significant to understand that we are talking about a very substantial sum of money.

Let me say in conclusion that the committee bill, the bill before us, meets our direction in the authorization bill to save $2.9 billion. The Glenn-Wilson amendment would save only $2.1 billion. The Glenn-Wilson amendment will save $800 million less in military retirement costs on an annual basis. The reduction in future military retirement costs of the committee bill is 16 percent. A reduction in future military retirement costs of the Glenn-Wilson amendment is 11 percent.

I would hope that my colleagues do not shrink from the challenge here and will follow the committee. I think the committee product is the correct result. I think the committee product keeps our own commitment of honor that we made in the vote on the DOD authorization bill last year. I would urge my colleagues to vote against this amendment and ultimately to support this bill.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I want to thank my friend and colleague from New Mexico who has been waiting to speak and who I asked if I could move ahead. I will only be taking a couple of minutes. I thank him for his consideration.

Mr. President, the Members of the Senate who have spoken on this measure are basically all members of the Armed Services Committee and I think for the most part are members of the Manpower Subcommittee of the Armed Services Committee.

This has been one of those issues that I think we are not sure where we should be. In a different era, at a different time, I would strongly support the amendment pending offered by the chairman and ranking member of the Manpower Subcommittee.

The matter was discussed at great length in the subcommittee. It was discussed at great length in the full committee. I would simply say that I feel that under the circumstances that we are facing right now, where those of us who serve on the authorizing committee of one of our most expensive and most necessary program, that being national defense, are forced into a position, and I think it is a good force under the conditions of runaway deficits, that we have to make some tremendously hard choices. This was one of them.

I take no relish in opposing the amendment which has been offered, but I think if we are going to make the decisions that we have to make, if we have to reach compromises that reward, as best we can, those who serve long tenure in the armed services of the United States, we have to recognize what is a good compromise and what is not.

Therefore, I urge my colleagues to turn down the amendment, not because I would not like to vote for it, not because I am convinced that Senator WILSON and Senator GLENN do not have every rationale from an historic sense to present this. But I simply say that if this goes forward, it is going to be more difficult in the future for us to make choices on properly compensating in their retirement the people who serve the United States of America well over a long, long time. It is not just a matter of conscience, it seems to me, but it is a matter of making the right choice at the right time and obtaining the best compromise that we can.

Mr. President, I yield the floor.

Mr. BINGAMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I also rise in opposition to the amendment offered by Senators GLENN and WILSON and in support of the bill as reported by the Armed Services Committee.

The fundamental point which has been made several times already is that we as a Congress made a commitment last year to try to find $2.9 billion in savings in this account on an annualized basis, and we drew up an

authorization bill with the assumption that we would find $2.9 billion in savings.

The Defense Department gave us proposals for achieving that level of savings last fall and the committee adopted one of those proposals after long and careful deliberation on the issue.

□ 1600

The committee chose the DOD proposal which involved a combination of structural changes in the retirement system and somewhat less generous cost-of-living allowances for those future retirees who enter service after enactment of the bill. We rejected the approach taken by the House Armed Services Committee of making structural changes alone. The danger with such an approach is that, long before the year 2006, when military retirees will first come under the restructured retirement system, the Congress could make changes in the COLA formula in addition to the changes in structure. Certainly, the experience of the past several years with regard to COLA's for military and civil service retirees would lend credence to such fears.

The approach taken by the committee with regard to COLA's, providing a COLA equal to the Consumer Price Index minus 1 percentage point, with a one-time restoral of the full value of the retired pay at the 40th anniversary of entry into service, compares favorably with the action being proposed in the conference report on the civil service retirement reform bill, to which the White House reacted positively yesterday. My understanding with regard to that conference report is that civil service employees who entered service after January 1, 1984, will receive no COLA on their retired pay until age 62 and a COLA equal to the Consumer Price Index minus 1 percentage point after age 62.

The question really before us is whether we are going to attempt to meet the $2.9 billion target set last year on an annual basis. The amendment before us does not attempt to meet that target. If the authors of the amendment had tried to do so while providing a full CPI COLA after the 40th anniversary of entering service, they would have had to make some further reductions in the percentage of base pay provided at the 20-year mark, or they would have to change the pay base from the high 3-year approach taken in the committee's bill to something like a high 5-year approach. That is a step toward the approach taken in the House bill. I would not favor it and I am sure the proponents of this amendment, the Senator from Ohio and the Senator from California, would not support it either.

I rise to oppose this amendment, frankly, with great reluctance. Last year, I was one of those who suported Senator GLENN in his attempt to provide for more orderly consideration of military retirement reform. As I recall, we were on the losing side of an 85 to 9 vote. As a result of that vote and later votes on the authorization bill conference report, there was a clear congressional mandate, I believe, last year for a military retirement reform which would meet the $2.9 billion savings target on an annualized basis. There was a clear mandate that this retirement reform should apply only prospectively to those who entered service after the enactment of the new retirement bill.

Mr. President, the bill which the committee has recommended to the Senate meets those mandates and I urge its adoption as reported. I urge the Senate to reject the pending amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. NUNN. I thank the Chair.

Mr. President, I oppose the amendment offered by Senator GLENN, Senator WILSON, and others to provide an annual cost of living allowance—COLA—for military retirees after their 40th anniversary of service equal to the full annual increase in the Consumer Price Index [CPI].

I truly regret being on the opposite side of this issue from Senator GLENN and Senator WILSON. They have done an outstanding job as chairman and ranking member of the Manpower and Personnel Subcommittee.

They both put in long hours on this military retirement reform bill. I threatened to introduce an amendment to call this the Wilson-Glenn military retirement bill. I have not done that yet, and I shall refrain from doing so. No one likes to deal with cutting any retirement. I think it is important for us to understand that nothing in this bill nor anything in this amendment affects people already retired nor does it affect anyone who is in the military nor does it affect anyone who was in the military before the date of enactment. So we are not talking about taking away anyone's benefits who is already retired or anyone's benefits who is in the military service today. That is the case whether you vote for or against this amendment because the amendment itself does not affect anyone nor does the bill nor the part being amended.

Senator WILSON and Senator GLENN have performed a great service to the Senate in bringing this bill to the floor over the concerted opposition of the Defense Department and the individual military services. But I must oppose this amendment for two basic reasons.

The first reason is that this amendment would substantially reduce the savings in future military retirement costs included in the committee bill.

Last year, in passing the fiscal year 1986 Defense Authorization Act, Congress removed $2.9 billion from the military personnel appropriation accounts. In doing so, we directed the Defense Department to submit legislative proposals to the Congress which, if enacted, would result in savings of $2.9 billion in future military pay and retirement costs in fiscal year 1986 if enacted by October 1, 1985.

I must say, Mr. President, this initiative came primarily from the House side but we had a good-faith conference. We engaged in good-faith negotiations with the House conferees, the Senate and House both passed that authorization bill. I do not contend everyone is bound by that number. I do contend if we are going to have any sense of budgetary discipline, we have to start being bound by what we did last year in terms of setting priorities and goals.

Clearly, Congress intended last year that this military retirement reform bill would save $2.9 billion in fiscal year 1986 on an annual basis, which is roughly 16 percent of future military retirement costs.

Again, I emphasize that this does not affect anyone in the military today or anyone who has retired.

In considering this bill, the committee made a conscious decision that we should meet this savings target. The bill reported by the committee achieves this $2.9 billion in savings on an annual basis.

If the Glenn/Wilson amendment is adopted, the fiscal year 1986 savings on an annual basis would be only $2.1 billion, $800 million or 30 percent below the level of savings Congress envisioned last year when we passed the fiscal year 1986 Defense Authorization Act.

Because this bill will not become effective until June 1, or 8 months into fiscal year 1986, the actual fiscal year 1986 savings in the committee bill will be $1.0 billion.

If the Glenn/Wilson amendment is adopted, the actual savings this fiscal year would be only $700 million. In other words, if the Glenn/Wilson amendment is adopted, DOD will have to spend approximately $300 million more for military retirement accrual cost in fiscal year 1986 than under the committee bill.

If the retirement provisions in the committee bill were in effect today, the cost of the Glenn/Wilson amendment would be $800 million per year more than under the committee bill. Over the next 20 years, the additional funds that will have to be set aside for future military retirement costs will be $14 billion more under the Glenn/Wilson amendment than under the committee bill.

The bottom line, Mr. President, is that last year in the fiscal year 1986 Defense Authorization Act, Congress went on record to require a 16 percent—$2.9 billion in fiscal year 1986—reduction in future military retirement costs. The Armed Services Committee felt bound by this level of savings, and the committee bill saves this 16 percent. The Glenn/Wilson amendment, if adopted, would reduce future military retirement costs by only 11 percent, well short of the goal we set last year.

The second reason I oppose this amendment, Mr. President, is that it unwisely severs the traditional link between COLA's for civil service retirement and military retirement.

Since 1970, military and civil service retireees have received the same annual COLA increases. Since 1980, the annual COLA's for military and civil service retirement have actually been linked in law.

The COLA formula in the committee bill provides an annual COLA for military retirees equal to 1 percentage point less than the annual CPI increase, with a one-time restoral of the retired pay base at the retiree's 40th anniversary of service—generally age 58-62.

The current conference on the civil service retirement reform bill has almost concluded.

□ 1610

I see my distinguished colleague from Missouri here on the floor. He is the ranking member on the Government Operations Committee and has had a vital role to play in that. That, too, has been a very difficult undertaking. It has been long and hard. It has been tough. Everything done in that bill is opposed by some very worthy group that is against making the cuts. So none of these issues are easy. The difficulty is that most of the time when you are making these changes the only people who know you are making them are those who are being hurt to some extent so it is not like you have a group of cheerleaders out there saying "Rah, rah, go ahead and cut that retirement program." That is not what is happening. So the Senator from Missouri has undertaken that. It is my understanding that the conference agreement which has recently emerged—in fact, it was reported this morning in the news media—provides no cost-of-living increase for civil service retirees before age 62. For civil service retirees age 62 and over, the cost-of-living increase would be generally equal to the CPI minus 1-percentage point.

Now, the committee bill provides a COLA for military retirees from the time they retire until their retired base pay is restored at the 40th anniversary of service, generally ages 58 to 62. Although there would be no COLA at all for civil service retirees before age 62, I think this difference in treatment is justified.

In other words, even without the Glenn-Wilson amendment, there is a distinction here between civil service retirees under the emerging conference report and military retirees if this committee bill passes. The military retirees are being treated more generously and I think there is a reason for that.

The military retirees' personnel management policies are based on having a youthful and vigorous force and many military members have to leave service before they want to leave service. So there is a reason for this basic distinction.

But while these are valid distinctions between military retirees and their civilian counterparts prior to age 62, it is very difficult for me to make an intellectual case that military retirees are so different from civil service retirees after age 62 that military retirees should receive a more generous cost-of-living increase than civil service retirees after that point.

I want to make it clear to everyone that if this amendment is adopted, we will be treating civil service retirees and military retirees fundamentally different after the age 62. Civil service retirees will not have as generous a retirement plan as military retirees. The committee bill provides that military members at their 40th anniversary of service will receive a one-time restoral of their retired base pay to the level it would have been if they had received full cost-of-living increases from the time of retirement. After this one-time restoral, however, under the existing bill without the amendment they would continue to receive an annual cost-of-living increase of CPI minus 1 percentage point which to my understanding is similar to the cost-of-living allowance for civil service retirees in the civil service retirement conference agreement.

The Glenn-Wilson amendment would provide full CPI COLA's for military retirees after their 40th anniversary of service. If we adopt this amendment, we would be providing a COLA mechanism for old-age military retirees that is substantially more generous than the COLA mechanism for old-age civil service retirees.

In my view after the age of 62, I do not see the justification for this different treatment.

Finally, Mr. President, I think all of us are coming to the unpleasant realization that full inflation protection for all Federal entitlement programs, if we are going to ever get the fiscal house in order, is going to have to be a thing of the past. We can handle it the best we can and we can be sensitive to the needs and certainly we ought to exempt those people who are presently employed. We ought to exempt those people with whom, in effect, we have had an implicit contract and apply it to people in the future. We must get our fiscal house in order. This bill is the way to do that, and I suggest we will fulfill our commitment to the fiscally responsible proposal that is called Gramm-Rudman-Hollings if we begin to adhere to our own targets from last year. Suffice it to say, the committee bill on an annual basis saves $2.9 billion. The Glenn-Wilson amendment would save $2.1 billion on an annual basis. That is $800 million less in military retirement savings than we would achieve under the bill. The committee bill achieves a 16-percent reduction in retirement costs. The Glenn-Wilson amendment achieves 11 percent. These dollars do add up. Over the next 20 years there is a $14 billion difference between the Glenn-Wilson amendment and the existing committee bill. So you are talking about very substantial amounts of money. You are talking about $14 billion over a 20-year period.

I yield the floor.

Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Mr. President, I rise to speak in opposition to the Glenn-Wilson amendment.

For years and years and years the overgenerosity of the Nation's military retirement system has been studied and criticized.

In 1969, for example, there was what was called the First Quadrennial Review of Military Compensation. It made recommendations for reforming the military retirement system. Where did they go? Wastebasket.

In 1971, there was a Department of Defense review entitled the Interagency Committee of 1971, which led to the Retirement Modernization Act proposal of 1974. Where did that end up with respect to military retirement compensation? In the wastebasket.

Then there was the Defense Manpower Commission of 1976. It, too, recommended reforms. The same end result, the wastebasket.

Then there was the Third Quadrennial Review of Military Compensation. Parenthetically, I do not know what happened to the second but they lept to the third, and that was in 1976. Where did that one go? In the wastebasket.

Then there was the President's Commission on Military Compensation. That was back in 1978. It, too, ended up in the wastebasket. And then there was a Department of Defense review which culminated in the Uniformed Services Retirement Benefits Act of 1979. The same result. Then there was the President's private sector survey on cost control in 1984. The same result. And then there was the Fifth

Quadrennial Review of Military Compensation in 1984. The same result.

Now, it addition, Mr. President, to these special studies, there have been numerous reports on military retirement by such agencies as the General Accounting Office, the Congressional Research Service, The Congressional Budget Office, and so forth.

All of these studies that have made recommendations for sweeping changes in the military retirement system so as to effecuate cost reductions, what have they wrought? Nothing.

Today, however, we do have before us the beginning of reform. S. 2395, the Uniformed Services Retirement Cost Reduction Act, is a serious attempt to change the status quo. In my thinking, it doesn't go nearly far enough. Those of us who spent the last 3 years revising the civil service retirement system would have been far happier had we been able to include the military in our bill and simply equate military retirees with other special classes such as police officers and firefighters, but I do applaud the Armed Services Committee for finally dusting off the decades of reports and making some fundamental changes.

There is one feature of the bill, however, which I think needs to be clarified—the cost-of-living adjustment that will be paid to military retirees. Until this legislation military and civilian retirees have always been given the same COLA's—full COLA's. This year the full COLA's were suspended for both military and civilian retirees, and a twice-a-year COLA for both of these groups of retirees was reduced to a once-a-year COLA in 1981, but Federal retirees, like Social Security recipients, have traditionally received full COLA's.

The Federal Employees Retirement System, the new civil service retirement plan, changes the full-COLA philosophy for Federal workers. Under FERS—the conference report for which will be considered by the Senate in the next few days—civilian retirees will receive no COLA if they retire before age 62, and after age 62 they will receive, not a full COLA, but a COLA based on the Consumer Price Index, minus 1 percent. This COLA change was the most hard-fought and difficult provision of the civil service retirement legislation.

However, during the 3 years the Governmental Affairs Committee spent working on FERS, it became strikingly clear to everyone closely involved with the bill that full COLA's are astronomically expensive and absorb funds which are better allocated to basic features of a retirement plan, such as the accrual rate. It is to the immense credit of the Federal employees unions that they saw fit not to block FERS once both the Senate and the House determined to legislate less than a full COLA for Federal civilian employees who will retire under FERS. I cannot overemphasize how difficult it was for the Federal unions to accept this decision and still support the FERS.

S. 2395 would provide similar treatment for military retirees. While the bill does not track the reduced COLA in FERS exactly, it, too, bases its COLA on the concept of CPI minus 1. I applaud this reduction, and while the military retirement system will remain far more generous than either the current civil service retirement system or FERS, at least the two systems will retain the historical pattern of the same or nearly the same COLA treatment.

Senators GLENN and WILSON, in the amendment now before us, drastically change that civilian-military link and ask the Congress to acknowledge in this area, as in all others, that the military is more deserving, more in need, and more important than the rest of the Federal work force. I cannot accept that philosophy for overall spending levels, and I certainly cannot accept it for military retirees' COLA's.

We should defeat the Glenn-Wilson amendment on the basic inequity of their proposal. If no future Federal civilian retirees will receive a full COLA, then no future military retirees should receive a full COLA.

However, if this basic consideration escapes my colleagues, then I appeal to their sense of fiscal responsibility. If the Glenn-Wilson amendment passes, the $2.9 billion in annual savings now attributed to S. 2395 will drop to $2.1 billion. Is a full COLA for a selected group of Federal personnel worth $800 million a year?

I certainly think not, and I urge my colleagues to defeat this amendment.

Mr. WILSON. Mr. President, I ask unanimous consent that on amendment 1964 at the appropriate place in the RECORD, Mrs. HAWKINS, Mr. KENNEDY, and Mr. DENTON be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER (Mr. EVANS). Is there further debate?

Mr. WILSON. Mr. President, I have listened with keen interest to the debate from my colleagues. I must say that I look forward in the future to equally fervent attacks on spending with regard to COLA's for other groups, but I am not so certain that we will see the same fervor if we are talking about Social Security or veterans.

□ 1620

Beyond that, I point out that those who are legitimately concerned with the deficit can take a little comfort, I think, from the fact that we are talking about an impact that is 40 years hence—40 years from the date of enactment. That is how long it would be before the increased spending that this amendment contemplates would actually take place.

I suspect that somehow between now and then there will be supervening events. But one thing I would make clear to my colleague from Missouri that there is indeed a distinction between military service and other highly useful and worthwhile things performed by civil servants. It is precisely because of the differences between military service and virtually every other form of activity that the military has consistently had a different retirement system. That has been true for half a century or more.

I also listened with great interest as he chronicled the various efforts to review the retirement system. Had he been here earlier, he could have been treated to the list I read into the RECORD. One distinction is that I have had the fun of looking through most of these recommendations, and it is true that Congress has turned away from reform.

The reason why one generation after another of investigations took place, with no result, is that Congress ignored those recommendations. In my judgment we are doing that again today.

I do not wish to be churlish or uncharitable, but I have to say that this is a modest beginning because it is focused purely on cost. When the military retirement system is one that is used as a force manager, when it is an integral part of the strategy of recruitment and retention, then I think it deserves to be treated differently, and it is inevitable that it will have implications that are quite different from all other retirement systems.

What we are looking at is a system that will cost somewhat more, but it is an amendment that will still result in the pending bill saving $2.1 billion annually from the military retirement accounts.

The reason for the difference between what we are proposing in this amendment, brought by the ranking minority member and myself, and the underlying bill has to do with the nature of military service. It has to do with those 12 to 15 moves that are made in a 20-year career. It has to do with the separations, extending 6 months and longer, sometimes 2 years, from family and loved ones. It has to do with danger, with the physical peril that occurs, not just in time of war but also in time of peace, because this is a dangerous business.

It is a very different way to make a living. Those who are induced to choose it, I concede, make that decision primarily because it is what they want to do. They want to serve their country. They like the military life. But they also have the same obliga-

tions as the rest of us, about the time we take on the responsibilities of a family, to see to it that, in a time when they can no longer run those hills, when they can no longer qualify for performance in a high-performance fighter aircraft, these men and women of the service be able to look forward to a second career, a productive one, in the civilian sector. But it is to a time when they are beyond that, that we are looking and directing the provisions of this amendment.

I think I have an honest disagreement with my friend from Georgia. He finds no reason to differentiate between people who are 62 years old, regardless of whether they attain that age as the result of a career in the military or another career. I think there is a difference, an enormous difference.

If we are to succeed in continuing, particularly in a time when we have turned to an All-Volunteer Force, to attract the kind of people who are essential to maintaining the quality of that All-Volunteer Force, then I think we need to be concerned with their compensation, of which this is one part; and if it is not the most important part, I would say the second most important part.

With regard to the money, the $2.9 billion that has been spoken of has been fully appropriated by the Appropriations Committee. I do not deny that what we are proposing by way of this amendment will result in a lesser saving; nonetheless, as amended with this amendment, the bill would save $2.1 billion annually.

So I guess what we come down to is a difference in our evaluation of the importance of seeing to it that there is that added increment of security for those who in the first years of their lives, for 20 years or more, choose a life of real insecurity. It seems to me that that is a fair trade. For that reason, I urge the adoption of this amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I move to lay the amendment on the table, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment. The motion is not debatable, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS], the Senator from Oregon [Mr. PACKWOOD], the Senator from South Dakota [Mr. PRESSLER], the Senator from Wyoming [Mr. WALLOP], and the Senator from Florida [Mrs. HAWKINS] are necessarily absent.

I further announce that, if present and voting, the Senator from Florida [Mrs. HAWKINS] would vote "nay."

Mr. BYRD. I announce that the Senator from Florida [Mr. CHILES] and the Senator from California [Mr. CRANSTON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 64, nays 29, as follows:

[Rollcall Vote No. 102 Leg.]

YEAS—64

Abdnor	Exon	Melcher
Andrews	Gore	Metzenbaum
Baucus	Gorton	Mitchell
Bentsen	Gramm	Moynihan
Biden	Grassley	Murkowski
Bingaman	Hart	Nickles
Boren	Hatfield	Nunn
Boschwitz	Hecht	Proxmire
Bradley	Heflin	Pryor
Burdick	Heinz	Rockefeller

NOT VOTING—7

Chiles	Mathias	Wallop
Cranston	Packwood	
Hawkins	Pressler	

So the motion to lay on the table amendment No. 1964 was agreed to.

□ 1650

Mr. WILSON. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. NUNN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WILSON. Mr. President, I am not aware of any other amendments.

Mr. QUAYLE. Mr. President, I support S. 2395, the Uniformed Services Retirement Cost Reduction Act of 1986.

We, in the Armed Services Committee, faced a difficult situation when we addressed the question of modifying or reforming the military retirement system. There has been a longstanding concern over the cost and structure of the current system. At the same time, it is a clear imperative that we ensure the military retirement system remains both an incentive and a reward for the dedicated service and efforts of the members of our armed services.

I am pleased that the committee and the full Senate here today have found an approach to this situation that I believe meets both criteria. We have proposed very carefully considered prospective changes. This legislation will achieve needed cost savings in the retirement system, but it will not deprive any current members of our armed services of promised benefits. Nor will it so reduce benefits to individuals who join the military in the future that there remains no motive to do so except patriotism.

Because of this success in achieving such disparate goals, and because S. 2395 contains other amendments pertaining to the Department of Defense's procurement process which are of great interest and concern to me, I am happy to vote for this legislation.

Mr. THURMOND. Mr. President, I rise in support of S. 2395, the Uniformed Services Retirement Cost Reduction Act of 1986. The Manpower and Personnel Subcommittee of the Armed Services Committee worked for many months reviewing numerous proposals for retirement reform.

The chairman of the subcommittee, Senator PETE WILSON, and the ranking minority member, Senator JOHN GLENN, have worked long and hard to bring about equitable adjustments in the military retirement system.

The Congress has discussed changing the military retirement system periodically for about 10 years. Last year, the Department of Defense Authorization Act for fiscal year 1986 mandated reform in the system.

Mr. President, for a long time I opposed changing the retirement system because of the adverse impact that it might have on retention of our most qualified personnel. The changes that we recommend in this proposal are modest, and I sincerely believe there will be little adverse impact on the career force if these changes are enacted into law.

I firmly believe that this legislation will resolve congressional concerns about the military retirement system. To open up the issue of military pensions annually will severely impact upon our ability to attract and keep quality personnel.

Mr. President, one of the most important provisions of this legislation is that all personnel currently on active duty are "grandfathered" under the present system. There will be no change in retirement benefits for current retirees or those personnel on active duty today.

Only those personnel who enter the service after this bill is signed into law will be under the new retirement system. The major change recommended in this bill reduces the amount of retired pay for a retiree with 20 years of service from 50 percent of his basic pay to 44 percent of his basic pay. Anyone who remains on active duty for 30 years will receive 75 percent of his basic pay.

Mr. President, adjusting any form of Federal retirement compensation is never popular, but in the current fiscal environment in which we find our country, we must make some hard decisions and tighten our belts. The military retirement changes contained in this legislation are equitable and fair, and I urge all my colleagues to support this bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. WILSON. Mr. President, I ask unanimous consent that the Committee on Armed Services be discharged from further consideration of H.R. 4420, the House companion bill to S. 2395.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILSON. Mr. President, I further ask unanimous consent that the Senate now turn to the consideration of H.R. 4420.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4420) to amend title 10, United States Code, to revise the retirement system for new members of the uniformed services, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed immediately to the consideration of the bill.

Mr. WILSON. Mr. President, I move to strike all after the enacting clause of H.R. 4420 and to substitute the text of S. 2395, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. NUNN. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, I would like to inquire of the distinguished majority leader whether or not there will be more rollcall votes tonight.

Mr. DOLE. Mr. President, this will be the last rollcall vote, unless there be some request for reconsideration. It is my guess the bill will pass easily. We will take up another matter for discussion and after we do that, we will go out until Monday.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass?

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Florida [Mrs. HAWKINS], the Senator from Maryland [Mr. MATHIAS], the Senator from Oregon [Mr. PACKWOOD], the Senator from South Dakota [Mr. PRESSLER], and the Senator from Wyoming [Mr. WALLOP] are necessarily absent.

I further announce that, if present and voting, the Senator from Florida [Mrs. HAWKINS] would vote "nay."

Mr. BYRD. I announce that the Senator from Florida [Mr. CHILES] and the Senator from California [Mr. CRANSTON] are necessarily absent..

The PRESIDING OFFICER (Mr. MCCONNELL). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 92, nays 1, as follows:

[Rollcall Vote No. 103 Leg.]

So the bill (H.R. 4420), as amended, was passed, as follows:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE; REFERENCES TO TITLE 10, UNITED STATES CODE

(a) This Act may be cited as the "Uniformed Services Retirement Cost Reduction Act of 1986".

(b) REFERENCES TO TITLE 10.—Except as otherwise expressly provided, whenever in this act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 10, United States Code.

SEC. 2. AMENDMENTS AFFECTING GENERAL COMPUTATION OF RETIRED PAY

(a) COMPUTATION OF RETIRED PAY.—Section 1401 is amended—

(1) in the first sentence—

(A) by inserting "(a)" before "The monthly"; and

(B) by inserting "who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, or who is retired for disability under chapter 61 of this title" after "subtitle"; and

(2) by adding at the end thereof the following new subsection:

"(b) The monthly retired pay of a person entitled thereto under this subtitle who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, and who has been retired other than for disability under chapter 61 of this title, is computed according to the following table. For each case covered by a section of this title named in the column headed "For sections", retired pay is computed by taking, in order, the steps prescribed opposite it in columns 1 and 2. The amount computed, if not a multiple of $1, shall be rounded to the next lower multiple of $1. However, if a person would otherwise be entitled to retired pay computed under more than one pay formula of this table or of any other provision of law, he is entitled to be paid under the applicable formula that is most favorable to him. Section references below are to sections of this title.

"Formula No.	For Sections	Column 1 Take	Column 2 Multiply by
1	1331	Monthly retired pay base as computed under section 1407(b).	2½ percent of years of service credited to him under section 1333 multiplied by the percentage factor prescribed in section 1407a(b) for years of service credited to him under section 1332.
2	564 1263 1293 1305	Monthly retired pay base as computed under section 1407(b).	The percentage factor prescribed in section 1407a(a) for years of service credited to him under section 1405.

"Formula No.	For Sections	Column 1 Take	Column 2 Multiply by
3	633 634 635 636 1251	Monthly retired pay base as computed under section 1407(b)..	The percentage factor prescribed in section 1407a(a) for years of service credited to him under section 1405.".

(b) RECOMPUTATION OF RETIRED OR RETAINER PAY TO REFLECT LATER ACTIVE DUTY.—Subsection (a) of section 1402a is amended—

(1) by inserting "(1)" after "(a)";

(2) by inserting "but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986," after "September 7, 1980,";

(3) by adding after paragraph (1) the following new paragraph (2):

"(2) A member of an armed force who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who has become entitled to retired pay or retainer pay, and who thereafter serves on active duty (other than for training), is entitled to recompute his retired pay or retainer pay upon his release from that duty according to the following table. The amount computed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.

"Column 1 Take	Column 2 Multiply by
Monthly retired or retainer pay base under section 1407 of this title which he would be entitled to use if— (1) he were retiring upon release from that active duty; or (2) he were transferring to the Fleet Reserve or Fleet Marine Corps Reserve upon that release from active duty.	The percentage factor prescribed in section1407a of this title for the sum of— (1) the years of service credited him in computing retired pay or retainer pay; and (2) his years of active service after becoming entitled to retired pay or retainer pay.".

(c) TAX TREATMENT OF DISABILITY RETIRED PAY.—Section 1403 is amended by inserting "(a)" after "1401".

(d) COMPUTATION OF YEARS OF SERVICE.—Section 1405 is amended—

(1) by inserting "(a)" after "1401";

(2) by striking out "3991 (formula A), 3992" and inserting in lieu thereof "1401(b) (formulas 2 and 3), 3991 (a) and (b) (formula A), 3992 (a) and (b)"; and

(3) by striking out "8991 (formula A), or 8992" and inserting in lieu thereof "8991 (a) and (b) (formula A), or 8992 (a) and (b)".

(e) DEFINITIONS.—(1) Section 1407(a)(2) is amended to read as follows:

"(2) In this section:

"(A) 'Uniformed service' means—

"(i) any of the armed forces;

"(ii) the commissioned corps of the Public Health Service; or

"(iii) the commissioned corps of the National Oceanic and Atmospheric Administration.

"(B) 'First became a member of a uniformed service' means the initial date a person was enlisted or appointed in a uniformed service as an officer, an enlisted member, or a cadet or midshipman.".

(2) Section 1407(b)(3) is amended—

(A) by inserting "(A)" after "(3)"; and

(B) by striking out "In" and inserting in lieu thereof "Except as provided in subparagraph (B), in"; and

(C) by adding after subparagraph (A) the following new subparagraph (B):

"(B) The monthly retired pay base of a member who is retired under section 1331 of this title who first became a member of a uniformed service on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, shall be computed under subparagraph (A), except that in determining the months which may be included in the 36 months referred to in subparagraph (A) there shall be excluded any month after the date he is first transferred to the inactive status list or to the Retired Reserve if such month follows the date such member was notified under section 1331(d) of this title. The monthly retired pay base computed under the preceding sentence shall be increased by the percentage by which the Consumer Price Index (all items, United States city average) published by the Bureau of Labor Statistics has increased from the last of such 36 months to the month preceding the date the member is entitled to retired pay.".

(f) RETIRED PAY MULTIPLIER.—(1) Chapter 71 is amended by inserting after section 1407 the following new section:

"§ 1407a. Retired pay multiplier for members who first became members on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986

"(a) Except as provided in subsection (b), in computing the retired pay or retainer pay of a person who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, and who has been retired other than for disability under chapter 61 of this title or transferred to the Fleet Reserve or the Fleet Marine Corps Reserve, the percentage factor shall be the one listed in column 2 of the following table which corresponds to the applicable years of service in column 1.

"Column 1 Years of service [1]	"Column 2 Percentage factor [2]
20	44.0
21	47.1
22	50.2
23	53.3
24	56.4
25	59.5
26	62.6
27	65.7
28	68.8
29	71.9
30 and over	75.0

[1] Before applying percentage factor in the case of a member with 20 but less than 30 years of service, add to the number of full years of service creditable to the member one-twelfth of a year for each full month of service that is in addition to such full years and disregard any remaining fractional part of a month.

[2] In the case of a member who has had one-twelfth of a year added to his years of service under footnote 1 for each full month of service that is in addition to his full years of service, the percentage factor to be applied is determined by mathematical interpolation between the appropriate percentage factors.

"(b) In computing the retired pay of a person retired under section 1331 of this title who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, the percentage factor shall be the one listed in column 2 of the following table which corresponds to the applicable years of service in column 1.

"Column 1 Years of service under section 1332 of this title	"Column 2 Percentage factor
20	88.00
21	89.71
22	91.27
23	92.70
24	94.00
25	95.20
26	96.31
27	97.33
28	98.29
29	99.17
30 and over	100.00.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 1407 the following new item:

"1407a. Retired pay multiplier for members who first became members on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986.".

SEC. 3. AMENDMENTS AFFECTING ADJUSTMENTS OF RETIRED AND RETAINER PAY TO REFLECT CHANGES IN THE CONSUMER PRICE INDEX

(a) DEFINITIONS.—Subsection (a) of section 1401a is amended—

(1) by inserting "(1)" after "(a)";

(2) by striking out the second sentence; and

(3) by adding at the end the following new paragraph:

"(2) In this section:

"(A) 'Price index' means the Consumer Price Index (all items, United States city average) published by the Bureau of Labor Statistics.

"(B) 'Base quarter' means the calendar quarter ending on September 30 of each year.

"(C) 'Price index for the base quarter' means the arithmetical mean of the price index for the three months comprising the base quarter.

"(D) 'Retired pay' includes retainer pay.".

(b) REQUIREMENT FOR SECRETARY OF DEFENSE TO INCREASE RETIRED AND RETAINER PAY.—Subsection (b) of such section is amended to read as follows:

"(b)(1) Effective on December 1 of each year, the Secretary of Defense—

"(A) shall increase the retired pay of each member and former member of the armed forces entitled to such pay who first became a member of a uniformed service (as defined in section 407(a)(2) of this title) before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, or who was retired for disability under chapter 61 of this title, by the percent (adjusted to the nearest one-tenth of 1 percent) by which—

"(i) the price index for the base quarter of such year, exceeds

"(ii) the price index for the base quarter of the preceding year in which an adjustment under this subsection was made; and

"(B) if the percent determined under subparagraph (A) is greater than 1 percent, shall increase the retired pay of each member and former member of the armed forces entitled to such pay who first became a member of a uniformed service (as defined in section 407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, other than a member or former member retired for disability under chapter 61 of this title, by the difference between—

"(i) the percent determined under subparagraph (A); and

"(ii) 1 percent.

"(2)(A) In the case of a member or former member who first entered a uniformed service on or after the date of the Uniformed Services Retirement Cost Reduction Act of

1986, when the first increase in such member's retired pay is required to be made under this subsection on or after the date the member completes 40 years as a member of a uniformed service, the retired pay of such member shall be recomputed so as to be the amount equal to—

"(i) the retired pay to which the member was entitled on the date of his retirement, increased by

"(ii) the percent (adjusted to the nearest one-tenth of 1 percent) by which—

"(I) the price index for the base quarter immediately preceding the date he completes 40 years as a member of a uniformed service, exceeds

"(II) the price index for the base quarter immediately preceding the date on which he first became entitled to retired pay.

"(B) After any such recomputation, increases under paragraph (1)(B) shall be applied to such retired pay as so recomputed.

"(3) Any increase in retired pay under this subsection shall be made in accordance with regulations prescribed by the Secretary of Defense.

"(4) For purposes of this subsection, a member's years as a member of a uniformed service shall be determined by crediting—

"(A) all periods of service creditable in computing the member's basic pay under section 205 of title 37 at the time the member became entitled to retired pay; and

"(B) all periods on a retired list while entitled to retired pay.

A period of time may not be counted more than once.".

SEC. 4. AMENDMENTS AFFECTING COMPUTATION OF RETIRED PAY OF ARMY PERSONNEL

(a) COMPUTATION OF RETIRED PAY.—Section 3991 is amended—

(1) in the first sentence—

(A) by inserting "(a)" before "The monthly"; and

(B) by inserting "who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986," after "subtitle";

(2) in the fourth sentence by inserting "(a)" after "1401"; and

(3) by adding at the end thereof the following new subsection:

"(b) The monthly retired pay of a person entitled thereto under this subtitle who first became a member of uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, is computed according to the following table. For each case covered by a section of this title named in the column headed "For sections", retired pay is computed by taking, in order, the steps prescribed opposite it in columns 1, 2, and 3, as modified by the footnote. The amount computed, if not a multiple of $1, shall be rounded to the next lower multiple of $1. However, if a person would otherwise be entitled to retired pay computed under more than one pay formula of this table or the tables in section 1401 of this title, he is entitled to be paid under the applicable formula that is most favorable to him. Section references below are to sections of this title.

"Formula	For Sections	Column 1 Take	Column 2 Multiply by	Column 3 Add
A	3911 3918 3920 3924	The monthly retired pay base as computed under section 1407(c).	The percentage factor prescribed in section 1407a(a) for the years of service credited to him under section 1405.	
B	3914	The monthly retired pay base as computed under section 1407(c).	The percentage factor prescribed in section 1407a(a) for the years of service credited to him under section 3925.	10% of product of columns 1 and 2 for extraordinary heroism in line of duty, but in no case shall his pay be more than 75 percent of his monthly retired pay base as computed under section 1407(c).[1]
C	3817	The monthly retired pay base as computed under section 1407(c).	The percentage factor prescribed in section 1407a(a) for the years of service credited to him under section 3925.	

[1] The Secretary of the Army's determination as to extraordinary heroism is conclusive for all purposes".

(b) RECOMPUTATION TO REFLECT ADVANCEMENT ON RETIRED LIST.—Section 3992 is amended—

(1) by striking out the first sentence and inserting in lieu thereof:

"(a) An enlisted member of the Army who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is advanced on the retired list under section 3964 of this title is entitled to recompute his retired pay under formula A of the following table, and a warrant officer of the Army who first became a member of a uniformed service before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is so advanced is entitled to recompute his retired pay under formula B of that table."; and

(2) by adding at the end thereof the following new subsection:

"(b) An enlisted member of the Army who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is advanced on the retired list under section 3964 of this title is entitled to recompute his retired pay under formula A of the following table, and a warrant officer of the Army who first became a member of a uniformed service on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is so advanced is entitled to recompute his retired pay under formula B of that table. The amount recomputed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.

"Formula	Column 1 Take	Column 2 Multiply by
A	The monthly retired pay base as computed under section 1407(c) of this title.	The percentage factor prescribed in section 1407a(a) of this title for the number of years credited to him under section 3925 of this title.
B	The monthly retired pay base as computed under section 1407(c) of this title.	The percentage factor prescribed in section 1407a(a) of this title for the number of years credited to him under section 1405 of this title.".

SEC. 5. AMENDMENTS AFFECTING COMPUTATION OF RETIRED PAY OF NAVY AND MARINE CORPS PERSONNEL

(a) HIGHER RETIRED PAY FOR MEMBERS WHO SERVE UNDER TEMPORARY APPOINTMENTS.—Section 6151 is amended—

(1) in subsection (b)—

(A) by striking out "on or after September 8, 1980," in clause (B) of paragraph (1) and inserting in lieu thereof "after September 7, 1980, but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986,";

(B) by redesignating paragraph (2) as paragraph (3); and

(C) by inserting after paragraph (1) the following new paragraph (2):

"(2) Each member, other than a former member of the Fleet Reserve or the Fleet Marine Corps Reserve, who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is advanced on the retired list under this section is, unless otherwise entitled to higher retired pay, entitled to retired pay at the rate determined by taking the monthly retired pay base computed under section 1407(d) of this title and multiplying that amount by the percentage factor prescribed under section 1407a(a) of this title for the years of service that may be credited to him under section 1405 of this title."; and

(2) in subsection (c)—

(A) by striking out "on or after September 8, 1980," in paragraph (2) and inserting in lieu thereof "after September 7, 1980, but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986."; and

(B) by inserting after paragraph (2) the following new paragraph (3):

"(3) Each former member of the Fleet Reserve or the Fleet Marine Corps Reserve who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is advanced on the retired list under this section is entitled to retired pay at the rate determined by taking the monthly retired pay base computed under section 1407(d) of this title and multiplying that amount by the percentage factor prescribed under section 1407a(a) of this title for the years of service creditable for his retainer pay at the time of retirement.".

(b) RETIREMENT OF AN OFFICER AFTER COMPLETING MORE THAN 20 Years of Active Service.—Section 6323(e) is amended—

(1) by inserting "(1)" after "(e)";

(2) by redesignating paragraphs (1) and (2) as clauses (A) and (B), respectively, and in such clause (B) (as so redesignated) by striking out "on or after September 8, 1980," and inserting in lieu thereof "after September 7, 1980, but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986,"; and

(3) by inserting after paragraph (1) the following new paragraph (2):

"(2) Unless otherwise entitled to higher pay, an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is retired under this section is entitled to retired pay at the rate determined by taking the monthly retired pay based computed under section 1407(d) of this title and multiplying that amount by the percentage factor prescribed under section 1407a(a) of this title for the years of service that may be credited to him under section 1405 of this title.".

(c) RETIRED PAY OF CERTAIN OFFICERS.—(1) Clause (2) of section 6325(a) is amended to read as follows:

"(2) unless otherwise entitled to higher pay, is entitled to retired pay—

"(A) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) before September 8, 1980, at the rate of 2½ percent of the basic pay of the grade in which he retired multiplied by the number of years of service that may be credited to him under section 1405 of this title, but the retired pay so computed may not be more than 75 percent of the basic pay upon which the computation of retired pay is based;

"(B) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) after September 7, 1980, at the rate of 2½ percent of the monthly retired pay base computed under section 1407(d) of this title multiplied by the number of years of service that may be credited to him under section 1405 of this title, but the retired pay so computed may not be more than 75 percent of the monthly retired pay base upon which the computation of retired pay is based; or

"(C) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, at the rate determined by taking the monthly retired pay base computed under section 1407(d) of this title and multiplying that amount by the percentage factor prescribed in section 1407a(a) of this title for the years of service that may be credited to him under section 1405 of this title.".

(2) Clause (2) of section 6325(b) is amended to read as follows:

"(2) unless otherwise entitled to a higher pay, is entitled to retired pay—

"(A) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) before September 8, 1980, at the rate of 2½ percent of the basic pay of the grade he would hold if he had not received such an appointment multiplied by number of years of service that may be credited to him under section 1405 of this title, but the retired pay so computed may not be more than 75 percent of the basic pay upon which the computation of retired pay is based;

"(B) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) after September 7, 1980, but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, at the rate of 2½ percent of the monthly retired pay base computed under section 1407(d) of this title multiplied by the number of years of service that may be credited to him under section 1405 of this title, but the retired pay so computed may not be more than 75 percent of the monthly retired pay base upon which the computation of retired pay is based; or

"(C) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, at the rate determined by taking the monthly retired pay base computed under section 1407(d) of this title and multiplying that amount by the percentage factor prescribed in section 1407a(a) of this title for the years of service that may be credited to him under section 1405 of this title.".

(d) RETAINER PAY FOR ENLISTED MEMBERS TRANSFERRED TO THE FLEET RESERVE OR THE FLEET MARINE CORPS RESERVE.—Section 6330(c)(1) is amended—

(1) by striking out "; or" at the end of clause (A) and inserting in lieu thereof "multiplied by the number of years of active service in the armed forces;";

(2) by striking out "on or after September 8, 1980," in clause (B) and inserting in lieu thereof "after September 7, 1980, but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986,";

(3) by striking out clause (B) and all that follows and inserting in lieu thereof the following:

"(B) in the case of a member who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) after September 7, 1980, at the rate of 2½ percent of the monthly retainer pay base computed under section 1407(d) of this title, or

"(C) in the case of a member who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, at the rate determined by taking the monthly retainer pay base computed under section 1407(d) of this title and multiplying that amount by the percentage factor prescribed in section 1407a(a) of this title for the years of his active service in the armed forces.".

(e) RETIRED PAY OF CERTAIN REGULAR OFFICERS INVOLUNTARILY RETIRED.—Section 6383(c)(2) is amended to read as follows:

"(2) is entitled to retired pay—

"(A) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) before September 8, 1980, at the rate of 2½ percent of the basic pay to which he would be entitled if serving on active duty in the grade in which he retired multiplied by the number of years of service credited to him under section 1405 of this title, but the retired pay may not be more than 75 percent of the basic pay upon which the computation of retired pay is based;

"(B) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) after September 7, 1980, but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, at the rate of 2½ percent of the monthly retired pay base computed under section 1407(d) of this title multiplied by the number of years of service credited to him under section 1405 of this title, but the retired pay may not be more than 75 percent of the monthly retired pay base upon which the computation of retired pay is based; or

"(C) in the case of an officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, at the rate determined by taking the monthly retired pay base computed under section 1407(d) of this title and multiplying that amount by the percentage factor prescribed under section 1407a(a) of this title for the number of years of service credited to him under section 1405 of this title.".

SEC. 6. AMENDMENTS AFFECTING COMPUTATION OF RETIRED PAY OF AIR FORCE PERSONNEL

(a) COMPUTATION OF RETIRED PAY.—Section 3991 is amended—

(1) in the first sentence—

(A) by inserting "(a)" before "The monthly"; and

(B) by inserting "who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986," after "subtitle";

(2) in the fourth sentence by inserting "(a)" after "1401"; and

(3) by adding at the end thereof the following new subsection:

"(b) The monthly retired pay of a person entitled thereto under this subtitle who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, is computed according to the following table. For each case covered by a section of this title named in the column headed "For sections", retired pay is computed by taking, in order, the steps prescribed opposite it in columns 1, 2, and 3, as modified by the footnote. The amount computed, if not a multiple of $1, shall be rounded to the next lower multiple of $1. However, if a person would otherwise be entitled to retired pay computed under more than one pay formula of this table or the tables in section 1401 of this title, he is entitled to be paid under the applicable formula that is most favorable to him. Section references below are to sections of this title.

"Formula	For sections	Column 1 take	Column 2 multiply by	Column 3 add
A	8911 8918 8920 8924	The monthly retired pay base as computed under section 1407(e).	The percentage factor prescribed in section 1407a(a) for the years of service credited to him under section 1405.	

"Formula	For sections	Column 1 take	Column 2 multiply by	Column 3 add
B	8914	The monthly retired pay base as computed under section 1407(e).	The percentage factor prescribed in section 1407a(a) for the years of service credited to him under section 8925.	10% of product of columns 1 and 2 for extraordinary heroism in line of duty, but in no case shall his retired pay be more than 75 percent of his monthly retired pay base as computed under section 1407(e).[1]
C	8917	The monthly retired pay base as computed under section 1407(e).	The percentage factor prescribed in section 1407a(a) for the years of service credited to him under section 8925.	

[1] The Secretary of the Air Force's determination as to extraordinary heroismis conclusive for all purposes.".

(b) RECOMPUTATION TO REFLECT ADVANCEMENT ON RETIRED LIST.—Section 8992 is amended—

(1) by striking out the first sentence and inserting in lieu thereof:

"(a) An enlisted member of the Air Force who first became a member of a unformed service (as defined in section 1407(a)(2) of this title) before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is advanced on the retired list under section 8964 of this title is entitled to recompute his retired pay under formula A of the following table, and a warrant officer of the Air Force who first became a member of a uniformed service before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is so advanced is entitled to recompute his retired pay under formula B of that table."; and

(2) by adding at the end thereof the following new subsection:

"(b) An enlisted member of the Air Force who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is advanced on the retired list under section 8964 of this title is entitled to recompute his retired pay under formula A of the following table, and a warrant officer of the Air Force who first became a member of a uniformed service on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is so advanced is entitled to recompute his retired pay under formula B of that table. The amount recomputed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.

"Formula	Column 1 take	Column 2 multiply by
A	The monthly retired pay base as computed under section 1407(e) of this title.	The percentage factor prescribed in section 1407a(a) of this title the number of years credited to him under section 8925 of this title.
B	The monthly retired pay base as computed under section 1407(e) of this title.	The percentage factor prescribed in section 1407a(a) of this title for the number of years credited to him under section 1405 of this title".

SEC. 7. AMENDMENTS AFFECTING COMPUTATION OF RETIRED PAY OF COAST GUARD PERSONNEL

(a) COMPUTATION OF RETIRED PAY OF CAPTAINS.—Section 288(b) of title 14, United States Code, is amended by striking out "section 423(b)" and inserting in lieu thereof "subsection (b) or (c) of section 423".

(b) COMPUTATION OF RETIRED PAY IN GENERAL.—Section 423 of such title is amended—

(1) in the first sentence of subsection (a), by striking out "subsection (b)"and inserting in lieu thereof "subsections (b) and (c)";

(2) in the fourth sentence of subsection (a), by inserting "or by which the percentage factor is determined under subsection (c) after "multiplied";

(3) in subsection (b) by inserting "but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986," after September 7, 1980,"; and

(4) by adding at the end thereof the following new subsection:

"(c) Notwithstanding any other provision of this title, the retired pay of each officer or enlisted member of the Coast Guard who first became a member of a uniformed service (as defined in section 1407(a)(2) of title 10) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, is determined by taking the monthly retired base computed under section 1407(f) of title 10 and multiplying that amount by the percentage factor prescribed under section 1407a(a) of title 10 for the number of years of service that may be credited to him under section 1405 of title 10.".

(c) LIMITATIONS ON RETIREMENT AND RETIRED PAY.—Section 424 of such title is amended in the first sentence by striking out "The" and inserting in lieu thereof "Except as provided in subsections (b) and (c) of section 423 of this title, the".

SEC. 8 AMENDMENTS AFFECTING COMPUTATION OF RETIRED PAY OF COMMISSIONED OFFICERS OF THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Section 16(a) of the Coast and Geodetic Survey Commissioned Officer's Act of 1948 (33 U.S.C 853o) is amended—

(1) by inserting "(1)" after "(a)";

(2) by redesignating clauses (1) and (2) as clauses (A) and (B), respectively;

(3) in clause (B) (as redesignated), by striking out "on or after September 8, 1980," and inserting in lieu thereof "after September 7, 1980, but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986,", and

(4) by adding at the end thereof the following new paragraph (2):

"(2) Each commissioned officer who first became a member of a uniformed service (as defined in section 1407(a)(2) of title 10, United States Code) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, who is on the retired list shall receive retired pay at the rate determined by taking the monthly retired pay base computed under section 1407(g) of title 10, United States Code, and multiplying that amount by the percentage factor prescribed under section 1407a(a) of title 10, United States Code, for the number of years of service that may be credited to him under section 1405 of title 10, United States Code, as if his service were service as a member of the Armed Forces. Retired pay, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

SEC. 9. AMENDMENTS AFFECTING COMPUTATION OF RETIRED PAY OF COMMISSIONED OFFICERS OF THE PUBLIC HEALTH SERVICE

(a) COMPUTATION OF RETIRED PAY FOR OFFICERS INVOLUNTARILY RETIRED.—Section 210(g)(3) of the Public Health Service Act (42 U.S.C. 211(g)(3) is amended—

(1) by striking out "or" at the end of subclause (A);

(2) in subclause (B)—

(A) by striking out "on or after September 8, 1980," and inserting in lieu thereof "after September 7, 1980, but before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986,"; and

(B) by striking out the period at the end thereof and inserting in lieu thereof "; or"; and

(3) by adding at the end of subclause (B) a new subclause (C) as follows:

"(C) in the case of an officer who first became a member of a uniformed service on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, at the rate determined by taking the monthly retired pay base computed under section 1407(h) of title 10, United States Code, and multiplying that amount by the percentage factor prescribed under section 1407a(a) of title 10, United States Code, for the number of years, not in excess of thirty, of his active commissioned service in the Service.".

(b) COMPUTATION OF RETIRED PAY OF OFFICER IN GENERAL.—Section 211(a) of such Act (42 U.S.C. 212(a)) is amended—

(1) in paragraph (4), by inserting "or (7)" after "paragraph (6)";

(2) by redesignating paragraph (7) as paragraph (8); and

(3) by adding after paragraph (6) the following new paragraph (7):

"(7) The retired pay under paragraph (4) in the case of a commissioned officer who first became a member of a uniformed service on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, is determined by taking the monthly retired pay base computed under section 1407(h) of title 10, United States Code, and multiplying that amount by the percentage factor prescribed under section 1407a(a) of title 10, United States Code, for the number of years of service credited to him under paragraph (4).".

SEC. 10. REQUIREMENT OF RESERVE-COMPONENT MEMBERSHIP FOR RECEIPT OF NON-REGULAR-SERVICE RETIRED PAY

Section 1331(a) is amended—

(1) by striking out "and" at the end of clause (3);

(2) by striking out the period at the end of clause (4) and inserting in lieu thereof "; and"; and

(3) by inserting after clause (4) the following new clause (5):

"(5) in the case of a person who first became a member of a uniformed service (as defined in section 1407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, he is a member of a reserve component.".

SEC. 11. UNREDUCED RETIRED PAY AS BASIS FOR SURVIVOR BENEFIT PLAN ANNUITIES

(a) IN GENERAL.—Subchapter II of chapter 73 is amended by adding at the end thereof the following new section:

"§ 1456. Unreduced retired pay as basis for annuities

"(a) In determining the amount of an annunity to be paid under this subchapter to the beneficiary of any person who first became a member of a uniformed service after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986, the amount of the annuity shall be determined on the basis of provisions of law in effect with respect to the computation of retired pay on the day before the date of the enactment of such Act.

"(b) For purposes of section 1451 and section 1452 of this title, computation of the retired pay of a member or former member who first became a member of a uniformed service on or after the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986 shall be made on the basis of provisions of law in effect with respect to the computation of retired pay on the day before the date of the enactment of the Uniformed Services Retirement Cost Reduction Act of 1986.

"(c) As used in subsection (a), the term 'first became a member of a uniformed service' has the same meaning as provided in section 1407(a)(2)(B) of this title.".

(b) CONFORMING AMENDMENTS.—The table of sections at the beginning of subchapter II of chapter 73 is amended by adding at the end the following item:

"1456. Unreduced retired pay as a basis for annuities.".

SEC. 12. REPEAL OF LIMITATION ON PAYMENTS TO ACCRUAL FUND FOR FISCAL YEAR 1986

Section 666 of the Department of Defense Authorization Act, 1986 (Pub. Law 99-145; 99 Stat. 659), is repealed.

SEC. 13. CONGRESSIONAL POLICY REGARDING POSTPONEMENT OF A CERTAIN DEPARTMENT OF DEFENSE CONTRACT

It is the sense of Congress that the Secretary of Defense should postpone the final award of a contract with respect to Defense Construction Supply Center Solicitation numbered DLA700-85-B-4-4607 (for the purchase of 178 crawler tractors) until Congress has enacted legislation authorizing appropriations for the Department of Defense for fiscal year 1987.

SEC. 14. UNDER SECRETARY OF DEFENSE FOR ACQUISITION

(a) CREATION OF POSITION.—Section 135 of title 10, United States Code, is amended—

(1) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) There are two Under Secretaries of Defense, one of whom shall be the Under Secretary of Defense for Acquisition and one of whom shall be the Under Secretary of Defense for Policy. The Under Secretaries of Defense shall be appointed from civilian life by the President, by and with the advice and consent of the Senate.";

(2) in subsection (b), by striking out the second sentence; and

(3) in subsection (c), by striking out the second sentence.

(b) EXECUTIVE SCHEDULE II PAY GRADE FOR UNDER SECRETARY OF DEFENSE FOR ACQUISITION.—Section 5313 of title 5, United States Code, is amended by adding at the end the following new item: "Under Secretary of Defense for Acquisition.".

SEC. 15. DENIAL OF FUNDS FOR T-46 TRAINER AIRCRAFT PROGRAM

Of the funds appropriated for "Aircraft Procurement, Air Force" for fiscal year 1986, none may be obligated or expended for the procurement of the T-46 trainer aircraft.

□ 1710

Mr. WILSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF LIMITATION OBLIGATIONS—MILITARY PERSONNEL ACCOUNTS

Mr. WILSON. Mr. President, I send a bill to the desk for immediate consideration. This has been cleared on both sides.

Mr. BYRD. Mr. President, I have no objection to the introduction of the bill or to its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 2460) to extend until June 30, 1986 the date on which certain limitations become effective with respect to obligations that may be made from the Military Personnel accounts of the Department of Defense for fiscal year 1986.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. WILSON. Mr. President, the clerk's recitation of the title describes the entire effect of the bill. We are simply seeking once again to extend the deadline for action by the Congress in accord with what was earlier enacted as the Johnston amendment. The purpose is to avoid the involuntary discharge of hundreds of thousand of uniformed personnel.

Mr. NUNN. Mr. President, I agree with this amendment. I think it is a good amendment. I think it is necessary. I would hope that we do not need this much time. I hope we will be able to complete this conference before June 30. But I see no reason to have to pass another delaying mechanism in the middle of June if we do not reach that goal. So I will agree with the amendment and I urge its passage.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2460

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the third proviso of section 8103 of the Department of Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190; 99 Stat. 1221), relating to obligations from Military personnel accounts for fiscal year 1986, is amended by striking out "May 1, 1986" and inserting in lieu thereof "June 30, 1986".

Mr. WILSON. I move to reconsider the vote by which the bill was passed.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WILSON. Mr. President, before I relinquish the floor, let me take a moment to express my gratitude and appreciation for the long hours, in fact days, that have been expended by my colleague, the Senator from Ohio, who is the ranking member of the subcommittee. His cooperation and his great dedication have been a source of comfort to me. I think they have improved our work product. I note that his very busy schedule requires his absence from the floor at this moment, but the hard work and leadership he has exhibited during the several months it has taken us to actually bring this to the floor are greatly appreciated. I express appreciation as well to the members of the subcommittee. The former chairman of that committee, who just left the floor, the ranking member of the Armed Services Committee from Georgia, has also on every occasion that his schedule permitted been in attendance and has made significant contributions for which I am grateful.

Finally, let me conclude, Mr. President, by expressing my gratitude and my admiration for the superb work that has been done by the staff on both sides of the aisle. They have given us prompt, very thorough analyses. The amount of work that was in-

volved has been described earlier this afternoon in several floor speeches. They had to shift through and analyze the work of any number of different panels through the years which had sought to bring about reform in the military retirement system. Notwithstanding my earlier comments that we have not yet quite achieved that, it is certainly not because the staff has not provided us with the abundant opportunity to do so.

□ 1720

In particular, Mr. Lyles for the minority and Mr. Tucker for the majority have performed more than yeoman service. They really have done an excellent job, under great time pressure too often, but their energy has been more than equal to the task. Their skill and competence have been more than equal to the task. It has been a great pleasure for me to work with both of them. They are thoroughgoing gentlemen and professionals, and they made the task of the chairman and the ranking minority member much easier.

I yield the floor.

Mr. SIMPSON. Mr. President, on behalf of the majority leader, I sincerely thank Senator WILSON for his extraordinary efforts in working to get this piece of legislation before us and passed. He and Senator GLENN, the ranking minority member of the subcommittee, have done a superb job, and we thank them. It has been a long and arduous task, and they have accomplished it with great steadiness, which is a trait of Senator WILSON, as I have noted it in my time here—great steadiness and thoughtfulness—and those are similar attributes of Senator GLENN.

I also thank Senator GOLDWATER and Senator NUNN for their stewardship and support of the legislation.

On behalf of the majority leader, it makes the job as much lighter one when we have that kind of procedure, with that kind of result, within this parameter of time. We thank them very much.

Mr. President, I ask unanimous consent that S. 2395, the military retirement bill, be returned to the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL FIRE PREVENTION AND CONTROL ACT AUTHORIZATION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 581, S. 2180, to authorize appropriations for activities under the Federal Fire Prevention and Control Act of 1974.

Mr. FORD. Mr. President, reserving the right to object—and I probably will not object—this is like putting on no witnesses during a defense, because we are not going to have any votes.

On Monday, we probably will take up something else, and this means that it will be late in June before any consideration of this measure, as it relates to daylight savings time. That is the reason why this bill is being brought up—daylight saving time.

I wonder if the distinguished acting majority leader feels that it is important, under the circumstances, that we even go to this bill tonight.

Mr. SIMPSON. Mr. President, it is the intent of the majority leader that we proceed on this measure in this form this evening.

I believe it is still the intent of the leader that we would likely close our proceedings this evening within the half-hour but this would be then the pending activity.

Mr. FORD. As I understood the distinguished majority leader, we would go out tonight around 6 o'clock and that we would come back in around 3 o'clock on Monday and the pending business that you are attempting to bring up tonight would be set aside for other items that probably would be coming out of the Appropriations Committee that has to be done by Wednesday. That will take precedence over this. We are going to get 30 minutes to talk about something that we will not get to bring up until the middle of June and then we will be into the tax bill and I wonder if we want to go ahead and bring it up.

I am going to have to take a certain stand on this as will my distinguished friends from the State of Washington and the State of Maine. But I just wonder if we want to go through that scenario with the understanding that the pending business in all probability would be set aside until June. Then when we come back in June, we will be on the tax bill and this is a piece of legislation that is going to be down the pike considerably before we have an opportunity to vote on it.

□ 1730

Mr. SIMPSON. Mr. President, I am making an inquiry of the majority leader at this time, but I believe it is the intent of the majority leader that we go to this on Monday. We will pursue this measure on Monday. There will be no votes before 3 o'clock and this would not be set aside. It would be addressed this evening with opening statements and then on Monday we would return to it. That is the intent of the leader.

Mr. FORD. Still reserving my right to object, Mr. President, would it be in order to have a unanimous-consent agreement for an amendment in the second degree when I get it prepared—I do not have it prepared right now—to this amendment on daylight savings time? I would like to reserve the right to put on an amendment in the second degree sometime on Monday.

Mr. SIMPSON. Mr. President, I am not prepared to respond to that.

Mr. GORTON. Will the Senator yield?

Mr. SIMPSON. Let me yield to Senator GORTON who will be the floor manager of this measure, and I do so yield.

Mr. GORTON. Mr. President, as the distinguished junior Senator from Kentucky knows, this bill, which is the Federal Fire Prevention and Control Act, will be the vehicle for a discussion of the extension of daylight saving time for 3 weeks in the month of April. We also have been informed through the Senator from Kentucky and others that they would like to use this bill as an opportunity at least to discuss the scrambling of television signals from satellites.

This Senator, the Senator from Washington, obviously can have no objection to the use of the bill for that purpose. His own amendment is nongermane but is within the jurisdiction of the Commerce Committee. And the proposal by the Senator from Kentucky is nongermane but it is also within the jurisdiction of the Commerce Committee.

It would be my intention, however, to offer two amendments, a first- and second-degree amendment, on daylight saving time simply in order to see to it that we are able to discuss that matter without the slightest intention of attempting to deprive or discourage Members from also discussing a proposed amendment to this bill on the question of scrambling of television signals.

Mr. FORD. Mr. President, under those circumstances, the Senator from Washington will be precluding any amendment in the second degree until the discussion on daylight saving time has been completed. I would just like to reserve the right to have the opportunity to lay down an amendment in the second degree before we proceed. If we are going to proceed, I think the parliamentary procedure would be that you would have to move on the motion to proceed and, under those circumstances, since the majority leader has said that there will be no more votes today and none until after 3 o'clock on Monday, most of our colleagues are gone and I do not want to preclude another 30 minutes of eloquent debate as it relates to this particular piece of legislation.

But I would like to have some acknowledgement of the right to put on an amendment in the second degree. So we are sparring a little bit here as it relates to parliamentary procedure. I do not mind that, as long as we do not get rough.

So I would like for the Senator to agree that I can offer my amendment in the second degree rather than for

him to lock me out from having an opportunity to offer my amendment in the second degree.

Mr. GORTON. Mr. President, if I may inquire of the Senator from Kentucky, is there any particular reason why his amendment should be an amendment to an amendment as opposed to an amendment to the bill and have the two subjects discussed separately?

Mr. FORD. They could, but under the circumstances I feel I would have more leverage if my amendment was in the second degree rather than wait until after the discussion of the daylight savings time has been completed and then to bring up my amendment.

So what I am trying to do here is just assure myself and others—I am not speaking primarily for myself, I am speaking for others who have asked me to use this procedure. I think it is incumbent upon me to protect their interests, as well as mine.

Mr. GORTON. Would the distinguished Senator suggest the absence of a quorum?

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1750

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, concerning this bill, the Senator from Kentucky and the Senator from Washington, along with the Senator from Maine, have discussed the issues. Let me then renew my unanimous-consent request.

Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar item No. 581, S. 2180, to authorize appropriations for activities under the Federal Fire Prevention and Control Act of 1974. Then I believe that the Senator from Kentucky or the Senator from Washington will have further procedural aspects to discuss with regard to that unanimous-consent request.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2180) to authorize appropriations for activities under the Federal Fire Prevention and Control Act of 1974.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

Mr. GORTON. Mr. President, as the distinguished assistant majority leader said, there have been extensive discussions involving myself, the Senator from Maine, and the Senator from Kentucky on how we should proceed on this bill. The bill authorizes appropriations for the Federal Fire Prevention and Control Act of 1974 and was reported favorably by the Commerce Committee.

This Senator has an amendment in the first degree, in which he is joined by the distinguished Senator from Maine, which would shift the day for the beginning of daylight saving time each year from the last Sunday in April to the first Sunday in April.

The distinguished Senator from Kentucky, along with the Senator from Arkansas, wishes, at the very least, to be able to discuss the form of a second-degree amendment, an amendment relating to the scrambling of television satellite signals.

I would be prepared at an appropriate time, which may well be now, simply to guarantee or to enter into a unanimous-consent agreement that will not preclude the right at the beginning of the discussion of this bill on Monday for such a second-degree amendment to be placed.

Mr. FORD. Mr. President, will the distinguished Senator yield?

Mr. GORTON. I yield.

Mr. FORD. The Senator has stated my understanding. I would like to have a unanimous-consent agreement, such as we discussed during the quorum call, that Senator BUMPERS and I be allowed on Monday, if we so desired——

Mr. GORTON. Mr. President, I note the presence on the floor of the distinguished minority leader who is better at this game than anybody else in the body. I hope he will make sure that I phrase this in the proper parliamentary language. I would appreciate it.

□ 1800

UNANIMOUS-CONSENT AGREEMENT

Mr. GORTON. Mr. President, I ask unanimous consent that the distinguished Senator from Maine and I be permitted to offer an amendment in the first degree this evening and that we begin discussion of that amendment; that no second-dgree amendment be in order until the beginning of the discussion on this bill on Monday next, at which time the Senators from Kentucky and Arkansas be recognized for the purpose of introducing a second-degree amendment if they should desire to do so.

Mr. FORD. Mr. President reserving the right to object, and I shall not, I hope that we are not tied to the beginning of the debate on Monday. It may be a little bit later, maybe things are working and we will not want to bring it up. I hope that we just say we be allowed—the distinguished Senator from Arkansas is here now. Before we proceed any further, will the distinguished Senator from Washington ask for a quorum call so I may discuss this? I do not know if that would be proper. He has the floor.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I say to my distinguished friend from the State of Washington that what he has just proposed, provided it meets all the requirements, has the agreement of the Senator from Arkansas and myself—if he would not limit this to the beginning of the session on Monday.

Mr. GORTON. Mr. President, the Senator from Washington modifies his unanimous consent to say that if debate occurs on such a second-degree amendment, it can take place any time on Monday during which this bill is under consideration.

Mr. BUMPERS. Mr. President, is it understood that we are going to be here and voting on Monday? That is a problem for me if that is what it means.

Of course, I cannot control whether we are going to be voting or not on Monday. I just want to find out if that has been definitely decided.

I see the assistant majority leader here. Perhaps he can shed some light on that. I ask the assistant majority leader to comment on that.

Mr. SIMPSON. Mr. President, the closing procedure this evening will reflect that we shall come in at the hour of noon and that there will be no votes before 3 o'clock on Monday. That is the present status of matters for Monday.

Mr. BUMPERS. Mr. President, in light of that, would the Senator from Washington be kind enough now to state fully the unanimous-consent request as modified according to the request of the Senator from Kentucky?

Mr. GORTON. The request is that this evening, after debate begins on S. 2180, the Senators from Washington and Maine jointly be authorized to offer an amendment with respect to daylight saving time; that no second-degree amendment be in order to that amendment until the Senators from Kentucky and Arkansas have had an opportunity to offer a second-degree amendment on the subject of the scrambling of television signals, which can take place at any time during which this bill is under debate on Monday next.

Mr. BUMPERS. Mr. President, reserving the right to object and I shall not object, I wonder why it would not be better, as long as we are entering

into a unanimous-consent request, to simply go ahead and dispose of the amendment dealing with daylight saving time and allow this amendment to go on.

Mr. GORTON. The Senator from Washington would be more than happy to do that.

Mr. BUMPERS. I rescind that.

I have no objection, Mr. President. I would be willing to do that, to make it a little cleaner, if the Senator from Washington would agree to include in the unanimous-consent request that no amendments in the second degree be in order on our amendment and that we may be permitted to offer that amendment immediately after a vote on his amendment.

Mr. GORTON. Is the Senator from Arkansas saying that he would just as soon debate the daylight saving time amendment until it has been voted on and then take up the amendments proposed by the Senators from Kentucky and Arkansas on television scrambling, simply on the basis that they not be subject to amendment?

Mr. BUMPERS. I do not have any strong feeling about it. It is just that I would like to get a nice clean debate on this issue and not have it diluted or confused with the daylight saving amendment. My colleague from Kentucky has been over here discussing that. I defer to him on that.

Mr. GORTON. The Senator from Washington would prefer that course of action as well. The Senator from Kentucky did have certain objections to it earlier during the course of this discussion.

The Senator from Arkansas has the floor.

Mr. BUMPERS. Would the Senator withhold just one moment?

Mr. GORTON. Yes; Mr. President.

□ 1810

Mr. BUMPERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, I believe that, when the Senator from Arkansas is ready, we are ready to renew the unanimous-consent request.

Mr. FORD. Will the Chair repeat the unanimous-consent request so we will be sure that we all understand it, that there is not a problem with it?

The PRESIDING OFFICER. The unanimous-consent request is that the Senator from Washington [Mr. GORTON] and the Senator from Maine [Mr. MITCHELL] may offer an amendment today on daylight saving time and that no second-degree amendment may be proposed to that amendment until Monday next, and that that first second-degree amendment to the amendment proposed by the Senator from Kentucky [Mr. FORD] and the Senator from Arkansas [Mr. BUMPERS] dealing with television scrambling.

Mr. GORTON. Mr. President, I suggest the absence of a quorum once again. We have another possible objection.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER (Mr. WILSON). Without objection, it is so ordered.

Mr. GORTON. Mr. President, I withdraw the unanimous-consent request which I made earlier.

The PRESIDING OFFICER. The request is withdrawn.

Mr. GORTON. Mr. President, it will not be my intention to offer my daylight saving time amendment this evening. We will work over the weekend on both the procedure for dealing with that amendment and the requests of the distinguished Senators from Kentucky and Arkansas.

Mr. President, the bill now being considered by the Senate, S. 2180, reauthorizes the Federal Fire Prevention and Control Act of 1974. It authorizes the appropriation of $18.3 million, in fiscal year 1987, for the National Fire Academy [NFA] and the U.S. Fire Administration [USFA], both of which are within the Federal Emergency Management Agency.

Reauthorization of this act is critical in treating a serious national problem. Fire is one of the largest causes of accidental death and property damage in the United States. There are close to 2.5 million fires reported in this country every year. The United States has the second worst fire death rate in the industrialized world. In 1984 alone, fire killed more than 6,000 people, injured 120,000, and destroyed nearly $7.7 billion worth of property. These deaths were disproportionately high among the poor, the elderly, and the very young.

Although fire prevention and control is primarily a local concern, the Federal program provides vital support for local activities. The USFA serves as the Federal focus of fire prevention and control through its activities in public education, arson control, firefighter health and safety data collection and analysis, and fire policy coordination. The NFA has an extensive program of courses, as well as series of outreach programs offered in cooperation with State and local fire service organizations. Both the Fire Administration and the Fire Academy are located at the National Emergency Training Center in Emmitsburg, MD.

The Subcommittee on Science, Technology and Space held a hearing on the Federal Fire Prevention and Control Act on February 20, 1986. On March 11, 1986, I introduced this legislation along with Senators RIEGLE, GORE, MATHIAS, and SARBANES. Senators ROTH and BIDEN were subsequently added as cosponsors. The Committee on Commerce, Science, and Transportation considered S. 2180 and ordered it reported favorably without amendment on March 13, 1986.

Mr. President, this bill rejects the administration's proposal to terminate the USFA, and to eliminate funding for the travel stipends and lodging costs for students at the NFA. It is clear to me that the Federal fire programs provide a necessary function which will not be provided by the private sector, and cannot be undertaken as efficiently by State and local government.

S. 2180 authorizes appropriations in fiscal year 1987 of $7.4 million for the USFA, which is a freeze at the fiscal year 1986 appropriation level. It authorizes $10.9 million for the NFA, which would maintain the current level of service at the NFA, and restore the student travel stipends and lodging costs. This bill is 17 percent below the level authorized for fiscal year 1986 and 4 percent below the current appropriation.

Mr. ROTH. Mr. President, there is no question, nor debate, concerning the invaluable and courageous role American firefighters assume in our modern society.

Communities throughout America depend on the willingness, skill, and preparation of fire service organizations to provide a fundamental protection. Local fire companies in Delaware and across the Nation have, in silent but steady dedication, fought and prevented countless fires, on budgets that are funded by chicken dinners, bingo, and some limited help from State and local governments.

It's clear that the network of fire service agencies that has been established here in America represents a very successful equation—one that includes both public and private willingness and participation. But another very important component is the sum total of the National Fire Academy, the U.S. Fire Administration, and the Center for Fire Research. Together, these entities allow our firefighters to receive training and instruction, and then in turn they can take what they've learned and share it with their colleagues.

Unfortunately, we are risking a serious disruption of our equation by proposing to cut back or eliminate these programs.

Therefore, it's essential that we support S. 2180, the Federal Fire Prevention and Control Act. We must maintain the funds to promote the research of firefighting and prevention technology. Because in a nation that loses 6,000 precious lives to fire each year, we can't afford to do otherwise.

Mr. BIDEN. Mr. President, I know that Senator GORTON shares my concern about the future of the fire programs at the Federal level, and I would like to commend him for his leadership and effort in bringing this reauthorization bill before the Senate today.

However, while we are restating our commitment to the U.S. Fire Administration and the National Fire Academy, I am concerned that the administration may be on the road to contradicting congressional intent with regard to these programs. I refer specifically to a report proposing major changes in the structure and operation of the National Fire Academy, which has been prepared for the Federal Emergency Management Agency, and is now undergoing review by the Associate Director of the Training and Fire Programs Directorate.

I would like to ask the distinguished Senator from Washington for his initial impression of the report.

Mr. GORTON. First, Mr. President, I would like to thank the distinguished Senator from Delaware [Mr. BIDEN] for his kind words and, more importantly, his interest in, and support for, the Federal fire programs. I would note both he and Senator ROTH are cosponsors of S. 2180, the bill before us today, and this is not surprising since fire service personnel from the State of Delaware have been active in developing the Federal fire program from its earliest conception.

Let me say to the Senator from Delaware that I have heard of the concerns of several members of the fire service community about a Management Study Report conducted by FEMA in its review of the Training and Fire Programs Directorate. I understand that although FEMA is still in the process of reviewing and evaluating the management changes recommended in the report, agency officials have already begun to take steps to carry out some of the proposed changes. I am also aware that some of the recommended changes contained in this report, if implemented, would dramatically alter the work and mission of the National Fire Academy. Thus I can understand, and indeed do share, the Senator's concern about the reaction of the fire service organizations to this report.

Mr. BIDEN. If I may ask the Senator a question about the Management Study Report, would FEMA be able to implement all, or any portion of, the recommendations of the report on its own, without any congressional approval?

Mr. GORTON. Let me assure the Senator from Delaware that his action alone, in raising this issue before the Senate today will greatly encourage the officials at FEMA to be certain that concerned Members of Congress are fully aware of which recommendations the agency intends to carry out.

Beyond that, I can say to the Senator that, as chairman of the Senate Subcommittee on Science, Technology, and Space, which has oversight jurisdiction over the Federal fire programs, I will guarantee that no significant changes in the purpose and management of these programs will occur without full consideration by the interested Members of the Senate, and by the fire service community.

It is with a great deal of pride that I point out to the Senator from Delaware that no State, on a per capita basis, takes greater advantage of the programs at the National Fire Academy than the State of Washington. Only California sends more fire personnel through the NFA's training programs. For that reason I am keenly aware of how important these programs are to the State and local fire services. I know that fire experts from the State of Washington are currently evaluating the Management Study Report and will make recommendations to the Director of FEMA on behalf of the International Association of Fire Chiefs. I also know that there are fire service representatives from the State of Delaware who have the report, and whose highly respected opinions will be listened to throughout the entire fire community, and here in the Senate.

Mr. BIDEN. I thank the Senator from Washington for clarifying this situation. He is well known as a supporter of a strong Federal fire education and training progam, as this legislation now before us shows. I realize he does not want to restrict FEMA unnecessarily from making normal management decisions, but at the same time does not want to give the agency free rein to completely alter and, in my opinion, weaken the Federal fire program.

Mr. GORTON. Mr. President, the Senator was about to ask unanimous consent that we go into routine morning business. Do either of the Senators from Kentucky or Arkansas wish to speak?

Mr. BUMPERS. Mr. President, what is the parliamentary situation? What is the pending business?

The PRESIDING OFFICER. The pending business before the Senate is S. 2180.

Mr. BUMPERS. Mr. President, I have no objection to going into morning business. I was going to speak on this subject of scrambling satellite television signals just hopefully for the edification of some of the Members before they go home over the weekend so that they can be meditating about what is involved. But if the Senate is about to adjourn, I do not want to hold that up.

Mr. GORTON. Will the Senator allow this Senator to move into morning business, at which time it would be perfectly appropriate to duscuss that subject?

Mr. BUMPERS. No objection, Mr. President.

□ 1820

ROUTINE MORNING BUSINESS

Mr. GORTON. Mr. President, I ask unanaimous consent that there now be a period for the transaction of routine morning business, not to extend beyond 6:30 p.m.

Will that be sufficient for the Senator from Arkansas?

Mr. BUMPERS. That is fine.

Mr. GORTON. Until 6:30.

The PRESIDING OFFICER. Without objection, it is so ordered.

TELEVISION SATELLITE DISHES

Mr. BUMPERS. Mr. President, I want to make a very few points for the benefit of Senators regarding the amendment that the Senator from Kentucky and I will offer on Monday or Tuesday on this bill.

First, it is not our intention to work something out to the disadvantage of the cable industry or Hollywood or the networks. Our amendment does not exclusively favor the rural areas of this country, many of which have these satellite dishes. Although, the way the situation has developed and the way it seems to be pointed, it is very discriminatory against rural America. I might also say that is the reason why I have become involved in the issue.

Rural America has not requested any big favors. They are willing to pay for a signal at a reasonable price, a price in accordance with what their city cousins are paying who are on cable television. They are willing to pay a reasonable price for a decoder to unscramble the signals that are increasingly being scrambled. They are willing for the cable operators in the various communities around the country to have franchises covering the rural areas, so that they will purchase their decoders from the cable companies. They will be happy to remit to them for the services they get, just as city customers who are on cable remit monthly to the cable companies. I do not understand how anybody could object to that.

Senator FORD and I have repeatedly asked for hearings. It is a very complicated thing to work our procedurally,

but the philosophy of it is very simple to understand.

We want the people who live in rural America, some of whom have invested as much as $10,000 in their satellite dishes, to be able to get the same programming that their city cousins get. We want them to get it at a reasonable price, not a hijack price.

The M/A Com Corp., which developed this decoding technology, deserves a lot of credit. I understand that they made a tremendous investment in developing this decoder. I applaud them for it. That is what we give people incentives to do, and that is what we reward people for under our incentive system in this country. But we need some standardization of this decoder.

M/A Com can license the manufacture of this decoder or they can make all of them. But, in my opinion, there needs to be some competition in it, so that the people who are now paying $395 for a decoder can buy at significantly less price than that.

I have heard that this thing is all going to take care of itself. They say: "Senator, don't you worry about it. It's all going to wash out."

Let me tell you how it has washed out in my State. We are probably the biggest manufacturer of satellite dishes in America. Not only because of what scrambling has been done heretofore, but because of the threat of scrambling virtually every signal they get off satellites, satellite dish sales are down 80 percent. Hundreds of workers have been thrown out of work in my State because of the confusion.

Win, lose, or draw, some stability and certainty need to be introduced into this business. People need to know when they buy a satellite that they are going to be able to get a signal at some price. It may be exorbitant or it may be reasonable, but they need to know what the rules of the game are going to be. The reason why nobody is buying a dish now is that they do not know how it is going to wind up. They are entitled to be told, not 5 years from now, when everybody says it is washed out—they are entitled to know now.

Some of my people paid up to $10,000 for those dishes because they live in a rural area. That is a pretty big sacrifice, just because they do not happen to live in the city and do not have access to the cable.

So, what we are saying in the amendment we will offer next week is that we want a moratorium established until January 31, 1987, during which time we want the Justice Department to complete their investigation on any antitrust implications of the present market structure in the industry. We want the FCC to come out with a report, as the Justice Department would be required to do.

I do not relish the idea of getting Congress involved in this mess. But, at the present time, it can only be described as a mess.

Jerry Clower, the great standup comic, used to tell the story about the fellow who went coon hunting in the middle of the night. He climbed up in a tree and got in a big fight with a coon and started hollering at his friends below. He said: "Shoot up here and kill this coon."

One of his friends shouted back: "We're afraid we're going to hit you."

He said: "Well, just shoot up here among us. One of us has got to have some relief."

These satellite dish owners have to have some relief, and that is all our amendment does. We are not trying to tell HBO or Cinemax or Showtime or C-SPAN or CNN or the networks that they cannot scramble. We are saying: "We want you to scramble, if you want to, but we want to make sure that our people can buy a decoder at a reasonable price and that they can use that decoder to receive this signal at a reasonable price."

Nobody is asking for anything more. How can anybody disagree with that proposition?

We are even saying in this: "Keep the scrambling you have right now, but don't increase it and don't start until we end this mass confusion, this chaos."

The Federal Communications Commission does not let anybody have a CB radio without an application. They do not give away radio station licenses willy-nilly.

□ 1830

They are the ones who are issuing all these cellular phone permits. They are deeply involved in the regulation of communications. I am not concerned with whether or not they regulate this thing deeply or not, but I want it regulated to the extent that the rural people of this country are not discriminated against.

There have been no hearings held here. It is one of those big voids. And when we have a big void like that, as we used to say in Arkansas, "Everybody's business is nobody's business." The people are suffering. They are entitled to have their Senator cognizant of their concern. I am going to do my very best to redress what I think right now is a serious wrong developing toward them.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL PEACE OFFICERS' MEMORIAL DAY SERVICE

Mr. SIMPSON. Mr. President, we commemorate today the fifth annual "National Peace Officers' Memorial Day Service" which was conducted in the Senate park on the grounds of the U.S. Capitol. This annual service is sponsored by the Grand Lodge Ladies Auxiliary of the Fraternal Order of Police to honor those police officers who were killed in the line of duty during the past year.

This year's service holds special significance for one fine Wyoming family because one of the officers remembered was Robert A. Van Alyne, Jr., a member of the Cheyenne Police Force, who died in a terrible flood which occurred in that community last summer.

I have had the privilege to come to know his parents; and a great friend of mine, Dick Brown, is the brother of the mother of this fine young man. I know many members of the immediate family, and an extraordinary, lovely family, they are.

He gave up his life while trying desperately to save four persons trapped in a car by flood waters. Certainly the giving of one's life to save another is among the most noble of human efforts. His death was a deep and anguishing tragedy within his own family, of course, and within the Cheyenne community and throughout the State of Wyoming as well. He was the only police officer in the State of Wyoming to lose his life in the line of duty last year within our State.

I appreciate this opportunity to join in the solemn, grateful tribute conducted today in the memory of Bob Van Alyne, and the other peace officers who gave their lives while in the service to their communities and to their Nation.

COMMISSION TO STUDY AVIATION SAFETY

Mrs. KASSEBAUM. Mr. President, I would like unanimous consent to be added as a cosponsor of legislation introduced last week by the Democratic leader, Senator BYRD, to create an independent commission to study aviation safety. I have never been a great fan of Presidential commissions, but I believe the legislation offered by the minority leader is worthwhile, and that a carefully devised commission could play a useful and important role in evaluating the current state of aviation safety.

The minority leader has spoken eloquently as always about his own views of the need for this commission. In joining as a cosponsor of this legislation I want to make clear my own concerns.

First, I want to note that the Secretary of Transportation, Elizabeth

Dole, has made aviation safety a top priority. I also have enormous respect for Admiral Engen who has done an outstanding job as head of the Federal Aviation Administration.

Since Admiral Engen has assumed office, the FAA has undertaken a number of much-needed initiatives to address problems in airline inspection programs, and the air traffic control system. Despite my confidence in Admiral Engen I believe it is important for the Congress and the public to have a thorough and thoughtful independent assessment of where we are, and where we should be going in our continuing effort to safeguard air travelers. Even the best administrator can benefit from a well-informed and constructive review of his agency.

An independent commission of management experts could provide both the FAA and the Congress with a fresh perspective on problems that have existed for many years such as among air traffic controllers, and on new challenges such as the complete replacement of the air traffic control computer system.

As the minority leader noted, a panel of outside experts also can provide us with a very useful evaluation of whether airline deregulation has had any effects on safety and what steps, if any, should be taken.

Mr. President, in July the Aviation Subcommittee will hold another aviation safety hearing, and will review this legislation at that time. It is my hope that a consensus can be reached to move forward with this legislation or something very similar to it. It is my hope that this can be supported not only by a majority of the Senate, but by the Department of Transportation and the FAA.

I commend the Democratic leader for his proposal and look forward to working with him and other cosponsors on what I believe is an important initiative.

(Later the following occurred:)

Mr. BYRD. Mr. President, I have been informed that the distinguished Senator from Kansas [Mrs. KASSEBAUM] spoke a little earlier with reference to S. 2417, a bill which I introduced on May 7 to establish an Aviation Safety Commission. I understand that the distinguished Senator from Kansas has asked unanimous consent, and received consent, to add her name as a cosponsor.

Mr. President, I am grateful for the cosponsorship of Senator KASSEBAUM. She indicated to me earlier today that she had studied my proposed legislation and that she wanted to be a cosponsor of it. I am indeed pleased that Senator KASSEBAUM has now become a cosponsor of the legislation. I welcome her as a cosponsor, and I shall be working with Senator KASSEBAUM and others to secure hearings on the bill. I shall welcome her advice and counsel as we join in our efforts to establish such a Commission.

Mr. President, I am only sorry that I was not aware at the time she was addressing the Senate that she was speaking in support of the legislation and that at that time she was joining in cosponsorship. I was informed of that later. I was on the floor at the time, but I was engrossed in a conversation with other Senators about the measure that is pending before the Senate and consequently unaware that she was speaking in support of that bill. So, I beg the Senator's pardon, and I thank her.

Mr. President, I yield the floor.

ARMED FORCES DAY

Mr. DOLE. Mr. President, each year we set aside May 17 as a time to say "thank you" to the thousands of men and women in our armed services.

Those of us who were once a part of the Armed Forces have a special appreciation of the dedication and self-sacrifice that these individuals make day in and day out. But every American knows instinctively that without the commitment of the people in the Armed Forces we would not enjoy what we often take for granted—the freedom to live, to work, to play in a protected land.

By observing Armed Forces Day, we show the armed services that we do not take them or their work for granted.

Over the past 6 years America's national security apparatus has been rebuilt and reinvigorated. Not just the machinery, but the civilian and military personnel who make our defense establishment work, have a renewed sense of pride in what they do and sense of certainty about why they are doing it.

No one deserves more credit for this renaissance than President Reagan—our Commander in Chief. And every man and woman in the Armed Forces is well aware of the President's commitment to guaranteeing the United States' defense is second to none and his commitment to them.

Mr. President, we all now that the finest military machine in the world means nothing if there are not honest, dedicated military personnel to utilize it. We, in the United States, are blessed with Armed Forces that deserve both our trust and admiration. And I hope the country will show its appreciation, show its pride in them this weekend on Armed Forces Day.

RESEARCH FUNDS

Mr. DANFORTH. Mr. President, I ask unanimous consent that the attached article from today's Washington Post be inserted in the RECORD. The article reviews the use of the appropriations process to direct scarce Federal research and development funds to favored colleges and universities. This process circumvents the competitive peer review system of awarding research grants on the basis of merit. I commend this article to my colleagues as we prepare to debate the emergency supplemental.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 15, 1986]

FUNNELING FUNDS BY FORMULA

(By George C. Wilson)

A band of influential senators has quietly mapped a plan to force the Pentagon to give colleges and universities in their home states a total of $55.6 million for research and construction while bypassing the usual competitive process.

Led by Sen. Alfonse M. D'Amato (R-N.Y.), they have attempted since last fall to circumvent the normal channels for awarding research funds. And they may make a major move as early as today during the Senate Appropriations Committee markup of the fiscal 1986 "urgent supplemental appropriations" bill.

A seven-sentence amendment has been drafted to direct Defense Secretary Caspar W. Weinberger to take money out of various military accounts and give it to specified colleges and universities. If the amendment is approved by the full committee, adopted by the full Senate and House and signed into law, the Pentagon would have no choice but to proceed with what one senator critical of the awards has called "pork barrel science."

Weinberger and at least two national educational organizations have been fighting the effort. They contend that awarding the contracts without competition would turn the military research program into a pork barrel, in which the colleges and universities with the most political clout, not the most capability, would win.

Early this month, Weinberger wrote to seven senators at the forefront of the battle, saying that disbursing money "without merit competition" would "jeopardize" the "preeminence" that American colleges and universities have achieved through competition. The Association of American Universities and the National Association of State Universities and Land-Grant Colleges have made similar arguments in bulletins sent to their members.

The seven senators are D'Amato, Majority Leader Robert J. Dole (R-Kan.), Don Nickles (R-Okla.), Tom Harkin (D-Iowa), Edward M. Kennedy (D-Mass.), Paul Laxalt (R-Nev.) and defense appropriations subcommittee Chairman Ted Stevens (R-Alaska), whose staff drafted the amendment that will be taken up today. The seven signed a letter to Weinberger in February demanding that he comply with instructions in the defense appropriations conference report for fiscal 1986 and apportion funds to the institutions shown above.

In addition to those funds, another $1 million covered by the draft amendment would go for research contracts to Oregon Graduate Center, in the home state of Appropriations Committee Chairman Mark O. Hatfield (R-Ore.). On top of the total $55.6 million in research awards that would be mandated under the amendment, Hatfield has pressed the Pentagon to award $10 million in research contracts to Floating Point Systems, an Oregon firm, for a super computer

to be operated at Cornell University in D'Amato's home state.

The money that would pay for the noncompetitive contract is scattered in the fine print of the fiscal 1986 defense authorization bill. For example, the $2 million for the University of Kansas, in Dole's state would come from the budget line called "Military Desease Hazards Technology, Army."

D'Amato gave birth to the $55.6 million draft amendment last October. During a meeting of the defense appropriations subcommittee, he sought to require that $29.5 million from a fund known as the University Research Initiative go to his alma mater, Syracuse University in New York, for an advanced computer engineering complex. Senators balked at this request.

Sen. Warren B. Rudman (R-Vt.) said, "I am an alumnus of Syracuse University and I oppose it! I want that clarly understood by all the piranha in this room!"

Later in the meeting, however, the subcommittee earmarked $12 million for Syracuse from the Defense Advanced Research Projects Agency account. Sen. Lawton Chiles (D-Fla.), an engineer of the compromise, observed, "Twelve million dollars . . . still is a very large sum of money, but in contrast to $29.5 million is not that large."

Since October, other senators and House members have followed D'Amato's lead and tried to carve money from the Pentagon budget for colleges and universities in their states. Two days after the subcommittee's $12 million Syracuse decision, D'Amato introduced an amendment to appropriations bill earmarking $32.1 million for projects at Rochester, Northeastern and Nevada, and for a $4 million research and development project in South Carolina that called for participation by the Univeristy of South Carolina.

Sen. Ernest F. Hollings (D-S.C.) is ranking minority member of the subcommittee responsible for the bill to which the amendment was attached.

Since then, the Syracuse allocation has been something of a lightning rod, focusing the debate. Weinberger so far has refused to give the $12 million to Syracuse on the basis of language in a committee report. In response, backers are trying—with the amendment scheduled for consideration today—to force his hand.

Sen. William Proxmire (D-Wis.) last year tried to delete the $12 million for Syracuse from the joint resolution continuing money for the Pentagon, declaring: "Congress has no business inserting language in a defense bill, or any other bill, which instructs the executive department to make contract awards to particular academic institutions without going through the normal awards process."

Stevens, in arguing against Proxmire's effort, said there was nothing new about Congress earmarking funds for certain colleges and universities. He said of Syracuse, "I do not know of a better investment in this bill in the interest of national security than to pursue the capabilities of that university in this area."

Proxmire's amendment was defeated 55 to 35.

Sen. Jeff Bingaman (D-N.M.) decried the special designations of funds in a speech last week, declaring that "pork barrel science" has found its way into the defense budget. Praising Weinberger's resistance to spending the money without competition, Bingaman said, "My sense is that there is going to be increasing opposition in the Congress to such a pork barrel approach . . . as more members come to recognize the zero-sum game that is being played."

THE LIABILITY INSURANCE CRISIS

Mr. McCONNELL. Mr. President, the season for summer vacations is rapidly approaching and this year, Americans are expected to be touring the United States in particularly large numbers. But consider the feelings of a family, which, upon arriving at a long-awaited recreation spot or festival, finds the place closed.

And it is closed not because there is anything wrong with the facility or event, but because liability insurance needed to keep the facility open was too expensive or not available at any cost.

This dilemma is actually plaguing parks and events in the New York area, as documented in an article in the May 12 New York Times titled "Insurance Costs Imperil Recreation Industry." As the article states, insurance premiums have doubled, tripled, or quadrupled for recreation facilities in recent weeks in New York and much of the rest of the Nation.

For example, the famed Cyclone roller coaster on Coney Island is closed because its operator could obtain only $1 million of the $3 million in coverage that the city has demanded. The fireworks display has been dropped from the city's 10-day Lilac Festival and the event's evening concerts have been reduced in number from eight to five because of liability insurance problems.

In Queens, the Ozone Park Little League was told it needed to increase its liability coverage to $25 million to use the fields it leases. When the league could only come up with $11 million in coverage, it had to shut down, ending summer baseball for 900 boys. Mr. President, summer Little League is one of the institutions that defines the American way of life.

The wide-reaching effects of the national liability insurance crisis must be addressed and brought under control. A campground operator was quoted as saying, "We've never had a claim, yet my premium's up 500 percent." I have introduced legislation, S. 2046, which if enacted, would bring long overdue reforms to our civil litigation system. These reforms would affect liability insurance as they would bring damage awards back to a point of common sense, punish those who file nuisance suits, make sure that fault was apportioned fairly in suits and introduce other reforms.

Mr. President, because this New York Times article points out yet another facet of American life suffering from the liability insurance crisis, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

INSURANCE COSTS IMPERIL RECREATION INDUSTRY

(By Robert Hanley)

Soaring costs for liability insurance are buffeting recreation facilities and businesses on the eve of the summer vacation season.

Premiums in many cases have doubled, tripled or quadrupled in recent weeks, following a year-old trend of sharply increased insurance rates for towns and cities across the New York metropolitan region and much of the nation.

Inevitably, recreation industry officials say, fun-seekers will have to help absorb the increases by paying higher prices, or will have to make do with less or, in some cases, without. The cost of insurance is already affecting a wide range of attractions and activities, from the Cyclone roller coaster at Coney Island to neighborhood ball fields, from fairs and fireworks displays to riding stables and campgrounds. The new restrictions include the following:

At Candlewood Lake in Connecticut, beer has been banned at park picnic areas.

In Queens, the Ozone Park Little League has been barred from the field it leases from the New York Racing Association until it comes up with $25 million in liability coverage.

In Rochester, fireworks displays have been dropped from the city's 10-day Lilac Festival, and its evening concerts have been reduced to five from eight.

At the Astroland amusement park at Coney Island, which is owned by New York City, the famed Cyclone has remained shut down because its operator could obtain only $1 million of the $3 million in coverage that the city demanded. City and company officials are now discussing ways to open the ride, including one proposal to pledge Astroland's assets to cover claims beyond $1 million.

The liability premium for the Rochester Lilac Festival, which usually draws about 250,000 people, is $10,000, up 400 percent. Organizers for the festival, which opens Friday, say they found an insurance carrier only a month ago, after agreeing to drop the festival's fireworks display and cancel three of its evening concerts.

"I don't think it's fair because every community-type thing, every festival, is suffering," said James Welch, the festival's chairman. "We never had a claim of any significance that would give us such a rate increase."

Variations on Mr. Welch's protest are common now in New York city and in towns across New York State, New Jersey and Connecticut.

"IN TERRIBLE SHAPE"

"The whole fireworks industry is in terrible shape," said August Santore, owner of Garden State Fireworks in New Jersey. "Maybe 98 percent of the companies haven't been able to get insurance since last November. Probably 75 percent of them won't be able to do displays this year."

Some Long Island tour bus operators are raising ticket prices by one-third because of 850 percent increases in insurance premiums, according to Eleanor Simpson, president of the Long Island Tourism and Convention Bureau.

Riding stables on the Island are having trouble finding coverage. "You can get a lovely apartment for what it costs us to

board a horse," said David L. Gibbons, owner of Knoll Farms, a stable-in Brentwood.

"We're having a crisis," said Robert Klos, executive director of Campground Owners of New York, which represents 252 private campgrounds in the state.

Like many other businesses, campgrounds are paying considerably higher rates for less coverage, Mr. Klos said. Until last year, his site, Sugar Creek in Dansville, N.Y., had $1 million in coverage. It was cut to $500,000. To restore the other $500,000, Mr. Klos had to pay $398 last year and $2,000 this year. Mr. Klos is raising the nightly rate for each campsite to $13 from $11.

EARLY CLOSING FOR PARKS

Private country clubs are also having difficulty obtaining insurance, and some may be operating without full coverage between the time one policy lapses and another begins, according to industry officials.

"In the main they seem to be able, after much aggravation, to find individual coverage," said Gerald F. Hurley, executive vice president of the National Club Association, a Washington-based group of about 1,000 private golf, tennis and yacht clubs.

On Candlewood Lake in New Milford, Conn., beer and liquor have been banned at picnics. And the town's five parks close now just after sunset, instead of at 11 p.m., because of troubles with insurance coverage.

In Stamford, Conn., officials have refused to allow sailboard races on Long Island Sound. In Kings Park, L.I., an ice-skating rink shut down last month after its annual premium went to $94,000 from $20,000.

And in Aurelius, near Auburn, N.Y., the Pat Kelly Field has been dismantled because its $1 million policy was cut to $350,000 and the premium doubled to $1,122. The field had a pavilion for picnics, a field for softball, and pits for clambakes—all opened three years ago as a memorial to Pat Kelly, a victim of muscular dystrophy who died in 1984, a year after throwing out the first ball on opening day at the field.

"A lot of love went into this place," the youth's nurse, Roxy Sherman, said, crying, as the field's P.J. Pavilion was torn down last month.

Insurance and government officials say the soaring cost and reduced availability of liability coverage is due to several factors: price cuts spurred by heavy competition a few years ago, a decline in interest rates that has since eroded their investment income, and high damage awards by the courts. The industry is campaigning for limits on jury awards and settlements.

Insurance critics argue, however, that the industry is trying to recoup from underwriting mistakes of a few years ago.

These developments, critics say, have prompted the industry to stop covering some risks and to increase costs for others. As a result, customers with good records are suffering.

NOW BASED ON RISK

Previously, said Mr. Klos of the New York campgrounds group, premium costs were pegged to a client's claims history. Now, he said, they are based on risk. "We've never had a claim, yet my premium's up 500 percent," Mr. Klos said of his campground.

"There are people with no accidents in the past who have had premium increases of 600 and 700 percent," said Michael Redpath, executive director of the New Jersey Amusement Association, which represents about 150 licensed rides and boardwalk games on the Jersey shore.

Two major amusement parks in New Jersey just managed to find summer insurance recently at sharply increased rates, Mr. Redpath said. Higher prices, smaller staffs of workers and fewer updated facilities will result, he said.

The liability coverage for New York State's three major race tracks—Belmont, Aqueduct and Saratoga—has been cut from $175 million to $6 million, leaving them "dreadfully underinsured," said Martin Lieberman, general counsel of the tracks' operator, the New York Racing Association.

Consequently, he said, community groups can no longer use track grounds. Recently, the racing association told the Ozone Park Little League, which plays on leased fields at Aqueduct, to increase its coverage to $25 million from $1 million. The league could obtain only $11 million from the national Little League headquarters in Williamsport, Pa. Thus, baseball for about 900 boys was stopped.

In an offshoot of the liability problem, the Little League and national organizations for youth hockey, soccer and football have joined forces to seek Federal legislation that would make volunteer coaches immune from "frivolous lawsuits" by parents.

Governor Kean is expected to sign similar legislation this week for New Jersey.

In Connecticut, the State Insurance Department is now trying to find coverage for some amusement, carnival and firework companies. And the New York State Insurance Department's new Liability Hot Line for those having trouble getting coverage is busy.

State-owned parks and beaches are self-insured and not having trouble. But leased refreshment stands at them are. Some concessionaires, especially "mom and pop" operations, plan sharply higher food prices this summer. Officials fear their future is threatened.

"Next year will tell whether we'll be able to continue with many of them," said William Petronis, director of concession management for the New York State Office of Parks and Recreation.

MAY 15—ANOTHER GRAMM-RUDMAN-HOLLINGS MILESTONE PASSES

Mr. HATFIELD. Mr. President, today is May 15. Under the terms of the Budget Act prior to the amendments of Public Law 99-177, otherwise known as the Gramm-Rudman-Hollings bill, today was the day when Congress was supposed to adopt a conference report on a first concurrent resolution on the budget. Of course, Gramm-Rudman-Hollings changed that date in the original Budget Act, and moved the deadline for final action on a budget resolution to April 15. As Members will recall, Congress did not meet that first deadline. In fact, since the House is still debating its version of the budget resolution and we are some weeks away from a conference agreement on a resolution, Congress will obviously miss even the old deadline on the original Budget Act.

Today is significant in another regard, Mr. President, in addition to its being emblematic of further delay in a budget process that was supposely cleansed of sin by the hocus-pocus rituals of Gramm-Rudman-Hollings. Thanks to the Gramm-Rudman-Hollings bill, today is the day when the House Appropriations Committee may proceed to report, and the House of Representatives consider, appropriations bills for fiscal year 1987 even though no budget resolution for the fiscal year 1987 has been adopted.

In the old days, before the new high priests brought us their new religion, no bill providing spending for a given fiscal year could be considered in either the House or the Senate unless the budget resolution for that fiscal year had been adopted. That made sense. The idea was to agree on an overall framework for the entire Federal budget before proceeding with individual appropriations bills or authorization measures providing direct spending authority. But now, under the new catechism, it doesn't matter whether we have agreed on a comprehensive plan or not. The House, the body most often characterized by Members of my party as the big, bad wolf and Federal spending, is liberated from the restraints of the new order and may proceed with consideration of appropriations bills.

Not so in the Senate. Here in this body, which is rightly regarded as the champion of fiscal discipline and budgetary restraining in recent years, we may not move forward with appropriations bills until there is final agreement on a budget resolution, no matter how long that takes. Why the authors of Gramm-Rudman-Hollings chose to take this step is an utter mystery to me. It is as though the Senate, and in particular, the Senate Appropriations Committee, was singled out to do penance for the sins of the entire Congress, and our penance will serve to sanctify a hopelessly flawed process.

When we find ourselves here in the fall, Mr. President, with a number of House-passed appropriations bills and no action in the Senate, let us remember this day. Let us remember that the Gramm-Rudman-Hollings bill allows the House of Representatives to go briskly about its business in providing the funds necessary for Government operations, while the Senate appears confused and inept in its inability to perform. And when Members of this body bitterly complain about the shortcuts of a massive continuing resolution, and the brief time for debate, let them not complain to the Appropriations Committee, for we will find some way to proceed with appropriations bills and report them to the Senate with or without a resolution. If we find ourselves in that logjam in the fall, let us remember the provisions of Gramm-Rudman-Hollings, that have hamstrung the Senate and liberated the House of Representatives.

THE NATIONAL SPELLING BEE

Mr. ANDREWS. Mr. President, I would like to bring to my colleagues' attention a fine, time-honored annual tradition that will again take place in Washington at the end of May. It is the 59th Annual Spelling Bee sponsored by the Scripps Howard Newspapers.

The last week of May, Kyle Lucke, an outstanding young eighth grade student from Schroeder Junior High School in Grand Forks, will be representing North Dakota in Washington at this 59th annual event. Kyle's road to the "National" has been a long one, similar to the one traveled by the many other talented students who will be here to participate in this championship event. In North Dakota, Kyle initially competed against his own schoolmates and was selected as one of the two representatives from Schroeder Junior High School; he then became one of the two finalists in county competition; and then won the State championship by besting 105 other young North Dakotans. Kyle's journey to the National Spelling Bee competition would not have been possible without the support of the North Dakota Newspaper Association who is sponsoring our State champion in the Washington finals.

The Scripps Howard Newspaper Association, which has hosted this event since 1941, once again will bring to this annual spring competition our Nation's brightest young people to test their skills against each other. Kyle will be competing against 173 other students from 48 States, the District of Columbia, Guam, Puerto Rico, and Mexico. This year Scripps Howard will provide $10,800 worth of prizes in cash and gifts to the finalists. Their generosity demonstrates that private industry in America cares deeply about fostering traditional, educational values amoung our most valuable resource for the future: our young people.

I appreciate having this opportunity to congratulate Kyle Lucke and all the other students who through talent, perseverance, and dedication have come to Washington to compete in the National Spelling Bee. I would also like to thank the North Dakota Newspaper Association and the Scripps Howard Newspaper Association for sponsoring such a worthy event.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON ESTABLISHING AN INTERNATIONAL SPACE YEAR—MESSAGE FROM THE PRESIDENT—PM 142

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

I am pleased to submit the attached report on the desirability of establishing an International Space Year in 1992. The year 1992 will be very special indeed. It will mark not only the 500th anniversary of Christopher Columbus' historic voyage of discovery, but also it will be the 35th anniversary of the International Geophysical Year, which ushered in the space age.

A major objective of an International Space Year should be maximize, through international cooperation, the achievements and benefits of the current and prospective space programs of the participating world community. Such efforts should emphasize the involvement of both the developed countries and the developing countries in ways that demonstrate the benefits to everyone from discoveries in space science and the practical utilization of space.

In consulting the space agencies of other nations, the National Aeronautics and Space Administration found substantial international support for the idea of an International Space Year.

I am directing NASA to continue to lead an interagency effort to develop the idea of an International Space Year so that the United States will be fully prepared to move this concept forward internationally. I would also expect the National Academy of Sciences to play a key role in focussing discussion within the United States' scientific community regarding the scientific content of an International Space Year.

RONALD REAGAN.

THE WHITE HOUSE, *May 15, 1986.*

NATIONAL PROGRAM FOR FLOODPLAIN MANAGEMENT—MESSAGE FROM THE PRESIDENT—PM 143

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

In accordance with the provisions of Section 1302(c) of the National Flood Insurance Act of 1968 (42 U.S.C. 4001(c)), I herewith transmit a report entitled, "A Unified National Program for Floodplain Management."

RONALD REAGAN.

THE WHITE HOUSE, *May 15, 1986.*

ANNUAL REPORT OF THE FEDERAL COUNCIL ON AGING—MESSAGE FROM THE PRESIDENT—PM 144

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 204(f) of the Older Americans Act of 1965, as amended, I hereby transmit the Annual Report for 1985 of the Federal Council on the Aging.

RONALD REAGAN.

THE WHITE HOUSE, *May 15, 1986.*

PRESIDENTIAL APPROVALS

A message from the President of the United States announced that he had approved and signed the following enrolled bills and joint resolutions:

On May 12, 1986:

S. 1952. An act to provide for the striking of medals to commemorate the Young Astronaut Program.

S.J. Res. 187. Joint Resolution designating Patrick Henry's last home and burial place, known as Red Hill, in the Commonwealth of Virginia, as a National Memorial to Patrick Henry.

S.J. Res. 285. Joint Resolution to designate the week of May 11, 1986, through May 17, 1986, as "National Osteoporosis Awareness Week of 1986".

On May 13, 19886:

S. 2308. An act to authorize the President of the United States to award congressional gold medals to Natan (Anatoly) and Avital Shcharansky in recognition of their dedication to human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals.

S.J. Res. 293. Joint Resolution to designate the month of May 1986 as "National Child Safety Month".

On May 14, 1986:

S.J. Res. 281. Joint Resolution to designate the week of May 11 through May 17, 1986, as "Senior Center Week".

S.J. Res. 284. Joint Resolution to designate the month of May 1986 as "Better Hearing and Speech Month".

MESSAGES FROM THE HOUSE

ENROLLED BILLS SIGNED

At 10:16 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks,

announced that the Speaker has signed the following enrolled bills:

S. 974. An act to provide for protection and advocacy for mentally ill individuals, and for other purposes; and

H.R. 1349. An act to reduce the costs of operating Presidential libraries, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

At 6:38 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolutions, without amendment:

S.J. Res. 246. Joint resolution to designate May 25, 1986, as "Hands Across America Day", for the purpose of helping people to help themselves, and commending United Support of Artists for Africa and all participants for their efforts toward combating domestic hunger with a four thousand mile human chain from coast to coast;

S.J. Res. 266. Joint Resolution to authorize and request the President to designate the month of June 1986 as "Youth Suicide Prevention Month";

S.J. Res. 271. Joint resolution designating "Baltic Freedom Day"; and

S.J. Res. 337. Joint resolution designating May 18-24, 1986 as "Just Say No to Drugs Week".

The message also announced that the House disagrees to the amendment of the Senate to the bill (H.R. 6) to provide for the conservation and development of water and related resources and the improvement and rehabilitation of the Nation's water resources infrastructure; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon; and appoints the following Members as managers of the conference on the part of the House:

From the Committee on Public Works and Transportation, for consideration of all matters except title XV of the House bill and title VIII of the Senate amendment: Mr. HOWARD, Mr. ANDERSON, Mr. ROE, Mr. BREAUX, Mr. MINETA, Mr. OBERSTAR, Mr. SNYDER, Mr. HAMMERSCHMIDT, Mr. STANGELAND, and Mr. CLINGER.

Appointed as additional conferees:

Mr. Nowak, for consideration of sections 510, 605(b), 752, 1110(b), 1159, and 1185 of the House bill, and modifications thereof committed to conference.

Mr. Rahall, for consideration of the paragraph entitled "Island Creek Basin, West Virginia" of section 301(a), and sections 302 and 813(21) of the House bill, and section 701 (a)(1) and (b) of the Senate amendment.

Mr. deLugo, for consideration of the paragraph entitled "Crown Bay Channel-St. Thomas Harbor, Virgin Islands" of section 102 and section 813(4) of the House bill, and section 609(29) of the Senate amendment.

Mr. Bosco, for consideration of section 536 of the House bill, and modifications thereof committed to conference.

Mr. Wise, for consideration of the paragraphs entitled "Gallipolis Locks and Dam Replacement, Ohio River, Ohio and West Virginia" and "Winfield Locks and Dam, Kanawha River, West Virginia" of section 201(a), the paragraph entitled "Cabin Creek, West Virginia" of section 501(a), and sections 507, 538, and 1120 of the House bill, and sections 317, 502(2), and 703(g) of the Senate amendment.

Mr. Shaw, for consideration of section 1199E of the House bill, and section 333 of the Senate amendment.

Mr. Packard, for consideration of the paragraph entitled "Santa Ana River Mainstem, California" of section 301(a) of the House bill, and section 703(a)(10) of the Senate amendment.

From the Committee on Interior and Insular Affairs, for consideration of the paragraph entitled "Saipan Harbor, Commonwealth of the Northern Mariana Islands" of section 102, sections 814, 1102(c), 1121, 1199B, 1199G, and title XII of the House bill, and sections 218, 233(c), 238, 308, 314, 338, 339, 340, 348, 358, 504, 701(a)(2), and 703(b)(7) of the Senate amendment: Mr. Udall, Mr. Miller of California, Mr. deLugo, Mr. Young of Alaska, and Mr. Cheney.

From the Committee on Merchant Marine and Fisheries, for consideration of sections 104, 107, 109, 110, 112, 113, 115, 116, 605, 1114, 1121, 1122, 1186, 1199E, 1199P, and titles XIII, and XIV of the House bill, and sections 209, 221, 224, 316, 326, 333, 351, 504, 604, 605, 606, 608, 703(e)(2), and 704 of the Senate amendment: Mr. Jones of North Carolina, Mr. Biaggi, Mr. Studds, Ms. Mikulski, Mr. Lowry of Washington, Mr. Hughes, Mr. Lent, Mr. Young of Alaska, Mr. Davis, Mr. Carney, and Mr. Fields (in lieu of Mr. Young of Alaska, for consideration of section 1121 of the House bill, and section 504 of the Senate amendment).

From the Committee on Ways and Means, for consideration of title XV of the House bill and title VIII of the Senate amendment: Mr. Rostenkowski, Mr. Gibbons, Mr. Pickle, Mr. Rangel, Mr. Stark, Mr. Duncan, Mr. Vander Jagt, and Mr. Frenzel.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, May 15, 1986, she had presented to the President of the United States the following enrolled bill:

S. 974. An act to provide for protection and advocacy for mentally ill individuals, and for other purposes.

FOREIGN CURRENCY REPORTS

In accordance with the appropriate provisions of law, the Secretary of the Senate herewith submits the following report(s) of standing committees of the Senate, certain joint committees of the Congress, delegations and groups, and select and special committees of the Senate, relating to expenses incurred in the performance of authorized foreign travel:

CONSOLIDATED REPORT OF EXPENDITURE OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS FOR FOREIGN TRAVEL BY MEMBERS AND EMPLOYEES OF THE U.S. SENATE, UNDER AUTHORITY OF SEC. 22, P.L. 95-384—22 U.S.C. 1754(b), COMMITTEE ON APPROPRIATIONS, FOR TRAVEL FROM JAN. 1 TO MAR. 31, 1986

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GOLDWATER, from the Committee on Armed Services, without amendment.

S. 2459. A bill to provide supplemental authorization of appropriations for fiscal year 1986 for certain programs of the Department of Defense, and for other purposes (Rept. No. 99-300).

By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.R. 4515. An act making urgent supplemental appropriations for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-301).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HOLLINGS (for himself and Mr. THURMOND):

S. 2452. A bill to designate the U.S. Post Office to be constructed in Barnwell, S.C., as the "Solomon Blatt, Sr., Post Office Building"; to the Committee on Governmental Affairs.

By Mr. COHEN (for himself and Mr. NUNN):

S. 2453. A bill to enhance the capabilities of the United States to combat terrorism and other forms of unconventional warfare; to the Committee on Armed Services.

By Mr. MURKOWSKI (for himself, Mr. WARNER, Mr. SIMON, Mr. CRANSTON, Mr. DECONCINI, and Mr. DENTON):

S. 2454. A bill to repeal section 1631 of the Department of Defense Authorization Act, 1985, relating to the liability of Government contractors for injuries or losses of property arising out of certain atomic weapons testing programs, and for other purposes; to the Committee on the Judiciary.

By Mr. MITCHELL:

S. 2455. A bill entitled the National Organ and Tissue Donor Act; to the Committee on Labor and Human Resources.

By Mr. DANFORTH (for himself and Mr. EAGLETON):

S. 2456. A bill for the relief of Milanie C. Escobol Norman; to the Committee on the Judiciary.

By Mr. LAXALT (for himself and Mr. HECHT):

S. 2457. A bill to grant the consent of Congress to the California-Nevada Interstate Compact; to the Committee on the Judiciary.

By Mr. SIMON:

S. 2458. A bill to clarify the antitrust exemption of the business of insurance, and for other purposes; to the Committee on the Judiciary.

By Mr. GOLDWATER:

S. 2459. An original bill to provide supplemental authorization for appropriations for fiscal year 1986 for certain programs of the Department of Defense, and for other purposes; from the Committee on Armed Services; placed on the calendar.

By Mr. WILSON (for himself and Mr. GLENN):

S. 2460. A bill to extend until June 30, 1986, the date on which certain limitations become effective with respect to obligations that may be made from the military personnel accounts of the Department of Defense for fiscal year 1986; considered and passed.

By Mr. HOLLINGS:

S. 2461. A bill to amend part C of the Balanced Budget and Emergency Deficit Control Act of 1985 to exempt certain benefits payable from the military retirement fund from sequestration or reduction under an order issued by the President under section 252 of such act; to the Committee on Governmental Affairs.

By Mr. KENNEDY (for himself, Mr. LUGAR, Mr. STENNIS, Mr. PELL, Mr. DANFORTH, Mr. ANDREWS, Mr. KERRY, and Mr. MOYNIHAN):

S. 2462. A bill to provide for the awarding of a special gold medal to Aaron Copland; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. RIEGLE (for himself and Mr. CRANSTON):

S. 2463. A bill to amend the Internal Revenue Code of 1954 to permit individuals to receive tax-free distributions from an individual retirement account or annuity to purchase their first home, and for other purposes; to the Committee on Finance.

By Mr. METZENBAUM (for himself, Mr. HEINZ, Mr. STENNIS, Mr. DIXON, Mr. LEVIN, Mr. THURMOND, Mr. ZORINSKY, Mr. KENNEDY, Mr. SIMON, Mr. RIEGLE, Mr. BAUCUS, Mr. BURDICK, Mr. SPECTER, Mr. GORE, Mr. SARBANES, Mr. EAGLETON, Mr. MOYNIHAN, Mr. LAUTENBERG, Mr. HEFLIN, Mr. BUMPERS, Mr. ROCKEFELLER, Mr. KERRY, Mr. MITCHELL, Mr. NUNN, Mr. PRYOR, Mr. MATTINGLY, Mr. STAFFORD, Mr. GRASSLEY, Mr. BRADLEY, Mr. HOLLINGS, Mr. QUAYLE, and Mr. GLENN):

S.J. Res. 346. Joint resolution to designate June 21, 1986, as "National Save American Industry and Jobs Day"; to the Committee on Judiciary.

By Mr. LEVIN (for himself, Mr. MOYNIHAN, Mr. ROCKEFELLER, Mr. D'AMATO, Mr. BRADLEY, Mr. ANDREWS, Mr. RIEGLE, Mr. METZENBAUM, Mr. MATSUNAGA, Mr. EAGLETON, Mr. KERRY, Mr. ZORINSKY, Mr. LAUTENBERG, Mr. DIXON, Mr. NUNN, Mr. PRYOR, Mr. BIDEN, Mr. BOREN, Mr. STENNIS, Mr. SIMON, Mr. CHILES, and Mr. KENNEDY):

S.J. Res. 347. Joint resolution to designate the week of May 19, 1986, through May 24, 1986, as "National Homelessness Awareness Week"; to the Committee on the Judiciary.

By Mr. GLENN (for himself, Mr. HEINZ, Mr. DOLE, Mr. BRADLEY, Mr. ANDREWS, Mr. BURDICK, Mr. CHILES, Mr. DODD, Mr. WILSON, Mr. RIEGLE, Mr. PRYOR, Mr. HOLLINGS, Mr. KERRY, Mrs. HAWKINS, and Mr. COHEN):

S.J. Res. 348. Joint resolution to designate the week beginning November 24, 1986, as "National Family Caregivers Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MOYNIHAN:

S. Res. 408. Resolution calling for the elimination of funding of Kurt Waldheim's retirement allowance from the United Nations; to the Committee on Foreign Relations.

By Mr. SIMPSON (for Mr. HELMS):

S. Con. Res. 140. Concurrent resolution to pay tribute to the late William C. Lee and to designate June 6, 1986, as "William C. Lee Day"; ordered held at the desk.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HOLLINGS (for himself and Mr. THURMOND):

S. 2452. A bill to designate the U.S. Post Office to be constructed in Barnwell, SC, as the "Solomon Blatt, Sr., Post Office Building;" to the Committee on Governmental Affairs.

SOLOMON BLATT, SR. POST OFFICE

Mr. HOLLINGS. Mr. President, I send to the desk for myself and my senior colleague, Mr. THURMOND, legislation to name the soon to be built Post Office in Barnwell, SC, in honor of Solomon Blatt, Sr. A native of Barnwell, and a long-time legislator representing Barnwell in the South Carolina House of Representatives, "Mr. Sol" died early this morning. With his death comes the end of an era in which he, as part of the famous "Barnwell Ring," greatly influenced the direction of South Carolina government for over 50 years.

Mr. President, this outstanding man's achievements are many, and I will submit several inserts outlining his record in more detail at the end of my remarks. "Mr. Sol" was a great friend to me, and in politics he was like a father. I served as Speaker protem to Speaker Blatt from 1951 to 1954 and worked closely with him as Lieutenant Governor and Governor. When he died today at age 91, "Mr. Sol" was the Nation's oldest legislator. He holds the record of being speaker of the South Carolina House of Representatives longer than anyone. As a long-time friend and observer of "Mr. Sol's" considerable talents, I can say without hesitation, Mr. President, that he exerted a greater influence on the direction of South Carolina's government than any other person in the last 50 years.

I learned a lot from him. He always had South Carolina's interest at heart. South Carolina always came first. He believed in pay-as-you-go government and sound fiscal management. And he never stopped working to make South Carolina a better place to live. It's a tribute to his many skills that he was respected and admired by friends and foes alike. The years I spent with him the State legislature really shaped my thinking and made me a better public servant.

Mr. President, one of the last things he discussed with me was the location of the new Post Office for Barnwell. He was determined that the new facility would be built on a site that would best serve the community. Characteristically, he was tireless in working out the details with Mayor Rodman Lemon and other local officials, and he got me to go to bat for Barnwell with the Postal Service. Like so many things in which he was involved, this, too, had a successful conclusion. Just yesterday, Mayor Lemon notified me that the Postal Service had agreed to the preferred Main Street site. So, Mr. President, it is a fitting tribute to this outstanding man that we name the postal facility, soon to be built, for him.

Mr. President, I ask unanimous consent that several articles I now send to the desk to be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Columbia Record, May 14, 1986]

DEATH OF "MR. SPEAKER" MARKS END OF LEGENDARY POLITICAL ERA

Solomon Blatt, the nation's oldest legislator and the man who held the S.C. House speakership longer than anyone in state history, died today after battling cardiac and respiratory problems for months.

Blatt, 91, was admitted to Barnwell County Hospital at 7:45 p.m. yesterday and died at 3:10 a.m. today, according to his personal physician, Dr. Henry Gibson.

"He has had recurrent difficulties with his cardiac and respiratory systems in the last three to four months," Gibson said.

Graveside services are to be held at 11 a.m. tomorrow next to Holy Apostle Episcopal Church in Barnwell.

Blatt's desk in the House chamber was draped this morning with a black cloth and on top of that was a white vase with a single white carnation.

House members agreed with a suggestion by House Speaker Ramon Schwartz that they meet briefly today, then recess for the week out of respect to Blatt.

Gov. Dick Riley immediately ordered the flags at the State House flown at half staff, and the House and Senate chambers were to hold abbreviated sessions out of respect to Blatt's memory.

Blatt's last day at the State House was May 6.

He attended the House session and spent about an hour talking privately with Gov. Riley about several matters, including pending legislation and the governor's family, which is from Barnwell.

Blatt and the governor's father, Ted Riley, grew up in homes near one another in Barnwell. They used to play baseball together. The elder Riley called Blatt "one of the strongest steadying forces in our history."

Gov. Riley and other state leaders were saddened by Blatt's death and praised his accomplishments.

Gov. Dick Riley said state government here will always carry Blatt's mark.

'He brought strong legislative leadership hallmarked by fairness, a balanced budget, and sound fiscal management," Riley said.

"He loved the state of South Carolina. And he knew his physical condition . . . but he still wanted to serve," Chief Justice Julius "Bubba" Ness said.

Ness knew Blatt most of his life, and said their relationship was like that of father and son.

Blatt was a generous man and lent Ness the money to go to college and, in his law practice, representing clients whether or not they could pay him, Ness said. "He always had time for everybody. He took time to talk to them," he said.

Blatt had announced earlier this year that he would seek a 27th term to the House, where he served as a representative from his native Barnwell County for 53 years.

Blatt was one of the four cornerstones and the last survivor of the famous "Barnwell Ring," which influenced South Carolina politics for decades and flowered fully in the 1940s.

Other members included Sen. Edgar A. Brown, then chairman of the Senate Finance Committee; Winchester Smith, then chairman of the House Ways and Means committee; and J. Emile Harley, former lieutenant governor and governor.

Blatt set a 33-year record of longevity as speaker of the House.

He was elected speaker in 1937. He retained the title until his retirement July 31, 1973, except for four years when he did not run. When he stepped down, his House colleagues named him speaker emeritus.

The son of Russian immigrants, Blatt's election to that powerful role in state government was noteworthy, because he was a Jew in control of an almost exclusively gentile House membership. When he assumed the gavel in 1937, Blatt pointed out emotionally, "I am a living example of the tolerance of the people of South Carolina."

He did not run for speaker in 1947 but remained a member of the House. Then in 1951 he again was elected speaker and presided until 1973, when he agreed to step down after growing pressure for fresh leadership.

Former Rep. Rex Carter of Greenville succeeded Blatt as speaker, but neither Carter nor Ramon Schwartz of Sumter, the current speaker, wielded the formidable power or tight rein on his fellow colleagues that Blatt did.

As one reporter noted, Blatt presided "with an iron hand encased in a velvet glove."

Blatt fought hard for the causes he believed in.

His reputation for toughness not only extended to his control over fellow House members and aides but to pages as well.

Once during the 1960s, when he had ordered the doors to the House chamber closed during a roll-call vote, Blatt dressed down a page for opening the door in the upper gallery to let a spectator leave.

On other occasions, he ramrodded legislation through the House, sometimes refusing to recognize opponents who wished to be heard on issues.

His stances over the years were sometimes controversial and unpopular. He opposed the compulsory school attendance law and the change to single-member House districts.

"The thing that has done more to hurt South Carolina," he complained in 1980, "has been single-member districts. A county delegation all worked together for a county—now you have people fighting for a smaller area. There's been a deterioration in statesmanship."

Blatt was one of the state's strongest supporters of nuclear energy and urged the licensing of the Barnwell Nuclear Fuels Plant as a reprocessing facility.

He was a sticker for a balanced budget and always praised the House's rule requiring revenue sufficient to meet expenses. He once said, "My father taught me that you can't spend what you haven't got."

He stood for an improved highway system, continuing industrial development and

against a return to Prohibition. And over the years, he became one of the most vocal advocates of shorter legislative sessions and speedier processing of bills.

Born in the small town of Blackville, Blatt was the son of the late Nathan and Mollie Blatt and remained in his native county throughout his life.

Blatt's father was an itinerant peddler who walked around Barnwell County selling goods from a 150-pound pack he carried on his back. He later opened a small store. Solomon was the Blatts' second son. His brother, Nathan, was born in Russia and died in this country in 1918.

After graduating from the Blackville public schools and the University of South Carolina law school, Blatt served 11 months in the U.S. Army during World War I as a member of the 81st Division in France.

He returned to the states in 1919 and joined Harley in the practice of law. On March 19, 1920 he married Ethel Green of Sumter, who died last year.

Subsequently, Blatt moved into a practice of his own and laid the groundwork for his present firm.

Blatt's first try at politics was a failure. He ran for the House in 1930 and was defeated. He vowed he would never run again, but in 1933 friends persuaded him to make another bid and he was elected. By 1935 he had become speaker pro tempore and two years later was elected speaker.

Through the years "Mister Speaker," as he was called by friends and colleagues, was a major influence on the legislation and, consequently, the life of South Carolina.

He said his career began at a time when the Ku Klux Klan was a major political force, when men campaigned on their Civil War records and when "women were never seen on the streets on Saturday."

His terms came in a period of sharp transition for this state, which was changing from a largely agrarian to a dominantly industrial economy. And his decisions as speaker, his powers of committee appointment and his persuasive, booming oratorical talents were often decisive factors in the General Assembly.

Blatt's leadership in the Legislature began when the state was moving, in a big program, from dirt and scattered pave roads to a comprehensive highway system. In fact, it was on what was known as the "highway issue" that he first became speaker.

This was during the first gubernatorial term of the late Olin D. Johnston.

As part of a move to gain a larger voice in highway matters, Johnston ran his own candidate for speaker, Rep. Caston Wannamaker of Chesterfield. Blatt ran as the champion of the highway department, then administered under the late Chief Highway Commissioner Ben M. Sawyer.

It was a close, bitter battle, but Blatt was the winner and usually, thereafter, he was re-elected without opposition.

However, when Strom Thurmond became governor in 1947, he sponsored the candidacy of then Rep. C. Bruce Littlejohn, now retired chief justice of the state Supreme Court.

Faced with a battle he probably would have lost, Blatt did not run and Littlejohn became speaker. But when Thurmond's term expired in 1951, the House again elected Blatt.

"It wouldn't have helped the legislature, Barnwell County or me to become further involved with the Thurmond forces," Blatt recalled in John K. Cauthen's biography, *Speaker Blatt—His Challenges Were Greater.*

Blatt said Thurmond had won the governorship "by resorting to demagoguery against Eggar (Brown) and me I felt I could be more effective for Barnwell and the state by working on the floor of the House for what I thought was right."

Thurmond had attacked the power and influence of the Barnwell Ring. But there were periods when the members themselves were rivals for political leadership and other matters in their home county.

One such example was the split between Blatt and Brown over the gubernatorial candidates in 1958. Blatt supported his old friend, University of South Carolina President Donald Russell, while Brown pushed the successful candidacy of Earnest F. Hollings.

But four years later, the two united behind Russell, who defeated Burnet R. Maybank.

As Hollings pointed out, the "ring" was a ring only when there was agreement among the Barnwell politicos, and often there was anything but harmony among them.

The speaker faced recurrent criticism through the years, in and out of the General Assembly, but the complaints and charges were largely general allegations of too much power or political favoritism.

However, in March, 1962, the late Sen. James P. "Spot" Mozingo III of Darlington shocked the Legislature by attacking Blatt with scathing accusations ranging from obtaining a private secretary at taxpayers' expense to an unethical transaction involving a legal fee.

But Blatt's fellow House members rushed to his defense and adopted a resolution supporting his integrity.

In addition to his legislative duties, Blatt was one of the state's most colorful trial lawyers. The senior partner in the law firm of Blatt and Fales, Blatt practiced law in Barnwell for 67 years.

Among the most controversial cases he tried was the civil lawsuit between former Lexington County Sen. Norma Russell and then House Clerk Sylvia Orange Risher, a Blatt protege.

The two got into a legal battle after a 1977 row at the Southern Legislative Conference in Charleston. Blatt was one of the lawyers who represented Mrs. Risher in court when she obtained a $22,000 verdict against Mrs. Russell, although the verdict was later overturned by the state Supreme court.

In 1981, Blatt came under fire again when he made an impassioned courtroom speech and obtained light sentences for two Barnwell adults who had pleaded guilty to criminal conspiracy and contributing to the delinquency of minors.

The case arose when Billie Joe Stewart and Gloria Jean Hair were accused of luring several young girls, aged 12 to 16, to a mobile home to engage in "sex parties."

But Blatt argued at the sentencing that the girls "voluntarily played a part" in the acts.

Stewart received a three-year sentence suspended on service of three months on weekends, a $1,500 fine and five years probation. Mrs. Hair was sentenced to three years, suspended on service for 60 days and five years probation.

Blatt's life was subsequently threatened because of his defense in the case, and he was given round-the-clock protection for a short time by State Law Enforcement Division agents.

In addition to his legislative and legal influence, Blatt's clout in USC affairs was legend. For 12 years, from 1936 through 1948, he was a member of the university's Board of Trustees and a powerful defender of the institution.

When dual office-holding was held unconstitutional in 1948, he resigned from the USC board and also from his chairmanship of the Barnwell public school board.

In 1953, Blatt was mentioned as a possible candidate for a state Supreme Court judgeship, but he declined to run even though State House observers said his election would have been a certainty.

Blatt's friend, the late Gov. James F. Byrnes, was one influence in the negative decision. Byrnes told the speaker he probably would not be happy in the "sanctuary" of the court.

Byrnes himself had left the U.S. Supreme Court for high wartime assignments under Franklin Roosevelt, and friends had doubted he was happy as a justice.

Over the years, Blatt mended fences with some of his earlier foes, including Johnston, Mozingo and Thurmond.

Blatt often said that his son, Solomon Jr., was his superior as a lawyer, and by 1971, the speaker was grateful to his enemy-turned-friend Thurmond, who helped successfully sponsor Blatt's son as a U.S. district judge.

Blatt received many honors during his long career.

In 1975 he was given the "Legislative Award" from the state division of the Veterans of Foreign Wars. On April 7, 1976, Barnwell County celebrated Solomon Blatt Day. In May 1979, the House office building was dedicated in his name. And on Jan. 12, 1982, the House opened its legislative year by honoring Blatt as he began his 50th year of service as a representative.

His portrait hangs in the House chamber and in the Barnwell County Courthouse. A bronze bust stands in the lobby of the Solomon Blatt building.

He has received honorary doctor of laws degrees from the Augusta Law School, Lander College and his alma mater.

He is survived by his son, U.S. District Judge Solomon Blatt Jr. and three grandchildren.

[From the Charlotte Observer, May 15, 1986]

S.C.'s Rep. Sol Blatt—Barnwell Democrat Was Still Legislator After 54 Years

(By John Monk)

Columbia.—Solomon Blatt, the feisty grand old man of S.C. politics, died early Wednesday at Barnwell County Hospital of heart and respiratory problems. He was 91.

At his death, Rep. Blatt, a Democrat, was still serving in the S.C. House of Representatives and was the longest-serving active legislator in the nation.

First elected in 1932, Rep. Blatt was House speaker from 1937 to 1946, and again from 1951 to 1973. In his early years as speaker, he exercised enormous power, power that began to wane in the late 1960s after he made a public speech construed by many as racist.

During his ascendant years, however, Rep. Blatt was a consummate power broker who, with the late Sen. Edgar Brown, controlled the S.C. General Assembly for decades.

"Our state government will always carry his mark," said Gov. Dick Riley in a tribute. "South Carolina has lost a true leader."

Rep. Blatt had been ailing in recent years. His familiar figure—he had a large shiny bald head and usually wore a dark suit—was seen only occasionally at the legislature.

Wednesday, his desk was draped in black cloth. On top, a single white carnation stood in a glass vase.

Graveside services are today at 11 a.m. next to Holy Apostle Episcopal Church in Barnwell.

Rep. Blatt's base of power was tiny Barnwell County, his birthplace, where voters returned him to office for 26 consecutive two-year terms.

He was powerful, in part, because the speaker of the House controls debate and makes committee assignments. He also was powerful because of his personality—a workaholic drive that led him to master parliamentary tactics and use them with skill and ruthlessness.

Despite his position, Rep. Blatt was not aloof, He took pains to meet and court young legislators and do them favors. His speeches were sometimes so fervent that tears ran down his cheeks.

In his later years, as his power slipped, he even begged fellow legislators for votes on matters he thought crucial, reminding them in a strong but shaky voice that he might die any day.

Another legislator, Rep. Ben Thrailkill, R-Horry, said Wednesday that several months ago he had agreed to pledge a vote for state Supreme Court justice candidate Rodney Peeples because Rep. Blatt had entreated his pledge, saying, "I don't know how many days I've got."

In his book "The Provincials," Eli Evans wrote of Rep. Blatt's style at its height:

"King Sol keeps it moving all session long, lunching with lobbyists, granting an interview, adjusting the language of bills, ramroding an amendment, standing aside, compromising with the Senate and making the law. . . . Sol doesn't just guide the House, he drives it."

In 1973, facing a challenge to his power from then-Rep. Rex Carter, Rep. Blatt resigned as speaker. But first, he negotiated an agreement that guaranteed him secretarial help, a carpeted office, and the title "speaker emeritus" to soften the transition.

Some said the real beginning of Rep. Blatt's fall came in 1966, when he made an emotional speech opposing reenactment of the state's compulsory school law, which had been repealed earlier to allow whites not to send their children to integrated schools.

"Do you want some 16-year-old so-and-so holding the hand of your little granddaughter In the classroom? Sol Blatt doesn't want that. For God's sake, help me out," said Rep. Blatt, who later denied he was referring to blacks when he said "so-and-so."

Throughout his long career, Rep. Blatt's name was never attached to any major legislation.

But his influence was such that former Gov. John West said, "If he was against an issue, it would almost surely fail."

Rep. Blatt's favored projects included his alma mater, the University of South Carolina (USC), and the Savannah River Plant, a massive, controversial federal plant in Aiken and Barnwell counties that manufactures materials for nuclear weapons.

In a state where powerful people have roads and buildings named after them while still living, Rep. Blatt accumulated his share of memorials.

Things named for him include three roads, a five-story state office building in Columbia, the physical education center at USC, a building at Barnwell County State Park and a gym at Barnwell High School.

Even with his health failing, Rep. Blatt—a lawyer—in recent years could still give an impassioned speech on the House floor or in the courtroom.

In June 1985, he took to his feet to beg House members to compromise with the Senate on the state budget. "My days as a public servant are about over. This may be my last trip to this House. . . . Grab your neighbor's hand and say, 'I love you, but I love South Carolina more.' "

A month later, Rep. Blatt asked a federal judge in Charleston to be lenient to a drug dealer.

"Show him mercy, because we all must face our Maker. Shortly—it can't be long—I must face my God," said Rep. Blatt.

He was a member of a four-man political band in the 1940s and 1950s many called "The Barnwell Ring." The others, from the Barnwell area, were Brown, who controlled the Senate Finance Committee. Gov. Emile Harley and former Rep. Winchester Smith.

"Blatt, by his policy of appointing no more than one member from any county to the Ways and Means Committee . . . ensured that the eight counties with half the population would have no more than one-third the vote," wrote author Jack Ba in his book "The Transformation of Southern Politics," describing how Rep. Blatt symbolized the ring's power.

Rep. Blatt once told a reporter he had no hobbies, never went swimming or golfing, had fished once and never took a vacation.

"If I went to Florida, what could I do? I'd just stay in a motel room all day."

Rep. Blatt's father, Nathan Blatt, was a Jewish Russian immigrant, who went to Charleston after arriving in New York and became a peddler in the Lowcountry, carrying a 150-pound pack of goods on his back. At first unable to speak English, he managed to open a store in Blackwell in Barnwell County. Young Solomon worked in it.

Doing secretarial work for a magistrate, Rep. Blatt became interested in law. He attended USC and graduated from law school in 1917—the year the United States entered World War I.

Enlisting, Rep. Blatt was sent to France and served on the western front. Coming home, he practiced law before being elected to the House in 1932.

His wife, Ethel, died in December 1985. He is survived by a sister, Mrs. Rebecca Mirmow of Orangeburg; a son, U.S. District Judge Solomon Blatt Jr.; and three grandchildren.

[From the South Carolina Legislative Manual, 1986]

SPEAKER EMERITUS

BLATT, Solomon [D] (Dist. No. 91, Barnwell-Allendale Cos.)—Lawyer, firm of Blatt & Fales, residing at Barnwell; *b.* Feb. 27, 1895, at Blackville; *s.* Nathan and Mollie (Blatt) Blatt of Blackville; *g.* Univ. of S.C., LL.B., 1917; Mar. 18, 1920 *m.* Ethel Green of Sumter; Trustee, Barnwell School 34 yrs.; on Gov. Blackwood's staff; Military Service: WW I Veteran, Supply Co., 323rd Inf., USA 81st Div., Apr. 1918–Mar. 1919; Trustee, Univ. of S.C. 1936–48; previous service in House, 1933–85; elected Speaker *Pro Tempore,* without opposition, Jan 8, 1935, elected Speaker over one opponent Jan 12, 1937, re-elected in 1939–1945 without opposition, did not offer for Speaker in 1947 & 1949. Elected Speaker again Jan. 9, 1951 over one opponent; re-elected 1953–73 without opposition; unanimously elected Speaker Emeritus June 6, 1973, effective upon resignation as Speaker, July 31, 1973.

Mr. THURMOND. Mr. President, I am pleased to cosponsor legislation which would designate the U.S. Post Office to be constructed in Barnwell, SC, as the "Solomon Blatt, Sr., Post Office."

South Carolina suffered a great loss when Speaker Emeritus Solomon Blatt died earlier this week at the age of 91.

Solomon Blatt, better known to his friends as "Sol", served in the South Carolina House of Representatives for over half a century. He served as presiding officer of a legislative body longer than any other person in the Nation. Because of his outstanding service, Solomon Blatt was elected speaker emeritus of the South Carolina House of Representatives in 1973. He served in that capacity until his death.

Solomon Blatt began his legislative service in 1933. He made many contributions to South Carolina in the areas of education and economic development. He was a hallmark of fiscal responsibility, and helped the South Carolina government to gain and to maintain its nationally respected, high financial rating.

His dedication to his legislative duties was an inspiration, not only to the legislators who served with him, but to the people of our State. He will be sorely missed.

It is fitting that the new U.S. Post Office in Barnwell, where Blatt resided most of his life, be named in his honor. I urge my colleagues to lend their support to the prompt passage of this legislation.

By Mr. COHEN (for himself and Mr. NUNN):

S. 2453. A bill to enhance the capabilities of the United States to combat terrorism and other forms of unconventional warfare; to the Committee on Armed Services.

(The remarks of Mr. COHEN and Mr. NUNN and the text of the legislation appear earlier in today's RECORD.)

By Mr. MURKOWSKI (for himself, Mr. WARNER, Mr. SIMON, Mr. CRANSTON, Mr. DECONCINI, and Mr. DENTON):

S. 2454. A bill to repeal section 1631 of the Department of Defense Authorization Act, 1985, relating to the reliability of Government contractors for injuries or losses of property arising out of certain atomic weapons testing programs, and for other purposes; to the Committee on Armed Services.

REPEAL OF SECTION 1631 OF THE DEPARTMENT OF DEFENSE AUTHORIZATION ACT

Mr. MURKOWSKI. Mr. President, as chairman of the Senate Committee on Veterans' Affairs, I am introducing today, along with my distinguished colleagues, Senator JOHN WARNER, from Virginia, Senator PAUL SIMON from Illinois, Senator ALAN CRANSTON from California, Senator DENNIS DECONCINI from Arizona, and Senator

JEREMIAH DENTON from Alabama, a bill to repeal section 1631 of the Department of Defense Authorization Act of 1985 related to the right of individuals to seek redress in court for acts or omissions of nuclear weapons contractors in carrying out the atomic weapons testing program. This matter is of great concern to Senator WARNER and me because of the impact that section 1631 may have on veterans, who, at the time of the U.S. nuclear weapons test program, were serving in the Armed Forces, and were participating in the tests. Senator WARNER, who at the request of the Department of Energy, inserted section 1631 into the 1985 Department of Defense Authorization Act, urged my committee to conduct hearings to consider the impact of the provision on the rights of veterans to seek redress for their disabilities.

Mr. President, ever since the nuclear test program, concern has been expressed about the long-term health effects of radiation exposure. Today that question has a deeper, more urgent significance. More than 80,000 scientific studies have already been done on the health effects of ionizing radiation. The United Nations, the National Academy of Sciences, and the National Institutes of Health, to name a few, have published their findings concerning radiation-related diseases. The Congress has held numerous hearings on these matters, particularly as it pertains to the possible long-term health effects of radiation exposure on those veterans who participated in the nuclear test program. As a result in 1984, Congress passed the "Veterans' Dioxin and Radiation Exposure Compensation Standards Act"—Public Law 98-542—to require the Veterans' Administration to establish a uniform process for adjudicating disability claims related to ionizing radiation exposure.

Though the VA's disability compensation system provides an administrative avenue for veterans who were exposed to ionizing radiation to seek redress for the disabilities they believe were related to that exposure, as a result of section 1631 these veterans no longer have access to the courts to seek redress from the contractors involved in the test program. Prior to October 1984, suits could be brought against contractors who participated in the testing program, but the contractors were indemnified by the government for all costs of litigation, judgments or settlements. Section 1631 of the Department of Defense Authorization Act of 1985—Public Law 98-525—established the United States as defendant in these cases, but provided that such cases would fall under the jurisdiction of the Federal Tort Claims Acts [FTCA]. However, the FTCA provides the United States with certain defenses that effectively bar judgments on behalf of many claimants. For example, the Feres doctrine established by the Supreme Court precludes judgments against the U.S. Government under the Federal Tort Claims Act for injuries to servicemen incurred in the course of their service. Thus, veterans are entitled to seek compensation and service-related injuries from the Veterans' Administration, but cannot sue the Government if their claims are not approved. Between 1978 and September 1985, the Veterans' Administration granted benefits for less than 3 percent of claims from veterans for exposure to radiation resulting from atomic weapons tests. Prior to enactment of Public Law 98-525, such claimants were able to sue private contractors. Similarly, suits by civilian employees are precluded by the Federal Employees Compensation Act. In response to the concerns raised by Senator WARNER and representatives of atomic veterans' organizations, I held hearings on November 14, 1985, to review the VA's implementation of Public Law 98-542 and to consider the effect of section 1631 on our Nation's veterans.

As a result of the information and testimony received at these hearings, I have determined that it is essential that this matter be discussed in the committee of jurisdiction, the Judiciary Committee, to resolve, what I believe to be some very serious matters. I am concerned that the VA's administrative system can only go so far in providing a suitable remedy for veterans.

Senator STROM THURMOND, Judiciary Committee chairman, has assured me that he will hold hearings on June 23 or 24 to consider these matters. I believe that at that time would be appropriate for the Judiciary Committee to consider all aspects of this issue, including total and partial repeal of section 1631, possible modifications to the Feres doctrine, and alternative systems of compensation. I intend to provide Senator THURMOND with copies of the November 14 hearing transcripts and additional materials to assist him in considering all relevant issues.

It is for these reasons that I introduce this measure today. I have reached no conclusion prematurely on the best course of action that should be taken. I do strongly believe that a full and open discussion should take place in the appropriate committee forum before any action is taken by the full Senate. The philosophical and legal issues raised by section 1631 merit comprehensive and thoughful consideration by the Congress. My intent today is to add an important option to that discussion. I hope this legislation will serve as a vehicle for discussion and aid in the resolution of the serious question of access to Federal courts by veterans exposed to ionizing radiation.

Mr. President, I ask unanimous consent that my February 13, 1985, April 2, 1985, and April 29, 1986 letters on this matter as well as a letter from the Department of Energy be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, February 13, 1985.

Hon. JOHN W. WARNER,
U.S. Senate, Washington, DC.

DEAR JOHN: Thank you for your letter of recent date requesting that the Senate Committee on Veterans' Affairs hold a hearing to assess the impact on the legal rights of certain veterans of section 1631 of the Department of Defense Authorization Act for Fiscal Year 1985, P.L. 98-525.

Under section 1631 of P.L. 98-525, contractors participating in United States atomic weapons testing activities are considered to be instrumentalities of the federal government. Accordingly, the Federal Tort Claims Act, 28 U.S.C. sections 1346(b) and 2672, or the Suits in Admiralty Act, 46 U.S.C. sections 741-752 and 781-790, as appropriate, is made the exclusive legal remedy for third parties alleging loss of property, personal injury of death due to the acts or omissions of the contractors. Specifically, section 1631 provides a remedy against the United States for loss of property, personal injury or death due to exposure to radiation based on acts or omissions by a contractor conducting atomic weapons tests under a contract with, and under the direction and control of, the United States. This section expressly precludes any other civil action by private individuals against a contractor for the purpose of determining civil liability from acts or omissions of the contractor. Section 1631 provides that the Attorney General of the United States will defend civil actions brought against such contractors.

As you state, individual veterans and veteran groups have expressed the opinion that section 1631 has denied certain veterans sufficient remedy to redress personal injury allegedly due to exposure to radiation while on active military duty resulting from the acts or omissions of a contractor. There is the apparent concern among these veterans and veteran groups that the Veterans Dioxin and Radiation Exposure Compensation standards Act. P.L. 98-542, may not adequately compensate the affected veterans and that a civil suit under section 1631 seeking a fuller recovery would be barred by application of the *Feres* doctrine. In *Feres* v. *United States*, 340 U.S. 135, 144 (1950), the Supreme Court held that the United States "is not subject to liability under the Federal Tort Claims Act for injuries to servicemen where the injuries arise out of or are in the course of activity incident to military service."

In light of the strong interest of the Senate Committee on Veterans' Affairs in all matters relating to veterans, I intend to honor your request and schedule a hearing for the purpose of evaluating the effect on the legal rights of certain veterans of section 1631 of P.L. 98-525. At this time, I am unable to determine whether this matter will be the subject of a separate hearing or will be heard in conjunction with a hearing on other veterans' issues. As soon as more information with regard to scheduling is developed, I will be back in touch with you.

Thank you for your interest in the welfare of this country's veterans.

Sincerely,

FRANK H. MURKOWSKI,
Chairman.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, April 2, 1985.

Hon. STROM THURMOND,
Chairman, Senate Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR STROM: I am writing to request that you consider scheduling a hearing of the Senate Committee on the Judiciary, to be conducted jointly with the Senate Committee on Veterans' Affairs, for the purpose of assessing the impact on the legal rights of certain veterans of section 1631 of the Department of Defense Authorization Act for Fiscal Year 1985, P.L. 98-525.

Please permit me to provide background information. Under section 1631 of P.L. 98-525, contractors participating in United States nuclear weapons testing activities are considered to be instrumentalities of the federal government. Accordingly, the Federal Tort Claims Act, 28 U.S.C. section 1346(b) and 2672, or the Suits in Admiralty Act, 46 U.S.C. sections 741-752 and 781-790, as appropriate, is made the exclusive legal remedy for persons alleging loss of property, personal injury or death due to the acts or omissions of the contractors.

Specifically, section 1631 provides a remedy against the United States for loss of property, personal injury or death due to exposure to radiation based on acts or omissions by a contractor conducting nuclear weapons tests under a contract with, and under the direction and control of, the United States. This section expressly precludes any other civil action by private individuals against a contractor for the purpose of determining civil liability from acts or omissions of a contractor. Section 1631 provides that the Attorney General of the United States will defend actions brought against such contractors.

Veterans whose military service involved participation in nuclear weapons testing, have expressed the view that section 1631 denies them the constitutional right of due process under the laws by preventing them from obtaining a legal remedy to redress personal injuries allegedly due to exposure to radiation which on active military duty. There is the concern among these veterans that a civil suit under section 1631, seeking compensatory damages, would be barred by application of the principle of sovereign immunity and the *Feres* doctrine. In *Feres v. United States*, 340 U.S. 135, 144 (1950), the Supreme Court held that the United States "is not subject to liability under the Federal Tort Claims Act for injuries to servicemen where the injuries arise out of or are in the course of activity incident to military service."

In light of the vital interest of the Senate Committee on Veterans' Affairs in all matters relating to veterans, I have indicated my intention to schedule a hearing for the purpose of evaluating the effect on the legal rights of certain veterans of section 1631 of P.L. 98-525. However, since the legal questions presented bear on the Federal Tort Claims Act, I believe that a joint hearing of the Senate Committee on the Judiciary and the Senate Committee on Veterans' Affairs would be the preferable forum for discussion of this matter. The Senate Committee on the Judiciary has jurisdiction over the Federal Tort Claims Act and would be the proper committee to conduct oversight of the legal issues raised by section 1631, the Federal Tort Claims Act and the relevant case law.

I appreciate your attention to my request and look forward to hearing from you.

Sincerely,

FRANK H. MURKOWSKI,
Chairman.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, April 29, 1986.

Hon. STROM THURMOND,
Chairman,
Hon. JOSEPH R. BIDEN, Jr.,
Ranking Minority Member, Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR STROM AND JOE: We are writing to urge that your Committee hold hearings to consider the issue of whether there is a need for legislative changes to section 1631 of Public Law 98-525 to the FY 85 DoD Authorization Act. This section provides that suits for personal injury or death due to radiation exposure resulting from a federal government contractor's activities in carrying out nuclear weapons tests must be brought against the federal government and may not be brought against the contractor.

Because one of the groups of individuals most directly affected by this section, the so-called "Warner Amendment", comprises individuals who were exposed to radiation while serving in the Armed Forces, Senator Warner requested that our Committee hold an oversight hearing to consider the impact of his amendment on those veterans who believe that they were injured during the test program. Such a hearing was held last November 14.

After considering the issues and testimony before the Committee, we have concluded that, although our Committee does have jurisdiction over matters of concern to veterans, we do not have jurisdiction over this legislation. Rather, we believe that the specific issue addressed by the "Warner Amendment"—that is, the right of individuals to seek redress in federal court for harm they believe is due to exposure to radiation as a result of the actions of government contractors—is under the jurisdiction of the Judiciary Committee. We, therefore, urge that your Committee conduct a hearing on this issue. We would, of course, be happy to share with you the information we gathered in connection with our Committee's hearing last November.

We thank you for your attention to our request and look forward to hearing from you in the near future.

Sincerely,

FRANK H. MURKOWSKI,
Chairman.
ALAN CRANSTON,
Ranking Minority Member.

THE SECRETARY OF ENERGY,
Washington, DC, May 15, 1986.

Hon. FRANK H. MURKOWSKI,
Chairman, Committee on Veterans Affairs, U.S. Senate, Washington, DC.

DEAR SENATOR MURKOWSKI: I have been advised that on May 13, 1986, the House of Representatives passed H.R. 1338, a bill that would allow suits against the United States for acts or omissions of contractors in carrying out the atomic weapons testing program, and to substitute the United States as party defendents in suits brought against such contractors.

As you know, H.R. 1338 would make a significant change in the Federal Tort Claims Act. In order to ensure that the extremely critical and complex issues of law and public policy raised in H.R. 1338 are properly addressed, I would ask that before the full Senate considers this or any similar measure, it receive a full examination in hearings before the Senate Judiciary Committee. I would also ask that the Department be allowed to testify on this bill when such hearings are held.

Thank you for your consideration on this issue of such great importance.

Yours truly,

JOHN S. HERRINGTON.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the full text of the proposed legislation be printed in the RECORD, also.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2454

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1631 of the Department of Defense Authorization Act, 1985 (Public Law 98-525; 98 Stat. 2646) is repealed effective on October 19, 1984.

(b) The period during which section 1631 of the Department of Defense Authorization Act, 1985, was in effect shall not be taken into account in computing the period provided in any Federal or State statute of limitations applicable to any civil action for an injury, loss of property, personal injury, or death described in subsection (a)(1) of such section.

Mr. WARNER. Mr. President, I would like to take this opportunity to thank the distinguished chairman of the Judiciary Committee for scheduling hearings to consider the legal issues regarding appropriate compensatory measures for veterans who consider themselves harmed by radiation from atomic tests conducted by our Government.

In 1983, and again in 1984, the administration proposed legislation which provided that contractors for the Government involved in atomic energy defense activities are considered instrumentalities of the Federal Government and, as such, are not subject to suit by private individuals for effects thought to be derived from those activities associated with the research, development and testing of nuclear weapons.

This measure was enacted into law as section 1631 of Public Law 98-525, the DOD authorization bill.

Prior to introducing this provision, I was assured by the Veterans' Administration and the Department of Justice that veterans' interests would be effectively protected by the "Veterans Dioxin and Radiation Exposure Compensation Act", Public Law 98-542, which was signed into law in the spring of 1984.

My assessment at that time, based on information I received from the administration, was that the atomic vet-

erans cases would be dealt with more fairly and equitably under the provisions of Public Law 98-542 than if these cases were allowed to proceed on an individual basis in the State courts.

The veterans themselves have since indicated that Public Law 98-542 has not been effective in addressing their claims.

Further, these veterans feel that section 1631 has denied their legal rights and treats them unfairly.

Since my intentions were never to harm the legal rights of this group of veterans, several months ago I requested the chairman of the Veterans Affairs Committee to hold hearings on this issue.

I would like to thank my good friend and distinguished colleague from Alaska, the chairman of the Veterans Affairs Committee, for scheduling and chairing an exhaustive set of hearings on this matter.

I appreciate the opportunity to participate in those hearings, and would like to thank the staff director of the Veterans Affairs Committee, Mr. Tony Principi, for his assistance and wise counsel.

I am hopeful that the hearings chaired by Chairman MURKOWSKI, coupled with the hearings Chairman THURMOND has now scheduled, will lead to a fair and equitable treatment of the atomic veterans as well as adequate protection for our Nation's atomic defense programs.

To ensure that all aspects of this issue—the bill recently passed in the House as well as other alternatives—are presented for consideration by the Judiciary Committee, I am joining the chairman of the Veterans Affairs Committee in introducing legislation to repeal section 1631.

If the Judiciary Committee concludes that this is an appropriate measure to address this issue, then we will pursue rapid enactment of this legislation.

Again, I would like to express my sincere appreciation to the Senator from South Carolina and the Senator from Alaska for their assistance and support on this important matter.

Mr. Chairman, I request unanimous consent that my letters of January 29, 1985, July 10, 1985, and three letters of May 5, 1986, on this subject be entered into the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, January 24, 1985.

Hon. FRANK H. MURKOWSKI,
Chairman, Veterans' Affairs Committee, U.S. Senate.

DEAR MR. CHAIRMAN: Section 1631 of Public Law 98-525 provides that contractors for the government involved in atomic energy defense activities are instrumentalities of the federal government and, as such, are not subject to suit by private individuals for effects thought to be derived from those activities associated with the research, development and testing of nuclear weapons. This provision, requested by the Administration in both 1983 and 1984, was passed by the Senate and finally incorporated in P.L. 98-525.

Prior to the enactment of Section 1631, I was assured by the Veterans Administration and the Department of Justice that the veterans' interests would be protected by the "Veterans Dioxin and Radiation Exposure Compensation Standards Act" (P.L. 98-542), which was signed into law last spring. Since the enactment of P.L. 98-525 individual veterans and veterans groups have indicated that Section 1631 may deny veterans sufficient remedy to redress any illness or injury they perceive as connected to atomic energy activities.

My assessment, based on the information I have received from the Veterans Administration and the Department of Justice, was that these veterans' cases would be dealt with more fairly and equitably under the provisions of P.L. 98-542 than if these cases were allowed to proceed on an individual basis in the state courts.

Since the veterans themselves have indicated that they feel that under Section 1631 they have been denied their legal rights and are not being dealt with fairly, I am writing to request that you hold hearings in your Committee on this matter as soon as possible. I am prepared to testify and present the background and my views on Section 1631 if you desire.

It is certainly not my intention to support any legislation that is damaging to the interests of our veterans. To the contrary, I feel that our veterans deserve fair and prompt consideration for their service to the country.

Thank you for your attention to this matter.

Sincerely,

JOHN W. WARNER.

U.S. SENATE,
Washington, DC, July 10, 1985.

Hon. FRANK H. MURKOWSKI,
Chairman, Committee on Veterans' Affairs, U.S. Senate.

DEAR FRANK: I appreciate very much your scheduling a hearing to assess the impact on the legal rights of certain veterans of Section 1631 of the Department of Defense Authorization Act for Fiscal Year 1985, P.L. 98-525.

I understand that the hearing will be chaired by you on July 23 at 1:30 p.m. I want to offer to be of service in any way that you consider that I can be helpful.

Because of their obvious, intense interest in the issue, I would like to request that members of the National Association of Atomic Veterans be provided the opportunity to testify at the hearing.

Thank you again for your consideration, and please let me know if I can be of assistance.

With kindest regards,

Sincerely,

JOHN W. WARNER.

U.S. SENATE,
Washington, DC, May 5, 1986.

Hon. FRANK MURKOWSKI,
Chairman, Committee on Veterans' Affairs, U.S. Senate.

DEAR MR. CHAIRMAN: I appreciate very much your sending me a copy of your recent letter to the Chairman of the Judiciary Committee proposing that he consider hearings on the plight of atomic veterans.

You are very much aware of my role in introducing legislation (Section 1631, P.L. 98-525) in the FY 1984 Defense Authorization bill, which made contractors participating in atomic weapons testing programs instrumentalities of the federal government and precluded any other civil action by private individuals against a contractor for the purpose of determining civil liability from acts or omissions of the contractor.

I have also written a letter to the Chairman of the Judiciary Committee supporting your proposal that he chair hearings on this issue. I am enclosing a copy of that letter.

It has never been my intent to damage the legitimate interests of the atomic veterans. At the time the legislation described above was passed, I was assured by the Veterans Administration and the Department of Justice that the claims of these veterans would be dealt with more fairly and equitably by the then-recently passed P.L. 98-542, the "Veterans Dioxin and Radiation Exposure Compensation Standards Act". The atomic veterans continue to feel that this act does not provide a sufficient vehicle to address their claims.

In addition to joining in your proposal that the Committee on the Judiciary hold hearings on Section 1631 of P.L. 98-525, I would appreciate it very much if you would advise me of any findings and/or conclusions your committee may have reached on the atomic veterans issue as a result of your hearings.

Thank you again for your support and assistance in this matter. Please let me know if I can be of any assistance.

Sincerely,

JOHN W. WARNER.

U.S. SENATE,
Washington, DC, May 5, 1986.

Hon. STROM THURMOND,
Chairman, Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I am writing to request that your committee hold hearings on Section 1631 of PL 98-525, the Federal Tort Claims Act and relevant case law.

Section 1631, which I introduced at the request of the Administration, provides that contractors for the government involved in atomic energy defense activities are instrumentalities of the federal government and, as such, are not subject to suit by private individuals for effects thought to be derived from those activities associated with the research, development and testing of nuclear weapons. This provision, requested by the Administration in both 1983 and 1984, was passed by the Senate and finally incorporated in PL 98-525.

Prior to the enactment of Section 1631, I was assured by the Veterans Administration and the Department of Justice that the veterans' interests would be protected by the "Veterans Dioxin and Radiation Exposure Compensation Standards Act" (PL 98-542), which was signed into law in the spring of 1984. Since the enactment of PL 98-525, individual veterans and veterans groups have indicated that Section 1631 denies veterans sufficient remedy to redress any illness or injury they perceive as connected to atomic energy activities.

My original assessment, based on the information received at the time of the Veterans Administration and the Department of Justice, was that these veterans' cases would be dealt with more fairly and equitably under the provisions of PL 98-542 than if these cases were allowed to proceed on an individual basis in the state courts. The vet-

erans themselves have indicated that they feel that under Section 1631 they have been denied their legal rights and are not being dealt with fairly.

I consider it appropriate that you hold hearings in your committee on this matter as soon as possible, since your committee has jurisdiction over the Federal Tort Claims Act. I understand that Chairman Murkowski and Ranking Minority Member Senator Cranston of the Veterans Affairs Committee have written to you and Senator Biden with a similar request to hold hearings on this matter. It was at my earlier suggestion that the Veterans Committee held hearings on this issue.

It was never my intent to damage the legitimate interests of our veterans. I am hopeful that hearings by the Committee on the Judiciary, along with those hearings already held by the Veterans Affairs Committee, will produce a just and fair solution for our veterans who feel they have been harmed by radiation.

Thank you for your consideration and support. Please let me know if I can be of assistance.

Sincerely,

JOHN W. WARNER.

U.S. SENATE,
Washington, DC, May 5, 1986.

Hon. JOHN S. HERRINGTON,
Secretary of Energy, Department of Energy, Independence Avenue SW., Washington, DC.

DEAR MR. SECRETARY: As you are aware, I introduced legislation at the request of the Administration in the FY 84 Defense Authorization Act to limit the liability of civilian contractors participating in our nuclear weapons testing activities.

Section 1631 of Public Law 98-525 provides that contractors for the government involved in atomic energy defense activities are instrumentalities of the federal government and, as such, are not subject to suit by private individuals for effects thought to be derived from those activities associated with the research, development and testing of nuclear weapons. This provision, requested by the Administration in both 1983 and 1984, was passed by the Senate and finally incorporated in PL 98-525.

Prior to the enactment of Section 1631, I was assured by the Veterans Administration and the Department of Justice that the veterans' interests would be protected by the "Veterans Dioxin and Radiation Exposure Compensation Standards Act" (PL-98-542), which was signed into law in the spring of 1984. Since the enactment of PL 98-525, individual veterans and veterans groups have indicated that Section 1631 may deny veterans sufficient remedy to redress any illness or injury they perceive as connected to atomic energy activities.

My original assessment, based on the information received at the time from the Veterans Administration and the Department of Justice, was that these veterans' cases would be dealt with more fairly and equitably under the provisions of PL 98-542 than if these cases were allowed to proceed on an individual basis in the state courts. The veterans themselves have indicated that they feel that under Section 1631 they have been denied their legal rights and are not being dealt with fairly.

In January, 1985 I requested that Chairman Murkowski hold hearings on this issue in the Veterans Affairs Committee. These hearings were held last November 14. Both Chairman Murkowski and I have now proposed to the Chairman of the Committee on the Judiciary that he hold hearings on Section 1631 of PL 98-525, the Federal Tort Claims Act and relevant case law.

I would appreciate being advised of the Administration's current position and recommendations on this matter based on the result of the hearings in the Veterans Affairs Committee and any other related developments.

Thank you for your assistance.

Sincerely,

JOHN W. WARNER.

● Mr. SIMON. Mr. President, I would like to support with my cosponsorship, Senator MURKOWSKI's amendment to repeal section 1631 of the Department of Defense Authorization Act of 1985. This amendment relates to the liability of Government contractors for injuries or losses of property arising out of atomic weapons testing programs. The amendment allows suits against contractors for acts or omissions of these contractors in conducting the Atomic Weapons Testing Program.

In June 1983, the Judiciary Committee asserted that section 1631 may be unfair to current and potential plaintiffs. The amendment deprives claimants of any right to sue for damages in negligence arising out of the Atomic Weapons Testing Program. Prior to passage of section 1631, known as the Warner amendment, civilians, veterans, and military personnel could bring suit against contractors for damages arising out of the Atomic Weapons Testing Program under State tort law.

The results of the Warner amendment, stipulating that suits brought against contractors involved in the Nuclear Testing Program would substitute the United States as a litigant, combined with the Feres doctrine prohibiting suits against the United States by military personnel for injuries sustained on active duty, block any adjudications of a veteran's claim.

I am an advocate for those seeking redress for injuries suffered during nuclear testing. They should not be forced to sacrifice their right to be heard in a court of law. I strongly urge my colleagues to support the repeal of section 1631 of the Department of Defense Authorization Act of 1985. I commend Senator MURKOWSKI for introducing this bill.●

Mr. CRANSTON. Mr. President, I am pleased to join with my friend from Alaska [Mr. MURKOWSKI], the chairman of the Veterans' Affairs Committee on which I serve as the ranking Democratic member, and with the other original cosponsors, Senators WARNER, SIMON, DECONCINI, and DENTON, in introducing S. 2454, a measure that would repeal section 1631 of the Department of Defense Authorization Act for fiscal year 1985, Public Law 98-525, effective on October 19, 1984, the date of the enactment of that provision. I have been interested in such legislation for some time and, in fact, had been working actively with Senators SIMON and DECONCINI in the preparation of such a measure when Senator MURKOWSKI invited us to join with him in introducing this bill. I am pleased to join with him so as to demonstrate our unity of purpose on this important issue.

Mr. President, section 1631 of Public Law 98-525, the so-called Warner amendment, provides that suits for personal injury or death due to radiation exposure resulting from a Federal Government contractor's activities in carrying out nuclear weapons tests must be brought against the Federal Government and may not be brought against the contractor. This provision originated in the Armed Services Committee and, although it relates to judicial remedies for actions involving the U.S. Government and makes specific references to various provisions in title 28, United States Code, it was not, prior to its enactment, considered by the committee of proper jurisdiction in the Senate, the Judiciary Committee.

As a result of my service on the Veterans' Affairs Committee, I have had a longstanding and very deep interest in issues relating to the concerns of veterans exposed to ionizing radiation during their military service. I chaired the first hearings in the Senate on this matter in 1979 and have actively pursued getting the Federal Government to shoulder its proper responsibilities vis-a-vis these veterans, and their survivors, who that Government deliberately exposed to ionizing radiation. In this regard, I have authored, and the Congress has enacted, legislation to provide health care to radiation-exposed veterans for conditions not caused by another factor; legislation to require the VA to develop, through a process allowing for public participation, special regulations prescribing uniform guidelines for resolving claims for VA compensation benefits; and legislation calling for a major study of the health of veterans exposed to nuclear test radiation.

I have also requested major investigations by the General Accounting Office—one of which, regarding safety precautions at "Operation Crossroads," was completed last December—into various aspects of the Nuclear Weapons Test Program.

Both by virtue of the numbers of veterans exposed to radiation in the Nuclear Weapons Test Program—estimates vary but it seems clear that there were at least 200,000 service members who participated in the Nucler Weapons Test Program while on active duty—and as a result of the Feres doctrine, the doctrine which derives from a 1950 Supreme Court decision, which bars suits against the United States by veterans for injuries or illnesses resulting from events while

on active duty, these veterans and their survivors were particularly adversely affected by section 1631.

Mr. President, in recognition of the very significant impact of section 1631 on veterans exposed to radiation during their military service, I early on sought to have the impact of section 1631 made the subject of hearings in the Senate. In that regard, I twice wrote Senator WARNER, on November 27, 1984, and on February 11, 1985. Later, on March 18, 1986, after the Veterans' Affairs Committee had held a hearing last November 14 on this issue at Senator WARNER's request, I wrote to Senator MURKOWSKI and asked that he join me in a letter to the Chairman [Mr. THURMOND] and ranking minority member [Mr. BIDEN] of the Judiciary Committee, urging that committee to hold a hearing to consider this issue. Finally, on April 29, 1986, Senator MURKOWSKI and I wrote to Senators THURMOND and BIDEN. I ask unanimous consent that these letters appear in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I am delighted that there is now a legislative measure for the Judiciary Committee to consider and that, the Judiciary Committee staff has advised, in response to our request of April 29, that that committee will hold a hearing on this issue and this legislation next month.

Mr. President, I am very pleased with this result. As I noted earlier, I have a longstanding interest in issues relating to veterans exposed to radiation during their service and was very surprised to learn of the existence of section 1631 following its enactment. Without making any judgment about the liability of any of the contractors involved with the Nuclear Weapons Test Program, I certainly believe that veterans who are concerned that they were adversely affected by radiation as a result of a contractor's negligence during the Nuclear Weapons Test Program should not be blocked from having their claims determined in court. With specific reference to the question of the liability of the various contractors who were involved with the Nuclear Weapons Test Program, it should be noted that, in light of the contractual relationship between the Government and the contractors, pursuant to which the Government has agreed to indemnify the contractors against any damages and to defend any lawsuits seeking such damages, it is not at all clear whether individual contractors will be at any risk, even if section 1631 is repealed.

Mr. President, I want to congratulate our colleague from Virginia [Mr. WARNER] for joining as an original cosponsor of this measure. His action in this regard is a tangible expression of his position that his original sponsorship of the provision that became section 1631 was premised on the view that it would not adversely affect anyone. He now recognizes, as a result of many contacts from veterans and their survivors and as a result of participating in the Veterans' Affairs Committee hearing last November, that there is a significant question as to the impact of the provision. It is very much to his credit that he is willing to have the matter reviewed and corrected as it should be.

Mr. President, I look forward to working with Senators MURKOWSKI and WARNER, as well as with Senators SIMON, DECONCINI, and DENTON and our other colleagues on the Judiciary Committee as we pursue this matter. In this regard, I note that, prior to the Judiciary Committee's hearing next month, I will introduce an amendment to this measure that would provide that in the event that on the date of the enactment of section 1631, an individual veteran or a veteran's survivor could have brought a civil suit under the applicable statute of limitations, that individual would have not less than 12 months following the date of the enactment of this repeal measure in which to initiate a civil suit against a contractor. I believe that such an additional period of time is needed so as to ensure that individuals who understood that they had lost the right to bring such an action as the result of the enactment of section 1631 have adequate time to learn of its repeal before again being barred from bringing suit by virtue of application of the relevant statute of limitations, even as our bill would propose to extend the period by the period of time that elapses from the date of the enactment of section 1631 to the date of the enactment of our bill.

There being no objection, the letters mentioned earlier were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, November 27, 1984.

Hon. JOHN W. WARNER,
U.S. Senate,
Washington, DC.

DEAR JOHN: As you know, as a result of my service on the Veterans' Affairs Committee, I have had a longstanding and very deep interest in issues relating to the concerns of veterans exposed to ionizing radiation during their military service. In this regard, I attempt to remain current on the status of matters that might affect these veterans and their dependents and was, therefore, quite surprised to learn of the provisions in section 1631 of Public Law 98-525, the FY 1985 DOD Authorization Act, which appear to make substantial changes in the rights of these individuals to seek redress for health problems which may be related to radiation exposure.

I was very pleased, therefore, to read in the November 14, 1984, Washington Post of your intention to hold hearings in the next Congress to investigate the impact of this provision. I believe that such hearings are extremely important. I urge you to schedule them as early as possible and to give as much advance notice of the proposed hearing schedule as is possible so that the many individuals concerned about this issue (including the civilians who were exposed to radiation as a result of their participation in the nuclear weapons test program or living downwind from test sites) can have a full opportunity to participate in the hearings.

I look forward to following these hearings closely and to working with you and others, as appropriate, on any legislative action.

With warm regards,

Cordially,

ALAN CRANSTON,
Ranking Minority Member.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, February 11, 1985.

Hon. JOHN W. WARNER,
U.S. Senate,
Washington, DC.

DEAR JOHN: I am writing in follow-up to my November 27, 1984, letter to you regarding your announced plans, as a member of the Armed Services Committee, to hold a hearing on the provisions in section 1631 of Public Law 98-525 that appear to have made substantial changes in the rights of individuals exposed to radiation to seek redress for health problems which may be related to their exposure. Having not heard from you on this matter, I am writing to request information about your plans in this regard. Enclosed is a copy of my earlier letter in case it did not reach you over the recess.

Since sending that first letter to you, I understand that, in some informal, staff-level discussions, it has been suggested that you may have concerns about whether the subject matter of the section 1631 provisions is properly within the jurisdiction of the Armed Services Committee and that, in light of those concerns, you may be seeking to have the Veterans' Affairs Committee conduct such a hearing. Athough I would agree with any reservations you have regarding the Armed Services Committee's jurisdiction over this legislation—notwithstanding the fact that your Committee has twice acted on such provisions and apparently believed there was some basis for asserting jurisdiction—I do not believe that the Veterans' Affairs Committee is the proper Committee of jurisdiction. (For one thing, the section 1631 provisions affect the rights of civilians, such as those who lived downwind of the Nevada test site, who may have been exposed to radiation—an issue clearly not within the Veterans' Affairs Committee's jurisdiction.)

Rather, inasmuch as the section 1631 provisions in question relate to judicial remedies for actions against the United States and make specific references to various provisions in title 28, United States Code, I believe the Judiciary Committee, either alone or jointly with the Armed Services Committee, has the jurisdiction to hold such a hearing.

In light of Strom Thurmond's leadership role on both the Judiciary and Armed Services Committees, I am sending Strom a copy of this letter and will follow up with him regarding his views and plans on this issue. You may wish to take similar action.

In any event, I would like to reiterate the recommendations set forth in my November 27 letter and applaud your commitment to these hearings. I look forward to hearing from you on this issue at your earliest convenience.

With warm regards,
Cordially,

ALAN CRANSTON,
Ranking Minority Member.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, March 18, 1986.

Hon. FRANK H. MURKOWSKI,
Chairman, Veterans' Affairs Committee, U.S. Senate, Washington, DC.

DEAR FRANK: I am writing in follow-up to my December 3, 1985, letter to you regarding the so-called "Warner Amendment" which, as you know, bars certain suits against nuclear test contractors and was the subject of a hearing before our Committee last November 14. In that letter, I asked that you consider joining with me in a letter to the Judiciary Committee urging that Committee to hold hearings to consider the need for changes in the "Warner Amendment".

As you may recall, in my opening statement at our Committee's hearing in November, I expressed my view that "Our Committee is not the correct forum in which that legislation should be evaluated." Later in the hearing, in a colloquy with Senator Warner, you also noted that any change to the "Warner Amendment" "would be done in the Judiciary Committee as opposed to the Veterans' Committee."

I continue to believe strongly that the specific issue addressed by the "Warner Amendment"—that is, the right of individuals who believe they may have been harmed by exposure to radiation as a result of the actions of non-governmental contractors—has not been appropriately addressed by the Committee of jurisdiction in the Senate, the Judiciary Committee. This failure can and should be addressed and thus I renew my request to you to consider joining with me in a letter to the Judiciary Committee to urge that Committee to hold hearings on this issue.

In this regard, I note that Senator Warner, in an interview reported in the January 25, 1986, Richmond News Leader (a copy of the article is enclosed) said he would "support revision of [the 'Warner Amendment'] that hindered [atomic veterans'] ability to sue defense contractors" However, Senator Warner indicated that "he was awaiting a recommendation by the Senate Veterans Affairs Committee" before taking further action.

Inasmuch as we both agree that this legislation is not within the jurisdiction of our Committee, I do not believe that it would be appropriate for our Committee to make any recommendation other than that the Judiciary Committee review this issue. Although I have not discussed this directly with Senator Warner, I would anticipate that he would support such a recommendation.

Frank, I congratulate you on your strong interest in seeking answers to the many questions relating to the issue of veterans' exposure to ionizing radiation from nuclear detonations. I look forward to continuing to work with you on that issue. With reference to the specific issue of the "Warner Amendment", however, I strongly believe that the most appropriate action that we and our Committee can take at this time is to urge the Judiciary Committee to under-take an inquiry into the matter. I ask for your support in that regard.

With warm regards,
Cordially,

ALAN CRANSTON,
Ranking Minority Member.

[From the Richmond News Leader, Jan. 25, 1986]

WARNER WOULD BACK CHANGE IN ATOMIC VETERANS LAW

(By Peter Hardin)

WASHINGTON.—U.S. Sen. John W. Warner, apparently bowing to complaints by veterans exposed to atomic radiation, says he would support revision of a law he sponsored that hindered the veterans' ability to sue defense contractors.

Congress heard testimony last fall from members of atomic veterans groups about their hardships and battles with government insensitivity. They appealed for changes in the law that Warner had introduced as an amendment in 1984.

In an interview yesterday, Warner didn't specify what kind of revision he would back but said he was awaiting a recommendation on by the Senate Veterans Affairs Committee, which held several of the hearings.

"I thought the atomic veterans, in a very responsible way, brought that issue to the focus," he said, "and we'll have to wait and see what the chairman and the members of that (veterans affairs) committee recommend."

If the committee recommends a change in the provision, he would support it, Warner added.

Asked whether he considered himself wrong for having sponsored the measure, Warner said, "No. Neither I nor the administration nor others were aware of all of the facts that have come to light."

The Virginia Republican said at another point, "Congress can and should undo things it has done when it is shown that we were in error. We're not infallible, any more than anybody else."

Was the atomic veterans policy in error, Warner was asked.

"I'm not going to make that judgment," he replied.

Representatives of atomic veterans' groups welcomed the development, which appeared to go beyond Warner's previous statements.

"It's excellent news from our point of view," said Tom J. Houser of Washington, who is with the National Association of Atomic Veterans.

"It represents a change of attitude, which really is a basic problem up on Capitol Hill."

"I'm very pleased to hear that Sen. Warner has seen the injustice that his amendment has brought . . ." said Dorothy Legarreta of Berkeley, Calif., administrative director of the National Association of Radiation Survivors.

"We're sure that thousands of atomic veterans and civilians will be gratified to hear that he is willing to consider a change in his amendment."

Alvin Guttman, a lawyer who has represented the veterans association in the past, called on Warner to help take care of the problems caused by his legislation.

"We hope he would be lending support and advice to the Veterans Affairs Committee in trying to remedy this problem," Guttman said.

Veterans exposed to atomic tests have said they were effectively blocked from suing by the Warner provision, which was an amendment to the 1985 Defense Appropriations Act, and a separate doctrine. Called the Feres doctrine, it bars suits by veterans against the government over injuries sustained on active duty.

Warner's amendment replaced defense contractors who are being sued in atomic-test cases with the government as defendant.

The Feres doctrine, when combined with the Warner provision, has barred atomic veterans' suit over injury or disease allegedly arising during the atomic tests, according to Guttman.

Warner said earlier he sponsored the amendment at the Reagan administration's request.

Rep. Frederick C. Boucher, D-9th District, has proposed creating an exemption to the Feres doctrine for atomic veterans to allow them to sue the federal government.

Warner said yesterday he didn't favor Boucher's route.

"If we cut one chink in the Feres doctrine, there's likely to be a series of cases of equal importance come along to cut successive chinks in it," he said.

Legislators have estimated that about 250,000 servicemen participated in the atomic weapons testing excercises.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, April 29, 1986.

Hon. STROM THURMOND, *Chairman,*
Hon. JOSEPH R. BIDEN, JR.,
Ranking Minority Member, Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR STROM AND JOE: We are writing to urge that your Committee hold hearings to consider the issue of whether there is a need for legislative changes to section 1631 of Public Law 98-525 to the FY 85 DoD Authorization Act. This section provides that suits for personal injury or death due to radiation exposure resulting from a federal government contactor's activities in carrying out nuclear weapons tests must be brought against the federal government and may not be brought against the contractor.

Because one of the groups of individuals most directly affected by this section, the so-called "Warner Amendment", comprises individuals who were exposed to radiation while serving in the Armed Forces, Senator Warner requested that our Committee hold an oversight hearing to consider the impact of his amendment on those veterans who believe that they were injured during the test program. Such a hearing was held last November 14.

After considering the issues and testimony before the Committee, we have concluded that, although our Committee does have jurisdiction over matters of concern to veterans, we do not have jurisdiction over this legislation. Rather, we believe that the specific issue addressed by the "Warner Amendment"—that is, the right of individuals to seek redress in federal court for harm they believe is due to exposure to radiation as a result of the actions of government contractors—is under the jurisdication of the Judiciary Committee. We, therefore, urge that your Committee conduct a hearing of this issue. We would, of course, be happy to share with you the information we gathered in connection with our Committee's hearing last November.

We thank you for your attention to our request and look forward to hearing from you in the near future.

Sincerely,

FRANK H. MURKOWSKI,
Chairman.
ALAN CRANSTON,
Ranking Minority Member.

By Mr. MITCHELL:

S. 2455. A bill entitled the "National Organ and Tissue Donor Act"; to the Committee on Labor and Human Resources.

NATIONAL ORGAN AND TISSUE DONOR ACT

● Mr. MITCHELL. Mr. President, today I am introducing the National Organ and Tissue Donor Act. This law will assist the States in their efforts to increase the number of organs and tissues available for transplantation. The need is critical. A few weeks ago, members of the Kidney Foundation of Maine told me about patients who have waited as long as 5 years for a donor kidney. Some have died. Just this week, a 9-month-old infant, in a neighboring State, died because a donor liver was located 24 hours too late. Across the country, more than 8,000 Americans are waiting for a chance for a new life.

Recent medical advances, including better matching techniques and the development of a more effective and safer antirejection drug, have greatly improved the survival rates of transplant recipients. Those who receive new kidneys, for instance, enjoy a survival rate of over 95 percent. They are able to leave the very restricted existence of a dialysis patient and return to work and resume normal family life.

Kidney and other organs for transplant must come from young victims who are brain dead but maintained mechnically. There are approximately 20,000 such deaths each year, usually from auto accidents or cerebral hemorrhages. Only about 15 percent become donors now, because in most cases the family is never asked to consider donation.

Donor cards, often printed on drivers licenses, are recognized in every State as legal authority for organ retrieval, but hospitals require the consent of the next of kin. Some hospitals have personnel trained to discuss donation with grief-stricken families, but many do not. Surveys indicate that 80 percent of families would consent, if they were asked, and donor families have testified that knowing that other lives were saved has helped them to accept their own loss.

I am proud that Maine has acted to give life to those who wait and some consolidation to those who grieve. Maine's new law provides for staff training and sets procedures for discussing donation with the families of potential donors. Early indications are that donations will double or even triple in the dozen States that have laws like the one in Maine. However, unless more act the shortage will continue and Maine and other States will become net exports of life-saving organs. Every State has a responsibility to participate.

My proposal, therefore, will direct the Secretary of Health and Human Services to encourage and assist States to enact and implement routine request legislation. It will further require the Secretary to report to the Congress in 1 year on the activity of the Department and on the progress made by the States.

Routine inquiry legislation has already saved lives, but it is not a panacea. In 1984, the Congress passed major legislation which provided for the computerization of organ and tissue distribution. As the number of donations increases in routine inquiry States, efficient distribution will become all the more critical. It is imperative that the 1984 act be implemented without further delay.

Organ and tissue transplantation is a modern medical miracle. If we fail to significantly increase donation and improve distribution, it will be available only to a few. I urge you to support routine inquiry legislation in your own States and to join me in this national initiative.●

By Mr. LAXALT (for himself and Mr. HECHT):

S. 2457. A bill to grant the consent of Congress to the California-Nevada Interstate Compact; to the Committee on the Judiciary.

CONSENT OF CONGRESS TO THE CALIFORNIA-NEVADA INTERSTATE COMPACT

● Mr. LAXALT. Mr. President, I introduce with my distinguished colleague, Senator HECHT, a bill to provide for the approval of Congress to an interstate compact on the development, use, conservation, and control of water within the Lake Tahoe, Truckee River, Carson River, and Walker River Basins.

Final conditions of the compact were drafted in 1968 after some 12 years of negotiations and approved by the Legislature of California on September 19, 1970, and by the State of Nevada on March 5, 1971. It has never been ratified by the Congress, although 15 years have passed since it was approved by the two States. Both States have abided by its provisions since the date of approval by the State legislatures and neither has found reason to alter the basic allocation scheme.

The compact essentially recognizes existing water uses and apportions to each of the States those waters not needed to meet existing uses. All water over and above that not needed to meet existing uses is distributed to each State on a percentage basis. In ratifying the compact, the State legislatures added language designed to ensure that the compact would not deny anyone rights to use water within its allocations.

I will not attempt a lengthy historical outline of the reasons the compact has not been ratified, to date. Questions were raised about the allocations to certain of the parties, mainly Indian tribes, which have been the subject of several lawsuits. The Pyramid Lake Tribe claims all of the currently unappropriated water of the Truckee River system against both California and Nevada and feels the compact could adversely affect that claim. The two main lawsuits involving water rights on the Truckee River and allocations from Stampede Reservoir have been settled and the remaining suits can be litigated whether or not the compact is ratified. I believe it is time to bring some finality to the very sensitive matter of division of waters between the two States by ratifying this agreement which both States have found appropriate and fair.

Mr. President, I ask that a statement explaining the compact and the need for its ratification be printed in the RECORD.

Mr. President, I will not claim there are not differences remaining within Nevada. This compact will not deny, and cannot deny, relief of grievances which may be proven by any aggrieved party. But I do not expect any changes to occur to the compact regarding the basic allocation between the States. Moreover, any reopening of the basic allocations of the compact will be a reopening of long settled, historic uses. Thus, I urge swift and favorable action by the Congress on this important compact.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT ON CALIFORNIA-NEVADA INTERSTATE COMPACT

INTRODUCTION

The California-Nevada Interstate Compact was formulated to provide each of the States of California and Nevada their equitable share of the interstate waters of Lake Tahoe and the Truckee, Carson and Walker River Basins. The compact is intended to resolve many of the problems rising from each state's increasing use of a limited, common water supply. These problems, which finally resulted in the determination to negotiate an interstate compact, first came to public light in the late 1940's when the State Engineers of California and Nevada faced difficulties in the administration of water rights on the Truckee, Carson and Walker River Systems. The principal water using agencies in the lower basins were protesting all new water right applications on these streams which were not supported by long-term carryover storage. These agencies took the position that there was no unappropriated water available from natural flow in excess of their rights.

Need for compact

In 1947–48 an attempt was made to resolve this water right problem in the Lake Tahoe Basin. An investigation of the use of water in the Lake Tahoe watershed was made jointly by the two states in 1948, and results were reported in June 1949. The report concluded that granting applications then pending or those to be filed within the then foreseeable future for use within the Tahoe Basin for domestic purposes and recreational uses would have little effect, if any toward depleting Lake Tahoe to the detriment of downstream users. The report went on to recommend that as regards applications for appropriation of water for domes-

tic and recreational use in the Lake Tahoe watershed, it should be the general policy to continue to grant such applications. Subsequently, the State Engineers of the two states issued permits for water for domestic purposes over the protests of downstream water user organizations.

During the early 1930's, the Lake Tahoe Interstate Water Conference Committee, created by the Governors of Nevada and California, was actively engaged in adjusting conflicting differences raised by the then proposed "Truckee River Agreement". The Federal Government proposed to execute this agreement with Nevada water users as a supplement to the 1915 Truckee River Decree. As a result of the Conference Committee's efforts, provisions were incorporated into the decree establishing a maximum permissible water level for Lake Tahoe of 6229.1 feet above sea level. This maximum stands today and provides protection against avoidable flooding for all the properties adjacent to the Lake. Many other conflicting differences considered by the Committee were not solved at that time. Some of these, such as desirability of a reduction in the fluctuations of the level between maximum and minimum permissible limits, still plague the Lake Tahoe Basin.

In the Carson River Basin, from 1941 through 1949, the California State Engineer provided watermaster service on the West Carson River. In 1950, the State watermaster was replaced by a Federal watermaster acting under a preliminary adjudication and temporary restraining order filed in the case of the *United States* v. *Alpine Land and Reservoir Company, et al.* This case, initiated in 1925, was being pushed after many years of inactivity, in order that the water rights of the Carson River System would be adjudicated prior to construction of the Washoe Project of the U.S. Bureau of Reclamation.

As to the Walker River Basin, about 1950 there had been changes in membership of the Board of Directors of the Walker River Irrigation District and the Board of U.S. Water Commissioners which administers Decree C-125 of the Federal District Court of Nevada. These Boards instituted a strict administration of the rights defined in the decree affecting the Walker River. The watermaster was required to adhere to the letter of the Decree, causing great distress among users under vested rights, especially users in California. At the same time, the Walker River Irrigation District instituted engineering studies of potential water projects on the Walker River for the benefit of the District lands in Nevada. These would utilize nearly all of the remaining unappropriated waters of this river. Again, this alarmed the Walker River water users in California.

As a result of all of these water conflicts, the desirability of an interstate compact between California and Nevada was discussed by the two states. However, it was not until 1955 that legislation was obtained initiating compact negotiations. The legislation received further impetus at that time from the pending authorization of the Washoe Project, a Bureau of Reclamation Project to develop additional waters in the Lake Tahoe, Truckee River and Carson River Basins.

Establishment of commissions

Under similar legislation passed by the legislatures of California and Nevada in 1955, each state established a commission for the purpose of negotiating an interstate compact which would provide for the equitable distribution and use of the waters of Lake Tahoe and the Truckee, Carson and Walker River Basins.

Federal legislation was also passed authorizing these negotiations and providing for the appointment and participation of a federal representative.

Basis of negotiations

In general, provisions of the interstate compact, which were arrived at after nearly thirteen years of negotiations, reflect several basic principles. These can be summarized as follows:

1. Existing rights and beneficial uses are recognized as having the highest priority of use of available waters.

2. Waters not needed to satisfy these recognized existing rights and beneficial uses are to be divided in proportion to water needs of the two states.

3. Uses of water made under federal claims of right in each state are to be considered as benefiting the state in which the use is made and hence are to be charged against the allocation of that state.

Summary of major provisions of compact

Article IV—California-Nevada Interstate Compact Commission

Article IV establishes a permanent commission, provides for the selection of members and provides for the funding for the work of the commission. The ex officio chairman of the commission is a representative of the United States to be chosen by the President of the United States.

Article V—Lake Tahoe Basin

Upon construction and completion of an overflow weir at the source of the Truckee River above the existing structure at the outlet of the Lake, the total annual gross diversion from all sources in the Lake Tahoe Basin shall not exceed 34,000 acre-feet. The State of California is allocated 23,000 acre-feet annually and the State of Nevada is allocated 11,000 acre-feet annually for use within the Basin.

Existing transbasin diversions as of December 31, 1959, from the Lake Tahoe Basin in both states may be continued if such rights were recognized as vested rights under the laws of the state in which the diversion is made. The existing transbasin diversions recognized by the compact are: (1) In California, a diversion from Echo Lake, a tributary of the Upper Truckee River Basin, into the American River Basin in California averaging approximately 1,700 acre-feet per year. (2) A Nevada transbasin diversion is from North Creek (Third Creek), a tributary of Lake Tahoe, into Washoe Valley of 5.5 cubic feet of water per second. (3) A second Nevada transbasin diversion of a maximum of 3,000 acre-feet annually from Marlett Lake for use in Nevada.

These three transbasin diversions recognized by the Compact are historical uses and in existence on December 31, 1959. In Nevada the diversion from North Creek into Washoe Valley was determined by a District Court in Washoe County, Nevada, in 1892. The Marlette Lake diversion represents a part of the water system started in 1872 by the predecessors of the Virginia City Water Company to bring water from the Sierras to Virginia City to operate the ore reduction mills of the newly discovered silver bonanza.

Article VI—Truckee River Basin

The first allocation to Nevada is for water for use on the Pyramid Lake Indian Reservation in the amounts provided in the 1944 Truckee River Decree (Final decree in *United States* v. *Orr Ditch Company, et al.*, U.S. District Court for the District of Nevada, Equity No. A-3). This allocation recognizes the authority of the Federal Court Decree to serve an early priority (1859) of water to the Pyramid Lake Indian Reservation of some 30,000 acre-feet annually.

There is allocated to California: (1) The right to divert 10,000 acre-feet of water per calendar year within the Truckee River Basin in California. This water may be stored in reservoirs at times when the flow in the Truckee River at the Iceland gauge exceeds 500 cubic feet per second. This is the provision in the compact to allocate water from the Truckee River for use in California which was not a part of the Truckee River Decree of 1944. (2) The amount of water as decreed to the Sierra Valley Water Company by judgment in the case of the *United States* v. *Sierra Valley Water Company* in the U.S. District Court for Northern California. The amount of water decreed to the Sierra Valley Water Company totaled 60 cubic feet per second for irrigation, domestic and stockwatering during the irrigation season of March 15 to September 30 of each year. (3) Six thousand acre-feet of water annually from the conservation yield of Stampede Reservoir having a storage capacity of 225,000 acre-feet. California may divert all or any portion of the said 6,000 acre-feet from Stampede Reservoir directly or by exchange from any source on the Truckee River or its tributaries or from Lake Tahoe. (4) When the 16,000 acre-feet allocated to California is being used or its total use is imminent, California will be permitted to develop additional yields of water for use in California, either directly or by exchange if all existing beneficial uses in Nevada are recognized. Nevada may share in such additional yield by bearing a proportionate cost of the development. (5) The right to store in Prosser Creek Reservoir a maximum of 30,000 acre-feet of water annually. There is allocated to Nevada all water in excess of the allocations made to California.

Article VII—Carson River Basin

There is allocated to the State of California: (1) The right to divert from the West Fork Carson River for existing nonirrigation uses and for direct irrigation use commencing on March 15 and ending on October 31 of each year or presently irrigable lands determined to be approximately 5,600 acres, an aggregate flow of water equal to a thirty-day average of 3 cubic feet per second per 100 acres or 168 cubic feet per second for the area as a whole but not to exceed a maximum aggregate diversion of 185 cubic feet per second. One unique feature of the Compact is that it provides for the rotation of all or a portion of the flow of the West Fork between California and Nevada users if the flow falls below 175 cubic feet per second. (2) The right to divert from the East Fork Carson River for existing nonirrigation uses and for direct irrigation use commencing on March 15 and ending on October 31 of each year on presently irrigable lands, determined to be approximately 3,820 acres, an aggregate flow of water equal to a thirty-day average of 3 cubic feet per second or 115 cubic feet per second for the area as a whole. (3) The right to store 2,000 acre-feet of water per annum within Alpine County for supplemental use on presently irrigated lands adverse to Lahontan Reservoir.

There is allocated to the State of Nevada: (1) The right to divert water from the Carson River and its tributaries commenc-

ing March 15 and ending October 31 of each year at the rate of 3 cubic feet per second per 100 acres for use on presently irrigated lands above Lahontan Reservoir determined to be approximately 41,320 acres. The rate of 3 cubic feet per second per 100 acres is based on a thirty-day average for the area as a whole and shall not exceed 700 cubic feet per second on the East Fork Carson River, 300 cubic feet per second on the West Fork Carson River, and 220 cubic feet per second on the Main Carson below the confluence. (2) The right to divert or store water in Lahontan Reservoir for use on the Newlands Project subject to the diversion for existing irrigation use and to the right of each state to store waters upstream from Lahontan Reservoir.

Both states are allocated the right to store water in existing reservoirs upstream from Lahontan Reservoir to the extent of existing capacities. Present uses of Water on National Forest Lands in the Toiyabe National Forest are confirmed and recognized by both states. Additional yields shall be available for development under the currently authorized Washoe Project in excess of existing beneficial uses in Nevada as recognized by Nevada Law. Such additional yields shall be allocated between the State with equal priority, 20 percent allocated to California and 80 percent to Nevada. Each state has the right to participate in any development project by bearing a proportionate cost of such development. In the event a joint development is not feasible or desirable, each state may develop separately its proportionate share of the remaining water. Waters of the Carson River are not to be used outside the Carson River Basin except by exchange of other allocated waters from the Lake Tahoe or the Truckee River Basins.

Article VIII—Walker River Basin

The provisions of the decree in the case of *United States* v. *Walker River Irrigation District, et al.*, known as Decree C-125, are recognized and confirmed. (2) the right under Decree C-125 to store 85,000 acre-feet of water from the West Walker River in Topaz Reservoir is recognized and confirmed subject to certain exceptions. The first is that a maximum of 85,000 acre-feet of water less reservoir evaporation may be rediverted for use annually from November 1 through October 31 of the following year. The second is that the maximum rate of diversion to each reservoir is 1,000 cubic feet per second. And third, that water qualifed for storage and allowed to pass through the reservoir and not rediverted in Nevada will be deemed to have been held in storage. (3) The right under Decree C-125 to store 57,000 acre-feet of water from the East Walker River in Bridgeport Reservoir is recognized and confirmed subject to certain exceptions. The first being that a maximum of 57,000 acre-feet of water less reservoir evaporation may be rediverted for use annually from November 1 to October 31 of the following year; and secondly, water may be stored upstream from the Bridgeport Reservoir without loss to the quantity allocated for storage in the Bridgeport Reservoir. (4) Each state is allocated an amount for existing diversions and uses of water from the Walker River upstream from the Weber Reservoir and not specifically covered in Decree C-125. The Commission after being established to administer the compact will ascertain the amounts and priorities of such uses.

In addition to the allocation to recognize and confirm the provisions of the Walker River Decree C-125, there is allocated to Nevada for use on the Walker River Indian Reservation a maximum of 13,000 acre-feet for storage in Weber Reservoir and a later rediversion to use and in addition 9,450 acre-feet per year, both allocations to have a priority of 1933. The season for diversion of water to storage shall be from November 1 to October 31 of the following year. The season for diversion of water directly for use shall be from March 1 to October 31 and at a maximum rate of 60 cubic feet per second.

California is allocated the right to divert water from the West Walker River at the time Topaz Reservoir is storing water, if such diversions have no net effect on the Topaz Reservoir storage for the season.

There is allocated to the State of California, 35 percent of unused waters or waters in excess of the amounts allocated or required to satisfy all rights and uses recognized and confirmed. There is allocated to the State of Nevada 65 percent of such unused water. The reregulation of storage waters allocated are not to be considered as the development of "unused water".

Separate development may be undertaken by either state for surface storage of unused water of the West Walker River so allocated. The State Engineer of Nevada and the California Department of Water Resources have been directed to prepare and present a joint report by July 1, 1969. This report is to include a review of all potential developments of unused water of the West Walker River with the benefits to be obtained from each such development.

Article X—Interbasin Transfers of Use

Article X provides that either state may, directly or by exchange, use the allocations of the Truckee River in the Lake Tahoe or Carson River Basin and the waters of the Carson River in the Lake Tahoe or Truckee River Basin. It further provides that Lake Tahoe may be used as a physical facility to accomplish such an exchange.

Article XIII—Fish, Wildlife and Recreation

This article determines that the use of water for preservation, protection and enhancement of fish, wildlife and recreation is recognized as a beneficial use.

Article XXI—Non-Impairment of Rights of United States

Article XXI provides that, except as provided in Article XXII, the Compact cannot be construed as affecting the obligations of the United States to the Indians and Indian tribes or any right owned or held by or for Indians or Indian tribes subject to the jurisdiction of the United States. Nor shall it affect any rights or powers of the United States or its agencies in or to the waters of the Truckee, Carson or Walker River Basin or the Lake Tahoe Basins or the capacity of the United States to acquire rights in and to the use of those waters. Nor may it be construed as subjecting any property of the United States to taxation by either state. Nor may it be construed as subjecting any property of the United States to the laws of any state to an extent other than the extent to which such laws be applied in the absence of the Compact.

Article XXII—Ratification and Consent

Article XXII provides that the Compact shall be effective as it has been ratified by the legislators of Nevada and California and has been consented to by act of Congress of the United States and that Congress has provided in its consent legislation or by separate legislation that certain provisions of the Compact shall be binding upon the agencies, wards and instrumentalities of the United States.

Consideration of comments and suggestions

In 1965, a provisional draft of Compact was adopted by the two states. This was submitted to all interested agencies for comments and suggestions. Many federal agencies including Interior, Justice, Agriculture, and Commerce responded with comments and suggestions on how the Compact might be improved. Following the receipt of the comments of the federal agencies, California and Nevada spent two more years negotiating. The comments of the federal agencies were considered and utilized, and resulted in many changes in the proposed Compact. In some few instances the two states felt that the suggestions of the federal agencies could not be incorporated in the Compact.

In 1968, following the completion of the present Compact, the two states answered comments of the federal agencies to the 1965 draft. In many cases the suggestions had been adopted and in those instances in which they could not be used, the commission explained the reasons therefor.

Need for compliance by the United States

Those provisions which the two states believe the United States should agree to be bound are found in Article XXIII of the Compact and concern only the total amount of water allocated to each state.

It is of utmost importance for the governing agencies of the United States to understand that the United States is not bound to any particular use within either of the two states nor to any particular development of any future project within the states, but would only be bound with respect to the allocations of water between the two respective states. Consequently, for effective administration and effective allocation, the states of California and Nevada believe most strongly that it is necessary for the United States to consent to enter into a binding contract insofar as Article XXII of the Compact is concerned.

The United States owns or controls almost all the storage and diversion facilities on the Truckee and Carson Rivers and Lake Tahoe. Its failure to agree to the allocations provided in the Compact would nullify the force and effect of the substantive provisions of said Compact. As an example, the United States claims the rights to all water stored in Lake Tahoe between elevations 6223 and 6229.1, or approximately 720,000 acre-feet of water. The Compact provides for use within the Tahoe Basin of 34,000 feet allocated on the basis of approximately two-thirds to California and one-third to Nevada. Failure of the United States to agree to this use in each of the states would preclude the development of perhaps one of the greatest recreational resources in the country.

The area to which the Compact applies is one which unfortunately cannot claim either a firm or sufficient supply of water for its potential domestic, industrial and recreational development. Thus, present uses are provided for in the Compact in terms of allocation of the water to the respective states with the hope that conservation use may allow some development for the future in these areas.

Should the United States refuse to agree to these allocations and refuse to consent to be bound by them, neither state can plan, develop or assume its indiviual obligation for what appears to be its future destiny. Certainly presently unused waters that are available and could be developed in the

future would entail partnership of the United States as a party to the development. Each of the two states look to the United States as a partner in such development rather than as a partisan. The waters in excess of present uses have been allocated as between the two states and if the United States as a partner in the development of any future project, which at present appears to be the only realistic approach, were not bound by the allocations of water, the agreements between the two states would be of no effect.●

By Mr. SIMON:

S. 2458. Joint resolution to clarify the antitrust exemption of the business of insurance, and for other purposes; to the Committee on the Judiciary.

INSURANCE ANTITRUST COMPETITION

● Mr. SIMON. Mr. President, the insurance crisis that currently confronts this Nation is serious and extremely perplexing. This crisis cuts across every sector of the economy and has rapidly developed into the No. 1 problem of interstate commerce.

Businesspeople, public entity officials, and people in virtually every profession are appealing to Congress with increasing urgency for relief from skyrocketing insurance premiums.

This crisis defies facile analysis and a quick fix. Insurance industry people say the price increases are necessary largely because of excessive litigation an multimillion-dollar settlements. They are calling for changes in the Nation's tort laws.

Others contend that the insurers themselves are responsible for the situation. They say insurance companies are raising rates to recoup losses resulting from artifically low premiums in the early 1980's and that this huge socially and economically important industry needs tighter regulation.

The ultimate role of the Federal Government in solving this crisis is still unclear. Many State governments are attempting to address the insurance crisis administratively and in their legislatures. It has been charged that the States are moving too slowly or not far enough and that the possible mish-mash of reforms may need to be sorted out at the Federal level.

While I am not prepared to support Federal regulation of the insurance industry or massive changes in our tort system, there is merit in some of the suggestions that have been made on both sides of this issue.

As a first priority we must do everything possible to alleviate the intense problems of liability insurance availability and affordability that are wreaking havoc on the lives and livelihoods of many Americans.

The country cannot remain captive to grotesquely exaggerated and disruptive insurance market cycle fluctuations.

The bill I am introducing today—the Insurance Competition Act of 1986—is a first, significant step in addressing some of these complex problems. It embodies a long overdue reform of the McCarran-Ferguson Act. It is based on recommendations made by the National Commission for the Review of Antitrust Laws and Procedures in 1979. I ask that the portion of that report that deals with insurance be inserted into the RECORD at the end of my remarks.

While the price of insurance will be reduced significantly in the short term if this bill becomes law, it will improve the competitive environment in which the insurance business operates and will help prevent future liability insurance crises.

The purpose of the Insurance Competition Act of 1986 is to promote full and open price competition in the insurance business and in particular in the commercial property and casualty lines. It does not reduce the ability of States to regulate rates.

Since the McCarran-Ferguson Act was passed in 1945, the insurance industry has been virtually exempt from the Federal antitrust laws. Current law permits insurance companies to engage in joint activities that would be illegal for companies in other industries.

In 1979, the bipartisan National Commission for the Review of the Antitrust Laws recommended that "the broad antitrust immunity granted by the McCarran-Ferguson Act should be repealed" and that narrowly drawn legislation "affirming the lawfulness of a limited number of essential collective activities" be adopted. The Commission also recommended that the States adopt regulatory schemes that place maximum reliance upon "independent behavior." This bill takes a major step toward accomplishing these goals.

The Insurance Competition Act will require insurance companies to think, plan and operate in a more competitive framework. Although companies will be permitted to exchange information regarding losses and other information necessary to generate credible data about expected losses for various classes and lines of insurance, they will be prohibited—for the purposes of Federal antitrust law—from exchanging data concerning each company's cost of doing business. And they will be prohibited from joint action to establish rates.

The "overhead" factor represents between 25 to 45 percent of the final premium charged to consumers. Insurance companies do not need to exchange such information to price their products knowledgeably and this added competition will promote industry efficiency and help keep insurance rates reasonable.

In order to assure that this competitive policy is implemented to the maximum extent possible without unduly limiting the authority of States to regulate insurance rates, the bill preempts State laws or regulations to the extent that those laws permit but do not require joint activities that might otherwise violate Federal antitrust law. The bill will not affect State laws which require insurance companies to obtain the prior approval of insurance rates by a State insurance commissioner, but it would preempt a State law which allows companies to jointly set final rates.

This limited preemption of permissive State laws and regulations will apply only to commercial risk insurance. This is a type of liability insurance which businesses, municipal governments and nonprofit organizations have found difficult to obtain. The States remain free to establish any system of regulation they consider appropriate for automobile, homeowners' and other types of "personal" insurance—which is more local in nature and whose purchasers are often less sophisticated than buyers of commercial liability policies.

This bill will not affect the ability of the States to require insurance companies to maintain adequate reserves to cover potential losses on the policies those companies write. If an insurer sold policies at rates that were too low to cover losses on those lines in an effort to maximize premium income or to increase market share, the State would retain the authority to require the insurer increase its reserves. Failure to comply with these orders could cause a company to lose its license.

The insurance industry claims that it suffers from too much competition—not a lack of it. If this is so, then the McCarran Act antitrust immunity is not needed and should be narrowed as proposed in this legislation.

The real problem with the current regulatory structure under the McCarran Act is that the insurance companies can engage in price competition when it suits their interests, but when restrictions on coverage and higher prices suits their interests, they are free to engage in joint action to implement those policies under the shield of the antitrust laws.

This freedom to choose or reject competition is a privilege that is not enjoyed by any other industry. This policy serves no compelling public or private interest.

There being no objection, the material mentioned earlier was ordered to be printed in the RECORD, as follows:

NATIONAL COMMISSION FOR THE REVIEW OF ANTITRUST LAWS AND PROCEDURES

CHAPTER ELEVEN: INSURANCE

Recommendations

1. The current broad antitrust immunity for the business of insurance granted by the McCarran-Ferguson Act should be repealed. In its place, narrowly drawn legislation should be adopted to affirm the lawfulness of a limited number of essential collective activities under the antitrust laws.

2. States should place maximum reliance on competition in pursuing their regulatory objectives. Although the Commission recognizes that the state action doctrine would exempt from antitrust scrutiny private action compelled and effectively regulated by the state to achieve legitimate social goals, we nonetheless believe that narrowly targeted antidiscrimination, disclosure, and similar statutes are preferable to such anticompetitive economic regulation as state ratesetting.

3. Further study of economic regulation of insurance should be undertaken by the relevant Congressional committees or by a special commission established by the President. The study should include:

(a) the appropriate regulatory response to problems of equity and discrimination in insurance rates;

(b) the relationship between such regulation and the availability and affordability of insurance;

(c) procedures by which such regulatory goals may be achieved in the least anticompetitive manner; and

(d) the appropriate role, if any, of federal legislation with respect to the business of insurance.

Under the McCarran-Ferguson Act of 1945, the "business of insurance" is exempted from the Sherman, Clayton, and Federal Trade Commision Acts to the extent that it is "regulated by state law." Utilizing the freedom granted by that statute, the states have enacted regulatory schemes of various types to supervise the ratesetting activities of property and liability insurance, including the activities of industry-controlled rate bureaus. Under the prevailing interpretation of McCarran-Ferguson, insurance company activities may be exempted from the coverage of the antitrust laws by the mere presence of a state regulatory scheme, without regard to whether these regulatory powers have been utilized to supervise the insurance industry effectively. As a result, various types of collective insurance company behavior are, as a practical matter, wholly free from control be either state regulation or the federal antitrust laws.

The Commission believes that the current immunity is not only overly broad, but also unnecessary: those collective activities by insurers that are essential to the fuctioning of an efficient, competitive industry would likely pass muster under the traditional rule of reason analysis of Sherman Act Section 1. Similarly, where collective activity or other insurance company behavior is affirmatively mandated by a state in its capacity as sovereign, and effectively supervised by independent state officials, such behaviour would fall within the judicially recognized "state action" exception to the antitrust laws.

Although there is general consenus that most segments of the industry are competitively structured, and that enhanced competition is an appropriate goal of state regulatory policy, many states adhere to regulatory schemes requiring prior approval of insurance rates, thereby discouraging independent pricing behavior. The costs of continuing the present system are not insignificant: where members of a competitively structured industry are allowed collectively published industry-wide rates—often without effective state supervision—in a regulatory environment that encourages uniform pricing, insurance premiums are likely to be higher than under a system that relies more heavily on independent pricing decisions. In some prior approval states, regulation may in fact keep rates below levels that would be produced by competition. Unduly low rates, however, may exacerbate availability problems.

Critics of proposals for reform do not argue that the existing broad antitrust immunity and state regulatory mechanisms are necessary. Instead, some argue that complete removal of antitrust immunity will create undue uncertainty concerning the lawfulness of a few joint activities regarded as essential. Others contend that unregulated competition among insurers will have effects that are contrary to important social policies.

While the Commission has substantial sympathy for some of those arguments, it does not believe that they justify retention of the present system. Rather, the current broad antitrust immunity for insurance should be repealed, with provisions made for statutory assurance of the lawfulness of a limited number of essential collective activities. Further, state regulatory schemes should be structured to place maximum reliance on independent, competitive behavior. The Commission recognizes, however, that additional study is necessary to resolve questions of social policy raised by the functioning of the insurance market and to determine the appropriate role of the federal government in resolving problems of insurance policy.

A number of Commissioners believe that social policy goals of equity and availability of insurance are better addressed by disclosure and antidiscrimination laws than by state economic regulation. These Commissioners believe the further study recommended here should aim toward a federal statute prohibiting certain types of anticompetitive state regulation to complement McCarran-Ferguson repeal.

The Insurance Industry

With assets of approximately $434 billion and annual premium payments of about $130 billion, the insurance industry is clearly an important sector of the economy. The industry is itself as complicated and diverse as is the set of risks from which consumers desire protection. In general, this industry is divided into two major components: life-health insurance, and property-liability insurance.

A key feature of all insurance "products" is that the insurance company does not know its costs at the time of sale. Faced with this uncertainty, insurers need accurate information based on credible data to estimate future losses and set premium rates. The information and risk problems faced by life and health insurers are less severe than those of the property-liability industry, with life expectancy tables and health data being readily accessible and more predictable for future periods. As a result, life-health insurers have generally not engaged in extensive cooperative activities. Nor have they been subject to extensive state rate regulation. Thus there is no justification for continued antitrust immunity in these areas. Consequently, the debate concerning the application of the antitrust laws to cooperative insurance activities and the reduction of state regulation of insurance ratemaking has focused on the property-liability lines. The Commission, therefore, targeted its inquiry on the property and liability lines.

In order to minimize uncertainty, property-liability insurers have engaged in cooperative assembling of loss statistics and in the sharing of large risks through pooling or other reinsurance mechanisms. Traditionally, property-liability insurers have utilized "industry advisory organizations" or rate bureaus. The activities of these organizations often go beyond the collection of industry loss data, and include the averaging of such information for specific risk classifications and the "trending" of the data for past years to predict probable loss expenses for specified future rate periods. After an expense component (administrative and sales overhead) is added, the resulting prices are published as "bureau rates" for the use of a bureau's members.

Characterized by a lack of significant economies of scale, relatively standardized policies, and low barriers to entry, the property-liability industry appears competitively structured. There are about 2,886 property-liability insurance companies of which the eight largest earned only 31.9 percent of total industry premiums in 1977, and only 38.7 percent of auto premiums. In several lines, including automobile insurance, many firms deviate significantly from bureau rates except where such independent behavior is prohibited by state law. Additionally, some of the larger automobile insurers do not utilize bureau rates since their policyholder base is large enough to permit them to use their own loss experience in setting premiums.

The Development of State Regulation of Insurance and the Industry's Exemption

In 1868, the Supreme Court ruled that an insurance contract did not constitute "commerce" within the meaning of the Commerce Clause of the Constitution, and thus placed the industry outside the federal government's powers. Beginning in 1911, several states passed statutes authorizing the fixing of fire insurance rates by rating bureaus under the general supervision of their insurance departments. In the two-thirds of the states that had rate regulation in 1994, effective control over private bureau rates was often nonexistent. Thus, insurance ratemaking for property-liability lines was largely in the hands of industry-controlled rate bureaus.

In its 1944 *South-Eastern Underwriters* decision, the Supreme Court, reversing precedent, held that transactions in insurance across state lines constituted interstate commerce and were subject to the federal antitrust laws. The Supreme Court's action distressed much of the insurance industry. Similarly, state regulators feared that many state controls over insurance companies, especially tax statutes, might be invalidated as undue burdens on interstate commerce.

To alleviate these concerns, in 1945 Congress passed the McCarran-Ferguson Act. The Act specifically reaffirmed the power of the states to regulate and tax insurance companies. In addition, it provided that no act of Congress, unless specifically relating to the business of insurance, was to be construed to invalidate or supersede state insurance regulation. The antitrust laws were to remain applicable to the business of insurance but only "to the extent that such business is not regulated by State Law." By 1951, in response to McCarran-Ferguson, all states had adopted fire and casualty rating laws. Generally these statutes were patterned after a model law developed by the National Association of Insurance Commissioners (NAIC). That law required prior approval of insurance rates by state officials.

Although the model statute contained language making it technically possible for member insurance companies to deviate from bureau rates, independent behavior

was difficult and many insurers adhered to agreements not to deviate from bureau rates. In the late 1950's, market conditions began to change, and some insurers began to establish independent rates. This movement was given a strong impetus by the growing number of direct insurance writers, who were able to charge significantly lower premiums. Many insurers also desired a rate structure more responsive to loss experience and inflationary pressures. As a result, some states adopted statutory changes making it easier for member companies to deviate from bureau rates and for insurers to participate in the activities of a bureau for some lines of insurance and not for others.

Today, there are a variety of state insurance regulatory mechanisms reflecting varying degrees of reliance on competition. In a few states, such as Massachusetts, a state agency sets rates. Other states require that insurers join a rate bureau and adhere to their rates, although deviations from bureau rates may be allowed with insurance department approval. At the other extreme, Illinois, since 1971, has had no rating law at all and insurers are free to set their rates without state supervision.

The majority of states continue to use the prior approval mechanism, which permits states to review premiums before they come into effect and disapprove them if they are found to be excessive, inadequate, or unfairly discriminatory. Under most prior approval statutes, a rate is deemed approved if it is not disapproved within a specific period of time. At least 17 states, however, now utilize various "open competition" statutes which permit insurers to introduce new rates without delay. States generally do retain power to investigate rates once they are in effect to determine their lawfulness under the traditional standards utilized in prior approval states. According to the NAIC, open competition states account for approximately 48 percent of personal property and liability premiums, although certain regulatory mechanism in some of these states may limit the extent to which actual open competition occurs.

In sum, the property-liability industry has undergone a significant change since the passage of the McCarran-Ferguson Act in 1945. No longer can the industry be characterized as dominated by tight cartels, or by uniform regulatory supervision of collective ratemaking. The justification for antitrust immuntiy and of state regulation must therefore be evaluated in light of present industry conditions and emerging concerns about the role of competition in achieving particular social goals.

The Present Broad Insurance Immunity

Both the language of the McCarran-Ferguson Act, and the Act's legislative history, make clear that the purpose of the insurance immunity was to permit state regulatory mechanisms to function without federal intervention, and not to give the industry broad license to operate without antitrust scrutiny. As the Supreme Court recently noted, the purpose of making antitrust immunity dependent on state regulation was to end the "'system of private government'" prevalent in the insurance industry before McCarran-Ferguson, and while agreements among insurers might be permittd, "'public supervision of agreements is essential.'"

Nevertheless, as historically interpreted by the courts, the exemption has in fact served as a broad grant of immunity for unsupervised collective behavior by insurers. Courts have refused to require that the state regulation be comprehensive or effective as a condition for permitting immunity to attach. Rather, as one court put it, "if a State had generally authorized or permitted certain standards of conduct, it is regulating the business of insurance under the McCarran Act." Moreover, the effectiveness of state regulation does not invalidate the immunity. Once Court of Appeals simply brushed aside allegations that the state of Ohio had never investigated a rate filing and did not possess the actuarial personnel to do so. It ruled that nothing in the McCarran-Ferguson Act supports "the thesis that the Act does not apply when the state's scheme of regulation has not been effectively enforced." While some judges have disagreed with this approach, their views have been confined to dissent or dictum.

The breadth of the antitrust immunity created by the prevailing interpretation of state regulation has been further expanded by the broad interpretation given to the "business of insurance." These activities include not only "the type of policy which could be issued, its reliability, interpretation and enforcement," but also the setting of agents' commissions and the relationship between insurance companies and agents, and the selling and advertising of insurance policies.

As presently interpreted, the McCarran-Ferguson Act effectively may immunize from the antitrust laws a broad range of anticompetitive activities which, in fact, serve no federal or state objectives. As one witness put it:

This indiscriminate immunity is granted whether or not the practice is necessary for the effective functioning of the insurance industry, the improvement of the insurance product, or the fulfillment of state regulatory goals; whether or not the practice is condoned, authorized or punished by state authorities; and whether or not it is anticompetitive or anticonsumer.

Just as importantly, the presence of antitrust immunity has permitted insurers and state regulators to avoid any inquiry into the appropriate limits that should be placed on insurance companies' collective activities. "[T]he states never at any point seriously considered what ought to be the minimum permissible limits of concerted activity on automobile and homeowners' ratemaking." The need for a discriminating approach to collective activity is demonstrated by Illinois' experience. In many states, insurance companies receive from the bureau a "bureau rate" reflecting not only loss data but projected average administrative expenses for the insurers. On the other hand, Illinois, which has no rating law, permits rate bureaus only to collect and compute statistics based on the loss component of insurance premiums. Consequently, unlike insurers in other states, each Illinois insurer is responsible for developing rates that reflect its own expense projections. This more limited role for rate bureaus apparently has been functioning in a satisfactory manner, thereby indicating the unnecessary breadth of collective information sharing in a number of states.

While the Commission is not aware of any studies that directly estimate the cost of the insurance exemption, we believe that, on the basis of the analytic framework developed in Chapter Nine, and by the Economic Advisory Panel Report, the cost is significant. Under McCarran-Ferguson, competing insurers are able collectively to publish industry rates for future periods based on industry average costs, often without effective government supervision and under regulatory mechanisms that, in many states, discourage independent pricing behavior. It seems likely that the resulting rates exceed those that would exist in a fully competitive environment.

The Commission found little, if any, evidence in favor of the present blanket immunity. Rather, some testimony and submissions to the Commission argued that application of the antitrust laws might undercut the ability of states to regulate insurance, or that it would place in doubt the legality of a few, specified practices that were argued to be essential to the functioning of a competitive industry.

With respect to the first concern, we note that application of the antitrust laws to a particular industry does not oust a state regulatory agency from its jurisdiction. States remain free to implement programs designed to further the public interest as they define it. State attempts to deal with problems of discrimination, equity, affordability and availability clearly fall within this principle. Moreover, under the state action exemption, private activities properly mandated and effectively supervised would not give rise to antitrust liability on the part of the private participants. Elimination of the existing insurance antitrust immunity thus does not threaten the primary role of the states as regulators of insurance activities.

On the second point, the extensive testimony before the Commission concerning the potential impact of the full application of the antitrust laws to traditional collective behavior by insurance firms does involve significant policy questions. In its 1977 report, *The Pricing and Marketing of Insurance*, the Department of Justice states that, under traditional antitrust theory and precedent, competing businesses can undertake joint activities in which there are economices of scale and which competing businesses can not undertake along as long as such activities do not involve unnecessarily anticompetitive restraints. The Report, however, cautioned that the projection of future prices, or of large components of future prices, would raise serious antitrust questions. Consequently, the Report suggested that, where possible, insurance firms should rely on independent consulting organizations, rather than industry-controlled rate bureaus, to make those calculations. By so doing, antitrust risks could be minimized.

While the basic accuracy of the Report's legal analysis was not disputed before the Commission, several witnesses argued that it was unwise to entrust a determination of the lawfulness of particular activites to case-by-case adjudication. Not only would the govenment's legal arguments not bind either private plaintiffs or the courts, but the issue of ultimate lawfulness of specific practices under a rule of reason analysis would require careful balancing of possible anticompetitive effects against procompetitive benefits. Since such a rigorous analysis had not been necessary previously due to the presence of antitrust immunity, insurers might remain unceratin whether activities they believe essential, or otherwise procompetive, were legal. A wrong guess could subject the insurers to substantial antiturst liability, while an overly cautions posture might deny insurers and the public the benefits of lawful efficiencies.

Given this concern, the Commission believes that new legislation, designed to confirm the lawfulness of enumerated essential collective activities, should replace the existing overly broad immunity.

The Joint Activities that Should Be Lawful for Antitrust Purposes

The Commission's recommendation that Congress adopt legislation setting out specific behavior that would be lawful for antitrust purposes is not intended to be a recommendation for antitrust immunity in the usual sense. That is, we do not recommend that Congress determine specific areas of insurance company behavior in which the principles of competition and methods of antitrust analysis are to be put aside becasue of a legislative determination that competition is either undesirable or unworkable in those circumstances.

Rather, we believe that Congress should pursue this task from a much more limited perspective, namely, that of assisting the transition of the insurance industry from that of a sector of the economy that has developed essentially devoid of antitrust scrutiny to one in which the antitrust statutes are applicable, consistent with federalism principles. In endorsing this approach, caution must be exercised to ensure that the occasion is not utilized as an indirect method for reintroducing broad antitrust immunity for the industry.

Consequently, in determining the kinds of activities that should be included in any such affirmative legislation, three criteria should be used: first, is the proposed joint activity so important to the insurance process that uncertainty as to its legal status would severely limit the ability of the industry to function in an efficient and competitive manner; second, is the activity in question one presently subject only to antitrust principles of broad generality rather than relatively detailed case law that would illuminate its antitrust legality, i.e., is its lawfulness truly uncertain; third, under a rule of reason analysis would the activity in question be found to have the probable effect of not lessening competition within the industry. These are broad, decisional criteria. Particular conduct must be shown to meet these criteria by the proponents of the inclusion of that conduct.

The Commission does not have a sufficient record to make a recommendation with respect to each specific area of potential concern to insurers. On the basis of the information presented, however, we can offer some initial recommendations regarding the areas of key concern articulated by Commission witnesses.

The Commission heard extensive testimony that it is necessary for many insurers to utilize pooled statistics concerning past losses to develop actuarially sound data on the expected future losses for particular risk classifications. In addition, it was argued that joint activity is necessary to "trend" past data to make it useful for projecting expected losses in future rate periods, to compile and disseminate information concerning the administrative expense component of rates, and to promulgate bureau rates to its members in a form which might be more directly usable as an actual insurance rate without significant actuarial modification.

Witnesses also stated that failure to permit several or all of these activities could have a harsh impact on many insurers, particularly small insurers, who would be unable on their own to develop economically all the data needed to establish their insurance premiums. As a result, some insurers might have to withdraw from particular lines or geographic markets, thus reducing the number of competitors. In the face of such claims, the issue becomes "[p]recisely where . . . the costs of cooperative behavior, in terms of price rigidity and a retardation in innovative ratemaking, outweigh the benefits associated with economies of scale" in rate calculation.

We agree that in the case of joint pooling and calculation of past loss data efficiencies are likely to be great, and the anticompetitive potential small. As noted in the Department of Justice's Report, calculation of past cost data by an industry association for use by its members generally has been considered lawful by the antitrust courts. Moreover, in the case of the insurance industry, where many firms will not have a sufficiently large policyholder base to make their own actuarially sound computations, such collective activity is likely to have a procompetitive effect. Increased numbers of small firms will be able to participate in the market on the basis of actuarial data as sound as that available to large firms.

In addition, some witnesses testified that many small firms could not independently trend past loss data supplied by bureaus. They argued that the number of actuaries is limited, and that independent consulting organizations might not be available. The Commission, while questioning such claims, recognizes that this contention deserves inquiry by Congress.

The justification for bureau compilation and projection of the administrative expense component of bureau rates is even less clear. Relevant expense data will normally be in the exclusive control of each individual company. Thus, we are unable to conclude that the vast majority of insurers would not be capable of developing independent premiums from pooled loss data. The satisfactory operation of Illinois rate bureaus which limit their activities to only the collection of loss data indicates that the joint collection of expense data and publication of advisory rates is unnecessary.

The Commission also received testimony that arrangements by which insurers provide for the reinsurance of risks by the pooled underwriting of large risks merit special antitrust consideration. On the record before us, we are unable to reach a conclusion with respect to this contention, but agree that it also merits Congressional attention. We do note, however, that many firms, such as those engaged in construction and securities underwriting, frequently utilize joint ventures to permit firms to share the risks of a major undertaking or to enable small firms to participate collectively in activities when their resources are insufficient to permit them to participate individually. Proponents of this position thus have the clear burden of demonstrating why traditional antitrust analyses applicable to joint ventures in other sectors of the economy would not adequately protect both the need of insurers to spread risk and the interest of the public in being protected from joint ventures that unduly eliminate competition.

These recommendations are not dependent on changes in state law. Application of the antitrust laws—with the appropriate legislative clarification of the lawfulness of specific practices—should not only help achieve the competitive goals of antitrust, but also should accommodate and supplement the goals of state insurance regulation while preventing unneeded uncertainty in the provision of insurance services.

The Need to Maximize Competition Under State Insurance Regulation

There remains the matter of state economic regulation itself. Given the competitively structured nature of the insurance industry, it is not surprising that the evidence presented to the Commission appears to demonstrate the regulatory schemes requiring prior state approval of rates have had an adverse effect on competition. The 1977 Department of Justice Report found that the benefits of open competition, when compared with prior approval regulation, included less adherence to bureau advisory rates, rates as reasonable or lower than in other states, and greater efficiency in distribution. Other studies and economic commentaries generally have confirmed these findings. Indeed, two recent reports concerning insurance company behavior in Illinois, the only state having no insurance rate regulation, came to the identical conclusion that performance was, on average, as good or better than that in comparable, more regulated states.

While some submissions to the Commission attempted to refute particular technical aspects of these studies, the consensus of the comments received by the Commission was that studies showing that open competition provided a better environment than did prior approval regulation were essentially correct. For example, the American Insurance Association concluded that the Justice Department Report "develops a convincing case that competitive rate laws serve the public much more effectively than laws requiring prior approval of rates."

Many of those who favor substantial state regulatory intervention do so not from a belief that the industry is structured noncompetitively, but from a fear that unregulated competition may have adverse social effects. Many states require individuals to have specified levels of insurance coverage as a prerequisite for operating an automobile. Consequently, society, it is argued, has an interest in the availability of insurance to all individuals at a price that is within their reach, and at premiums that do not unfairly discriminate among individuals on the basis of certain arbitrary characteristics.

The central concern of those who believe that unregulated rate competition is at odds with the achievement of social objectives is "selection competition," the process by which competitive insurance markets tend to classify people by risk groups and charge them accordingly. The impetus of competition is to segment markets into finer and finer classifications. Since premiums from each classification must cover expected losses from that class, groups with presumed high risk potential will be charged higher rates. In practice, such classifications may be seen as unfair, since they may place a particular driver in a high cost category despite "clean behavior". Moreover, those charged higher rates may be individuals, such as young inner-city males, with minimal financial resources. Insurance for them thereby becomes unaffordable. Conversely, the individuals with higher income may well turn out to be those charged the lowest rates.

Thus, some of the categories that have been traditionally utilized to determine insurance premiums have been argued to be unfair because they may be based on socially "suspect" criteria or classifications over which the individual has little or no control, i.e., age, location (density of traffic or potential for theft), sex, and marital status.

Critics of selection competition argue that regulators may have an obligation to intervene in the functioning of the market to ensure that the pricing and availability of insurance comport with social objectives of

equity and fairness. Such concerns may also include the notion that the burden of higher expected losses in places like the inner city should be shared by all since some of the factors contributing to higher risks may be viewed as the responsibility of society at large.

The Commission believes that such concerns are legitimate and must be carefully evaluated in terms of defining the appropriate role of state insurance regulation. The Commission, however, is also impressed by arguments, including the testimony of our economic advisory panel, that establishment of regulatory solutions to ensure availability and affordability may lead to possible distortions requiring additional state intervention.

For example, to the extent that classifications are restricted by regulation and contain individuals of varying potential risk, insurers have an incentive to reject those whose predicted losses are supposedly greater than the premium established for the class. Similarly, if a state limits rates that may be charged for certain individuals, insurers may not write coverage for those groups for whom the expected loss is greater than the premium. Such difficulties may also lead to an increased use of "residual market" mechanisms for those who cannot obtain insurance in the voluntary market. Although the evidence is relatively sparse, it does show that participation in such assigned-risk pools for automobile insurance tends to be higher in states that have stricter regulation of rates. Finally, some states may require, as Massachusetts does, that property-liability insurers write insurance for all individuals within a given regulated classification.

In some circumstances, utilization of the insurance mechanism as a means of carrying out cross subsidization may pose questions of fairness and efficiency. For example, the low-risk policyholders who must pay the subsidies from being placed in the same category as high-risk individuals may be individuals, such as retired persons, who are less financially able to pay high insurance rates than are those to whom the subsidy is directed. It is also argued that, ironically, "taxing" low-risk drivers through such cross-subsidization may discourage such drivers from operating automobiles, while encouraging greater automobile use by those more likely to be involved in accidents.

The Commission takes no position on the ultimate merits of the issues raised by arguments for and against increased regulation of insurance to achieve social objectives. We do, however, believe that it is important that states not preclude reliance on market forces to establish rates for the majority of policyholders as part of an effort to ensure equitable, affordable, and available insurance for all its citizens.

The Commission's fundamental conclusion, reached in Chapter Nine, is the regulation should eliminate competition only when truly essential to the achievement of articulated public objectives and that the regulatory techniques chosen should operate in the least anticompetitive manner possible. It is important for public officials to attempt to reconcile the maintenance of competition in the insurance industry with the objectives of those who favor social regulation of the industry. Such an effort requires creative analyses and may encompass various new regulatory approaches. We believe the use of specifically targeted antidiscrimination, disclosure, and similar statutes or publicly subsidized residual market mechanisms can prove to be satisfactory methods for achieving the objectives of encouraging competitive and independent pricing, while ensuring that societal goals for insurance are also protected.

The Need For Further Study of the Insurance Industry

Our inquiry into state regulation of insurance raises several difficult issues involving a complex and diverse industry. We have concluded, however, that regulatory mechanisms existing in many states unduly restrict independent pricing and that true open competition laws are the preferable means of achieving available, reasonably priced insurance for a majority of consumers. In those instances in which the dynamics of the insurance market lead to results which are deemed unacceptable as a matter of public policy, *e.g.*, rates that are unfairly discriminatory or unaffordable for some, concerned state officials should seek to find regulatory solutions that do not needlessly eliminate the forces of competition that encourage insurers to set prices on the basis of their own costs and relative efficiencies.

In contrast to the issue of antitrust immunity, the Commission has not had the resources to go beyond these basic observations about competition and insurance regulation. Additionally, we recognize that a national statute affecting the ability of a state to regulate insurance in the manner of its own choosing poses significant issues of federalism. It is for these reasons that we recommend that further inquiry into state regulation of insurance promptly be undertaken by the appropriate Congressional committees or by a new study commission to be established by the President.

This insurance industry study should have several objectives:

1. To identify and analyze ways in which state regulation of insurance acts to restrict, and acts to strengthen, competition and independent pricing behavior in the various lines of insurance;

2. To identify ways in which states could ensure the achievement of social objectives without needlessly restricting competition in insurance markets; and

3. To suggest the appropriate mix, if any, of state and federal legislation with respect to the business of insurance and to determine the appropriateness of limiting the ability of states to achieve their regulatory objectives in an anticompetitive manner.

Several Commissioners wish to note that they do not believe an additional study is needed since techniques are presently available to adequately deal with problems of equity and discrimination. These Commissioners believe that open competition should be federally mandated now.

In any event, we do not believe that repeal of the current broad immunity should await the results of this inquiry. There is simply no justification for retention of the immunity in its present form. Adoption of a statute to affirm the lawfulness of specific essential collective activity, as recommended by the Commission, will deal adequately with the industry's legitimate fears concerning the transition to an environment of antitrust scrutiny. Moreover, in the interim between repeal of the current immunity and the conclusion of the recommended study, the states' important social interests in regulation designed to achieve equity, affordability, availability and nondiscrimination will be protected from inappropriate antitrust attack by the application of the state action exemption.

. . . . .

[Separate views on this chapter were filed by Commissioners McClory and Hatch, and are contained in Appendix B.]

ORDERS FOR MONDAY, MAY 19, 1986

ADJOURNMENT UNTIL MONDAY, MAY 19, 1986

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I ask unanimous consent that once the Senate completes its business today it stand in adjournment until the hour of 12 noon, Monday, May 19, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. SIMPSON. Mr. President, I further ask unanimous consent that following the recognition of the two leaders under the standing order, there be special orders in favor of the following Senators for not to exceed 5 minutes each: Senator HAWKINS, Senator MATTINGLY, and Senator PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business for not to extend beyond the hour of 1 p.m. with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

READING OF JOURNAL DISPENSED WITH

Mr. SIMPSON. Mr. President, I ask unanimous consent that when the Senate reconvenes on Monday, May 19, 1986, the reading of the Journal be dispensed with, no resolution come over under the rule, the call of the calendar be dispensed with, and that the morning hour be deemed to have expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. SIMPSON. Mr. President, on Monday, following routine morning business, the Senate will resume consideration of S. 2180, the Federal Fire Prevention and Control Act.

Rollcall votes will not occur prior to the hour of 3 p.m. on Monday, May 19, 1986.

Following the recognition of the two leaders under the standing order, there will be special orders in favor of the following Senators for not to exceed 5 minutes each: Senators HAWKINS, MATTINGLY, and PROXMIRE, to be followed by a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m.

with Senators permitted to speak therein for not more than 5 minutes each.

At the conclusion of routine morning business, the Senate will resume consideration of S. 2180, the Federal Fire Prevention and Control Act. There will be no rollcall votes prior to the hour of 3 p.m. on Monday, May 19. I inquire of the Democratic leader if he has further business.

Mr. BYRD. Mr. President, in response to the distinguished acting Republican leader, as it is so characteristic of him—and it is deeply appreciated—there is nothing further on this side for action today. I thank him.

Mr. SIMPSON. Mr. President, I thank the Democratic leader. I came upon the floor about 2 hours ago just to kind of check on things and the Democratic leader and I were suddenly raveled in scrambling or unscrambling satellite dishes and watching or not watching later hours or earlier hours with daylight saving time, and it was a pleasure to have his good counsel on that particular bit of unravelment.

Mr. BYRD. Mr. President, I thank the distinguished acting Republican leader for unraveling the situation. I look forward to our being able to leave this Chamber and get some rest over the weekend and continue our work for our constituents and come back with renewed vigor and vision and determination on Monday next.

Mr. SIMPSON. That has me ready to go.

ADJOURNMENT UNTIL MONDAY, MAY 19, 1986

Mr. SIMPSON. Mr. President, there being no further business, in accordance with the previous order, I move the Senate stand in adjournment until 12 noon on Monday, May 19, 1986.

The motion was agreed to, and at 6:53 p.m. the Senate adjourned until Monday, May 19, 1986, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate May 15, 1986:

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be general

Gen. William R. Richardson, [redacted] age 56, U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be general

Lt. Gen. Carl E. Vuono, [redacted] U.S. Army.

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Edward C. Peter II, [redacted] age 56, U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Frederic J. Brown, [redacted] U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Robert W. RisCassi, [redacted] U.S. Army.

The following-named officer for appointment to the position indicated under the provisions of title 10, United States Code, section 711:

To be senior Army Member of the Military Staff Committee of the United Nations

Lt. Gen. Robert W. RisCassi, [redacted] U.S. Army.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 15, 1986:

DEPARTMENT OF STATE

Paul H. Nitze, of the District of Columbia, to be Ambassador at Large.

Warren Zimmermann, of Virginia, a career member of the Senior Foreign Service, class of Minister-Counselor, for the rank of Ambassador in his capacity as Chief of the U.S. Delegation to the Vienna Conference on Security and Cooperation in Europe Follow-up Meeting.

Ronald Frank Lehman II, of Virginia, for the rank of Ambassador during his tenure of service as U.S. Negotiator for Strategic Nuclear Arms.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

By Mr. HOLLINGS:

S. 2461. A bill to amend part C of the Balanced Budget and Emergency Deficit Control Act of 1985 to exempt certain benefits payable from the Military Retirement Fund from sequestration or reduction under an order issued by the President under section 252 of such act; to the Committee on Governmental Affairs.

COLA'S FOR DISABLED VETERANS AND SURVIVORS OF VETERANS UNDER THE MILITARY RETIREMENT SYSTEM

● Mr. HOLLINGS. Mr. President, the Balanced Budget Act of 1985, the Gramm-Rudman-Hollings Bill, contains provisions dealing with certain exempt and nonexempt Federal programs for the purposes of the sequestration of funds required by the act. These programs are mainly entitlements and payments to the poor. Today I am introducing a bill to correct a serious deficiency in the application of the nonexempt standard as it applies to the cost-of-living adjustments [COLA] for disabled veterans and survivors of veterans under the military retirement system.

For several years prior to passage of the legislation, I had offered, along with several of my colleagues, budget proposals requiring a freeze of reduction in essentially every Federal program except those for the national defense and for low-income recipients. My freeze called for an across-the-board, share sacrifice to reduce the Federal deficit and balance the budget. This sacrifice extended to all COLA's for entitlement programs except as noted above. Although my freeze plan received as many as 38 votes in the Senate, it was continually turned down not on its merits but for the political expediency of don't rock the boat with the Social Security voters. President Reagan and House Speaker O'NEILL said, hands off Social Security. We need those votes.

In passing the Balanced Budget Act, the Senate accepted the facts about what was politically achievable and what was not. Thus, Social Security was put off limits—its COLA was made exempt from cuts. Deficit production and balancing the budget were to happen exclusive of Social Security. Well, there are obvious problems with this approach. The concept of a shared sacrifice was sacrificed. Exempting Social Security and not other entitlement COLA's created an inequity. However, the need to control Federal spending and reduce the deficit was considered more critical than this inequity, and the act was passed.

The Senate hoped to block out the inequity by essentially not requiring a sequestration of funds in fiscal year 1986 and more or less limiting the inequity to Social Security. The view was that the Congress would work its will during the normal legislation process in 1986 toward the fiscal year 1987 deficit target of $144 billion, and the disparity in paying entitlement COLA's would not occur. The conference with the House produced a drastically different outcome. The House insisted and won on the point that virtually every entitlement COLA and payments of low-income recipients were exempt except those COLA's affecting military and Federal civilian retirees. Still, the need to reduce the deficit was overriding, and the legislation was passed.

Several bills have been offered in both the Senate and the House to provide equitable treatment for all COLA's. These bills center on two actions. The first ensures the COLA for everyone only for fiscal year 1987 to avoid a second consecutive COLA loss for military and civilian retirees. The second would make military and civil-

ian retiree COLA's exempt from sequestration. It is too soon to tell which, if either of these, will pass, though I intend to support—as a minimum—the payment of the fiscal year 1987 COLA. With the uncertainty surrounding the outcome of these bills, I believe it is imperative that some adjustment be made to address the most flagrant inequity created in the law.

The bill I am introducing today would correct the inequity involving the disabled veteran receiving benefits under the military retirement system who is denied a COLA available to other disabled veterans. It further addresses the survivors' benefit program (SBP) under the military retirement system. Let me explain why, if we do nothing else to correct the overall inequity in COLA payments, we must correct these two aspects.

The Balanced Budget Act exempts from sequestration the COLA's provided under the Veterans' Compensation Program. What this approach failed to recognize was the nearly 140,000 disabled veterans under the military retirement program. It seems totally unfair to pay a COLA to a disabled veteran under one program and not pay a COLA to a veteran under the other. A prime responsibility of the Government must be to honor its commitments to those who have earned benefits. The Government definitely has an obligation in this respect.

As far as the Survivor Benefits Program (SBP) is concerned, I need not say more than that 106,000 current survivors receive an average benefit of $5,300—only $5,300 a year. Under all budget proposals of past years, any entitlement recipient at this income level was always provided a COLA. It is wrong to ignore this group of beneficiaries, and the law should be changed.

Mr. President, I believe we made a mistake in neglecting these beneficiaries, and it is time to correct our error. This bill will do it, and I hope the Senate can act soon on it.●

By Mr. KENNEDY (for himself, Mr. LUGAR, Mr. STENNIS, Mr. PELL, Mr. DANFORTH, Mr. ANDREWS, Mr. KERRY, and Mr. MOYNIHAN):

S. 2462. A bill to provide for the awarding of a special gold medal to Aaron Copland; to the Committee on Banking, Housing, and Urban Affairs.

SPECIAL GOLD MEDAL FOR AARON COPLAND

● Mr. KENNEDY. Mr. President, I am pleased to introduce, on behalf of myself and Senators LUGAR, STENNIS, PELL, DANFORTH, ANDREWS, KERRY, and MOYNIHAN, legislation to award a special Congressional Gold Medal to Aaron Copland.

I believe that this medal would appropriately recognize the extraordinary role that Mr. Copland has played in our musical heritage. Perhaps more than any other classical composer, Aaron Copland is authentically American.

Over the years, Aaron Copland has helped our Nation celebrate, mourn, prosper, and mature. His music is a loving evocation of the American national spirit. His "Rodeo" is a lively and affectionate tribute to the pioneers and the pioneering spirit that settled—but never tamed—the West.

Two of his most recognized and heralded works were created in 1942, as America endured the hardships of World War II. The sensitive "Lincoln Portrait" libretto is based on Lincoln's own observations of a war-torn country. Copland's musical narration captures the essence of Lincoln and the rugged strength of America.

So, too, "Fanfare for the Common Man" endures as a patriotic tribute to our hardy national optimism and our fundamental values.

Copland has made a difference in our national history. He once remarked that he could not imagine the course of American music without his mentor, Serge Koussevitzky. The same can also be said of Copland himself.

He has brought distinction to the American musical heritage and earned nearly every prestigious award in the process. He was the first composer to receive a Guggenheim Fellowship. He has also received a Pulitzer Prize for his "Appalachian Spring," which also earned a Music Critics Circle award. He has received an Oscar and the Presidential Medal of Freedom.

I believe that we in the Congress should act to recognize this important contribution to our cultural heritage. Aaron Copland has enriched our lives, and this special medal will acknowledge his gift to America.

Congressman Vic Fazio has introduced companion legislation in the House of Representatives. I hope that my colleagues will join me in supporting this bill, and I urge its prompt consideration and enactment.

I also ask that a biography of Mr. Copland be printed in the RECORD, along with the text of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2462

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS AND STATEMENT OF POLICY.

(a) Findings.—The Congress finds that—

(1) Aaron Copland has contributed to American music as a composer, a pianist, a lecturer, an author, and an organizer of various musical societies;

(2) Aaron Copland has composed patriotic musical works, such as "Lincoln Portrait", which was composed during World War II as a patriotic tribute to the United States and distributed worldwide;

(3) Aaron Copland has enjoyed great popularity and critical acclaim as evidenced by his receiving many awards, including a Guggenheim Fellowship, a Pulitzer Prize, an Academy Award, and the Presidential Medal of Freedom; and

(4) Aaron Copland is referred to as the "dean" of American musical composition as the result of his contributions to American music.

(b) Statement of Policy.—The incomparable contributions of Aaron Copland to American musical composition should be recognized by awarding him a special congressional gold medal.

SEC. 2. AUTHORIZATION TO PRESENT GOLD MEDAL.

The President is authorized to present on behalf of the Congress 1 gold medal of appropriate design to Aaron Copland.

SEC. 3. PRODUCTION OF GOLD MEDALS AND PRODUCTION AND SALE OF BRONZE MEDALS.

(a) Production of Gold Medal.—The Secretary of the Treasury shall coin 1 gold medal and shall deliver the medal to the President for presentation under section 2. The gold medal shall contain suitable emblems, devices, and inscriptions to be determined by the Secretary.

(b) Production and Sale of Bronze Duplicate Medals.—The Secretary of the Treasury shall coin and sell bronze medals which are duplicates of the gold medal coined pursuant to subsection (a) under such regulations as the Secretary may prescribe, at a price sufficient to cover the cost of the gold medal and such duplicates, including the cost of labor, materials, dies, use of machinery, and overhead.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for any fiscal year beginning on or after October 1, 1986, such funds as may be necessary to carry out the purposes of this Act.

SEC. 5. EFFECT ON OTHER LAW.

The medals provided for in this Act are national medals for the purpose of section 5111 of title 31, United States Code.

[From Contemporary Authors 1969]

COPLAND, Aaron 1900–

PERSONAL: Born November 14, 1900, in Brooklyn, N.Y.; son of Harris Morris and Sarah (Mittenthal) Copland. *Education:* Studied piano under Leopold Wolfson, Victor Wittgenstein, Clarence Adler, and (briefly) Ricardo Vines; studied composition with Rubin Goldmark, 1917-21 with Nadia Boulanger at Fontainbleau School of Music, 1921, and in Paris, 1921-24. *Address: C/o Boosey and Hawkes, 30 West 57th St., New York, N.Y.*

CAREER: Composer of music for orchestra, ballet, stage, films, chamber music, voice, 1920–; pianist. Lecturer on contemporary music at New School for Social Research, 1927-37; was a teacher of composition, and Charles Eliot Norton Professor of Poetry at Harvard University, 1951-52; chairman of faculty and head of composition, Berkshire Music Center; public lecturer throughout the United States. Organizer with Roger Sessions, of Copland-Sessions Concerts, 1928-31; founder of American Festival of Contemporary Music at Yaddo, 1932. Piano soloist with New York Philharmonic, Boston Symphony, Los Angeles Philharmonic; conductor of own works with other orchestras in United States, Europe, Mexico, South America; pianist and conductor on government-sponsored tours of Latin American countries, 1941, 1947. Vice-president, Koussevitsky Music Foundation; president of Edward MacDowell Association; director of Walter W. Naumburg Music Foundation, American Music Center.

MEMBER: National Institute of Arts and Letters, American Academy of Arts and Letters, American Society of Composers, Authors and Publishers, League of Composers (director), International Society for Contemporary Music (director); Royal Academy of Music, Royal Society of Arts (both London); Accademia Nazionale di Santa Cecilia (Rome). *Awards, honors:* Guggenheim Foundation, first composer to receive fellowship, 1925, renewed, 1926; RCA Victor Co., $5,000 award for "Dance Symphony," 1930: Pulitzer Prize in music and New York Music Critics Circle Award for "Appalachian Spring," 1945; New York Music Critics Circle Award for "Third Symphony," 1946; Oscar, Academy of Motion Picture Arts and Sciences, for musical score for "The Heiress," 1950; American Academy of Arts and Letters Gold Medal for Music, 1956; Edward MacDowell Medal, 1961; Presidential Medal of Freedom, 1964. Honorary degrees include Mus. D., Princeton University, 1956, Oberlin College, 1958, Illinois Wesleyan University, 1958, Temple University, 1959, University of Hartford, 1959; H.H.D., Brandeis University, 1957, Harvard University, 1961, Syracuse University, 1964, University of Rhode Island, 1964.

WRITINGS—Books: "What to Listen for in Music," McGraw, 1939, revised edition, 1957; "Our New Music," McGraw, 1941, revised edition, Norton, 1968; "Music and Imagination," Harvard University Press, 1952; "Copland on Music," Doubleday, 1960.

Music: "Cortege Macabre," 1923, "Symphony for Organ and Orchestra," 1924, "Music for the Theatre," 1925, "Dance Symphony," 1925, "Piano Concerto," 1926, "First Symphony," 1928, "Symphonic Ode," 1929, "Short Symphony," 1933, "Statements," 1934, "El Salon Mexico," 1936, "Music for Radio," 1937, "Outdoor Overture," 1938, "Billy the Kid" (ballet), 1938, "Our Town" (film), 1940, "John Henry," 1940, "Quiet City" (play), 1940, "Music for the Movies" (film scores), 1942, "Lincoln Portrait," 1942, "Rodeo" (ballet), 1942 "Danzon Cubano," 1942, "Fanfare for the Common Man," 1942, "Appalachian Spring" (ballet), 1944, "Third Symphony," 1946, "The Red Pony" (film), 1948, "Preamble for a Solemn Occasion," 1949, "The Tender Land" (opera), 1954 (all published by Boosey and Hawks).

Published works also include music for string orchestra, chamber music, band music, choral music, various instrumental and vocal compositions, mainly published by Boosey and Hawkes).

By Mr. RIEGLE (for himself and Mr. CRANSTON):

S. 2463. A bill to amend the Internal Revenue Code of 1954 to permit individuals to receive tax-free distributions from an individual retirement account or annuity to purchase their first home, and for other purposes; to the Committee on Finance.

FIRST-TIME HOME BUYER OPPORTUNITY ACT

Mr. RIEGLE. Mr. President, I am introducing today the First-Time Home Buyer Opportunity Act, which I believe will bring homeownership within the reach of thousands of additional American families. I am pleased that my distinguished colleague, Senator ALAN CRANSTON, is joining me in this initiative. Our bill will permit individuals to use funds in their individual retirement accounts for purchasing a first home.

The dream of owning a home has been a primary motivation for generations of American families. For most Americans, homeownership has been the only realistic way to build family assets and provide a nest egg for their retirement years. I believe homeownership contributes enormously to the quality of our community life and the stability of our society.

Recently, a welcome drop in interest rates has created a new surge in home buying. That is a development we all applaud. Single family housing sales hit a record annual rate of 903,000 in March. Realtors and mortgage lenders have rarely been busier. The home building industry has had reason for new confidence. Thousands of families have taken this opportunity to improve the quality of their housing. All of that is good for homeowners and good for the economy.

The glare of this good news may obscure the fact that Americans who don't already own a home remain at a significant disadvantage. And that disadvantage will widen now that interest rates are beginning to raise home prices. Families who sell one home when they go to buy another can use their tax deferral capital gains to help with the downpayment and other closing costs. But a young family that is seeking to buy their first home often finds that the benefits of lower interest rates are largely offset by higher housing prices, downpayments, and closing costs.

Mr. President, I believe it is in the national interest to insure that homeownership is within the reach of all American families who want it and are willing to work for it.

Unfortunately, the country's recent performance on homeownership is not as good as it should be or even as good as it has been in the past. Here is some evidence.

First, the rate of homeownership has been declining every year since 1980 after having previously risen steadily since the end of the Second World War. The percentage of American families owning their own home fell from 65.6 percent in 1980 to 63.9 percent in the third quarter of last year, the lowest level since 1968.

Second, families are having to wait longer and longer before they can buy their first home. The age of a typical first-time home buyer was 2½ years older in 1985 than it was in 1979.

Third, families buying their first home are having to rely more heavily on a second income to make home ownership possible. In 1985, 68.7 percent of all first-time home buyers relied on a second income, compared to 65.2 percent in 1983.

The U.S. League of Saving Institutions recently found that "in spite of the recent improvements in affordability, home ownership is becoming more difficult to achieve."

Mr. President, enactment of the First-Time Home Buyer Act would provide important assistance to thousands of Americans who are still trying to buy their first home. The bill would permit individuals to withdraw funds from their individual retirement accounts or annuities without penalty if the funds are used to buy a principal residence within 90 days of the withdrawal.

Our bill is designed to increase savings for home ownership and to provide the kind of assistance that is most important to first-time home buyers. An individual could not withdraw funds under our bill unless they had been invested in the IRA for at least 12 months. The total amount of home ownership withdrawals for each individual could not exceed $10,000 in the aggregate across all taxable years. An individual's tax basis in a property would be reduced by the amount of any withdrawal. For reasons of administrative feasibility, those who have not had an ownership interest in a principal residence for 3 years would be considered first-time home buyers.

Mr. President, the Riegle-Cranston bill places no new burden on the U.S. Treasury. Its effect would be to make investment in a first home a permitted form of IRA investment. Individuals already have wide latitude in investing their IRA funds: stocks, bonds, real estate investment trusts, certificates of deposit and other forms of financial assets. It is ironic that investment in a person's own home is not already a permitted form of investment since home ownership has long proven to be one of the best ways for Americans to build up assets for their retirement years.

The Riegle-Cranston bill uses a proven incentive to save for home investment. It would give American first-time home buyers help that has for many years been available to people in Germany, Canada, Japan, France, the United Kingdom and other industrial nations.

Mr. President, I believe the bill we introduce today provides a straightforward, efficient way to enable many more Americans to share in the dream of home ownership. I believe the bill deserves prompt consideration in the Senate, and I invite my colleagues to cosponsor it.

Mr. CRANSTON. Mr. President, I join with my colleague, Senator RIEGLE, in introducing a bill to allow first-time home buyers to make a one-time withdrawal without penalty of up to $10,000 from an individual retire-

ment account [IRA] for downpayment on a principal residence. Funds so utilized would be taxed as ordinary income if the home is sold and the proceeds not reinvested in a new home within 18 months.

In the last 5 years, the increasing cost of home ownership has prevented an estimated 800,000 young households from purchasing homes. The 1981–82 recession was disastrous for housing affordability and even though the economy has recovered somewhat, home ownership cost still remains high according to a 1985 study of home ownership and housing affordability by the Massachusetts Institute of Technology. Indeed this study goes on to conclude that even though the peak of the baby boomers are now hitting their prime home-buying years, home ownership rates for young households are declining and will continue to do so. Some 42 million Americans, 1 out of 6 people in the country, will reach the age of 30 during the 1980's. These prospective home buyers will have to save substantially more than in the past to meet higher downpayment requirements. Higher down payments will almost certainly mean that young households will achieve home ownership a bit later in life than those who preceded them in the 1970's. I view declining home ownership rates with concern, because the dream of home ownership must be kept alive in America. Until the cost of home ownership returns to more traditional levels, many households will be denied an essential part of the American dream.

California faces a substantial set of housing problems in the mid-1980's due to increased land prices, large increases in net migration to California, and increasing demand for housing, a surge in household formations reflecting the baby boom of World War II, along with land use and growth management techniques that will slow and stop new housing production. All of these problems assure that first-time home buyers will face a continuing affordability crisis. The most recent event contributing to the affordability crisis is the tremendous inflationary rise in house prices and interest rates during the 1970's. While interest rates have fallen dramatically over the last year, house prices still continue to reflect the price increases from prior periods. These housing prices will continue to stay high because of strong demand for housing and declining Government support for homeownership.

It is a fairly well-known fact that California in general, and the San Francisco and Los Angeles areas particularly, have house prices that are the highest in the Nation, exceeding the national median by over 70 percent. The median price in Los Angeles/Long Beach is $123,000 and San Francisco, $152,000, the highest median home price in the Nation. Statistics show that for first-time home buyers, the greatest stumbling block to home ownership is coming up with cash for downpayments. This proposal would help many potential buyers who invest in individual retirement accounts and encourage others to invest in these accounts. Individual retirement accounts allow people to save up to $2,000 a year, on a tax-deferred basis, for retirement. The Internal Revenue Service imposes a tax penalty on IRA users who withdraw money from the account before they are 59 years old, except in disability or death.

From 1968 through the late 1970's, the cost of owning a home took about 15 percent of a family's income. Today it is 30 percent or more according to the MIT-Howard Joint Center for Housing Studies. Seventy-five percent of first time home buyers make a down payment of $10,000 or less. Especially vulnerable to escalating prices—the study said—is "young households" under the age of 35, the group most likely to be buying a first home. They are likely to use and need two incomes to afford a house, and many put off having children to get a home. Despite these financial hurdles, young people are still trying to buy homes. Their ideal remains the single-family home.

The immediate effect of this proposal on the budget deficit would be negligible because money in IRA accounts isn't currently being taxed and in the long term it would raise revenue, and because of the overall revenue generated by increased homebuilding. Buying a home is the single most important investment most people make toward retirement. Shifting IRA funds to equity in a home, will stimulate economic growth while maintaining the concept of planning for a secure retirement.

I believe that our bill is consistent with the traditional values of exploring innovative ways of helping our young families realize the cornerstone of the American dream—home ownership.

By Mr. METZENBAUM (for himself, Mr. HEINZ, Mr. STENNIS, Mr. DIXON, Mr. LEVIN, Mr. THURMOND, Mr. ZORINSKY, Mr. KENNEDY, Mr. SIMON, Mr. RIEGLE, Mr. BAUCUS, Mr. BURDICK, Mr. SPECTER, Mr. GORE, Mr. SARBANES, Mr. EAGLETON, Mr. MOYNIHAN, Mr. LAUTENBERG, Mr. HEFLIN, Mr. BUMPERS, Mr. ROCKEFELLER, Mr. KERRY, Mr. MITCHELL, Mr. NUNN, Mr. PRYOR, Mr. MATTINGLY, Mr. STAFFORD, Mr. GRASSLEY, Mr. BRADLEY, Mr. HOLLINGS, Mr. QUAYLE, and Mr. GLENN):

S.J. Res. 346. Joint resolution to designate June 21, 1986, as "National Save American Jobs and Industry Day"; to the Committee on the Judiciary.

NATIONAL SAVE AMERICAN JOBS AND INDUSTRY DAY

Mr. METZENBAUM. Mr. President, on behalf of myself and Senator HEINZ, I rise to introduce a joint resolution designating June 21, 1986, as "National Save American Industry and Jobs Day." Joining us in cosponsoring this resolution are Senators STENNIS, DIXON, LEVIN, THURMOND, ZORINSKY, KENNEDY, SIMON, RIEGLE, BAUCUS, BURDICK, SPECTER, GORE, SARBANES, EAGLETON, MOYNIHAN, LAUTENBERG, HEFLIN, BUMPERS, ROCKEFELLER, KERRY, MITCHELL, NUNN, PRYOR, MATTINGLY, STAFFORD, GRASSLEY, BRADLEY, HOLLINGS, QUAYLE, and GLENN.

Throughout America's history, U.S. manufacturing industries have spurred economic growth and raised the standard of living for millions of Americans. Innovative thinking and a commitment to hard work and excellence have produced innumerable consumer goods and helped this Nation and its allies meet their defensive needs and obligations. Our lives have been made better, easier and safer because of the efforts of American manufacturing industries.

Indeed, Mr. President, it is hard to imagine where this Nation and the rest of the world would be today if not for the American workers and the manufacturing sector of our economy. The sad truth is, however, that unless we take some action, we will wind up without a strong manufacturing base in this country.

Although the manufacturing sector of the U.S. economy accounts for over $1.5 trillion of the gross national product, individual firms are continuing to fail at an alarming rate. Steel and textile mills, auto plants, shoe factories, and machine tool companies are continuing to shut down. Manufacturing jobs, once the economic backbone of the Nation, are being permanently lost to overseas competition. As a result, many communities and livelihoods have been destroyed.

Part of the problem is that our foreign trading partners refuse to deal fairly with us. While subsidizing their own industries' exports to the United States, these same foreign governments continue to erect barriers which prevent the sale of U.S. goods in their own markets. It is not a two-way street.

We cannot allow the drain on our manufacturing base to continue. We must demand better treatment from our trading partners and we must continue to make improvements within our own industries to become more competitive. And, finally, we must stand together as a nation in support of the "Made in America" label and the American worker.

The joint resolution I am offering today is a step in this direction. By designating June 21, 1986 as "Save American Industry and Jobs Day," we can help focus national attention on the need to buy American and demonstrate our firm support for American jobs and industry.

By Mr. LEVIN (for himself, Mr. MOYNIHAN, Mr. ROCKEFELLER, Mr. D'AMATO, Mr. BRADLEY, Mr. ANDREWS, Mr. RIEGLE, Mr. METZENBAUM, Mr. MATSUNAGA, Mr. EAGLETON, Mr. KERRY, Mr. ZORINSKY, Mr. LAUTENBERG, Mr. DIXON, Mr. NUNN, Mr. PRYOR, Mr. BIDEN, Mr. BOREN, Mr. STENNIS, Mr. SIMON, Mr. CHILES, and Mr. KENNEDY):

S.J. Res. 347. Joint resolution to designate the week of May 19, 1986, through May 24, 1986, as "National Homelessness Awareness Week"; to the Committee on the Judiciary.

NATIONAL HOMELESSNESS AWARENESS WEEK

● Mr. LEVIN. Mr. President, every day, in every American community, there are people living in the streets—men and women without homes, without clothes, without money, without food, and, most frightening of all, without hope.

Most of us, who have been blessed with material comfort, are uneasy when we see these human symbols of social imperfection. We may try to look away from them; but we cannot avoid seeing them. They are there, lodged in our minds and our souls, disquieting remainders that all is not well with the world even if it is well with us.

Mr. President, these "street people" are usually seen through a stereotype. Some think of them as "bums" or "crazy people" because that makes it easier to ignore them. And it's probably that some are mentally impaired and others are emotionally incapable of dealing with the complexity of modern life. But it is equally true that those conditions do not justify society's indifference or decrease the suffering these people feel or diminish the essential humanity they share with us.

But there are also people out there who are sane as the rest of us, as ambitious as the rest of us—but just not as lucky as the rest of us.

The streets are home to children who have been abandoned, women who have been abused, men who have been rejected by a system they want to understand.

Mr. President, what we need to keep in mind is that all these "street people" are people, all of them. They are our brothers and sisters, our parents and our children.

Homelessness is not a political issue—though some have tried to make it one. If there are 300,000 homeless or 3 million homeless there are too many. And, whatever their number, there is a need to respond to their problems.

Americans are a generous people, and we do respond. But that response tends to be seasonal and cyclical. We give the most, we do the most, in the winter. Stories about people freezing and starving at Christmas time touch us. And we respond.

But death and despair do not take a holiday when the weather turns warm. Indeed, some shelter providers believe that spring and summer are the worst times to be on the streets. Public resources are reduced, but personal problems increase. The warm weather brings out gangs—the sort of street people we really need to fear—who prey on the homeless. They steal their few belongings; they threaten them verbally, they attack them physically.

So now, in this spring season of renewal, there is a need for all of us—as individuals, as organizations, as a government—to renew our commitment to provide help to those in need. That renewed commitment, though, cannot be made until all of us are aware of the nature of the problem.

On Monday night, May 19, at 8:30, millions of Americans may get a better sense of the reality that so many of their fellow citizens face when they see a movie depicting the efforts of the Community for Creative Non-Violence [CCNV], to provide shelter for people here in Washington. That movie, of course, is a drama; but the real-life struggle which face organizations like the CCNV, Luther Place, the House of Ruth, the National Coalition for the Homeless, headquartered in New York; LIFE (Love Is Feeding Everyone) in East and South Los Angeles; and Saint Peter's Coalition on Temporary Shelter in Detroit are not fiction and they do not make a pretty picture.

Mr. President, dealing with the homeless on a personal level is a difficult task. Not many of us have the compassion and the courage to do it. But that "failure" is not a flaw in our character—not as long as we recognize it and compensate for it by doing those things we can do to deal with the problems that our people face.

The millions of Americans who will participate in the Hands Across America event designed to fight hunger are doing something to deal with a problem. Their action may not be as dramatic as the acts of a Mitch Snyder or a John Steinbruck—but it is real and it is valid and it is valuable.

We appreciate and applaud that sort of action. And we ought to appreciate and applaud the action of the dedicated volunteers and professionals who try to deal with the plight of the homeless on a daily basis.

That is why, Mr. President, I am joining with Representative EDWARD J. MARKEY in introducing a joint resolution to declare the week of May 19, 1986, "National Homelessness Awareness Week." This joint resolution is designed to help increase public awareness of the problems that the homeless face; to applaud the efforts of organizations who are dedicated to dealing with those problems; and to recognize the role that government, at all levels, has in responding to this problem.

Mr. President, all religions call upon human beings to share God's gifts with those in need. In Isaiah we are told to:

> Cease to do evil and learn to do right, pursue justice and champion the oppressed; give the orphan his rights, plead the widow's cause.

And in Matthew, by analogy, praise is given to those who help:

> I was hungry and you fed me, thirsty and you gave me drink; I was a stranger and you received me in your home, naked and you clothed me; I was sick and you took care of me, in prison and you visited me.

The religious roots of care are well known. And the human obligations to provide it is widely recognized. John Stuart Mill, rarely recognized as being driven by excessive concern for the poor, wrote:

> * * * it will be admitted to be right that human beings should help one another; and the more so in proportion to the urgency of the need. * * * The claim to help, therefore, created by destitution is one of the strongest that can exist; and there is a prima facia the amplest reason for making the relief of so extreme an exigency as certain to those who require it as by any arrangements of society [that] can be made.

Mr. President, there are real people in need. And there is a real need for people to respond. This joint resolution is one way for us to respond. It is not a sufficient response, but it is a necessary one. I hope that the Senate will act promptly on it.●

● Mr. D'AMATO. Mr. President, I rise today to bring attention to a serious problem that affects every community in this Nation—homelessness. We are all aware of the overwhelming problem that homelessness poses for communities and individuals alike. As a nation we must address this issue.

There are an estimated 3 million homeless individuals across the country. The rapid rise in homelessness is marked by the increased demand for emergency shelters. In 1985, the demand increased by as much as 20 percent in 22 cities.

Homelessness is the result of a number of social and individual problems. Deinstitutionalization has pushed many mentally ill individuals into the streets. Problems with alcohol and drug abuse and unemployment also have pushed individuals to desperate levels of despair: Homelessness has been the result.

Communities across the Nation are pulling together to help these individ-

uals find food, clothing, and shelter. More importantly, communities are seeking long-term assistance for the homeless. Providing counseling and jobs for these individuals is a first step toward helping these individuals become more self-sufficient.

The Federal Emergency Management Agency has made rigorous efforts to confront the homeless problem. In 1984, $110 million was provided for meals and shelter. I am pleased with these efforts, and I am committed to continuing our efforts to confront the problem.

I appreciate my colleague, Senator LEVIN, introducing this important legislation. I am delighted to be an original cosponsor and I urge my colleagues to join this effort.●

By Mr. GLENN (for himself, Mr. HEINZ, Mr. DOLE, Mr. BRADLEY, Mr. ANDREWS, Mr. BURDICK, Mr. CHILES, Mr. DODD, Mr. WILSON, Mr. RIEGLE, Mr. PRYOR, Mr. HOLLINGS, Mr. KERRY, Mrs. HAWKINS, and Mr. COHEN):

S.J. Res. 348. Joint resolution to designate the week beginning November 24, 1986, as "National Family Caregivers Week"; to the Committee on the Judiciary.

NATIONAL FAMILY CAREGIVERS WEEK

Mr. GLENN. Mr. President, as the ranking minority member of the Special Committee on Aging, I am introducing a joint resolution to designate the week of November 24, 1986, as "National Family Caregivers Week." I am pleased to be joined by Senator HEINZ, chairman of the Aging Committee, and 13 of our colleagues in drawing attention to the dedicated—and often heroic—efforts of those who provide support and care to their family members who are frail and no longer able to fully care for themselves.

Personal care for the frail elderly is provided largely by family members, not by the Federal Government or outside social service agencies. For every person 65 years of age and older residing in a nursing home, it is estimated that there are twice as many persons residing in the community requiring similar levels of care. Eighty percent of the disabled elderly receive care from family members, most frequently from wives, daughters, and daughters-in-law. For many, this is a round-the-clock responsibility that often leaves the caregiver emotionally and physically exhausted.

Most studies examining family caregiving in our society document that the major issue of concern is the stress experienced by caregivers. At a recent Aging Committee hearing that I conducted as a part of my series "Women in Our Aging Society," I received testimony from Mrs. Bernadette Tatman, of Cincinnati, OH, a mother of 10 who is the sole provider of care to her 88-year-old mother and retarded adult brother. She stated that "there was a 6- to 8-month period of time I did not leave the house except for church and the store." Mrs. Tatman's experience is not a typical, and demonstrates the tremendous need for respite care to alleviate some of this stress.

Frequently, caregivers are forced to sacrifice employment opportunities to provide care. The economic status of the caregiver's old age can be jeopardized by this sacrifice, which is another source of stress. Mrs. Tatman stated that "each year I must remain out of the work force, my earning power decreases. Will I be able to get a job again at my age * * *?" Those caregivers who continue to work outside the home face an equally stressful situation in attempting to balance the demands of their jobs and families with their caregiving role. Although women have entered the work force in unprecedented numbers, their traditional responsibilities often have not diminished. The workload for many women has simply doubled.

As Americans are living longer, more and more of us will find ourselves responsible for the care of a loved one. This is especially true for women. It is estimated that 70 to 80 percent of caregivers are women, many of whom are aging themselves. More than 1 in 3 impaired men are cared for by their wives, while only 1 in 10 impaired women are cared for by their husbands. This reflects the fact that women not only tend to marry men older than themselves, but that they live an average of 7 years longer than men. Women also have a higher incidence of long-term chronic diseases than men, and the likelihood of becoming chronically disabled increases with age. The fastest growing segment of our population is those age 85 and older—70 percent of whom are women. Caregiving, then, is in many ways a woman's issue. Growing numbers of women will find themselves at both ends of the caregiving role, first giving care to a loved one, and eventually in need of that care themselves.

Mr. President, I am disturbed by the myth that persists in our society that families are abandoning their elderly family members and "unloading" them to nursing homes and public programs. Nothing could be further from the truth. "National Family Caregivers Week" would recognize the vital role played by families who provide the bulk of personal care for the elderly in our communities.

Family caregivers make enormous sacrifices to provide their loved ones with care; their contributions help to maintain strong family ties, and strengthen intergenerational support. The cash value of caregiving services provided by families far exceeds the combined cost of government and professional services to the elderly living both in the community and in institutions.

We must recognize that the demands for and on caregivers are increasing due to several major trends. The implementation of Medicare's prospective payment system, resulting in many elderly patients being discharged "sicker and quicker," has increased the demand for family members to serve as caregivers. Demographic changes such as the aging of our population, and the decreasing numbers of the "typical" American family in which the husband works and the wife stays home to care for their children will have a profound effect on the caregiving role. The combined impact of Gramm-Rudman budget cuts, Reagan administration initiatives to reduce essential health care services and our concern over the Federal deficit are reducing the availability of services at a time when the need is escalating. For families already burdened to their physical, emotional, and financial limits in caring for a loved one, there appears to be little relief in sight.

"National Family Caregivers Week" recognizes and acknowledges the contributions of family caregivers. However, I believe they deserve a great deal more. It is clear, Mr. President, that we must address this Nation's need for a community-based system of long-term care for chronically ill older Americans. Respite, home health, and adult day care, as well as transportation and other services for the frail elderly need to be expanded. This resolution should not only honor the Nation's dedicated family caregivers but should also signal our intent, despite the realities of the current economic climate, to seek ways to assist them in their critical efforts.

I urge my colleagues in the Senate to join me in establishing "National Family Caregivers Week."

ADDITIONAL COSPONSORS

S. 1622

At the request of Mr. MELCHER, the name of the Senator from Hawaii [Mr. MATSUNAGA] was added as a cosponsor of S. 1622, a bill to promote the development of Native American Culture and Art.

S. 2064

At the request of Mr. WARNER, the names of the Senator from Utah [Mr. HATCH], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of S. 2064, a bill to require the President to make an annual report on the national strategy of the U.S. Government to certain committees of Congress and to require joint committee meetings to be held on such report.

S. 2134

At the request of Mr. HEFLIN, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 2134, a bill to amend title 39, United States Code, to extend to certain officers and employees of the Postal Service the same procedural and appeal rights with respect to certain adverse personnel actions as are to Federal employees under title 5, United States Code.

S. 2152

At the request of Mr. DIXON, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 2152, a bill to amend title 10, United States Code, to require the Department of Defense to exclude from consideration for contracts those firms in which a hostile foreign government or a covered foreign national owns or controls a significant interest.

S. 2160

At the request of Mr. THURMOND, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of S. 2160, a bill to clarify and improve the analysis of mergers under the antitrust laws.

S. 2181

At the request of Mr. D'AMATO, the name of the Senator from Maryland [Mr. MATHIAS] was added as a cosponsor of S. 2181, a bill entitled the "Construction Industry Labor Law Amendments of 1986."

S. 2206

At the request of Mr. NICKLES, the name of the Senator from New Mexico [Mr. DOMENICI] was added as a cosponsor of S. 2206, a bill to amend the Internal Revenue Code of 1954 to repeal the windfall profit tax on crude oil.

S. 2208

At the request of Mr. KENNEDY, the names of the Senator from New Mexico [Mr. BINGAMAN] and the Senator from Ohio [Mr. METZENBAUM] were added as cosponsors of S. 2208, a bill to establish the African Famine, Recovery and Development Fund for the relief, recovery, and long-term development of sub-Saharan Africa, and for other purposes.

S. 2269

At the request of Mr. D'AMATO, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 2269, a bill to amend title 10, United States Code, to permit members of the Armed Forces to wear, under certain circumstances, items of apparel not part of the official uniform.

S. 2280

At the request of Mr. WILSON, the name of the Senator from Kentucky [Mr. FORD] was added as a cosponsor of S. 2280, a bill to amend the Agricultural Act of 1949 to suspend the application of the milk production termination program in order to minimize the adverse effect of the program on beef, pork, and lamb producers.

S. 2294

At the request of Mr. WEICKER, the name of the Senator from Illinois [Mr. SIMON] was added as cosponsor of S. 2294, a bill to reauthorize certain programs under the Education of the Handicapped Act, to authorize an early intervention program for handicapped infants, and for other purposes.

S. 2332

At the request of Mr. BOREN, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 2332, a bill to provide credit assistance to borrowers of loans made by commercial lending institutions, Farm Credit System institutions, and the Farmers Home Administration, and for other purposes.

2333

At the request of Mr. DURENBERGER, the name of the Senator from Florida [Mrs. HAWKINS] was added as a cosponsor of S. 2333, a bill to amend title XIX of the Social Security Act to strengthen and improve medicaid services to low-income pregnant women and children.

S. 2336

At the request of Mr. ABDNOR, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 2336, a bill to protect United States cattlemen from imports of live Canadian cattle, and to require the International Trade Commission to conduct a Section 201 investigation of such imports.

S. 2354

At the request of Mr. MITCHELL, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 2354, a bill to amend the Nuclear Waste Policy Act of 1982 to provide for the disposal of high-level radioactive waste and spent nuclear fuel in a single repository, and for other purposes.

S. 2401

At the request of Mrs. KASSEBAUM, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 2401, a bill to prohibit the manufacture or distribution in, or the importation into, the United States of certain firearms.

S. 2411

At the request of Mr. D'AMATO, the name of the Senator from Virginia [Mr. TRIBLE] and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of S. 2411, a bill to prohibit possession, manufacture, sale, importation, and mailing of ballistic knives.

S. 2422

At the request of Mr. MURKOWSKI, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of S. 2422, a bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans and the rates of dependency and indemnity compensation for surviving spouses and children of veterans; to improve the Veterans' Administration home loan guaranty program; to authorize certain debt collections; to authorize the Administrator of Veterans' Affairs to require additional information from certain fiduciary agents of veterans to revise the authority of the Administrator of Veterans' Affairs to construct, alter, acquire, operate, and maintain parking facilities at Veterans' Administration medical facilities; and to authorize an administrative reorganization in the Veterans' Administration.

S. 2435

At the request of Mr. WILSON, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 2435, a bill to improve international intellectual property protection, to improve foreign market access for U.S. companies that rely on intellectual property protection, and for other purposes.

S. 2445

At the request of Mr. MURKOWSKI, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of S. 2445, a bill to amend title 38, United States Code, to improve certain Veterans' Administration health-care programs.

SENATE JOINT RESOLUTION 143

At the request of Mr. GORE, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of Senate Joint Resolution 143, a joint resolution to authorize the Black Revolutionary War Patriots Foundation to establish a memorial in the District of Columbia at an appropriate site in Constitution Gardens.

SENATE JOINT RESOLUTION 304

At the request of Mr. SIMON, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of Senate Joint Resolution 304, a joint resolution to designate the week of November 16 through 22, 1986, as "National Arts Week."

SENATE JOINT RESOLUTION 333

At the request of Mr. ANDREWS, the names of the Senator from Oklahoma [Mr. BOREN], the Senator from Texas [Mr. BENTSEN], the Senator from Oregon [Mr. PACKWOOD], and the Senator from Pennsylvania [Mr. HEINZ] were added as cosponsors of Senate Joint Resolution 333, a joint resolution designating the week of May 18 through 24, 1986, as "National Food Bank Week."

SENATE JOINT RESOLUTION 334

At the request of Mr. LAUTENBERG, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of Senate Joint Resolution 334, a joint resolution allowing quali-

fied persons representing all the States to be naturalized on Ellis Island on July 3 or 4, 1986.

SENATE JOINT RESOLUTION 342

At the request of Mrs. HAWKINS, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of Senate Joint Resolution 342, a joint resolution to designate May 25, 1986, as "Missing Children Day."

SENATE RESOLUTION 394

At the request of Mr. LAUTENBERG, his name was added as a cosponsor of Senate Joint Resolution 394, a resolution expressing the sense of the Senate regarding the shipment to Poland of dried milk to replace milk contaminated as a result of the nuclear disaster in the Soviet Union.

SENATE RESOLUTION 400

At the request of Mr. ROTH, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of Senate Resolution 400, a resolution to retain current tax treatment of Individual Retirement Account.

SENATE RESOLUTION 402

At the request of Mr. SPECTER, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of Senate Resolution 402, a resolution on minority set-aside programs.

AMENDMENT NO. 1823

At the request of Mrs. KASSEBAUM, the name of the Senator from New Hampshire [Mr. RUDMAN] was added as a cosponsor of amendment No. 1823 intended to be proposed to S. 100, a bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes.

SENATE CONCURRENT RESOLUTION 140—DESIGNATING WILLIAM C. LEE DAY

Mr. SIMPSON (for Mr. HELMS) submitted the following concurrent resolution; which was ordered held at the desk by unanimous consent until Monday, May 19, 1986:

S. CON. RES. 140

Whereas Major General William C. Lee of Dunn, North Carolina, served the United States with distinction in World Wars I and II;

Whereas General Lee was instrumental in conceiving and establishing the use of parachute and glider troops in the United States Army;

Whereas General Lee played a primary role in planning the assault on Nazi forces in France by over 10,000 United States paratroopers in connection with D-Day operations;

Whereas General Lee has become known as the "Father of the United States Airborne"; and

Whereas on June 6, 1986, the homeplace of General Lee in Dunn, North Carolina, will be opened as the William C. Lee Airborne Museum: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring, That the Congress of the United States recognizes the notable contribution of Major General William C. Lee to his country; expresses to his family the appreciation and gratitude of the Nation for his long, faithful, and outstanding military service; and designates June 6, 1986, as "William C. Lee Day".

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the family of Major General William C. Lee.

● Mr. HELMS. Mr. President, I send to the desk a concurrent resolution in honor of Maj. Gen. William C. Lee of Dunn, NC, for his outstanding military service to his country during World Wars I and II, and especially for his role in developing airborne troops as a major part of our Army. On June 6, 1986, the homeplace of General Lee in Dunn will be opened to the public as the William C. Lee Airborne Museum.

Mr. President, this resolution recites several of the achievements of General Lee, including his becoming recognized, deservedly, as the "Father of the United States Airborne"; it further resolves that Congress recognize the contribution of General Lee to his country, expressing the gratitude of the Nation to his family, and declaring June 6, 1986, as William C. Lee Day.

Mr. President, let me also mention that the driving force in giving General Lee the honor he deserves is Hoover Adams of Dunn, editor and publisher of the Dunn Daily Record. Mr. Adams is a longtime friend of mine, a true American patriot, and a dedicated member of his community. Without his efforts and the efforts of others in Dunn, I am confident that there would be no General Lee Airborne Museum. Mr. Adams is owed a debt of gratitude.

Mr. HELMS. Mr. President, I ask unanimous consent that two articles about General Lee be printed in the RECORD. They are "Father of United States Airborne," which appeared in the summer 1958 edition of Airborne Quarterly, and "General From N.C. Immortalized by D-Day Troops," by Dennis Rogers, which appeared in the June 5, 1984, edition of the Raleigh News and Observer.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

FATHER of United States Airborne

(The Airborne Association is resolved to honor the memory of the late General William C. Lee with an Airborne Memorial Library in his home town of Dunn, North Carolina.)

At the Third Annual Meeting of The Airborne Association in 1957, the membership adopted a resolution to endorse and promote the erection of an Airborne Memorial dedicated to the memory of the late Major General William C. Lee.

General "Bill" Lee is known affectionately as the "Father of United States Airborne." Long before there was even a "first test platoon" his sole interest as a young War Department officer was that of laying the groundwork for Army parachute troops.

While serving in the office of the Chief of Infantry, he became interested in applying the use of parachuting to military tactics as a medium for increased mobility in modern war.

At that time, several European countries, including Russia, had piled up a significant lead in airborne experimentation. General (then Major) Lee was the leading member of a small group of officers who, by a combination of vision, persuasiveness and daring, convinced the Army that airborne must be an element of the U.S. armed forces.

In July of 1940, he directed the organizing, equipping and testing of a group of parachutists who are now identified as the "original test platoon." The leaders of this platoon were First Lieutenant (now Colonel) William T. Ryder and Second Lieutenant (later Colonel) James F. Bassett. The latter lost his life in a helicopeter crash at Fort Bragg. The XVIII Airborne Corps Chapter of The Airborne Association is named the Colonel James E. Bassett Chapter in his memory.

Part of the story of the original test platoon is told in the March 1956 issue of Airborne Quarterly in an article titled "Jumping for Centuries."

Through General "Bill" Lee's efforts, the test platoon was expanded on October 1, 1940 into the 501st Infantry Parachute Battalion. In March of 1941 the Battalion was further expanded to form the Provisional Parachute Group at Fort Benning, Georgia, with Lee, by then a Colonel, in command.

Under his inspired direction, additional airborne units, including glider elements, were formed and trained in the new concept of vertical envelopment. In March of 1942, "Bill" Lee was promoted to Brigadier General and ordered to head the new Airborne Command, at Fort Bragg, North Carolina. Airborne Command was the over-all headquarters of all parachute and glider troops.

He personally participated in the numerous tests and experiments involving parachutes and gliders, including body-shocking glider snatch, and was twice injured in these tests.

When Pearl Harbor startled the world in December of 1941, General Lee was in the hospital at Fort Benning in a plaster cast because he had broken his back in a parachute jump. The following day, he borrowed some civilian clothes and went AWOL from the hospital to Washington to plead and argue for expansion of U.S. parachute forces.

It was General Lee's recommendation that one of the infantry divisions being readied for combat in 1942 be converted into two airborne divisions. The 82d Infantry Division, commanded by General Bradley at first, was considered by Army Ground Forces to be the best of the new divisions, General Lee was instrumental in the selection of the 82d to be split up into the 82d and 101st Airborne Divisions in July of 1942.

On General McNair's recommendation, Brigadier General William C. Lee was given command of the 101st Airborne Division and the added star of a major general. The formation of two airborne divisions under command of General Matt Ridgway and Bill Lee was eloquent recognition of the vision of General Lee.

Both the 82d and the 101st were moved from Louisiana to Fort Bragg, North Carolina. There General Lee devoted himself tirelessly to the task of whipping the 101st into shape, setting a constant example of selfless dedication to perfecting his division in the new art of vertical warfare. Typically, on

one occasion, he jumped in a training maneuver while recuperating from pneumonia.

General Lee took the 101st Airborne Division overseas and continued its training in Southern England. Shortly before the Normandy invasion, he was stricken with a heart attack which forced his retirement from active duly in October of 1944.

Only those who worked personally with Bill Lee can appreciate the tremendous outpouring of mental and physical effort that he put into airborne from 1939 to the eve of D-Day in 1944. His was the pick-and-shovel work before promotion and glory. His was the vision that conceived of glider troops before gliders had even been developed. His was the foresight that coined the word "airborne" to allay jealousy between parachute and glider troops.

And his were the dreams and convictions back in 1940 that U.S. Airborne would go into action as divisions, as a corps, and even as part of an allied airborne army. Others were then calling his dreams just figments of imagination that would never become reality.

When hostilities ended and the troops were back home in 1946, historians took time to evaluate the birth and growth of airborne. Every avenue of research into the past of American airborne led back inevitably to Bill Lee. Even before he died in June of 1948, General Lee was called the "Father of U.S. Airborne." And when all else is forgotten about the beginnings of American airborne, Bill Lee will always be remembered as the brilliant visionary who converted a dream of space warriors into the reality of airborne units starting with the first test platoon through to the great Allied Airborne Army of 1944 and 1945.

It is in recognition of the great contributions General Lee made toward the development of a new idea in war that The Airborne Association is resolved to promote an Airborne Memorial in his memory.

Should the memorial be merely a symbolic monument? Should it be located overseas where troopers bled and died? Should it be spotted in the Nation's capital? Or should it be something utilitarian which might serve more fittingly to preserve for posterity the memories of both the living and the dead who helped achieve the glory that surrounds everything associated with American airborne?

These and a host of other considerations were resolved in the decision to promote a utilitarian Airborne Memorial dedicated to the memory of the "Father of United States Airborne"—a memorial to be located in the town of his birth a short half-hour's journey from Fort Bragg, North Carolina, the present day "Home of the Airborne."

Many suggestions have been examined. They range from a $300,000 civic community center to an airborne memorial library in the home of General Lee in Dunn, North Carolina. Mrs Lee has graciously offered to sell the magnificent Lee family home to the Memorial for far less than the cost of constructing a comparable building. This last suggestion seems to be the choice of nearly everyone with whom it has been discussed.

Contributions started coming in immediately after the resolution was adopted in 1957. To handle the financing of the Memorial project separately from normal Association activities, The Association has established "The Airborne Association Memorial Fund." All contributions are segregated in this fund for the specific purpose designated by a donor.

At present, in addition to the Lee Memorial, the fund will eventually provide money for educational scholarships for children of deceased airborne troopers. All donations are entered on a standard form and given a number. The donors are rostered in numerical sequence and the rosters and signed donation forms become a permanent record of the Fund.

A form for your contribution is printed on page 24 of this issue. You are invited to share in the first and only Airborne Memorial for all of airborne and the distinguished "Father of United States Airborne"—General William C. Lee.

GENERAL FROM N.C. IMMORTALIZED BY D-DAY TROOPS

DUNN.—It was 40 years ago tonight when Bill Lee of Dunn became a legend.

He wasn't there when it happened. He was at home in his mansion on Divine Street in Dunn, still trying to recover from a heart attack almost a year earlier.

He didn't know that shortly after midnight, when the first U.S. combat troops landed in the fields and hedgerows of France, it would be his name they would shout as their victory cry.

It was the privates' way of honoring the small-town general from North Carolina they had followed from the swamps of Louisiana to the sandy hills of Cumberland County to the meadows of England to the burning night skies over Normandy.

"Not being there with his men that day was his greatest heartbreak," said Hoover Adams, a Dunn newspaper publisher who served as Bill Lee's aide and friend during World War II.

Maj. Gen. William C. Lee of Dunn did not win his fame or his stars in combat. His was a more thankless task. He was a planner, an organizer and a trainer. But the men he sent into combat—and would have led had his heart not failed—ignited the world's imagination on the day of America's greatest military victory.

It was D-Day, 40 years ago tomorrow, when the military gospel according to Bill Lee was proved true.

More than 10,000 U.S. paratroopers jumped into the darkened skies of France on the night of June 5, 1944, many hours before the troops landed on the Normandy beaches we remember as Omaha, Utah, Gold, Sword and Juno.

Bill Lee had taken a small test platoon of paratroopers and in four years molded them into a crack unit of elite soldiers. They landed behind enemy lines that dark night and, often fighting alone or in small groups hastily put together, bought time for the men who landed on the beaches. That was what Bill Lee had said they could do, and they did it.

And that night, when they leaped from the planes, they did not shout "Geronimo!" as they had been trained. Loaded down with up to 100 pounds of equipment and all the guns and ammunition they could carry, the paratroopers shouted "Bill Lee!" as they hit the silk.

Lee won accolades and medals and the friendship of the famous, but no soldier was ever paid a higher tribute.

Bill Lee grew up in Dunn. He was a hotshot athlete, a big strapping kid who haunted the playing fields and hunting grounds of Harnett County. He went away to college on a baseball scholarship, and they still say he knocked the longest home run ever hit at N.C. State University.

But his would be the life of a professional soldier. He fought in World War I, but it was his peacetime service that made him famous. He was a fast-tracker in the Army, going to all the right schools and serving in all the right, but almost invisible, jobs.

When Hitler was planning his conquest of the world, Bill Lee was there as a military observer, reporting to a disbelieving military that a madman was building a mighty army. Lee also saw Hitler's use of paratroopers and came home convinced that paratroopers could make the difference.

No one wanted to hear that. Lee became such a proponent of air borne training that he once was forbidden to discuss the subject because his bosses were tired of hearing it. But he was right and he knew it, and so did President Franklin D. Roosevelt.

The President listened to the young officer from Dunn and, despite the objections of most of the military brass in Washington, told him to go ahead and see what he could do with his idea of sky soldiers.

"General Lee had been to the World's Fair in New York and seen those parachute towers they were using as rides," Adams said. "He ordered two of them for Fort Benning, Ga."

Using carnival rides and his own belief in what he was doing, Lee took a handful of soldiers with their out-of-date equipment and untried techniques. And when the dust had settled, he was the commanding general of the crack 101st Airborne Division.

Lee was at Eisenhower's side when D-Day was planned. He trained his paratroopers hard for their mission, and to this day the manual on airborne operations he wrote is still being used.

"There is no doubt that Bill Lee would have been the first American to hit France on D-Day," said Adams. "He would have been the first man out of the first airplane."

But it was not to be. Lee suffered a heart attack before the invasion and was sent home to Dunn to recuperate. He died four years later. His heart never healed.

The people of Dunn will remember their most famous son Friday night with a black-tie dress ball. The proceeds will be used to finish the museum the town is putting in Lee's home. Tickets are $100 a couple. You can get information by calling 892-4113 in Dunn.

A reporter once asked Bill Lee who the most important man in the military was. Lee said, "The buck private, of course."

Forty years ago tonight, 10,000 of those buck privates he loved and led painted their faces black, jumped out of airplanes and shouted his name in gratitude.

They were living up to another comment he once made: "You do not have a history," he told his first band of paratroopers. "But you have a rendezvous with destiny."●

SENATE RESOLUTION 408—ELIMINATION OF UNITED NATIONS RETIREMENT ALLOWANCE FOR KURT WALDHEIM

Mr. MOYNIHAN submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 408

Whereas Kurt Waldheim has lied repeatedly about his past, particularly his service as intelligence officer for convicted war criminal General Alexander Lohr;

Whereas such mendacity allowed Kurt Waldheim to rise to the position of Secretary General of the United Nations;

Whereas Kurt Waldheim currently receives $81,650 a year as a retirement allowance for his service in that position; and

Whereas the allowance rewards him for having lied about matters that are at the very heart of the existence and purposes of the United Nations: Now, therefore, be it

Resolved, That the Senate hereby calls upon the President to instruct the Permanent Representative of the United States to the United Nations to introduce in the General Assembly—

(1) an amendment to the 1986-1987 United Nations Regular Program Budget eliminating funding of Kurt Waldheim's retirement allowance; and

(2) a resolution denying Kurt Waldheim a retirement allowance in all budgets after 1987.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

Mr. MOYNIHAN. Mr. President, I rise today to call for the elimination of Kurt Waldheim's retirement allowance from the United Nations budget.

Kurt Waldheim never would have become U.N. Secretary General had he revealed the truth about his Nazi past. But Waldheim was and is a liar. Thanks to the efforts of the World Jewish Congress, the extent of his mendacity is finally becoming known, particularly concerning his service as intelligence officer to convicted war criminal Gen. Alexander Lohr.

Should we now reward Waldheim for having deceived us so thoroughly, so brazenly, and for so long? That is what his retirement allowance represents: $81,650 a year for lying about matters that are at the very heart of the existence and purpose of the United Nations.

If the United States does nothing, we accept what has happened. There is something called shame even at the United Nations.

Mr. President, the resolution I am submitting today would demonstrate our refusal to let Kurt Waldheim benefit from covering up the past. Let that past never be forgotten.

AMENDMENTS SUBMITTED

UNIFORMED SERVICES RETIREMENT COST REDUCTION ACT

HARKIN (AND OTHERS) AMENDMENT NO. 1959

Mr. HARKIN (for himself, Mr. DIXON, and Mr. GRASSLEY) proposed an amendment to the bill (S. 2395) to establish a revised retirement system for new members of the uniformed services, to revise the method of determining cost-of-living adjustments under the revised retirement system, and for other purposes; as follows:

At the end of the bill add the following new section:

SEC. 13. CONGRESSIONAL POLICY REGARDING POSTPONEMENT OF A CERTAIN DEPARTMENT OF DEFENSE CONTRACT.

It is the sense of Congress that the Secretary of Defense should postpone the final award of a contract with respect to Defense Construction Supply Center Solicitation numbered DLA700-85-B-4-4607 (for the purchase of 178 crawler tractors) until Congress has enacted legislation authorizing appropriations for the Department of Defense for fiscal year 1987.

SIMON AMENDMENT NO. 1960

Mr. SIMON proposed an amendment to the bill S. 2395, supra; as follows:

On page 10, beginning with line 17, strike out all down through line 3 on page 12 and insert in lieu thereof the following:

"(B) shall increase the retired pay base of each member and former member of the armed forces entitled to such pay who first became a member of a uniformed service (as defined in section 407(a)(2) of this title) on or after the date of the enactment of the Uniformed Services Retirement Reduction Act of 1986, other than a member or former member retired for disability under chapter 61 of this title, by the same percent by which the retired pay of members and former members referred to in clause (1) is increased.

"(2) Increases in the retired pay of a member or former member referred to in paragraph (1)(B) shall be cumulative and may not be compounded.

QUAYLE (AND OTHERS) AMENDMENT NO. 1961

Mr. QUAYLE (for himself, Mr. DIXON, and Mr. WILSON) proposed an amendment to the bill S. 2395, supra; as follows:

At the end of the bill add the following new section:

SEC. 13. UNDER SECRETARY OF DEFENSE FOR ACQUISITION

(a) CREATION OF POSITION.—Section 135 of title 10, United States Code, is amended—

(1) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) There are two Under Secretaries of Defense, one of whom shall be the Under Secretary of Defense for Acquisition and one of whom shall be the Under Secretary of Defense for Policy. The Under Secretaries of Defense shall be appointed from civilian life by the President, by and with the advice and consent of the Senate.";

(2) in subsection (b), by striking out the second sentence; and

(3) in subsection (c), by striking out the second sentence.

(b) EXECUTIVE SCHEDULE II PAY GRADE FOR UNDER SECRETARY OF DEFENCE FOR ACQUISITION.—Section 5313 of title 5, United States Code, is amended by adding at the end the following new item:

"Under Secretary of Defense for Acquisition.".

GOLDWATER AMENDMENT NO. 1962

Mr. GOLDWATER proposed an amendment to the bill S. 2395, supra; as follows:

At the end of the bill add the following new section:

SECTION . DENIAL OF FUNDS FOR T-46 TRAINER AIRCRAFT PROGRAM

Of the funds appropriated for "Aircraft Procurement, Air Force" for fiscal year 1986, none may be obligated or expended for the procurement of the T-46 trainer aircraft.

WILSON AMENDMENT NO. 1963

Mr. WILSON proposed an amendment to the bill S. 2395, supra; as follows:

On page 9, line 21, strike out the quotation marks and the second period.

On page 9, between lines 21 and 22, insert the following:

"(D) 'Retired pay' includes retainer pay.".

On page 10, line 8, insert "Cost" before "Reduction".

On page 10, line 23, insert "Cost" before "Reduction".

On page 11, line 8, insert "Cost" before "Reduction".

On page 35, line 1, strike out "paragraph (1)" and insert in lieu thereof "subsection (a)".

GLENN (AND OTHERS) AMENDMENT NO. 1964

Mr. GLENN (for himself, Mr. WILSON, Mrs. HAWKINS, Mr. KENNEDY, and Mr. DENTON) proposed an amendment to the bill S. 2395, supra; as follows:

On page 12, strike out lines 1, 2, and 3 and insert in lieu thereof the following:

"(B) After the retired pay of a member or former member has been recomputed under subparagraph (A), increases in such member's retired pay shall be made in the manner prescribed in paragraph (1)(A) rather than in the manner prescribed in paragraph (1)(B).

MOTOR VEHICLE SAFETY AND COST SAVINGS AUTHORIZATION

STAFFORD AMENDMENT NO. 1965

Mr. SIMPSON (for Mr. DANFORTH) proposed an amendment to the bill (S. 863) to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act to authorize appropriations for fiscal years 1986 and 1987, and for other purposes; as follows:

On page 10, line 14, strike "$51,825,000 for fiscal year 1986,".

On page 10, line 20, strike "$331,000 for fiscal year 1986,".

On page 11, line 2, strike "$1,943,000 for fiscal year 1986,".

On page 11, line 8, strike "$475,000 for fiscal year 1986,".

On page 13, strike all from line 19 through page 16 and insert in lieu thereof the following:

SIDE IMPACT PROTECTION

SEC. 302. Not later than 60 days after the date of enactment of this Act, the Secretary shall reopen the rulemaking proceeding terminated on July 12, 1982, to implement Federal Motor Vehicle Safety Standard 214 (49 CFR 571.214). The Secretary shall, not later

than one year after the date of enactment of this Act—

(1) establish performance criteria for improved occupant protection in side impact; and

(2) issue an Advance Notice of Proposed Rulemaking to extend the applicability of such Standard to light trucks, vans, and multipurpose passenger vehicles.

AUTOMOBILE CRASHWORTHINESS DATA

SEC. 303. (a) Section 201 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941) is amended by adding at the end thereof the following:

"(f)(1) The Secretary shall enter into appropriate arrangements with the National Academy of Sciences to conduct a comprehensive study and investigation regarding means of establishing a method for calculating a uniform numerical rating which will enable consumers to compare meaningfully the crashworthiness of different passenger automobile models.

"(2) Such study shall include examination of current and proposed crashworthiness tests and testing procedures and shall be directed to determining whether objective, accurate and relevant information regarding the comparative crashworthiness of different passenger automobile models reasonably can be provided to consumers by means of a crashworthiness rating rule. Such study shall include examination of at least following proposed elements of a crashworthiness rating rule:

"(A) information on the degree to which different passenger automobile models will protect occupants across the range of motor vehicle crash types when in use on public roads;

"(B) a repeatable and objective test which is capable of identifying meaningful differences in the degree of crash protection provided occupants by the vehicles tested, with respect to such aspects of crashworthiness as occupant crash protection with and without use of manual seat belts, fuel system integrity, and other relevant aspects;

"(C) ratings which are accurate, simple in form, readily understandable and of benefit to consumers in making informed decisions in the purchase of passenger automobiles;

"(D) dissemination of comparative crashworthiness ratings for consumers either at the time of introduction of a new passenger automobile model or very soon after such time of introduction; and

"(E) the development and dissemination of crashworthiness data at a cost which is reasonably balanced with the benefits of such data to consumers in making informed purchase decisions.

"(3) Any such arrangement shall require the National Academy of Sciences to report to the Secretary and the Congress not later than 18 months after the date of enactment of this subsection on the results of such study and investigation, together with its recommendations. The Secretary shall, to the extent permitted by law, furnish to the Academy upon its request any information which the Academy considers necessary to conduct the investigation and study required by this subsection.

"(4) Within 60 days after transmittal of the report of the National Academy of Sciences to the Secretary and the Congress under paragraph (3) of this subsection, the Secretary shall initiate a period (not longer than 90 days) for public comment on implementation of the recommendations of the National Academy of Sciences with respect to a rule promulgated under this title establishing an objectively based system for determining and publishing accurate comparative crashworthiness ratings for different passenger automobiles.

"(5) Not later than 180 days after the close of the public comment period provided for in paragraph (4) of this subsection, the Secretary shall determine, on the basis of the report of the National Academy of Sciences and the public comments on such report, whether an objectively based system can be established by means of which accurate and relevant information can be derived that reasonably predicts the degree to which different makes and models of passenger automobiles provide protection to occupants against the risk of personal injury or death as a result of motor vehicle accidents. The Secretary shall promptly publish the basis of such determination.

"(g)(1) If the Secretary determines that the system described in subsection (f)(5) of this section can be established, the Secretary shall, subject to the exception provided in paragraph (2) of this subsection, not later than three years after the date of enactment of this subsection, promulgate a rule under this title establishing an objectively based system for determining and publishing accurate comparative crashworthiness ratings for different passenger automobiles. The rule promulgated under this subsection shall be practicable and shall provide the public relevant objective information in a simple and readily understandable form in order to facilitate comparison among the various makes and models of passenger automobiles so as to contribute meaningfully to informed purchase decisions.

"(2) The Secretary shall not promulgate such rule unless (A) a period of 60 calendar days have passed after the Secretary has transmitted to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Energy and Commerce of the House of Representatives a summary of the comments received during the period for public comment specified in subsection (f)(4) of this section, or (B) each such committee before the expiration of such 60-day period has transmitted to the Secretary written notice to the effect that such committee has no objection to the promulgation of such rule.".

(b)(1) Section 201 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941), as amended by this Act, is further amended by adding at the end thereof the following:

"(h) If the Secretary promulgates a rule under subsection (g) of this section, not later than 3 years after the date of enactment of the National Highway Traffic Safety Administration Authorization Act of 1985, the Secretary shall by rule establish procedures requiring passenger automobile dealers to make available to prospective passenger automobile purchasers information developed by the Secretary and provided to the dealer which contains data comparing the crashworthiness of passenger automobiles.".

(2) Section 2 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901) is amended by adding at the end thereof the following new paragraph:

"(19)(A) The term 'passenger automobile' means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less.

"(B) As used in subparagraph (A) of this paragraph, the term 'multipurpose passenger vehicle' means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 304. Section 403 of title 23, United States Code, is amended by adding at the end thereof the following:

"(g) There is authorized to be appropriated for purposes of carrying out this section not to exceed $31,000,000 for fiscal year 1987.".

INOUYE (AND RUDMAN) AMENDMENT NO. 1966

Mr. BYRD (for Mr. INOUYE (for himself and Mr. RUDMAN)) proposed an amendment to the bill S. 863, supra; as follows:

On page 17, strike all from line 1 through line 14 on page 20, and insert in lieu thereof the following:

TITLE IV—CONTROL OF IMPORTATION OF CERTAIN VEHICLES TO ENSURE COMPLIANCE WITH SAFETY STANDARDS

AMENDMENTS TO THE NATIONAL TRAFFIC AND MOTOR VEHICLE SAFETY ACT OF 1966

SEC. 401. (a) Section 108(b) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(b)) is amended—

(1) by striking paragraphs (3) and (4); and

(2) by redesignating paragraph (5) as paragraph (3).

(b) Section 108 of such Act (15 U.S.C. 1397) is amended—

(1) by redesignating subsection (c) as subsection (f); and

(2) by inserting after subsection (b) the following:

"(c)(1) Except as provided in this subsection and subsection (d), a motor vehicle or item of motor vehicle equipment offered for importation in violation of subsection (a)(1)(A) shall be refused entry into the United States.

"(2) In the case of any vehicle imported under this subsection, the person importing the vehicle shall furnish a bond in the amount of the dutiable value of the vehicle plus the duty, and shall comply with such terms and conditions as it appears to the Secretary appropriate to ensure that any such vehicle—

"(A) will be brought into conformity by such person with all applicable Federal motor vehicle safety standards prescribed under this title within a reasonable time after such importation (as specified by the Secretary); or

"(B) will be exported (at no cost to the United States) or abandoned to the United States.

"(3)(A) Subsection (a)(1)(A) and paragraph (1) of this subsection shall not apply to any motor vehicle if—

"(i) the vehicle is imported by an importer registered under procedures established by the Secretary;

"(ii)(I) the vehicle is determined under subparagraph (C) to be substantially similar to motor vehicles originally manufactured for importation into the United States and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards; or

"(II) where there is no substantially similar United States motor vehicle, as determined by the Secretary, the Secretary determines that the safety features of the ve-

hicle comply with or are capable of being modified to comply with all applicable Federal motor vehicle safety standards, as determined on the basis of destructive test data and such other evidence as the Secretary determines to be adequate;

"(iii) the registered importer pays upon registration and annually each year thereafter (I) such fee as the Secretary reasonably establishes to cover the cost of administering the requirements of this subsection, except those referred to in clause (iv), and (II) such other fee or fees as the Secretary reasonably establishes to cover the cost of processing the bond furnished under paragraph (2), making the determinations under clause (ii), and conducting tests and investigations pursuant to subparagraph (D);

"(iv) the person making modifications to the motor vehicles pays upon registration such fee as the Secretary reasonably establishes to cover the cost of registration and inspection of facilities at which modifications are performed; and

"(v) any modifications to the motor vehicle are performed pursuant to procedures described in support of the petitions approved under subparagraph (C) and are performed at a facility which has been registered by the Secretary under procedures established by the Secretary.

"(B)(i) The amount or rate of fees under subparagraph (A) (iii) and (iv) shall be reviewed by the Secretary and adjusted, if appropriate, by the Secretary at least every 2 years.

"(ii) The amount or rate of any such fee applicable in any calendar year shall be established by the Secretary before the beginning of such year.

"(iii) Fees collected shall be available, to the extent provided in advance by appropriation Acts, solely for use by the Secretary in the administration of the requirements of this subsection.

"(iv) The Secretary shall publish such regulations as may be necessary to ensure that the requirements of this section are fully met.

"(C)(i) The Secretary shall make determinations under subparagraph (A)(ii) upon the petition of a registered importer, and shall expend every reasonable effort to make any such determination within 45 days after the receipt of such a petition. The Secretary shall establish by regulation the information required in any such petition, except that each such petition shall contain information that clearly shows that the vehicle is capable of being brought into compliance with all applicable Federal motor vehicle safety standards. Such information shall include a complete description of all the work to be performed, an engineering analysis (where applicable), and evidence that any modification to be made for purposes of such compliance does not appear to create a violation of any applicable Federal motor vehicle safety standard or a defect relating to motor vehicle safety.

"(ii) In considering any such petition, the Secretary shall give due consideration to any tests or other information available to the Secretary, including any information provided by the manufacturer or other interested parties. The Secretary shall in a timely manner compile a list of petitions received, and shall make such lists available to the public. After such a determination is made, petitioners shall be offered an opportunity to present views and evidence relevant to the determinations made by the Secretary.

"(iii) The Secretary shall annually publish in the Federal Register a list of all determinations made under subparagraph (A)(ii) and shall make available to the public all information and evidence submitted by petitioners after such determinations are made. Other interested parties may also comment on such information.

"(iv) The approval of any such petition shall be sufficient authority for any other importer or manufacturer, to take any action which the registered importer or manufacturer who submitted such petition was authorized to take under such approved petition, if the other importer or manufacturer complies with all terms and conditions of such petition.

"(D) The Secretary shall establish procedures for periodically conducting inspections and tests, including destructive tests, of vehicles pursuant to this subsection to determine compliance with all applicable Federal motor vehicle safety standards. The Secretary shall also establish procedures for periodically inspecting facilities registered under this subsection to ascertain whether such facilities are performing modifications pursuant to this section. The Secretary shall inspect each such facility within one year after the effective date of regulations promulgated under this section or six months after a facility is registered under this subsection, whichever is later. The Secretary may, to the extent funds for such purposes are available, retain the services of temporary employees for the performance of such inspections, if the Secretary determines that it is necessary to retain such services. Such employees shall not, by reason of such employment, be deemed to be Federal employees for any purposes.

"(E) Determinations made under subparagraph (C)(i) shall be revoked if, on the basis of tests and inspections conducted by the Secretary, the Secretary finds that a clear pattern of noncompliance exists with respect to motor vehicles covered by any such determination. The Secretary shall give due consideration to any relevent information submitted to the Secretary under this subsection.

"(4)(A) In order to acquire and maintain registration under this subsection, an importer shall comply with all requirements which the Secretary shall establish under this subsection. Such requirements shall include requirements for recordkeeping, including a record of the make and model of each vehicle and its vehicle identification number, inspection of records and facilities relating to each vehicle which such person has imported or modified, or both, and, for purposes of maintaining registration under this subsection, annual payment and documentation of payment of any applicable taxes and duties provided for under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064) and penalties due under section 508(b)(1) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2008(b)(1)). Upon terminating or transferring its business, such importer shall submit such records to the Secretary.

"(B) The Secretary shall establish procedures for (i) the revocation or suspension of a registration issued under this subsection for failure to comply with any requirement of this Act, including the requirements of subparagraph (A), or regulations issued under this Act, (ii) automatic suspension of registrations for failure to pay any fee referred to in paragraph (3)(A) (iii) or (iv) in a timely manner, and (iii) reinstatement of suspended registrations.

"(5)(A) Prior to the date described in subparagraph (B), a registered importer shall not—

"(i) release custody of an imported motor vehicle to any person for license or registration for use on public roads, streets, or highways; or

"(ii) license or register an imported vehicle for use on public roads, streets, or highways or otherwise operate such vehicle (other than for testing).

"(B) An importer shall not take any action set forth in subparagraph (A) until—

"(i) the registered importer has filed a certification statement with the Secretary signed and containing the following statement: 'This vehicle has been modified in accordance with procedures established in an approved determination and conforms to all applicable Federal motor vehicle safety standards in effect on .' (with the date such certification statement is filed being inserted in the blank space);

"(ii) the Secretary has reviewed and accepted such certification as valid;

"(iii) the Secretary has confirmed that the importer has labeled the vehicle and that the label is prominently displayed in a form to be determined by the Secretary, stating that the vehicle was not originally manufactured to comply with all applicable Federal motor vehicle safety standards but has been modified by the registered importer to comply with standards, and stating the obligations of the registered importer under this subparagraph; and

"(iv) the Secretary has confirmed that the importer has established the fuel economy ratings for purposes of determining the tax due under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064) and has labeled the vehicle to meet the requirements of section 506(a)(1)(C) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2006(a)(1)(C)).

Within 30 days after the date on which a certification statement is filed under clause (i) of this subparagraph, the Secretary shall accept such certification statement and issue a bond release letter, or reject such certification statement.

"(C) A State may require the registered importer to provide to appropriate State authorities a notarized English translation of all title and ownership documentation.

"(D) The Secretary may require that any such certification statement be accompanied by such evidence of compliance as the Secretary considers appropriate, or that the vehicle be inspected by the Secretary, or both.

"(6) For purpose of part B of this title—

"(A) the registered importer shall be deemed to be the manufacturer with respect to all motor vehicles imported by such importer;

"(B) in the case of any defect or failure to comply with any applicable motor vehicle safety standard in or regarding any motor vehicle which was originally manufactured for importation into the United States, any imported motor vehicle that has a valid certification under this subsection and that is determined to be substantially similar to such motor vehicle shall be treated as having the same defect or failure unless the manufacturer or registered importer demonstrates otherwise to the Secretary;

"(C) the Secretary shall publish in the Federal Register notice of any defect or failure referred to in subparagraph (B), and any defect in or failure to comply regarding any motor vehicle imported under this subsection which is reported by the manufacturer of such motor vehicle; and

"(D) the registered importer shall be treated as the manufacturer with respect to

the motor vehicles imported, except that in the case of defects referred to in subparagraphs (B) and (C), the Secretary shall establish procedures to ensure that the original manufacturer of the vehicle or one of its domestic subsidiaries or affiliates shall, at the time of any recall determination affecting such vehicle, cooperate with the Secretary to facilitate a successful and timely recall.

"(7) The Secretary shall, by regulation, establish requirements to ensure that the registered importer (or any successor in interest) will be capable of carrying out the importer's responsibilities under part B of this title. The Secretary shall require each registered importer to provide evidence of sufficient financial responsibility to meet such obligations. Such evidence may include the posting of a prepaid surety bond for each motor vehicle or similar guarantee measures.

"(8) Section 109 shall apply in the case of any violation of the requirements of this subsection, except that the amount of any civil penalty imposed under such section for any such violation shall not exceed $5,000 for each such violation and shall not exceed $800,000 for any related series of violations.".

(c) Section 108 of such Act (15 U.S.C. 1397) is amended by inserting after subsection (c), as added by subsection (b) of this section, the following:

"(d) Subsection (a)(1)(A) and subsection (c)(1) shall not apply to any motor vehicle or item of motor vehicle equipment if—

"(1) it requires further manufacturing to perform its intended function (as determined under regulations prescribed by the Secretary); and

"(2) it is accompanied at the time of entry by a written statement issued by the manufacturer of the incomplete vehicle or item of equipment which indicates the applicable Federal motor vehicle safety standard with which such vehicle or item is in compliance.".

(d) Section 108 of such Act (15 U.S.C. 1397) is amended by inserting after subsection (d), as added by subsection (c) of this section, the following:

"(e)(1) Subsections (a)(1)(A) and (c)(1) shall not apply to any motor vehicle if the vehicle is imported for personal use, and not for resale, by a member of the uniformed services (as defined in section 2101 of title 5, United States Code) or the foreign service (as defined in section 103 of the Foreign Service Act of 1980 (22 U.S.C. 3903))—

"(A) whose permanent duty station or assigned place of employment is outside the United States;

"(B) who has not previously imported a vehicle into the United States under the authority of this section (or subsection (b)(3) with respect to the period before the date of enactment of the National Highway Traffic Safety Administration Authorization Act of 1985); and

"(C) who agrees to have the vehicle modified to meet all applicable Federal motor vehicle safety standards at a facility registered under subsection (c)(3)(A)(iv).

"(2) Subsections (a)(1)(A) and (c)(1) shall not apply to any motor vehicle if the vehicle is imported on a temporary basis for personal use, and not for resale, by any individual who is a member of—

"(A) the personnel of a foreign government on assignment in the United States who is within the class of persons for whom free entry of vehicles has been authorized by the Secretary of State;

"(B) the armed forces of a foreign country on assignment in the United States; or

"(C) the Secretariat of a public international organization so designated under the International Oganizations Immunities Act (22 U.S.C. 288 et seq.).

The Secretary may require such verification of such status as the Secretary considers appropriate. The Secretary shall ensure that any vehicle entered under this subsection will be exported (at no cost to the United States) or abandoned to the United States when the individual involved ceases to reside in the United States and to hold such status.

"(3) The Secretary may exempt any motor vehicle or item of motor vehicle equipment from subsections (a)(1)(A) and (c)(1) upon such terms and conditions as the Secretary may find necessary solely for the purpose of research, investigations, studies, demonstrations or training, or competitive racing events.".

(e)(1) The first sentence of section 501(8) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2001(8)) is amended by inserting immediately before the period the following: "and any importer registered to import vehicles pursuant to section 108(c) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(c))".

(2) Section 502(c)(1) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2002(c)(1)) is amended by inserting immediately after "manufacturer" the first time it appears the following: "(expect a manufacturer registered to import vehicles pursuant to section 108(c) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(c))".

(f) Section 108(a)(1)(A) of such Act (15 U.S.C. 1397(a)(1)(A)) is amended by inserting immediately after "such standard" the following: "and is covered by a certification issued under section 114,".

(g) Section 114 of such Act (15 U.S.C. 1403) is amended—

(1) by inserting ", as appropriate," immediately after "dealer";

(2) by striking "or distributor" wherever it appears;

(3) by inserting immediately after the first sentence the following: "Every distributor of a motor vehicle or item of motor vehicle equipment shall furnish to a dealer or subsequent distributor at the time of delivery of such vehicle or item of equipment the manufacturer's certification that was previously furnished to the distributor."; and

(4) by adding at the end thereof the following: "As used in this section and section 108, the term 'manufacturer' means any person engaged in the manufacturing or assembling of motor vehicles or items of motor vehicle equipment, including any other person who acts for or is under the control of such person with respect to the importation of such vehicles or items of equipment.".

(h)(1) Section 108(a)(1)(A) of such Act (15 U.S.C. 1397(a)(1)(A)) is amended by striking "subsection (b)" and inserting in lieu thereof "subsections (b), (c), (d), and (e)".

(2) Section 108(b)(2) of such Act (15 U.S.C. 1397(b)(2)) is amended by striking "or importer".

(i) The General Accounting Office shall prepare and submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives on July 1, 1988 and on or before July 1 of each year thereafter a comprehensive report on the administration of sections 108 (c), (d) and (e) of the National Traffic and Motor Vehicle Safety Act of 1966, as added by this section. Such report shall include, but need not be restricted to—

(1) a listing of the registered importers and the determinations made by the Secretary under section 108(c)(3)(C) of such Act;

(2) a description by model year and make of the vehicles entered under such section;

(3) an itemization of the number of such vehicles entered, segregated by model number and year;

(4) the degree of observed compliance with applicable Federal motor vehicle safety standards;

(5) a description of the efforts undertaken by the Secretary under section 108(c) (3) and (4) of such Act, including tests and investigations conducted and the results of such tests and investigations;

(6) an accounting of the fees collected and expended by the Secretary pursuant to section 108(c)(3)(A) (iii) and (iv) of such Act;

(7) an assessment of the Secretary's compliance in processing certification statements under section 108 of such Act in a timely manner and a compilation of the number of certification statements received;

(8) compliance with any requirement of applicable taxes and duties provided for under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064); and

(9) such other information as the General Accounting Office considers appropriate.

The report shall contain such recommendations for additional legislation as is considered necessary to ensure that motor vehicles not originally designed or manufactured for compliance with all applicable Federal motor vehicle safety standards are being properly brought into compliance following importation into the United States.

(j) The Secretary of Transportation shall prepare and make available to the public information on the importation of motor vehicles into the United States and procedures to be followed to bring such vehicles into conformity with Federal motor vehicle standards.

(k) The Secretary of Transportation shall conduct a study on the effectiveness of the amendments made by this section in ensuring compliance with applicable motor vehicle safety standards and enhancing motor vehicle safety. Such study shall be submitted to the Congress not later than 36 months after the date of enactment of this Act. Following receipt of such study, the Congress shall determine and enact, if any, those changes to existing law which it considers appropriate. Such changes may include termination of the conditional importation of nonconforming vehicles, repeal of this title, or appropriate modifications of procedures provided for under this title.

(l)(1) The Secretary of Transportation shall promulgate such regulations as may be necessary to implement the provisions of this title as soon as practicable, but in no case later than eight months after the date of enactment of this Act. The amendments made by this title shall take effect three months after such regulations become effective, except that such amendments shall take effect prior to the expiration of such three-month period with respect to any model of a vehicle for which a determination is made under section 108(c)(3)(C) of the National Traffic and Motor Vehicle Safety Act of 1966 (as added by subsection (a) of this section), as soon as such determination is made.

(2) Any person may commence a civil action on such person's own behalf against the Secretary of Transportation to compel the Secretary to promulgate regulations under this section where there is alleged a failure by the Secretary to promulgate such regulations by the date specified in paragraph (1) of this subsection. The United States Court of Appeals for the District of Columbia shall have jurisdiction over such action and may award costs of litigation (including reasonable attorney's fees) to the prevailing party (other than the United States Government) whenever the Court determines that such award is appropriate. Any petition under this paragraph shall be granted an expedited hearing by the Court.

(3) As soon as possible after the date of enactment of this Act, the Secretary of Transportation shall take steps designed to encourage notification regarding the changes made by this section to members of the uniformed services and other individuals who may be affected by such changes.

NOTICES OF HEARINGS

SUBCOMMITTEE ON CIVIL SERVICE, POST OFFICE, AND GENERAL SERVICES

Mr. STEVENS. Mr. President, I wish to announce that the Subcommittee on Civil Service, Post Office and General Services, Senate Governmental Affairs, will hold a joint hearing with the House Post Office and Civil Service Committee on Wednesday, June 18, 1985, at 10 a.m. in room SD-342, Dirksen Senate Office Building. The purpose of this hearing will be to receive testimony from the members of the Postal Rate Commission on the results of their study, which will be released on that date, on the use and abuse of the preferred mail rate.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee will hold an oversight hearing on the implementation of the Prompt Payment Act, Public Law 97-177, on Thursday, July 19, 1986. The hearing will commence at 10 a.m. and will be held in room 428A of the Russell Senate Office Building. For further information, please call William B. Montalto, procurement policy counsel for the committee at 224-5175.

Mr. President, I would like to announce that the Senate Small Business Committee will hold a full committee markup on Wednesday, May 21, 1986 on S. 2147, a bill to reauthorize the eligibility of sheltered workshops to compete on Federal procurement contracts and H.R. 2787, a bill to extend the Small Business Administration Pilot programs under section 8 of the Small Business Act. The markup will commence at 10 a.m. in room 428A of the Russell Senate Office Building. For further information, please call Bob Wilson, chief counsel for the committee, at 224-5175.

Mr. DOLE submitted the following notice on behalf of Mr. MATHIAS:

COMMITTEE ON RULES AND ADMINISTRATION

● Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will meet in SR-301, Russell Senate Office Building, on Wednesday, May 21, 1986, at 2 p.m., to conduct a business meeting.

On the legislative agenda, the committee will be considering S. 2255, concerning official mail costs; an original bill to authorize appropriations for the Federal Election Commission for fiscal year 1987; an original bill that would amend 2 U.S.C. 58a in order to authorize the Senate Sergeant at Arms to pay for State long-distance telephone charges based on the amount of time the service is used; Senate Concurrent Resolution 123, to permit the 1986 Special Olympics Torch Relay to be run through the Capitol Grounds; two printing resolutions for the House of Representatives (H. Con. Res. 288 and H. Con. Res. 301); an original resolution to amend rule XXXV of the Standing Rules of the Senate so that the chairman of the Ethics Committee can give notice in the CONGRESSIONAL RECORD of approval of foreign travel by a Member, officer, or employee after the foreign travel has concluded; and several original resolutions to pay gratuities to survivors of deceased Senate employees.

Administrative business scheduled to be considered includes the following: use of the official office expense account to defray the cost of drug testing for Senate staff, and requests from the Sergeant at Arms that his office assume responsibility for office automation training and that funds from the Computer Center budget be reprogrammed.

For further information concerning this meeting, please contact Carole Blessington of the Rules Committee staff on extension 40278.●

SUBCOMMITTEE ON PUBLIC LANDS, RESERVED WATER, AND RESOURCE CONSERVATION

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public that a public hearing has been scheduled before the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources on Thursday, July 17, 1986, at 10 a.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC 20510. Testimony will be received on S. 2412, to withdraw and reserve certain public lands.

Those wishing to testify should contract the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources, room SD-308, Dirksen Senate Office Building, Washington, DC 20510. Oral testimony may be limited to 5 minutes per witness. Witnesses may be placed in panels, and are requested to submit 25 copies of their testimony 24 hours in advance of the hearing, and 50 copies on the day of the hearing. For further information, please contact Tony Bevinetto or Patty Kennedy of the subcommittee staff at (202) 224-0613.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce, for the information of the Senate and the public, that on Monday, June 9, and Tuesday, June 10, 1986, the full Committee on Energy and Natural Resources will convene oversight hearings on clean coal technology and strategies for acid rain control.

The general purpose of these hearings is to provide, from the macroperspective, a review of the relationships between implementation of the DOE Clean Coal Technology Program and proposed strategies for the control of acid rain. In this regard, the hearings will examine the relationship between the timetables for both the demonstration of clean coal technologies and those proposed for the control of acid rain. The hearing also will examine the relationship between these timetables and current utility planning schedules.

The primary objectives of these hearings are to first review the recent United States-Canadian agreement on acid rain, including the administration's position; second, review of the types of proposals received under the clean coal technology solicitation, for example, whether these proposals reflect utility and regulatory requirements—for example, whether the proposals are suitable for retrofit, repowering, or new construction; third, examine the potential regulatory and other barriers to the development and deployment of clean coal technologies; fourth, review the comparative costs of current and proposed sulfur oxide and nitrogen oxide controls with current and future clean coal technologies; and fifth, review, from the perspective of State regulatory bodies—for example State public utility commissions—and industry, the economic and environmental implications of proposed acid rain controls.

Other objectives for the hearings, as time permits, are first, to provide an update on current knowledge with respect to the causes and effects of acid precipitation since the committee's April 30, 1984, hearing on the subject; second, to review current knowledge on identification and assessment of cost-effective approaches for the reduction of emissions of pollutants linked to acid rain; and third, to examine the energy, environmental, and economic implications of recent legislative and regulatory proposals for reducing sulfur oxide emissions from fossil fired energy sources.

These hearings will begin at 10 a.m. in room SD-366 of the Dirksen Senate Office Building. Those wishing to submit written statements for the record should transmit 10 copies to the Senate Committee on Energy and Natural Resources, room SD-358, Dirksen Senate Office Building, Washington, DC 20510. For further information, please contact Richard D. Grundy, director of oversight and investigations, at (202) 224-2564 or Jeffrey Arnold, professional staff member, at (202) 224-5205.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public, that the Committee on Energy and Natural Resources has scheduled an oversight hearing on Thursday, June 19, 1986, beginning at 9:30 a.m. in room SD-366 of the Senate Dirksen Office Building, Washington, DC.

The purpose of this hearing is to receive testimony on the Chernobyl accident and implications for the domestic nuclear industry. Those wishing to testify or submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, U.S. Senate, Washington, DC 20510. For further information regarding this hearing, please contact Ms. Marilyn Meigs or Mr. K.P. Lau at 202-224-4431.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. WILSON. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, May 15, to hold a hearing on S. 2197, Federal Employees Optional Early Retirement Act of 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY, AND SPACE

Mr. WILSON. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology and Space, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on Thursday, May 15, 1986, in order to conduct a hearing on the fiscal year 1987, National Science Foundation authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. WILSON. Mr. President, I ask unanimous consent that the Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, May 15, in closed session, to markup the fiscal year 1987 intelligence authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. WILSON. Mr. President, I ask unanimous consent that the Committee on Agriculture be authorized to meet until 1 p.m. during the session of the Senate on Thursday, May 15, 1986, in order to conduct a hearing on the possible impact on agriculture due to the explosion in the Soviet Union of the nuclear plant, Chernobyl.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

GARRISON DIVERSION UNIT

● Mr. McCLURE. Mr. President, on April 28, 1986, the Senate took from the desk and passed without amendment H.R. 1116, the Garrison Diversion Unit Reformulation Act of 1986, thereby clearing the measure for signature into law by the President.

Mr. President, the quick passage of H.R. 1116 reconfirms the longstanding policy of the Senate Committee on Energy and Natural Resources that in authorizing or reauthorizing water resource development projects to be undertaken by the Department of the Interior's Bureau of Reclamation, each legislative proposal should be crafted on a project-by-project basis. This policy of crafting authorizing legislation to reflect the unique circumstances surrounding a particular project has held in good stead over the years and is reflected in the outstanding performance of the reclamation program.

I know of no Government program that has returned more to the taxpayer or the Nation at large than the investment the Congress has made in the reclamation program. I attribute much of that success to the thorough examination each project and related legislation must undergo and the recognition by the Congress that each project is unique and may require specific legislative language to address unusual circumstances. In that regard, I can think of no better example of unusual circumstances than those surrounding the passage of the Garrison Diversion Unit Reformulation Act of 1986.

Mr. President, my colleagues are all familiar with the legislative history of the Garrison diversion project and the controversy which has surrounded the project for over 20 years. Since initial authorization in 1944, the Congress has repeatedly held out to the farmers and citizens of North Dakota the promise of comprehensive water resource development for their State; only to snatch it away when confronted with criticism or objections. With passage of H.R. 1116, that time has passed and I hope that we can move ahead in fulfilling that promise. It has been a long process, but I am confident that each of the objections to the Garrison diversion unit has been addressed by the provisions of H.R. 1116.

The Garrison project is unique in its regional, national, and international implications. The process by which the Garrison Diversion Unit Reformulation Act was achieved was also unique. The Garrison Diversion Unit Commission, created by act of Congress, recognized not only the special circumstances of the resource base upon which to reformulate the project, but also the unusual historical context as well. I admire the efforts of the Commission and the courage of the North Dakota congressional delegation in recommending and adopting elements of the legislation which may be contrary to the historic and traditional methodology which the Congress has adopted in authorizing water resource development projects, but for which there is application to the unique Garrison situation.

I would briefly cite several elements which are applicable only to the Garrison project:

The House report (99-525) provides that mitigation "is to precede, or at least be concurrent with * * * construction * * *" I think my colleagues will agree that this is a novel concept; that is, that the Federal Government is in the position of obligating funds and undertaking fish and wildlife mitigation efforts for a project which has not yet been constructed and may in fact never be constructed.

The act also provides for straight line repayment of irrigation costs allocated to power revenues for repayment in a period not to exceed 40 years. This is an unusual requirement given the vagaries of precipitation and the resultant impact on hydroelectric power production. It will be interesting to note the response on the part of the consumer and dependent utilities to rate changes resulting from this unwise policy.

The act also provides for a 10-percent "full cost" surcharge on water delivered for use in the production of surplus crops. I am very aware of the philosophical debate which is taking place regarding the production of surplus crops on lands served by reclamation projects and I believe that the imposition of such a surcharge strikes at the very heart of the reclamation program—efforts to promote the family farm. Under reclamation law, the farmer already pays all that he can based upon his ability to pay. The surcharge is over and above that amount and frankly, I don't know how the Garrison farmer will be able to afford it.

There are also several other elements of the bill dealing with fish and

wildlife resources which are unique to a reclamation project authorization and I would cite the creation of a wetlands trust and the Commission's recommendation of a binational program for acquisition of wildlife habitat in Canada and the United States. Both are interesting concepts, but unrelated to the Garrison project and the mitigation of adverse environmental impacts should the project be constructed.

I would also note in passing the rather bizarre rationale contained in the House report on H.R. 1116 as to why indexing was not included for the authorization of construction funds for the irrigation portion of the project. Apparently, the "committee believes this is the best way to ensure oversight of the construction progress on the project." As my colleagues understand and appreciate, the respective appropriation and authorizing committees of the House and Senate are kept well advised by the President's annual budget submittal to the Congress as to the progress of all Bureau projects under construction. To single out the irrigation portion of the Garrison project as requiring additional authorizing legislation or oversight activities is without parallel. As for forcing oversight on the part of a congressional committee by not authorizing indexing of construction costs, this is novel indeed.

There are also elements of the bill in keeping with past committee and congressional practice. I would note, for example, two elements of the act. First, there is no requirement for an up-front financial contribution by a non-Federal party. This is in keeping with the Committee on Energy and Natural Resources' policy on cost-sharing whereby such requirements are crafted to meet the economic viability of each project proposal. Next I would cite authorization of a $200 million grant for construction of rural water supply systems in the State of North Dakota. This application of the grant concept is similar to what Congress provided for in the authorization for the WEB pipeline in South Dakota and what is being contemplated for other rural water supply systems.

Given the circumstances, there is no question in my mind that it was necessary to adopt unique provisions for the Garrison project to ensure passage of a bill. As Senator ANDREWS noted in his comments during final passage of the bill: "That Commission has acted. The report has been studied by the other body, and while the final results in the other body after 7 long months are not what we in North Dakota nor perhaps too many others would like, it is a compromise. It is the best package we can get and we would hope that we can pass it through the Senate because we are long behind the time that we needed to get it." In response to the good Senator's remarks I can only respond with a strong "amen."●

JEWISH HERITAGE WEEK

● Mr. GLENN. Mr. President, this week is Jewish Heritage Week and we take this opportunity to recognize the enormous richness and diversity of the heritage of the Jewish people.

The inspiring history of the Jewish people has been one of both great trials and great accomplishments. It is a legacy that has touched the human spirit since ancient times. In our time, the Jewish community has enriched our Nation in virtually every field of endeavor and has contributed to the diversity of American life. It is difficult to think of a single dimension of American life that has not been touched, if not strongly influenced, by the contributions of the Jewish community.

But while we remember the accomplishments of the Jewish people, we must also remember the grave trials of the past. The tragic past of the Jewish people—the horrors of the Holocaust and the pervasiveness of anti-Semitism—must never be forgotten. This is why America must not forget the tragic plight of Soviet Jewry that exists today. The Jewish people have endured enormous hardship and persecution for centuries and the Soviet Union has been a leading force in anti-Semitism in the 20th century. I am pleased to have been a cosponsor of Senator MOYNIHAN's resolution expressing support for last Sunday's Solidarity Sunday for Soviet Jewry. Such events are vital to keep the plight of Soviet Jewry alive in our consciences.

Mr. President, in recognizing Jewish Heritage Week, we recognize both the contributions of Jews to civilization and the unique tribulations Jews have been forced to bear throughout human history. As Americans, we must continue to stand up for the basic principles of human rights and religious freedom by which this Nation was created.●

FRAUD AGAINST THE GOVERNMENT

● Mr. McCLURE. Mr. President, recently the Wall Street Journal had an interesting editorial concerning S. 1134 and S. 1562, which are both bills written with the good intention of trying to deal with the problem of fraud against the Government.

I found the editorial to be a very succinct analysis of why the approach taken in the bills may, however, be somewhat misguided and even dangerous.

In particular, a number of organizations and individuals have expressed their dismay at the new powers these bills would give to the Federal bureaucracy. They question, as do I, the wisdom of these broad grants of power to unelected officials who are not part of the judicial system.

The organizations include the American Farm Bureau, the Aerospace Industries Association of America, Inc., the American Electronics Association, the Associated General Contractors of America, the Computer and Business Equipment Manufacturers Association, the Electronic Industries Association, the National Association of Manufacturers, the National Council of Technical Service Industries, the Professional Services Council, the Scientific Apparatus Makers Association, the Semiconductor Industry Association, and the U.S. Chamber of Commerce.

Mr. President, I ask that the Wall Street Journal editorial be printed in full as if read at the conclusion of these remarks. I further ask that my colleagues, at least those who may not already have done so, to study the content of these bills and to reflect on their possible implications for civil liberties should they be enacted.

The editorial follows:

OPEN-ENDED ASSAULT ON LIBERTIES

(By Paul Craig Roberts)

The next time you make a careless mistake on your federal income-tax return it could cost you $10,000. At least, that will be the case if Sen. Charles Grassley (R., Iowa) and Sen. William Cohen (R., Maine) succeed in getting their bills passed. S. 1562 and S. 1134 are legislative responses to sensational reports of defense contractors billing the Pentagon for $600 toilet seats and $100 screwdrivers. Designed to beef up the government's ability to deal with fraud and abuse, the bills would expose ordinary citizens to unusual legal procedures.

The bills would cross the lines between civil and criminal law and strip the accused of the rights of criminal defendants and the protections of the evidentiary rules and discovery process provided in civil-court proceedings. Under the bills, fraud would no longer be premised upon the motives of the accused or require proof of knowledge, culpability or intent. Defendants could be fined $10,000 for each false statement made to a federal agency, regardless, in the case of S. 1134, of whether the defendant knew the statement was false or the government suffered a loss as a consequence. Moreover, the bills taken together would establish a procedure whereby the defendant would be accused, investigated, tried and sentenced by the federal agency itself without any trial in court. Indeed, provisions such as Section 803(f)(2)(B) of S. 1134 do not seem to grant the accused any real right to be heard.

Proponents of the bills claim that these changes are necessary to catch defrauders who claim lack of knowledge or intent to defraud as a legal defense. However, the net would be so wide it could as easily catch anyone who makes an honest mistake.

S. 1134 would also establish new and apparently unlimited subpoena powers in the office of the inspector general of each federal agency. Anyone could be subpoenaed and compelled to testify. The government would not be required to inform a subpoenaed person of the reason for the subpoena nor of the subject of investigation. The bill does

not even provide for the accused to have access to the testimony taken from other people in the investigation. This procedure would be a marked departure from the normal discovery proceedings in civil litigation in which all parties are entitled to representation at all depositions and in all discovery proceedings. In effect, the bills would give the government the powers of criminal investigation in civil proceedings, while stripping the defendant of the normal protection of the law.

It would be an unusual development in the American legal system to give such power to the federal bureaucracy. It is therefore, disturbing that the Senate Judiciary Committee and Governmental Affairs Committee have voted to report the bills to the Senate—and without any outcry from the Civil Division of the Department of Justice. In Washington the lust for power is overwhelming, and it is combining with political demagogy about defense contractors to lead the country away from its legal traditions. The silence of the hardcore liberals is as extraordinary as the bills themselves.

Another feature of the ususual legislation now before the Senate is worthy of notice. S. 1562 would permit private *qui tam* suits by people who have no connection whatsoever to a perceived abuse. In other words, anyone and everyone who heard on the evening news that a defense contractor overcharged or made a false statement could sue the contractor in court. The provision would not be limited to defense contractors and, obviously, could be widely used to settle personal grudges. This is an extraordinary development for a Reagan administration that was going to get government off people's backs.

If these bills become law, the cost of doing business with the federal government would rise and could become prohibitive for many. Not only would new federal procurement procedures be piled on top of existing procedures, greatly multiplying paper work, but also the risks of doing business with the government would be greatly increased. Federal contractors would have to adopt the excruciating legal evaluation of each word that characterizes filing before the Securities and Exchange Commission. The same risks would be faced by people who apply for Social Security, Medicare, food stamps, student loans or any federal program.

Perhaps these bills have the Machiavellian purpose of cutting back the size of government by making it too costly for anyone to have any dealings with the government. It is hard to imagine people voluntarily doing business with the government when the activity would expose them to star chamber proceedings.●

HELPING MINORITY BUSINESS WORK

(By request of Mr. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. CHILES. Mr. President, there has been a justifiable and spirited debate over the role of race and gender set-asides in contractual awards and procurement. It is not a debate that is new to government. Neither is it an issue that is new to this Senator nor others in the Congress who have worked in this vineyard.

In 1977 and 1978, I conducted an investigation into the 8(a) set-aside program in the Small Business Administration, through my Subcommittee on Governmental Affairs. We found some very definite problems in relationship to those procurement awards, particularly in the food service industry. However, the investigation did more than "point with alarm." We also suggested some reforms that would get rid of the so-called "fronts" and restore credibility to the set-aside program in SBA. Some of those reforms were implemented and some were not. Nevertheless, significant strides were made in assisting minority and women-owned businesses in the SBA.

The Civil Rights Commission draft report which called for a 1-year moratorium on Federal set-asides for minority and women-owned businesses was quite properly returned to the staff for further review. I hope in laymen's terms, this action effectively kills that report. If the Commission seriously desires to study the problems facing minority and women-owned businesses and want to make the program work more effectively and more efficiently, then I certainly would applaud their attempt to do that.

Minority business persons are making some headway toward the economic mainstream in this country and a constituent of mine, John W. Ruffin, Jr., is part of that story. John Ruffin is a 60-percent owner of station WRBD in Fort Lauderdale and also chairs the Broward Urban League.

Mr. President, recently Marlene Sokol of the Miami Herald wrote a very interesting article on John Ruffin and his struggle to make WRBD a strong radio voice in south Florida.

I ask that the article by Ms. Sokol be printed in the RECORD.

The article follows:

STATION OWNER TUNES IN ON BLACK CONCERNS

(By Marlene Sokol)

John Ruffin did not set out to make WRBD, 1470-AM, the only black-owned radio station in South Florida. But it was no accident.

"I asked plenty of white people to invest in this station," he says, barely two months into his new job as general manager and 60 percent owner of the station. "But no one in South Florida would help me. I didn't even get my financing from Florida; it came from Chicago."

Today Ruffin, 44, is trying to boost profits at the 23-year-old station and looking back on two turbulent years.

His former employer, Pantry Pride, escaped takeover by Devon Stores in 1984, but was swallowed by the MacAndrews & Forbes investment firm in 1985. Ruffin, then vice president for general merchandise, lost his job last February.

He tried for a year to earn a living as a marketing consultant. That didn't work. He sank his energies into a newsstand concession at the Fort Lauderdale/Hollywood International Airport. The business, of which he owns 20 percent, has eaten $250,000 but is years from profitability.

In between, Ruffin became "a professional meeting-goer"—active in dozens of community organizations.

Finally, he got together with his college roommate, his sister-in-law and an old family friend from New Jersey. They raised $2 million and bought WRBD from Sconnix Broadcasting—which also owned and still owns WMXJ-FM—in March.

"What did I know about radio?" he says in a rare glib moment. "How to turn it on and how to turn if off."

Somewhat unintentionally, he has become an outspoken advocate of black enterprise. Not just a radio manager, but manager of South Florida's only black-owned station. In addition: Chairman of the Broward Urban League, co-chairman of Project Horizon's minority business task force and first vice chairman of the Broward Employment and Training Administration.

Carlton Moore, president of Broward branch of the National Association of Colored People, calls Ruffin "one of the few people I know who are both willing and able to do things for the African American community—willing to offer his time and able, with his educational and professional background."

Six months ago, at a heated meeting of Project Horizon's steering committee, Ruffin convinced the economic development organization to devote one of its five task forces to minority business development.

"I've lived in Broward County for more than five years, and I've seen this place change from a rural community to a megalopolis," he says, seeming comfortable in a windowless, nondescript office personalized by life-sized photographs of his two small children.

"And there ain't no black folks taking part in this. We've doubled our office space in the past two years, and I don't know any blacks who have had contracts to build any of those buildings—not even to sweep the floors."

Hardly radical statements. But Ruffin has not always been known as an activist. He has assumed that role relatively recently, having learned some painful lessons about corporate America at Pantry Pride and in his search for financing for his radio station.

For much of his life, his image has been that of corporate climber.

"He always seemed to have a business sense about him," said Jacksonville lawyer Reese Marshall, Ruffin's former roommate and 25-percent owner of the station. "John always seemed to know exactly what he was doing and where he was going."

Ruffin, an only child, was born in rural North Carolina and raised in Virginia, Tennessee, and New York. His parents were divorced when he was 5. He went from Morgan State University in Baltimore to New York in 1963 to work in the city's welfare department.

After a year as a case worker, he grew bored and frustrated. He quit his $5,400-a-year job and signed up as a management trainee—"a glorified clerk"—at a Grand Union supermarket.

"He was always the first person in the store in the morning and always seemed to be closing the place up at night," Marshall recalls. Ruffin describes the experience as "humbling." He became an assistant store manager, then a store manager, then national merchandising manager.

He took a year off in 1970 to earn a master's degree at Cornell University, writing his thesis on *Attitudes and Behavior of*

Black Low Income Urban Food Shoppers. In it, he tried to dispel the myths that black shoppers try to avoid white-owned stores, that poor blacks prefer mom-and-pop stores to supermarkets, and that black shoppers are less inclined to buy name-brand products. Then he returned to Grand Union.

But by 1979, he was looking for another challenge. So he joined Food Fair, which was then reorganizing under Chapter 11 of the U.S. Bankruptcy Code.

Food Fair spun off Fort Lauderdale of Pantry Pride and Ruffin was named vice president. In addition to marketing nonedible products, he supervised Pantry Pride's store in the Bahamas. Under his supervision, he says, the Bahamas Pantry Pride increased 45 percent.

But Pantry Pride was not long for the supermarket world. Management realized that the company's best asset was, paradoxically, the fact that it had lost more than $300 million. These paper losses could best be used if Pantry Pride bought a large manufacturing company that needed to shelter its pretax earnings.

Eventually, Pantry Pride sold its supermarkets and swallowed Revlon, a cosmetics manufacturer three times its size. Ruffin, proud of his success in the Bahamas, assumed his job would be safe.

He was wrong.

In February 1985, Ruffin was one of several Pantry Pride executives who were let go as the company began its retreat from the grocery business. "I couldn't believe it—not after I had done that many flips and turns, after I had had such success in an operation that they had sworn would not make another cent," he said.

Supermarket President Leonard Slider says that though Ruffin was an excellent buyer and merchandiser, he was no longer needed as the firm's supermarket operations shrank. Ruffin says he's not sure.

"The reality set in, the reality that there is a limit to how far you can go in a corporation," he said. "They'll let you go pretty far—very far. But there's always a limit, and you cannot go beyond it."

Today, few would describe Ruffin as all-business. His life is governed by a black appointment book that is always filled. Breakfast with Fort Lauderdale's Downtown Council. Lunch with Slider of Pantry Pride. Night-time promotions for the station. Weekend duties as his church's finance chairman. He often does not see his Coral Springs home until 10 or 11 p.m. Dorothy, his wife, helps run the airport concessions.

At civic functions, Ruffin is part salesman, selling commercial time on WRBD, a lively station that broadcasts everything from Prince to Motown from southern Palm Beach County to the Bahamas.

He laments the reluctance of some white advertisers to buy his product. "They'll tell me, 'That's really not our market,'" he said. "And meanwhile, I was in a shop Saturday, trying on suits, and I must have seen five [black] people in there besides me. All buying. I must have seen $1,000 worth of business go into that store in five minutes. But these people are like the guy in Ralph Ellison's book, *The Invisible Man.* They don't exist."

At work, he is as much activist as businessman, trying to blend political programming into the station's musical format. Already, he is changing WRBD's logo from "where the music is fresh" to "your community station," community meaning black. Moore applauds WRBD's additional public service announcements and its support for such events as NAACP membership drives and Urban League workshops.

Ruffin resents assumptions that his success has come easily. "People look at me and they say, 'It can't be that hard to go into business,'" he said. "What they don't realize is that it took me 10 months to put this deal together, and that I had to travel all over the country for financing."

And he hardly considers WRBD a model for black business investment. Ideally, he says, he should have been able to buy a controlling interest without ending up with a totally black-owned station.

On the subject of revenues, Ruffin only says that the station is and always has been profitable. He will not divulge dollar amounts.

Already, Ruffin says he is in preliminary negotiations to buy other stations. He hopes to buy at least one within 18 months. Said Moore: "I don't know how political he intends to make his programming. But he has the potential to really mobilize the community." ●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the notification which has been received. The classified annex referred to in the covering letter is available to Senators in the office of the Foreign Relations Committee, room SD-423.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, May 13, 1986.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 86-32 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter(s) of Offer to Egypt for defense articles and services estimated to cost $42 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

GLENN A. RUDD,
Acting Director.

[Transmittal No. 86-32]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b)(1) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Egypt.

(ii) Total estimated value: Major defense equipment,[1] $36 million; other, $6 million; Total, $42 million.

(iii) Description of articles or services offered: Five hundred sixty AIM-9L SIDEWINDER missiles, spares, support equipment and services.

(iv) Military department: Navy (AAP).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annex under separate cover.

(vii) Section 28 report: Case not included in section 28 report.

(viii) Date report delivered to Congress: May 13, 1986.

POLICY JUSTIFICATION

EGYPT—AIM 9L SIDEWINDER MISSILES

The Government of Egypt has requested the purchase of 560 AIM-9L SIDEWINDER missiles, spares, support equipment and services. The estimated cost is $42 million.

This sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in the Middle East.

These AIM-9L missiles are needed by Egypt to use with their F-16 aircraft. Egypt previously purchased AIM-9L missiles from the United States; accordingly, Egypt will have no difficulty absorbing these missiles into its armed forces.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractors for this sale will be the Raytheon Corporation of Lowell, Massachusetts and Ford Aerospace Corporation of Newport Beach, California.

No additional U.S. Government personnel or contractor representatives will be required in Egypt to implement this proposed sale.

There will be no adverse impact on U.S. defense readiness as a result of this sale. ●

PORK-BUSTER AMENDMENT

● Mr. QUAYLE. Mr. President, I plan to introduce the pork-buster amendment to the urgent supplemental to put a permanent stop to pork-barrel politics on approriations. As Congress struggles to meet the Gramm-Rudman-Hollings deficit limit, efforts to eliminate unnecessary, ill-advised spending become even more crucial. The urgent supplemental is a good place to begin such efforts of fiscal responsibility.

I have been a proponent of granting the President use of a line-item veto, but I am aware that many have argued that such authority would erode the constitutionally defined separation of powers between the execu-

[1] As defined in section 47(6) of the Arms Export Control Act.

tive and legislative branches of Government. Furthermore, others have presented a cogent argument that the policy deferral process is inextricably linked to the one-House veto, and is therefore suspect under the Supreme Court's 1983 Chadha decision. These uncertainties, in my estimation, point toward the larger problem of the lack of a mechanism under the Budget Act which promotes fiscal responsibility. I, therefore, intent to propose my Federal spending control initiative, Senate Concurrent Resolution 65, as an amendment to the urgent supplemental appropriation bill, to prevent pork-barrel spending through a clearly defined, balanced procedure. I look forward to working with both the administration and the chairman of the Appropriations Committee to develop this much needed procedure.

This amendment would give the President greater power over excessive spending while at the same time addresses the concerns of those who oppose the line-item veto by forcing Congress to give timely and careful reconsideration to those items in appropriations bills that the President considers excessive or unnecessary. We have all voted for an appropriation bill without being committed to each and every line-item it may include. If the President believes strongly that an appropriation is excessive or unnecessary, it does not seem unreasonable to require Senators and Representatives to vote publicly on the need for that item. It is our belief that this process will make it easier to eliminate unnecessary spending without disturbing the constitutional balance of powers.

Using the rulemaking powers of each House, the Federal spending control initiative would guarantee an up-down vote on rescission bills submitted by the President under certain conditions. A bill, or bills, implementing the President's message would be introduced in both Houses and referred to their respective Appropriations Committees, which, within 5 days, would be required first to determine whether the President's rescission message meets specified conditions for expedited consideration and then to report the rescission bill to the floor without amendment. The bill would be guaranteed consideration on the floor within 10 days with no amendments in order.

This process differs significantly from the current system for authorizing Presidential rescissions provided under title X of the Congressional Budget and Impoundment Control Act. Under that system, unless Congress acts to approve a President's rescission message within 45 days of its transmittal, the funds in question must be spent. Under the current procedure, inaction assures no change, whereas under this proposal, action is assured on rescission requests but the outcome is not prejudged.

The huge Federal deficit is a real threat to continued economic growth. We must utilize every possible mechanism to promote fiscal discipline. Since the 1986 fiscal year began last October 1, the President has submitted 77 rescission proposals, yet not one has had a record vote. Given the critical need to reduce the Federal deficit—and to do so by curbing runaway spending—we believe the Federal spending control initiative is just the tool Congress requires to promote fiscal responsibility and deal with unnecessary and wasteful spending in a manner that does not fall under a cloud of constitutional uncertainty.●

NATIONAL SCIENCE WEEK

● Mr. GORTON. Mr. President, National Science Week, 1986, is a good time for reflection. Ten, twenty, or fifty years from now, historians will look back at 1986 as a turning point for American science and engineering. After World War II, we made a national commitment to scientific research. The Soviet's launch of Sputnik led us to increase sharply our support for science and engineering to meet the challenge of competition in scientific achievement. Today, the loss of the space shuttle *Challenger* and the destruction of the nuclear powerplant in Chernobyl are tragic events, discouraging to scientists throughout the world.

As dark as these times may seem, however, they offer us the opportunity to renew our commitment to science and engineering and to proceed with programs that are better than those that went before. We in Congress and those in the science and engineering community must make a critical assessment of our priorities, of the adequacy of our investment, and of the quality of our execution in science and engineering.

Recent events remind us that we can never finish the job of scientific investigation. Our commitment in science is to discovery, to change, to challenge our assumptions, and to build steadily on the successes—and failures—of the past. The real secret to scientific and technological success is hard work, patience, and faith that the payoffs, though not always obvious, will be worth the wait.

Fortunately for American science, Congress and the administration recognize the importance of basic research in science and engineering. The budget request for the National Science Foundation, for example, can only be described as generous in these days of Federal budget cuts. Thus far, congressional support for that budget has been strong. Chairman DOMENICI, my fellow members of the Senate Budget Committee, and I were able to see that the Senate budget resolution supports the administration's request for the National Science Foundation. It protects the foundation by supporting NASA's programs, as well.

The Senate Committee on Labor, I understand, will report out an authorization bill for the National Science Foundation next week. We on the Commerce Committee look forward to receiving that legislation, which will be referred to the Commerce Committee for 30 days under an agreement we reached last year. I would like to note that the chairman of that committee, Senator HATCH, along with its ranking member, Senator KENNEDY, have been a pleasure to work with in support of the Foundation and its programs.

I want to commend the National Science Foundation for its support of National Science Week. At schools and science centers throughout the country, community groups are sponsoring events which will boost public understanding of science and technology, will make us more aware of how science affects our lives, and will attract young people to science, mathematics, and engineering.

In my home State of Washington, the following people are conducting science week programs: Karen Bliss, of Spiritridge Elementary School in Bellevue; Robert Phipps, of Parkersburg South School in Parkersburg; Glenn Terrell, the president of Washington State University; Gloria Tinder, of Lincoln Middle School in Pullman; Ashfaq Shirazee of the Liason Committee in Seattle; Ann Cowan of the Hanford Science Center; Cheryl Lydon of St. John School in Seattle; David Taylor of the Pacific Science Center in Seattle; Jeffrey Morse of Charles Wright Academy in Tacoma; Joy McBride of Reed Elementary School in Tacoma; and Michael Markley of Boeing Computer Services in Tukwila. I congratulate my constituents for their initiative and for their support of science during National Science Week.●

POLICE MEMORIAL DAY

● Mr. SYMMS. Mr. President, May 15 has been designated as "Police Memorial Day" this year. I want to take this opportunity to offer a few words of thanks for the invaluable public service rendered each day by police officers in cities, counties, and States across the Nation.

In 1985, the Department of Justice reported that 167 police officers were killed in the line of duty. Sworn to defend our Constitution and the laws of their local government, these men and women died in the performance of an essential public service and have left loving families and friends behind. Mr. President, many of my colleagues will be shocked, as I was, to learn that a majority of the officers killed in the line of duty are under 26 years of age.

They make the ultimate sacrifice in the prime of their lives, often before marrying or starting a family. It is appropriate that Congress has set aside this day to pay our respect to those who have given their lives in an effort to enforce our laws and protect our freedom.

Mr. President, I am pleased to see so many cities and towns participating in "Police Memorial Day." In Boise, ID, Mayor Dick Kempthorne has proclaimed today as "Police Memorial Day," and the ceremonies will include a color guard and speeches honoring the 10 Idaho police officers who have been killed in the line of duty. Similar ceremonies will be held across the Nation, including Washington DC. Mrs. Irene Sudano, the chairperson of the Survivors of Law Enforcement Officers Killed in the Line of Duty and the mother of an officer killed in 1982, will be joined by Sheriff Dennis Martin, who serves on the board of the Police Hall of Fame, in a memorial ceremony on the Capitol Grounds. Today, we recognize the men and women killed in the line of duty, but let us not forget the mothers and fathers such as Mrs. Sudano, and the wives and children of officers killed, whose sorrow will last throughout their lives.

As I have said before on this floor, I have the highest respect and admiration for the Nation's police officers and agents. They can be proud of their daily brave efforts in the service of a peaceful and just society. Saying a few words on their behalf today is a small but heartfelt token of my appreciation for their efforts.

Mr. President, over the past 5 years, violent crime rates have dropped significantly. The murder rate is down 23 percent, the aggravated assault rate is down 3 percent, the rape rate is down 3 percent, and the robbery rate is down 18 percent. Citizens feel safer in their cities, neighborhoods, and their homes. This is due in part to the criminal code reform Congress has enacted since 1981, and in part, to the development of effective crime prevention programs. But the frontline soldiers in this war against crime are the Nation's police officers, and the Nation owes them a debt of gratitude.●

DEMOCRATS AND DEFENSE

● Mr. GOLDWATER. Mr. President, an interesting article appeared in the Washington Times the other morning asking a simple question, yet a very obvious question, "Will Democrats Sell Out Defense?"

I have to start out by saying that the Republicans in the Senate have done a pretty good job in denying our military the funds they need to maintain their present strength and capabilities. If the Republicans in the House go through with their intended cut and the Democrats with theirs, our military is going to sink to a point lower in strength than it has been since World War II.

Right at this moment, we have a very strong military. It is not strong in numbers, but strong in quality of men and equipment, in spite of what some Johnny-come-latelies would have you believe. To have the funds cut by both parties, Republican and Democrat, any further is going to cause havoc with the military of the future.

Mr. President, I ask that the article I refer to be inserted in the RECORD at this point in my remarks.

The article follows:

WILL DEMOCRATS SELL OUT DEFENSE?

Most American monetary experts have been shocked by how rapidly the dollar has fallen against world currencies—much more than monetary policies alone would have suggested.

They are ignoring the one non-monetary fundamental that has been changing even more rapidly than our monetary policies: our rapid abandonment of the original Carter-Reagan defense buildup, signaled both by the 1986 defense budget freeze, and the dangerous proposals by the Democrats on the House Budget Committee to slash 1987-1989 defense spending back to pre-Afghanistan and pre-Reagan levels.

Weak defense has always meant weak currency, and vice versa. It is no accident that from 1974 to 1979, while national defense spending was slashed from 5.8 percent of GNP to 4.7 percent (the lowest in postwar history), the U.S. dollar plunged from 101 percent of the 1973 index to 84, also its lowest level in modern history.

It is equally no accident that under the defense buildup started by President Jimmy Carter in 1980-81 (after the invasion of Afghanistan) and carried on by President Ronald Reagan which raised defense outlays from 4.7 to 5.9 percent of gross national product in Mr. Carter's last budget (FY 1982) and 6.4 percent in FY 1985, the U.S. dollar soared from 88 to 157.

But since April 1985, the dollar has plunged to 113 percent of its 1973 value—a shocking 29 percent decline which actually began at the precise moment that President Reagan was forced by his own Senate to agree to a 1986 defense freeze—a sure signal the defense buildup was over.

That declining defense posture picture was reinforced not only by the recent Senate decision to cut Mr. Reagan's defense budget authority for 1987 from $320 to $301 billion ($253 billion in constant 1982 dollars) but by the ominous proposals now coming out of the House Budget Committee to slash that budget authority still further, to $285 billion ($240 billion in 1982 dollars).

That proposal amounts to a 10 percent real (constant dollar) cut in budget authority from 1985 and, as a percent of GNP, would take us back to the same level of spending we had in 1981, before the Reagan buildup.

In short, the House Democrats are proposing to abort the entire Reagan defense revival, long before it has even reached the timid 1986 levels which a frightened Jimmy Carter suddenly proposed in January of 1980, after the fall of Kabul.

The fact they are willing to risk such a savage assault on national security shows how skillfully the liberal Democrats and their media colleagues have been able to paint the Reagan defense buildup in so much bigger and more wasteful terms than actually took place.

Last February, the House Budget Committee published a highly misleading table showing the "huge" Reagan defense buildup, comparing it to defense spending since 1950—but it deliberately left out any factor for inflation making all spending since 1973 look far larger than it really was, when for most of those years, it was plunging in real value.

This chart was sent out, with stunning impact, to their constituents by a large number of liberal, anti-defense Democrats such as Rep. Ed Markey of Massachusetts.

Yet, had they been really honest with their constituents, they would have sent out the other chart you see here, which shows defense spending as a share of GNP—and how steeply it has actually fallen since the peacetime budgets of the Eisenhower administration, when it averaged more than 10 percent, compared with only 6.2 percent as proposed by Mr. Reagan for 1987, which, in turn, is nearly 40 percent less than the pre-Vietnam Kennedy budgets of 1962 and 1963.

That kind of information might have forestalled the kind of outrageous proposals Democrats are now making that would cut current defense outlays back to 6.1 percent of GNP, the lowest level since 1982, and budget authority back to 6.2 percent, the lowest since 1981, a dangerous drawback in defense posture.

During the peak of the Reagan defense buildup in 1984 and 1985, a buildup that followed closely the Carter proposals of 1980-81, budget authority reached 7.6 percent of GNP—and Mr. Reagan's proposal for 1987, at 7.0 percent, was actually a substantial fallback from that level, as is the 6.6 percent level recently passed by the Senate.

Now the House proposes to cut that back to 6.2 percent, or just about where it was before Mr. Carter got hit in the head by Soviet reality in Afghanistan.

House Democrats would have you believe this is all because of Gramm-Rudman-Hollings—but actually the House proposes to go below the GRH targets by $10 billion or so—even without allowing for lower total outlays and deficits due to falling interest rates.

More important, the Senate tax reform bill, like the House version, already contains a $31 billion windfall for FY 1986 and FY 1987 because it repeals the Investment Tax Credit as of January 1, 1986, even though individual rates are not cut until 1987. This alone would obviate any need either for tax increases in FY 1987 or draconian defense cuts.

In short, they are cutting defense because that's what they have always done—and the Russians are smiling, again.●

JEWISH HERITAGE WEEK

● Mr. RIEGLE. Mr. President, I am pleased to mark the beginning of Jewish Heritage Week, by joining my colleagues in a congressional call to conscience which recognizes the suffering of 400,000 Jews who are being held prisoner in the Soviet Union as they wait to be granted permission to emigrate.

Just a few months ago, after years of effort by concerned individuals and nations in the West, Anatoly Shchar-

ansky was finally allowed to emigrate to Israel. He has brought a renewed sense of vitality to the campaign on behalf of Soviet Jews. At a Solidarity Sunday rally in New York City this past weekend, Shcharansky shared his energy with a crowd of 300,000. They not only listened to his pleas, but they heard them. Mr. President, so must we.

Shcharansky has become a symbol of the human rights movement both in the Soviet Union and in the free world. While in the Soviet Union, he became a spokesman for Jewish refuseniks. His efforts lead to his arrest as he advocated human dignity and freedom. On September 27, 1983, Shcharansky began a hunger strike to protest the nondelivery of his mail in prison. As a result of his outcry, he received an additional 5-month sentence in solitary confinement. But his commitment was unfaltering as he endured physical and emotional abuse.

As he was silenced by prisons and labor camps, his wife Avital, who had emigrated in 1974, fought for his release in the West. She spoke at hundreds of rallies in a courageous campaign for human justice which focused the world's attention on the injustices her husband and other Jews suffered in the Soviet Union. On February 11, 1986, 13 years after applying to emigrate, and after over a decade of work dedicated to a human rights campaign which cost him his job and contact with his wife, Anatoly Shcharansky was released from the Soviet Union.

I am pleased that earlier this week Anatoly Shcharansky and his wife were honored with the congressional gold medal. To both of them I extend my deepest respect and appreciation, not only for the personal sacrifices they have made, but for the inspiration they have provided to others.

There are many more like Shcharansky who want to leave, and who need to leave the Soviet Union, but who have been continually denied that privilege. Many who have been turned down are harassed by the KGB, dismissed from their place of work, and denied medical care. Some are forced to live in internal exile for speaking out against the demolition of synagogues, while others live in constant fear of being imprisoned and forgotten.

Unfortunately, some do not share the exemplary courage of Shcharansky and have been "cured" through reeducation in Soviet political prisons. Many have recanted following incarceration, physical intimidation, and psychological repression. They have been forced to publicly denounce their past positions. One such man, Mr. Berdnyk, could not withstand the authorities' threats and abuses any longer. He folded to threats and consequently publicly described " 'ambitions, discontents, false concepts and self-deception' that he now claims led him to a 'flirtation with the world of imperialism and in the camp of the enemies of the mother country.' " These are the words of someone who once advocated freedom.

Our help is critical for the future of these repressed people. They must know that they are not alone. In Scharansky's words:

> My KGB interrogators, my prison guards, tried to convince me that I was alone, powerless in their hands. But I knew I was never alone. I knew my wife, my people and all of you were with me. They tried their best to find a place where I was isolated. But all the sources of a superpower cannot isolate a man who hears the voice of freedom, a voice I heard from the chamber of my soul.

We must help these people. The University of Michigan Student Struggle for Soviet Jewry has worked to help many dissidents, including Beniamin Bogomolny. Beniamin was cited in the 1982 Guinness Book of Records as "The Most Patient Refusenik." He has waited patiently for his freedom since 1966. He is a talented young man who has been dismissed from employment and has been detained by the KGB more than once. His apartment was ransacked, but only objects relating to his Judaism were destroyed. His wife, Tanya, was also dismissed from her job. Isolated from their friends abroad and not permitted to receive their mail, they continue to patiently wait for their emigration visas.

The Student Coalition for Soviet Jewry is also very concerned about the plight of Jews in the Soviet Union. They have brought to my attention the hardships of Albert Burnstein. Albert applied for an exit visa and was refused. In protest he staged a work strike which was cut short when he was arrested and sentenced to 15 days in prison. He urgently needs medical attention to heal a decay in his shin bone. Soviet doctors say they must amputate, but Israeli hospitals say that they can definitely cure him. Albert is a 20-year-old young and able man who may lose his leg because Soviet authorities will not allow him to seek adequate medical treatment in the West.

We, as Americans, must not forget these people who have been deprived the most basic right to sustain a healthy life. And so, today, as we rejoice in the justice which has come to Anatoly Shcharansky, we must redouble our efforts to be tireless advocates for the rights of those who cannot speak for themselves. Through our words and our deeds, we must let Beniamin and Tanya Bogomolny, and Albert Burnstein, and the hundreds of thousands of refuseniks like them know that we are with them, and will be, until they are free.●

FORMER MEMBERS RECEIVE WORLD HUMOR AWARD

● Mr. ABDNOR. Mr. President, two former members of the U.S. Congress were honored by the Workshop Library on World Humor when the Honorable John A. Blatnik and the Honorable Ben Reifel received the 1986 World Humor Award. The citations were presented "for recognizing the need for and the fostering of WLWH efforts to advance the constructive use of humor in domestic and international affairs to enrich life, increase creativity, and promote world peace."

Participating in the presentation on Capitol Hill were Richard Peet, chairman of the Workshop Library, and Herbert J. Cummings, the organization's founder and president.

It was noted that John Blatnik was teaching chemistry until he became the youngest State senator ever elected to the Minnesota Legislature. During World War II he served in the Army Air Corps intelligence as chief, OSS Mission, and spent nearly a year behind Nazi enemy lines in Yugoslavia with local and other friends of freedom including Randolph Churchill, Fitzroy Maclean and Evelyn Waugh. In 1950 he personally carried the first word to President Truman that the Tito-Stalin break was real and President Truman then set in motion policies and programs to improve the United States-Yugoslav relations to ensure Yugoslav sovereignty and independence. Blatnik was elected to the U.S. Congress from Minnesota in 1946 and served 28 years, becoming chairman of the House Committee on Public Works in 1981.

The citation for John Blatnik noted:

> John's unique background—growing up under the wise guidance of immigrant parents during a severe economy depression in a multi-ethnic mining and agricultural area that he later represented for nearly three decades—contributed to making him a natural selection for a seat on the board of directors of a budding nonprofit organization devoted to the exploration of the use of humor from the earliest societies to the present. He enlightened us with his stories of his father's advice—broken but pointed English—to his congressional son. John can laugh at himself and deeply appreciates the keen and craftily directed wit of his late father. John has been an active supporter and member of the WLWH since its inception, and members and friends of the organization here and abroad are in his debt for his wholehearted cooperation and understanding of the importance of humor in easing tensions in domestic and foreign affairs and its effects on increasing the prospects for world peace.

Ben Reifel was born in a log cabin on the Rosebud Indian Reservation in South Dakota and is an enrolled member of the Rosebud Sioux Tribe. He graduated from the University of South Dakota in 1932 and entered the Indian Service, which was interrupted between 1942 and 1945 to serve in the

U.S. Army, and again between 1949 and 1952 to attend Harvard for his master's and doctorate degrees in public administration. In 1960 Dr. Reifel left the Bureau of Indian Affairs to run for Congress from South Dakota. He served five terms before retiring in 1971. He has continued his interest in Indian affairs and a wide variety of other activities which included chairman of the board, American Indian National Bank; Commissioner of Indian Affairs in the Ford administration; director of Indian programs for the National Park Service; member of the board of the National Easter Seal Society of Crippled Children and Adults; and membership on the Episcopal Blue Ribbon Committee to advise on ministry among Indians. He is president of the Washington-based ARROW, Inc., which works with Indian tribes on education and tribal court programs and is chairman of the board of the Lower Brule Sioux Farm Corp., a tribal enterprise primarily engaged in irrigation agriculture.

His citation noted:

Ben has been called a number of things since he left the Rosebud Indian Reservation in South Dakota many moons ago. During his five terms in the House, many of his friends and colleagues referred to him as "the only genuine American in the U.S. Congress." When he returned from a House committee study of peat production in some boglands of Ireland, he was spoken of with pride as "that Indian with the best damn Irish brogue in America." These were some positive factors in considering his qualifications to guide and advise a newly organized group in getting on with the task of assessing our world humor heritage, but we noted some other outstanding characteristics that made him a shoo-in for the WLWH board—a deep insight into the many and varied facets of intercultural cooperation in the arts, sciences and professions. In committee hearings, Ben could lend an attentive and discerning ear to comments of distinguished leaders in education and the arts as well as comments of bigots, phonies and professional fourflushers who insist on dumping their respective negative cultural claptrap on congressional committees. This award represents a small token of our admiration and respect for Ben, a world citizen of genuine good will combined with engaging wit and humor. We are grateful to him for his early and continuing support and his contribution to world peace where levity, not nuclear confrontation, could be the global pastime.

Mr. President, it was an honor to serve with John Blatnik on the House Public Works Committee, and Ben Reifel has been my esteemed friend for many, many years. It has been my privilege to work with both on projects of great importance and intensity, and to witness their application of good will, wit and humor in resolving thorny issues. This recognition of what is certainly a key to their success is richly deserved.

The Workshop Library of World Humor is a nonprofit organization founded by H.J. Cummings in 1975 to explore the uses of humor and to examine our humor heritage from the earliest societies to the present. The Honorable MORRIS K. UDALL is its honorary chairman. Its international advisory council includes Agam, Steve Allen, Art Buchwald, Norman Cousins, George Cruikshank, Bill Dana, Antal Dorati, John Fobes, Patrick Hayes, A.J.N. Judge, Marcel Marceau, Dr. Ronald Paulson, Desmond Rushe, Henryk Szeryng and Peter Ustinov. Their newsletter "Humor Events and Possibilities, Old New, Important, Marginal Wise and Otherwise," is an "occasional commentary on cultural turbulence as registered on the Humor Events and Possibilities [HEP] scale."●

U.N. VOTING PATTERNS SEND DISTURBING SIGNALS

● Mr. KASTEN. Mr. President, this is the Year of Liberty, the year during which we will rededicate the Statue in New York Harbor that for the past century has welcomed to our shores and to a new life the oppressed, impoverished citizens of the world.

In rededicating ourselves to the principles of liberty that make this Nation great, we also are renewing our commitment as a nation blessed by prosperity to help those countries less fortunate than ourselves.

American largesse is historic. It also is taken for granted. And while we should never as a nation turn our backs on those in need, we must seriously consider our priorities in giving aid to the world.

Consider this disturbing fact: The 159 member states of the United Nations voted against American interests in the General Assembly last year on average 80 percent of the time.

Mr. President, that is the conclusion of the third annual "Kasten Report," the study of U.N. voting patterns done by the U.S. State Department in accordance with legislation I sponsored requiring these annual reports.

The report shows that once again Israel is our staunchest ally, siding with us on 91.5 percent of the votes before the General Assembly. A number of our NATO allies—the United Kingdom, 86.6 percent; West Germany, 84.4 percent; France, 82.7 percent, up from 72 percent in 1984; Belgium, 82.3 percent; and Italy, 81.9 percent; all increased their support for the United States.

But, unfortunately, they were the exceptions to what is becoming a disturbing rule.

Mr. President, most of the time, on most of the critical issues facing our Nation, we stand almost alone in the United Nations.

According to the State Department analysis, the key issues before the General Assembly included positions taken by the United Nations on terrorism, the Soviet invasion and continued occupation of Cambodia, the Arab-Israeli conflict, apartheid, human rights abuses in several countries, and efforts to delete instances of name calling against various U.S. foreign policy positions.

It is a sad reality, Mr. President, that we cannot even count on other NATO allies to support our positions with any consistency. Turkey and Greece, particularly, two countries which receive hundreds of millions of dollars in aid each year, voted consistently against us—Turkey 60 percent of the time and Greece 66 percent of the time.

Turkey refused to criticize human rights abuses in Iran and supported name-calling attacks against United States policy in the Middle East—both considered key votes by the State Department.

It should not be surprising that the strongest opposition to our position, in addition to Communist bloc nations in Eastern Europe, comes from the 21-member Arab group. It supported America on only 12.2 percent of the votes.

African nations, many of which look to America for the very survival of their people, gave us their support on only 15.1 percent of the votes.

There is a bright spot in the most recent "Kasten Report." Since our liberation of Grenada, that country has become an increasingly dependable friend of America at the United Nations. In 1983, Grenada opposed our position in the General Assembly more than 80 percent of the time. But in 1984, it supported us in 60 percent of the votes, and it has since raised its level of support to over 70 percent.

Mr. President, we are not attempting to buy votes with the aid we send to the needy nations of the world. But we do have the right to expect that if these nations aggressively seek our assistance, our money, and our protection, they in turn will support the positions that continue to keep our Nation strong enough and vital enough to continue sending such assistance.

Yet, many of these nations are no where in sight when we need their support in the United Nations.

According to the most recent U.N. vote analysis, Egypt, a major recipient of United States foreign aid, opposed our positions a shocking 85 percent of the time. Even the Philippines supported us on only 22 percent of the General Assembly votes.

I urge all of my colleagues to carefully consider the pattern of voting by those nations who seek, and receive, our aid. In these times of cutting back we must place priorities not only on how our dollars are spent, but where.

The American people expect no less of their elected representatives.

Mr. President, I ask that the General Assembly voting record be printed in the RECORD.

The material follows:

BIRTHDAY OF COL. DANIEL N. SUNDT

● Mr. ROTH. Mr. President, today I wish to honor the 79th birthday of Col. Daniel N. Sundt of Newark, DE.

Colonel Sundt served in the U.S. Army for 30 years including a 4-year stint at the U.S. Military Academy at West Point, duty with the 24th Artillery Regiment in the Philippines, duty with the 1st Artillery Observation Battalion at Fort Bragg, NC, and command of the 867th Field Artillery Battalion of the 65th Infantry Division at Le Havre during World War II.

After retiring from active duty, Colonel Sundt served on the staff of the University of Delaware where he commanded the ROTC Program and taught mathematics. He has served as parade marshal of the Newark Memorial Parade since 1956 and will do so again this year, marching the entire route of the parade.

Colonel Sundt is truly a great American and one of which all Delawareans are justifiably proud. I join with his family and friends in extending him best wishes for continued health and prosperity in the years to come.●

KOREA

● Mr. SIMON. Mr. President, many of us are deeply concerned about the continued unrest in Korea. As Senators may remember, in February, 1985, Korean opposition leader Kim Dae Jung returned to Korea after years of exile. He was accompanied by a number of U.S. observers, including several Members of Congress and a former State Department official. We all viewed his arrival at the airport in Seoul and watched, with great dismay, the treatment he received from South Korean security forces.

Since that time, I have had the opportunity to talk with Kim Dae Jung on the phone, to be reassured that he is healthy and safe. Recently, I re-

ceived a letter from him updating me on his current status. He also included a lengthy memo he has prepared giving his views on the current political situation in Korea. As we in Congress continue to review the relationship between our two countries, I believe Kim Dae Jung's analysis should be read by my colleagues, and I ask that his letter and his memorandum be printed in full in the RECORD.

The material follows:

KIM DAE JUNG,
178-1 Dong Kyo-dong,
Mapo-ku, Seoul, Korea, March 27, 1986.

Hon. PAUL SIMON,
U.S. Senator,
Washington, DC.

DEAR MR. SIMON: You are always in my memory, and I am looking forward to seeing you again. I feel grateful to you whenever I think about how kindly you have aided me and how much you have supported our efforts for the recovery of democracy.

I have lived in persistent strict surveillance and restriction since I returned home in February last year. My civil rights are not restored yet and the hitch of 17 and a half years still remains against me. That has prevented me from doing party activities and I have been put under house arrest as much as 12 times during past year. However, I have exerted the best efforts possible for the recovery of our democracy by overcoming such difficulties with patience and courage. Such efforts of mine are completely attributable to the ardent support of the Korean people and the encouragement of my friends of the world including you. I feel really grateful.

Although I am still in trouble, I think it has been better that I returned home and have stayed here. Now I am really happy. That is because I can share troubles and difficulties with our people and directly encourage and help them in this land.

The Korean people have been greatly encouraged by the recent recovery of democracy in the Philippines and are consolidating the resolution to exert further efforts believing that it is time for us to recover democracy in this land of Korea. The Korean government is dazzling our people and international public opinions by alternately appropriating suppression and appeasement.

Faced by such circumstances, I have felt it necessary to explain the current situation of Korea to my most intimate friends of limited number; therefore I have executed a memorandum as attached. I sincerely hope the writing will help you grasp the Korean situation.

If you have something to inquire or inform, please write to me via your Embassy in Seoul. Unfortunately, it is not safe to use normal mails.

I pray that God may bless you and all your family members.

Sincerely yours,

KIM DAE JUNG,
Co-chairman of the Council
for Promotion of Democracy, Seoul,
Korea.

RECENT POLITICAL STATE OF KOREA

(By Kim Dae Joong, Cochairman of the Council for Premotion of Democracy)

1. Suppression of Government and 10-million Signature Movement:

(A) Increasement of Suppression—Government has been increasing Suppression on the opposition party and general democratic forces since the latter half of the last year. Now the democratic forces are on the brink of extinction.

(B) Infringement of Human Rights—Now more than 1000 political prisoners are in jails; and tortures are inflicted frequently in investigation organizations and jails; and about 500 dissidents have been deprived of civil rights; and tortures on anti-government persons, closing of their offices, and confiscation of anti-government bulletins are occurring every day.

(C) Denial of Fundamental Rights—Freedom of press, and freedom of assembly and association are denied completely. Because local self-government does not exist, all public servants are under control of President and Government. People are deprived of their fundamental rights systematically, and live under the control and intimidation of Government.

(D) Suppression on 10-million-person-signature Movement—As the 10-million-person-signature Movement by the opposition party to petition the parliament for revision of constitution into a direct presidential election system seems to be met by people's eager agreement, Government tried to stop it with undisguised suppression. However, as the resistance of the opposition party and people is strong and criticism from foreign countries boils up, Government gave up undisguised suppression, but instead switched to disguised one, mobilizing all the employees of Government organizations, government-run firms and big private firms. It instructed those organizations, and firms to fire any member of them who signed for revision of constitution. It is also increasing all kinds of intimidations on general people not to sign.

2. Real Purpose of Government in Insisting on Constitutional Revision in 1989:

(A) Change of Attitude—Government had opposed the revision of Constitution all along. But since January of this year, it has been proposing that Constitution be revised in 1989 into one among presidential government system, parliamentary government system, and double executive system; and the president who will swear in 1988 step down with the revision of Constitution in 1989.

(B) Election in 1988 and the real purpose of the Government—This means that Government wants the presidential election in 1988 be done by the method of indirect election in accordance with the current Constitution. The indirect election in Korea is different from that of the U.S.A. Its results rely absolutely upon Government. The reasons are: First, Korean population is 40 millions but its electoral college are more than 5000, which is ten times of American electorate college. Second, people should vote to each elector, not to the presidential candidate as in America. Third, electors' election campaigns are limited, and the presidential candidates cannot even go out on the stump. Third, Opposition presidential candidates cannot secure more than 5000 reliable elector candidates throughout the country, because local self-rule governments do not exist in Korea. Therefore, if the Government's line of maintaining current election system is not changed, people's ardent wish for direct election system and a change of regime will be obstructed.

(C) Constitutional Revision in 1989 and Chun's Reappearance—Current Constitution rules only one term of the President and its amendment rules that term-lengthening or another term be denied to President Chun Doo-Hwan if those systems will be newly added to the constitution. Therefore, political analysts think, the present Government, which plans Chun's permanent rule, is proposing revision of constitution in 1989, expecting that one who will follow Chun's line obediently be revised in 1989, and after that the one-year term President resign, and Chun grasp power again under the new Constitution.

(D) Our Opinion—Everyone knows that Korean people supported eagerly revision of Constitution into direct presidential election system in the Parliamentary election done in February last year. People know that direct presidential election, in which all the people can rise around one opposition candidate, is the only way of realizing a change of regime on the present state in which basic conditions of democracy such as freedom of press, local self-rule government, institutional guarantee of fair election do not exist. On the other hand, we want that Olympic of 1988 will be held successfully. We expect to realize democracy first and carry out the Olympic successfully on the basis of stabilized political state. To do so, we think the revision of Constitution into direct presidential election system by the autumn of 1986, election of the President in the autumn of 1987, and the Olympics in the autumn of 1988 is the most reasonable and surest schedule for success.

3. The Philippines' Political State and Korea:

(A) Reasons of Success in the Philippines on our Viewpoint—We welcome eagerly restoration of democracy in the Philippines, and list reasons of its success as follows: First, great democratic ability of the Philippino people; second, the opposition parties' success in nominating one candidate for presidency; third, acquisition of overall support, home and abroad, through non-violent struggle; fourth, the Philippino people's cherished memory and sympathy for the late Mr. Aquino; fifth, American efficient aid to Philippino people's efforts for the restoration of democracy, respecting the wish of the majority of the Philippino people.

(B) Encouragement and Model for Us—The Philippino democratic revolution gave us a great deal of encouragement and courage. It is thought to be the Korean people who have expressed greatest interest and pleasure in the recent Philippino political state. The process of the Philippino democratic revolution is a good model for us. To achieve democracy in Korea, the power of the people should lead a struggle for restoration of democracy as it did in Philippine, and the violent and radical line should be avoided absolutely, and our basic line of peaceful struggle, anti-Communism, and cooperation with friendly nations including the U.S.A. should be clearly declared to the people and the world, because it conforms to the wish of the absolute majority of our people, and with the wish of democratic friendly nations.

(C) Our Fears—The reason that the Philippino revolution could be settled smoothly without severe confusion or encounters consists not only in efforts and attitudes of Anti-Marcos forces led by Corazon Aquino. Also in Marcos regime there were some passable points. In spite of severe dishonesty in voting and counting of the votes, the Philippines guaranteed considerably free atmosphere of election such as freedom of assembly and demonstration, direct election of president, and freedom of election campaign. However, none of them exists in Korea. Therefore, we fear, struggle for democratization and its result in Korea would

become much more radical than in the Philippines.

4. Korea People's Opinion on the U.S.A:

(A) Opinion in the Past—So far, Koreans, especially students, intellectuals and workers were convinced that the U.S.A. was supporting the autocratic regime partially. This opinion brought violent criticisms on the U.S.A., and in some Koreans' mind anti-American sentiments were growing remarkably.

(B) Beginning of New Perception—However, with the Philippino revolution as a start, considerable change begins to appear in the Koreas' opinion on the U.S.A. Everyone concedes that the Philippino democratic revolution could not result in success without the positive role of the U.S.A. Majority of Koreans think that American role in favor of the Philippino people's human rights and fundamental political rights cannot be regarded as intervention in the domestic affairs of another country. They believe it is the duty of friendly nations which share democratic ideal and common interests as free nations.

(C) Historical Outlook—Although there were many ups and downs, Amercian attitudes shown through the whole process of the Philippino presidential election and appearance of Aquino regime, were a far cry from the former ones. This transformation was more clearly displayed in contrast with the Soviet Union's foolish support for Marcos. Now the U.S.A. seems to depart from old political failures of supporting autocrats and minority around them of the Third World countries, for spirit of American Revolution of being on the side of majority of the people and justice. We hope such expectation of ours be met for the interests of us, Korean people, American people, and all the peoples of the world, who love freedom.

5. Future Course of Korean Democratic Forces:

(A) Basic Line—We support democracy, and oppose Communism. We advocate economic, social justice, but believe that justice could be achieved richly only through free economic system. We insist on strict neutrality of the Army in politics, and seek for powerful security preparedness which will erase any miscalculation of the Communists.

(B) Right Way of Security—We absolutely oppose war, and believe permanent peace should be realized in Korean peninsula through direct dialogue between South and North Korea and agreement of four great nations—the U.S.A., Japan, China, the Soviet Union. The basis of security is democracy. Forced security without giving the people the value to defend, that is democracy, will help Communists as proved in China, Vietnam and Cuba. We guaranteed people's democratic freedom even during the Korean War, and so could beat off the invasion of one million Chinese communist army and North Korean army. Then our per capita income was $60 but now it amounts to $2000.

(C) Realization of Common Interests of Korea and the U.S.A.—We believe political stability and security could be realized only under a democratic government, successful, smooth economic cooperation with the developed countries including the U.S.A. could be possible, as proved in the European countries and Japan after World War II. Also in the fields of security and economic cooperation, democracy is the only way of realizing common interests of Korea and the U.S.A.

(D) To Achieve Restoration of Democracy in Korea—Now we have no reasons for postponing restoration of democracy in Korea, and should not postpone it. For the peaceful change of regime through free, honest election, and for the successful Olympic Games in 1988, the schedule of Revision of Constitution in 1986, Presidential Election in 1987, Olympics in 1988 should be followed. True democratization requires democratic revision of Constitution including direct presidential election, effectuation of local self-rule government, restoration of freedom of press, revision of parliamentary and presidential election laws that make possible honest election, and guarantee of equal opportunities for obtaining money for political activities, as preconditions. We are convinced that democracy will be restored in Korea by the people's forces by 1988. How smooth and peaceful the process will be depends on the attitude of the Government. That's because our demand is nothing more than guarantee of least preconditions for free election.●

NATIONAL POLICE WEEK

● Mr. DOMENICI. Mr. President, I wish to take this oportunity to pay tribute to a group of men and women who keep our communities safe from the perils of crime night and day. Even at the risk of their own lives, these dedicated individuals fight to protect our persons and property against the elements of crime. It is only proper that we should honor the law enforcement officers of this country for their hard work, devotion, and service that benefits our society.

Every day, when law enforcement officers put on their uniforms they become the most visible representatives of society, protecting our safety and freedom. These public servants are in the closest contact with the public. They are always available both night and day, and they can be contacted with little effort. In times of danger or crisis, we look first to our law enforcement officers for assistance and safety. They are the most immediate link between the people and their Government.

At times, routine police work can seem menial and tedious, but all police work is essential in their struggle to keep public order. Other times, these individuals are put in a situation where their life is on the line. The office has to determine the severity of the situation, evaluate the danger to himself and innocent bystanders, and take into account the rights of the suspect, and respond without hesitation. Hesitation or an error in judgment can have tragic consequences. These courageous individuals know the risks and uncertainties of being a police officer, yet they put their lives on the line every day so that our laws and safety can be preserved.

The President has proclaimed this week to be National Police Week. It is an honor to pay tribute to all the men and women who keep our persons and property safe. The law enforcement officers of ths Nation make many sacrifices so that we may all be shielded from the effects of crime. We must do what we can do to support and assist our police officers so that they may do their job as effectively as possible. The observance of National Police Week will bring a high degree of public awareness to the honorable deeds, commitments, and contributions to society that these courageous individuals have brought about. I urge all my colleagues and all Americans to join me in recognition of these very special people.

I thank the Chair.●

SOCIAL SECURITY COLA

● Mr. D'AMATO. Mr. President, I speak at this time in support of active legislation for the senior citizens of this country. Senator HEINZ, has introduced S. 2450, legislation which insures that senior citizens continue to receive Social Security benefits which take into account the rate of inflation. As with the Senator's previous legislation which addressed this issue, Senate Resolution 375, I wholeheartedly support this effort.

Senator HEINZ's legislation eliminates an unnecessary payment provision of Social Security benefits. Currently, Social Security beneficiaries receive a cost-of-living adjustment when the Consumer Price Index rises by at least 3 percent in a single year. However, without a 3-percent increase in the CPI, Social Security benefits receive no adjustment for an increase in the cost of living. No cost-of-living adjustment is made for recipients until the combined CPI for 1 or more years is greater than 3 percent.

This type of system could create a great deal of hardship for beneficiaries. While a 2.9-percent increase may not seem like a large increase in the cost of living, it is a very significant increase for many senior citizens who rely on their Social Security payments as a key source of income. As the system currently exists, these senior citizens will be forced to stretch last year's payments to meet this year's prices.

In addition, a postponed COLA would result in a long-term loss to the Federal Government. Beneficiaries who retire the year of the postponed COLA would eventually drain the Social Security trust funds of a greater amount than they would have had there not been a postponement of the cost-of-living adjustment. When these individuals receive their first year of payments, their COLA would include compensation for inflation that occurred before their retirement.

A 1985 report by the Actuary's office at the Social Security Administration confirms this inequity. An August 1985 report from the Office of the Actuary of the Social Security Administration estimates that the cost of this COLA

trigger could be as much as $364 million per year at 1986 levels.

In addition, no COLA would mean less taxable income and less income for the Social Security trust funds. The country would lose part of its taxable wage base—revenues which significantly contribute in our efforts to eliminate our Federal deficit.

The 3-percent COLA trigger was designed to cut administrative costs. With increased computerization, these savings are not very substantial. The initial purpose of the trigger no longer seems to exist.

In 1984, Congress realized the futility of postponing the COLA. The COLA trigger was canceled for that year. I believe we should make that decision a permanent one, and I am pleased that my colleague from Pennsylvania has moved to do so, for the well-being of our senior citizens and the Nation as a whole.●

COMMENDATION OF ALEXANDER NACLERIO

● Mr. D'AMATO. Mr. President, I speak at this time in recognization of the outstanding services of Mr. Alexander Naclerio, our "Man of the Year." He has shown a special dedication to meeting the housing needs of all Americans. He has demonstrated a commitment and dedication to our citizenry for more than 40 years.

Mr. Naclerio majored in real estate principles and appraisals and attended Manhattan College and Columbia University. He learned the housing business from the bottom up, starting with the VA Home Guaranty Program in 1946. Since that time, he has played an integral part in meeting the changing needs for housing in America. Alexander C. Naclerio has been a member in Federal service for 43 years.

Throughout his many years of service he has served in positions of increasing responsibility. These responsibilities have included dealing with urban renewal, metropolitan revitalization, and innovative programs to house the poor, handicapped, and elderly. Most recently, Mr. Naclerio served as Director, Office of Housing, Region II, of the U.S. Department of Housing and Urban Development.

He has been the recipient of numerous awards and recognition which include: Public Service Award—Southern Brooklyn Community Organization, Man of the Year Award—B'Nai Brith Youth Service Real Estate and Construction Industry, honorary member—New York Society of Architects, and special recognition by the National Housing Conference.

Mr. President, I ask that my colleagues join me in honoring Alexander Naclerio who has so diligently served the American public. His dedication to housing is recognized by many who affectionately refer to him as "Mr. FHA." Mr. Alexander C. Naclerio is deserving of this special commendation and recognition.●

NAUM AND INNA MEIMAN: THE WAIT CONTINUES

● Mr. SIMON. Mr. President, Inna Meiman and her husband, Naum, continue to lanquish in their Moscow apartment. Naum's secret work making mathematical calculations for his institute ended 25 years ago. With Inna ill and Naum's age advancing, there is no reason for keeping the Meimans in the Soviet Union.

The Soviets gain only negative publicity by refusing to grant a couple like the Meimans permission to emigrate. By releasing the Meimans, they could demonstrate that they are concerned about human dignity and human rights.

I strongly encourage the Soviets to allow the Meimans to go to Israel.●

□ 1850

NATIONAL TRAFFIC AND MOTOR VEHICLE SAFETY ACT AUTHORIZATION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar item No. 122, S. 863, to amend the National Traffic and Motor Vehicle Safety Act.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 863) to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act to authorize appropriations for fiscal years 1986 and 1987, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike out all after the enacting clause and insert the following:

That this Act may be cited as the "National Highway Traffic Safety Administration Authorization Act of 1985".

DEFINITIONS

SEC. 2. As used in this Act, the term—

(1) "multipurpose passenger vehicle" means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation;

(2) "passenger automobile" means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less; and

(3) "Secretary" means the Secretary of Transportation.

TITLE I—AUTHORIZATIONS OF APPROPRIATIONS

GENERAL AUTHORIZATIONS

SEC. 101. (a) Section 121 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1409) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", $51,825,000 for fiscal year 1986, and $54,157,125 for fiscal year 1987.".

(b) Section 111 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1921) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", $331,000 for fiscal year 1986, and $345,895 for fiscal year 1987.".

(c) Section 209 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1949) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", $1,943,000 for fiscal year 1986, and $2,030,435 for fiscal year 1987.".

(d) Section 417 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1990g) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", $475,000 for fiscal year 1986, and $496,375 for fiscal year 1987.".

OCCUPANT CRASH PROTECTION PROGRAM

SEC. 102. In order to carry out a national program to encourage the use of safety belts and passive restraints in passenger automobiles, as authorized by section 403 of title 23, United States Code, the Secretary may derive an additional amount not to exceed $20,000,000 from unobligated balances of funds made available for highway safety programs under title 23, United States Code. Not less than one-half of the total of such amounts shall be used for educational efforts related to the use of air bags. Of the funds allocated to such efforts, not less than $5,000,000 shall be used to carry out a program to demonstrate the effectiveness of air bag technology, with emphasis on lowest-cost technologies. Such amounts shall remain available until expended.

TITLE II—HIGHWAY SAFETY GRANTS

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. (a) Section 203(a)(1) of the Surface Transportation Assistance Act of 1982 (Public Law 97-424; 96 Stat. 2138) is amended—

(1) by striking "and" after "1985,"; and

(2) by inserting immediately before the period at the end thereof the following: ", and $132,000,000 for the fiscal year ending September 30, 1987".

(b) Section 203(b) of the Surface Transportation Assistance Act of 1983 (Public Law 97-424; 96 Stat. 2138) is amended—

(1) by striking "and" after "1985," wherever it appears;

(2) by inserting immediately after "1986," the following: ", and $132,000,000 for the fiscal year ending September 30, 1987,"; and

(3) by inserting immediately before the period at the end thereof the following: ", and September 30, 1987".

DRUNK DRIVING INCENTIVE GRANTS

SEC. 202. The first sentence of section 408(g) of title 23, United States Code, is amended by striking all after "Fund," and inserting in lieu thereof "$29,232,000 for the fiscal year ending September 30, 1987.".

TITLE III—AUTOMOBILE CRASHWORTHINESS

PURPOSE AND FINDINGS

SEC. 301. (a) This title is part of the continuing effort by Congress to address the critical highway safety problems facing this Nation.

(b) The Congress finds that—

(1) the Department of Transportation should be given explicit direction as to actions to be taken to save lives, reduce injuries, and decrease consumer costs of accidents;

(2) the current trend toward purchases of smaller and lighter passenger automobiles increase the importance of and the need for effective occupant crash protection;

(3) crashworthiness information should be available upon the introduction of each new passenger automobile model, and a systematic effort must be made to disseminate this information.

SIDE IMPACT PROTECTION

SEC. 302. (a) Not later than 60 days after the date of enactment of this Act, the Secretary shall reopen the rulemaking proceeding terminated on July 12, 1982, to implement Federal Motor Vehicle Safety Standard 214 (49 CFR 571.214). The Secretary shall—

(1) establish performance criteria for improved occupant protection in side impact; and

(2) extend the applicability of such Standard to light trucks, vans, and multipurpose passenger vehicles.

(b) The final regulations implementing such Standard shall be issued not later than 1 year after the date of enactment of this Act.

AUTOMOBILE CRASHWORTHINESS DATA

SEC. 303. (a) Part A of title I of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391-1410b) is amended by adding at the end thereof the following:

"SEC. 126. (a) Not later than 60 days after the date of enactment of this section, the Secretary shall promulgate a Federal motor vehicle safety standard establishing passenger automoble crashworthiness rating and labeling requirements in accordance with this section. Such amendment shall take effect not later than 120 days after such date of enactment, and shall apply to passenger automobiles manufactured on or after September 1, 1986.

"(b) The standard required in subsection (a) of this section shall provide a method for calculating a uniform numerical rating which will enable consumers to compare the crashworthiness of different passenger automobile models.

"(c)(1) The standard required in subsection (a) of this section shall also require that—

"(A) each passenger automobile manufacturer certify to the Secretary, not later than 90 days before any passenger automobile model produced by such manufacturer is offered for sale to consumers, the crashworthiness rating achieved by that model;

"(B) each passenger automobile manufacturer affix a label to each passenger automobile indicating that model's crashworthiness rating; and

"(C) the Secretary prepare a booklet for purposes of disseminating comparative information regarding the crashworthiness of passenger automobiles.

"(2) The Secretary may include in the booklet to be prepared pursuant to paragraph (1)(C) of this subsection such other information relating to the purchase and ownership of passenger automobiles as the Secretary determines may be useful to consumers. Copies of such booklet shall be furnished by the Secretary to passenger automobiles manufacturers for distribution to passenger automobile dealers.

"(d) The labeling and certification required under this section shall be based upon performance criteria established by the Secretary relating to—

"(1) crash protection for occupants with and without manual seatbelts;

"(2) windshield mounting;

"(3) windshield zone intrusion;

"(4) fuel system integrity; and

"(5) such other aspects affecting crashworthiness as the Secretary may consider appropriate.".

(b)(1) Section 201 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941) is amended by adding at the end thereof the following:

"(f) Not later than 1 year after the date of enactment of the National Highway Traffic Safety Administration authorization Act of 1985, the Secretary shall by rule establish procedures requiring passenger automobile dealers to make available to prospective passenger automobile purchasers information developed by the Secretary and provided to the dealer which contains data comparing the crashworthiness of passenger automobiles.".

(2) Section 2 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901) is amended by adding at the end thereof the following new paragraph:

"(19)(A) the term 'passenger automobile' means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less.

"(B) As used in subparagraph (A) of this paragraph, the term 'multipurpose passenger vehicle' means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation.".

TITLE IV—GRAYMARKET AUTOMOBILES

AMENDMENTS TO THE NATIONAL TRAFFIC AND MOTOR VEHICLE SAFETY ACT OF 1966

SEC. 401. (a) Section 102(5) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391(5)) is amended by striking all after "motor vehicle equipment," and inserting in lieu therof "or who has express written authorization of any such person to import such motor vehicles or motor vehicle equipment for resale.".

(b) Section 108(a)(1)(A) of such Act (15 U.S.C. 1397(a)(1)(A)) is amended by inserting "and is covered by a certification issued by the manufacturer under section 114," immediately after "such standard".

(c) Section 108(b) of such Act is amended—

(1) in paragraph (2), by striking "or importer";

(2) by amending paragraph (3) to read as follows:

"(3) a motor vehicle or item of motor vehicle equipment offered for importation in violation of paragraph (1)(A) of subsection (a) shall be refused admission into the United States, except under any of the following circumstances:

"(A) The Secretary may exempt any motor vehicle or item of motor vehicle equipment from the prohibition against importation in such paragraph upon such terms and conditions as the Secretary finds necessary for the purpose of research, investigations, studies, demonstrations or training, competitive racing events, or for reasons of national security.

"(B) The Secretary of the Treasury and the Secretary may, by joint regulations, authorize the temporary importation into the United States of a motor vehicle or item of motor vehicle equipment upon such terms and conditions (including the furnishing of bond) as may appear to the Secretary of the Treasury and the Secretary to be appropriate to ensure that any such motor vehicle or item of motor vehicle equipment will be exported from or abandoned to the United States.

"(C) The Secretary of the Treasury and the Secretary may, by joint regulations, authorize importation into the United States of a motor vehicle or item of motor vehicle equipment where an individual, who has never before imported a nonconforming motor vehicle or item of motor vehicle equipment, seeks to import such a motor vehicle or item of motor vehicle equipment for personal use and not for resale and demonstrates that such importation is necessary to meet unforeseen cases of extreme hardship or unforeseen extraordinary circumstances. In any such case, the motor vehicle or item of motor vehicle equipment may be imported into the United States upon such terms and conditions (including the furnishing of a bond) as may appear to the Secretary of the Treasury and the Secretary to be appropriate to ensure that any such motor vehicle or item of motor vehicle equipment will be brought into conformity with applicable Federal motor vehicle safety standards prescribed under this subchapter.

"(D) An incomplete motor vehicle or incomplete item of motor vehicle equipment (as defined by the Secretary) shall not be refused admission into the United States where such motor vehicle or item of motor vehicle equipment is accompanied at the time of importation by a statement issued by the person who first manufactures or assembles the incomplete vehicle or incomplete item of equipment, indicating the Federal motor vehicle safety standards in effect at the time of manufacture with which such incomplete vehicle or item of equipment is in compliance. The Secretary shall prescribe the form and contents of such statement."; and

(3) by striking paragraph (4) and by redesignating paragraph (5) as paragraph (4).

(d) Section 114 of such Act (15 U.S.C. 1403) is amended—

(1) by inserting ", as appropriate," immediately after "dealer";

(2) by striking "or distributor" the second time it appears; and

(3) by inserting "Every distributor of a motor vehicle or motor vehicle equipment shall furnish to a dealer, at the time of delivery of such vehicle or equipment, a certification which was previously furnished to the distributor by the manufacturer." immediately after the first sentence.

AMENDMENT NO. 1965

(Purpose: To make various amendments, including amendments on side impact protection and crashworthiness)

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator DANFORTH to the committee substitute and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. DANFORTH, proposes an amendment numbered 1965.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, line 14, strike "$51,825,000 for fiscal year 1986,".

On page 10, line 20, strike "$331,000 for fiscal year 1986,".

On page 11, line 2, strike "$1,943,000 for fiscal year 1986,".

On page 11, line 8, strike "$475,000 for fiscal year 1986,".

On page 13, strike all from line 19 through page 16 and insert in lieu thereof the following:

SIDE IMPACT PROTECTION

SEC. 302. Not later than 60 days after the date of enactment of this Act, the Secretary shall reopen the rulemaking proceeding terminated on July 12, 1982, to implement Federal Motor Vehicle Safety Standard 214 (49 CFR 571.214). The Secretary shall, not later than one year after the date of enactment of this Act—

(1) establish performance criteria for improved occupant protection in side impact; and

(2) issue an Advance Notice of Proposed Rulemaking to extend the applicability of such Standard to light trucks, vans, and multipurpose passenger vehicles.

AUTOMOBILE CRASHWORTHINESS DATA

SEC. 303. (a) Section 201 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941) is amended by adding at the end thereof the following:

"(f)(1) The Secretary shall enter into appropriate arrangements with the National Academy of Sciences to conduct a comprehensive study and investigation regarding means of establishing a method for calculating a uniform numerical rating which will enable consumers to compare meaningfully the crashworthiness of different passenger automobile models.

"(2) Such study shall include examination of current and proposed crashworthiness tests and testing procedures and shall be directed to determining whether objective, accurate and relevant information regarding the comparative crashworthiness of different passenger automobile models reasonably can be provided to consumers by means of a crashworthiness rating rule. Such study shall include examination of at least the following proposed elements of a crashworthiness rating rule:

"(A) information on the degree to which different passenger automobile models will protect occupants across the range of motor vehicle crash types when in use on public roads;

"(B) a repeatable and objective test which is capable of identifying meaningful differences in the degree of crash protection provided occupants by the vehicles tested, with respect to such aspects of crashworthiness as occupant crash protection with and without use of manual seat belts, fuel system integrity, and other relevant aspects;

"(C) ratings which are accurate, simple in form, readily understandable and of benefit to consumers in making informed decisions in the purchase of passenger automobiles;

"(D) dissemination of comparative crashworthiness ratings to consumers either at the time of introduction of a new passenger automobile model or very soon after such time of introduction; and

"(E) the development and dissemination of crashworthiness data at a cost which is reasonably balanced with the benefits of such data to consumers in making informed purchase decisions.

"(3) Any such arrangement shall require the National Academy of Sciences to report to the Secretary and the Congress not later than 18 months after the date of enactment of this subsection on the results of such study and investigation, together with its recommendations. The Secretary shall, to the extent permitted by law, furnish to the Academy upon its request any information which the Academy considers necessary to conduct the investigation and study required by this subsection.

"(4) Within 60 days after transmittal of the report of the National Academy of Sciences to the Secretary and the Congress under paragraph (3) of this subsection, the Secretary shall initiate a period (not longer than 90 days) for public comment on implementation of the recommendations of the National Academy of Sciences with respect to a rule promulgated under this title establishing an objectively based system for determining and publishing accurate comparative crashworthiness ratings for different passenger automobiles.

"(5) Not later than 180 days after the close of the public comment period provided for in paragraph (4) of this subsection, the Secretary shall determine, on the basis of the report of the National Academy of Sciences and the public comments on such report, whether an objectively based system can be established by means of which accurate and relevant information can be derived that reasonably predicts the degree to which different makes and models of passenger automobiles provide protection to occupants against the risk of personnel injury or death as a result of motor vehicle accidents. The Secretary shall promptly publish the basis of such determination.

"(g)(1) If the Secretary determines that the system described in subsection (f)(5) of this section can be established, the Secretary shall, subject to the exception provided in paragraph (2) of this subsection, not later than three years after the date of enactment of this subsection, promulgate a rule under this title establishing an objectively based system for determining and publishing accurate comparative crashworthiness ratings for different passenger automobiles. The rule promulgated under this subsection shall be practicable and shall provide the public relevant objective information in a simple and readily understandable form in order to facilitate comparison among the various makes and models of passenger automobiles so as to contribute meaningfully to informed purchase decisions.

"(2) The Secretary shall not promulgate such rule unless (A) a period of 60 calendar days has passed after the Secretary has transmitted to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Energy and Commerce of the House of Representatives a summary of the comments received during the period for public comment specified in subsection (f)(4) of this section, or (B) each such committee before the expiration of such 60-day period has transmitted to the Secretary written notice to the effect that such committee has no objection to the promulgation of such rule.".

(b)(1) Section 201 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941), as amended by this Act, is further amended by adding at the end thereof the following:

"(h) If the Secretary promulgates a rule under subsection (g) of this section, not later than 3 years after the date of enactment of the National Highway Traffic Safety Administration Authorization Act of 1985, the Secretary shall by rule establish procedures requiring passenger automobile dealers to make available to prospective passenger automobile purchasers information developed by the Secretary and provided to the dealer which contains data comparing the crashworthiness of passenger automobiles.".

(2) Section 2 of the Motor Vehicles Information and Cost Savings Act (15 U.S.C. 1901) is amended by adding at the end thereof the following new paragraph:

"(19)(A) The term 'passenger automobile' means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less.

"(B) As used in subparagraph (A) of this paragraph, the term 'multipurpose passenger vehicle' means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 304. Section 403 of title 23, United States Code, is amended by adding at the end thereof the following:

"(g) There is authorized to be appropriated for purposes of carrying out this section not to exceed $31,000,000 for fiscal year 1987.".

Mr. DANFORTH. Mr. President, in April of 1985, I introduced S. 863, the National Highway Traffic Safety Administration Authorization Act of 1985 on behalf of Senator PACKWOOD, Senator GORTON, Senator LAUTENBERG, Senator MURKOWSKI, and myself. Later that month, the Senate Commerce Committee ordered the bill favorably reported with certain amendments, including one to restrict the importation of "gray market" automobiles that do not meet U.S. safety standards. After the committee acted, further progress on the bill through the Senate was stopped, primarily because of concern that the gray market amendment went too far and was anticompetitive. Moreover, some concerns were raised regarding the bill's provisions on side impact protection and automobile crashworthiness data.

Last December, Senator INOUYE and Senator RUDMAN announced that after extensive negotiations they had reached a compromise agreement on gray market automobiles. Since then, they have reduced their agreement to amendment form, and will be offering that today. I also will be offering an

amendment that addresses the concerns raised with other provisions of the bill and strikes the bill's fiscal 1986 authorizations, which have been rendered unnecessary by the passage of time. With the adoption of these two amendments, I believe we finally will have a bill that all our colleagues can and should support.

The National Highway Traffic Safety Administration [NHTSA] of the U.S. Department of Transportation [DOT] has been charged with the responsibility of saving lives and preventing injuries on our Nation's highways. NHTSA administers three landmark statutes: The National Traffic and Motor Vehicle Safety Act of 1966; the Highway Safety Act of 1966; and the Motor Vehicle Information and Cost Savings Act. These statutes direct NHTSA to establish safety standards, mandate compliance, undertake safety research, order recalls, and provide consumers with information on motor vehicles.

It is clear that many of NHTSA's programs are actively promoting highway safety. In testimony before the Commerce Committee last year, NHTSA Administrator Diane Steed noted that the highway accident fatality rate in 1984 declined to an all-time low of 2.55 deaths per hundred million vehicle miles traveled. I have no doubt that many of NHTSA's efforts, such as in the areas of drunk driving and child passenger safety, along with improved motor vehicle design and construction and other factors, have been important contributors to this improvement.

Nevertheless, the fact remains that roughly 44,000 people died in highway accidents in 1984. It is clear that NHTSA must continue to work aggressively to improve highway safety in a broad range of areas. I also believe there are specific actions that NHTSA can take which will enhance highway safety.

The following is a description of the bill as amended by my amendment today. Title I authorizes funding for NHTSA's highway safety programs for fiscal 1987. This title also authorizes DOT to reprogram $20 million of existing funds to enable DOT to conduct the National Seat Belt/Passive Restraint Education Program established as part of Secretary Dole's July 1984 occupant crash protection standard. We intend, however, that DOT spend half of the reprogramed funds for air bag education efforts. The bill further directs DOT to use at least $5 million of these reprogramed funds to carry out a program to demonstrate the effectiveness of air bag technology, with emphasis on lowest cost technologies.

Title II of this legislation authorizes funding for fiscal 1987 for the State and community highway safety grant program, the so-called section 402 program. This legislation authorizes funding of $132 million for this important safety program; this is equivalent to the fiscal 1986 authorization provided in Public Law 98-363.

In addition, title II authorizes funding for fiscal year 1987 for the Drunk Driving Incentive Grant Program established in 1982. This program, which encourages States to enact tougher drunk driving laws, has been working well. According to NHTSA 17 States have qualified thus far for a basic grant; 14 of these States have also qualified for a supplemental grant which requires a State to meet additional criteria. I understand that seven other States are working to meet the grant criteria of the 1982 law.

Title III of the legislation directs NHTSA to take action in two specific areas:

One, side impact protection—more than 9,000 Americans die each year in side impact crashes and another 20,000 suffer serious, nonfatal injuries. The current side impact protection standard is effective in preventing death and serious injury in single-vehicle crashes, where about 30 percent of the life-threatening injuries occur, but it is not effective in vehicle-to-vehicle crashes.

Research in the 1970's showed that the side impact crashworthiness of cars could be significantly improved using existing technology. In December 1979, NHTSA issued an advance notice of proposed rulemaking to upgrade the side impact protection standard, No. 214. The new standard would have required testing procedures which more closely resemble real-world crashes, and also would have been extended to apply to light trucks, vans, and multipurpose passenger vehicles. In July 1982, however, NHTSA terminated this rulemaking, stating that many complex issues needing resolution had arisen. NHTSA indicated, however, that the rulemaking would be reopened after further research and analysis had been completed and appropriate test methods had been developed.

I believe that motor vehicle side impact protection can be improved now. The bill requires NHTSA to reopen its rulemaking on standard 214 within 60 days after the enactment of this act. Not later than 1 year after the enactment of this act, NHTSA would be required to establish performance criteria for improved occupant protection in side impact and would be required to issue an advance notice of proposed rulemaking to extend the applicability of standard 214 to light trucks, vans, and multipurpose passenger vehicles.

Two, automobile crashworthiness data—the bill requires NHTSA to make arrangements with the National Academy of Sciences to conduct a study to determine an appropriate method for calculating a uniform numerical rating which will enable consumers to compare meaningfully the crashworthiness of different passenger automobile models. No later than 18 months after the date of enactment, the National Academy of Sciences shall report to NHTSA and to Congress on the results of its study together with its recommendations. In turn, NHTSA shall determine, on the basis of the report and public comments on the report, whether an objectively based system can be established that can be used to compare the crashworthiness of different modes. If NHTSA determines that such a system can be established, it shall promulgate a rule not later than 3 years after the date of enactment. If such a rule is promulgated, then NHTSA shall establish procedures requiring automobile dealers to make crashworthiness data available to prospective automobile purchasers.

The current statute requires NHTSA to compile information regarding the crashworthiness of automobiles. Furthermore, consumers want this type of information. A 1981 NHTSA survey of 2,231 recent or prospective new car purchasers found that 78 percent of those surveyed agreed with the statement made by interviewers that they "like the idea of government rating of things, like safety and maintenance costs." Further, more than 71 percent of the respondents said they would be willing to spend an additional $400 for a safer car. I believe we need to ensure that every effort is made to try to find a way to provide meaningful information to consumers on automobile crashworthiness.

Title III also authorizes fiscal 1987 funding for DOT's Highway Safety Research and Development Program. This program provides research funds for such things as training or education of highway safety personnel and studying the relationship between drug consumption and highway safety. Continued support for this program is vital to efforts to reduce highway deaths and injuries. This provision is identical to one that was included in S. 1529, which the Senate passed on July 31, 1985.

Title IV of the bill deals with the importation of gray market automobiles. I do not believe it is necessary to describe the details of this title here, primarily because Senators INOUYE and RUDMAN will do so in their statements on their amendment. However, I would like to use this opportunity to congratulate both Senators and to say that I appreciate their efforts to come up with a compromise and to allow this bill to move forward. I would be remiss not to mention that I voted against the gray market amendment when it was offered in the committee, because I thought it was overly broad and anticompetitive. Today, I support the Inouye-Rudman gray market

amendment. In my view, it strikes an appropriate balance between the need to ensure that cars operating in the United States meet our safety standards and the need to encourage competition in automobile sales.

Mr. President, it is essential that we do all that we can to promote highway safety in this country. This bill, as amended, will help us to meet this important goal.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 1965) was agreed to.

AMENDMENT NO. 1966

(Purpose: To amend provisions regarding graymarket automobiles)

Mr. BYRD. Mr. President, I send an amendment to the desk on behalf of Senators INOUYE and RUDMAN to the committee amendment in the nature of a substitute to title 4 dealing with gray market autos.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD], for Mr. INOUYE and Mr. RUDMAN, proposes an amendment numbered 1966.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, strike all from line 1 through line 14 on page 20, and insert in lieu thereof the following:

TITLE IV—CONTROL OF IMPORTATION OF CERTAIN VEHICLES TO ENSURE COMPLIANCE WITH SAFETY STANDARDS

AMENDMENTS TO THE NATIONAL TRAFFIC AND MOTOR VEHICLE SAFETY ACT OF 1966

SEC. 401. (a) Section 108(b) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(b)) is amended—

(1) by striking paragraphs (3) and (4); and

(2) by redesignating paragraph (5) as paragraph (3).

(b) Section 108 of such Act (15 U.S.C. 1397) is amended—

(1) by redesignating subsection (c) as subsection (f); and

(2) by inserting after subsection (b) the following:

"(c)(1) Except as provided in this subsection and subsection (d), a motor vehicle or item of motor vehicle equipment offered for importation in violation of subsection (a)(1)(A) shall be refused entry into the United States.

"(2) In the case of any vehicle imported under this subsection, the person importing the vehicle shall furnish a bond in the amount of the dutiable value of the vehicle plus the duty, and shall comply with such terms and conditions as it appears to the Secretary appropriate to ensure that any such vehicle—

"(A) will be brought into conformity by such person with all applicable Federal motor vehicle safety standards prescribed under this title within a reasonable time after such importation (as specified by the Secretary); or

"(B) will be exported (at no cost to the United States) or abandoned to the United States.

"(3)(A) Subsection (a)(1)(A) and paragraph (1) of this subsection shall not apply to any motor vehicle if—

"(i) the vehicle is imported by an importer registered under procedures established by the Secretary;

"(ii)(I) the vehicle is determined under subparagraph (C) to be substantially similar to motor vehicles originally manufactured for importation into the United States and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards; or

"(II) where there is no substantially similar United States motor vehicle, as determined by the Secretary, the Secretary determines that the safety features of the vehicle comply with or are capable of being modified to comply with all applicable Federal motor vehicle safety standards, as determined on the basis of destructive test data and such other evidence as the Secretary determines to be adequate;

"(iii) the registered importer pays upon registration and annually each year thereafter (I) such fee as the Secretary reasonably establishes to cover the cost of administering the requirements of this subsection, except those referred to in clause (iv), and (II) such other fee or fees as the Secretary reasonably establishes to cover the cost of processing the bond furnished under paragraph (2), making the determinations under clause (ii), and conducting tests and investigations pursuant to subparagraph (D);

"(iv) the person making modifications to the motor vehicles pays upon registration such fee as the Secretary reasonably establishes to cover the cost of registration and inspection of facilities at which modifications are performed; and

"(v) any modifications to the motor vehicle are performed pursuant to procedures described in support of the petitions approved under subparagraph (C) and are performed at a facility which has been registered by the Secretary under procedures established by the Secretary.

"(B)(i) The amount or rate of fees under subparagraph (A) (iii) and (iv) shall be reviewed by the Secretary and adjusted, if appropriate, by the Secretary at least every 2 years.

"(ii) The amount or rate of any such fee applicable in any calendar year shall be established by the Secretary before the beginning of such year.

"(iii) Fees collected shall be available, to the extent provided in advance by appropriation Acts, solely for use by the Secretary in the administration of the requirements of this subsection.

"(iv) The Secretary shall publish such regulations as may be necessary to ensure that the requirements of this section are fully met.

"(C)(i) The Secretary shall make determinations under subparagraph (A)(ii) upon the petition of a registered importer, and shall expend every reasonable effort to make any such determination within 45 days after the receipt of such a petition. The Secretary shall establish by regulation the information required in any such petition, except that each such petition shall contain information that clearly shows that the vehicle is capable of being brought into compliance with all applicable Federal motor vehicle safety standards. Such information shall include a complete description of all the work to be performed, an engineering analysis (where applicable), and evidence that any modification to be made for purposes of such compliance does not appear to create a violation of any applicable Federal motor vehicle safety standard or a defect relating to motor vehicle safety.

"(ii) In considering any such petition, the Secretary shall give due consideration to any tests or other information available to the Secretary, including any information provided by the manufacturer or other interested parties. The Secretary shall in a timely manner compile a list of petitions received, and shall make such lists available to the public. After such a determination is made, petitioners shall be offered an opportunity to present views and evidence relevant to the determinations made by the Secretary.

"(iii) The Secretary shall annually publish in the Federal Register a list of all determinations made under subparagraph (A)(ii) and shall make available to the public all information and evidence submitted by petitioners after such determinations are made. Other interested parties may also comment on such information.

"(iv) The approval of any such petition shall be sufficient authority for any other importer or manufacturer, to take any action which the registered importer or manufacturer who submitted such petition was authorized to take under such approved petition, if the other importer or manufacturer complies with all terms and conditions of such petition.

"(D) The Secretary shall establish procedures for periodically conducting inspections and tests, including destructive tests, of vehicles pursuant to this subsection to determine compliance with all applicable Federal motor vehicle safety standards. The Secretary shall also establish procedures for periodically inspecting facilities registered under this subsection to ascertain whether such facilities are performing modifications pursuant to this section. The Secretary shall inspect each such facility within one year after the effective date of regulations promulgated under this section or six months after a facility is registered under this subsection, whichever is later. The Secretary may, to the extent funds for such purposes are available, retain the services of temporary employees for the performance of such inspections, if the Secretary determines that it is necessary to retain such services. Such employees shall not, by reason of such employment, be deemed to be Federal employees for any purposes.

"(E) Determinations made under subparagraph (C)(i) shall be revoked if, on the basis of tests and inspections conducted by the Secretary, the Secretary finds that a clear pattern of noncompliance exists with respect to motor vehicles covered by any such determination. The Secretary shall give due consideration to any relevent information submitted to the Secretary under this subsection.

"(4)(A) In order to acquire and maintain registration under this subsection, an importer shall comply with all requirements which the Secretary shall establish under this subsection. Such requirements shall include requirements for recordkeeping, including a record of the make and model of each vehicle and its vehicle identification number, inspection of records and facilities relating to each vehicle which such person has imported or modified, or both, and, for purposes of maintaining registration under

this subsection, annual payment and documentation of payment of any applicable taxes and duties provided for under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064) and penalties due under section 508(b)(1) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2008(b)(1)). Upon terminating or transferring its business, such importer shall submit such records to the Secretary.

"(B) The Secretary shall establish procedures for (i) the revocation or suspension of a registration issued under this subsection for failure to comply with any requirement of this Act, including the requirements of subparagraph (A), or regulations issued under this Act, (ii) automatic suspension of registrations for failure to pay any fee referred to in paragraph (3)(A)(iii) or (iv) in a timely manner, and (iii) reinstatement of suspended registrations.

"(5)(A) Prior to the date described in subparagraph (B), a registered importer shall not—

"(i) release custody of an imported motor vehicle to any person for license or registration for use on public roads, streets, or highways; or

"(ii) license or register an imported vehicle for use on public roads, streets, or highways or otherwise operate such vehicle (other than for testing).

"(B) An importer shall not take any action set forth in subparagraph (A) until—

"(i) the registered importer has filed a certification statement with the Secretary signed and containing the following statement: 'This vehicle has been modified in accordance with procedures established in an approved determination and conforms to all applicable Federal motor vehicle safety standards in effect on .' (with the date such certification statement is filed being inserted in the blank space);

"(ii) the Secretary has reviewed and accepted such certification as valid;

"(iii) the Secretary has confirmed that the importer has labeled the vehicle and that the label is prominently displayed in a form to be determined by the Secretary, stating that the vehicle was not originally manufactured to comply with all applicable Federal motor vehicle safety standards but has been modified by the registered importer to comply with standards, and stating the obligations of the registered importer under this subparagraph; and

"(iv) the Secretary has confirmed that the importer has established the fuel economy ratings for purposes of determining the tax due under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064) and has labeled the vehicle to meet the requirements of section 506(a)(1)(C) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2006(a)(1)(C)).

Within 30 days after the date on which a certification statement is filed under clause (i) of this subparagraph, the Secretary shall accept such certification statement and issue a bond release letter, or reject such certification statement.

"(C) A State may require the registered importer to provide to appropriate State authorities a notarized English translation of all title and ownership documentation.

"(D) The Secretary may require that any such certification statement be accompanied by such evidence of compliance as the Secretary considers appropriate, or that the vehicle be inspected by the Secretary, or both.

"(6) For purpose of part B of this title—

"(A) the registered importer shall be deemed to be the manufacturer with respect to all motor vehicles imported by such importer;

"(B) in the case of any defect or failure to comply with any applicable motor vehicle safety standard in or regarding any motor vehicle which was originally manufactured for importation into the United States, any imported motor vehicle that has a valid certification under this subsection and that is determined to be substantially similar to such motor vehicle shall be treated as having the same defect or failure unless the manufacturer or registered importer demonstrates otherwise to the Secretary;

"(C) the Secretary shall publish in the Federal Register notice of any defect or failure referred to in subparagraph (B), and any defect in or failure to comply regarding any motor vehicle imported under this subsection which is reported by the manufacturer of such motor vehicle; and

"(D) the registered importer shall be treated as the manufacturer with respect to the motor vehicles imported, except that in the case of defects referred to in subparagraphs (B) and (C), the Secretary shall establish procedures to ensure that the original manufacturer of the vehicle or one of its domestic subsidiaries or affiliates shall, at the time of any recall determination affecting such vehicle, cooperate with the Secretary to facilitate a successful and timely recall.

"(7) The Secretary shall, by regulation, establish requirements to ensure that the registered importer (or any successor in interest) will be capable of carrying out the importer's responsibilities under part B of this title. The Secretary shall require each registered importer to provide evidence of sufficient financial responsibility to meet such obligations. Such evidence may include the posting of a prepaid surety bond for each motor vehicle or similar guarantee measures.

"(8) Section 109 shall apply in the case of any violation of the requirements of this subsection, except that the amount of any civil penalty imposed under such section for any such violation shall not exceed $5,000 for each such violation and shall not exceed $800,000 for any related series of violations.".

(c) Section 108 of such Act (15 U.S.C. 1397) is amended by inserting after subsection (c), as added by subsection (b) of this section, the following:

"(d) Subsection (a)(1)(A) and subsection (c)(1) shall not apply to any motor vehicle or item of motor vehicle equipment if—

"(1) it requires further manufacturing to perform its intended function (as determined under regulations prescribed by the Secretary); and

"(2) it is accompanied at the time of entry by a written statement issued by the manufacturer of the incomplete vehicle or item of equipment which indicates the applicable Federal motor vehicle safety standard with which such vehicle or item is in compliance.".

(d) Section 108 of such Act (15 U.S.C. 1397) is amended by inserting after subsection (d), as added by subsection (c) of this section, the following:

"(e)(1) Subsections (a)(1)(A) and (c)(1) shall not apply to any motor vehicle if the vehicle is imported for personal use, and not for resale, by a member of the uniformed services (as defined in section 2101 of title 5, United States Code) or the foreign service (as defined in section 103 of the Foreign Service Act of 1980 (22 U.S.C. 3903))—

"(A) whose permanent duty station or assigned place of employment is outside the United States;

"(B) who has not previously imported a vehicle into the United States under the authority of this section (or subsection (b)(3) with respect to the period before the date of enactment of the National Highway Traffic Safety Administration Authorization Act of 1985); and

"(C) who agrees to have the vehicle modified to meet all applicable Federal motor vehicle safety standards at a facility registered under subsection (c)(3)(A)(iv).

"(2) Subsections (a)(1)(A) and (c)(1) shall not apply to any motor vehicle if the vehicle is imported on a temporary basis for personal use, and not for resale, by any individual who is a member of—

"(A) the personnel of a foreign government on assignment in the United States who is within the class of persons for whom free entry of vehicles has been authorized by the Secretary of State;

"(B) the armed forces of a foreign country on assignment in the United States; or

"(C) the Secretariat of a public international organization so designated under the International Oganizations Immunities Act (22 U.S.C. 288 et seq.).

The Secretary may require such verification of such status as the Secretary considers appropriate. The Secretary shall ensure that any vehicle entered under this subsection will be exported (at no cost to the United States) or abandoned to the United States when the individual involved ceases to reside in the United States and to hold such status.

"(3) The Secretary may exempt any motor vehicle or item of motor vehicle equipment from subsections (a)(1)(A) and (c)(1) upon such terms and conditions as the Secretary may find necessary solely for the purpose of research, investigations, studies, demonstrations or training, or competitive racing events.".

(e)(1) The first sentence of section 501(8) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2001(8)) is amended by inserting immediately before the period the following: "and any importer registered to import vehicles pursuant to section 108(c) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(c))".

(2) Section 502(c)(1) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2002(c)(1)) is amended by inserting immediately after "manufacturer" the first time it appears the following: "(expect a manufacturer registered to import vehicles pursuant to section 108(c) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(c))".

(f) Section 108(a)(1)(A) of such Act (15 U.S.C. 1397(a)(1)(A)) is amended by inserting immediately after "such standard" the following: "and is covered by a certification issued under section 114,".

(g) Section 114 of such Act (15 U.S.C. 1403) is amended—

(1) by inserting ", as appropriate," immediately after "dealer";

(2) by striking "or distributor" wherever it appears;

(3) by inserting immediately after the first sentence the following: "Every distributor of a motor vehicle or item of motor vehicle equipment shall furnish to a dealer or subsequent distributor at the time of delivery of such vehicle or item of equipment the manufacturer's certification that was previously furnished to the distributor."; and

(4) by adding at the end thereof the following: "As used in this section and section 108, the term 'manufacturer' means any person engaged in the manufacturing or assembling of motor vehicles or items of motor vehicle equipment, including any other person who acts for or is under the control of such person with respect to the importation of such vehicles or items of equipment.".

(h)(1) Section 108(a)(1)(A) of such Act (15 U.S.C. 1397(a)(1)(A)) is amended by striking "subsection (b)" and inserting in lieu thereof "subsections (b), (c), (d), and (e)".

(2) Section 108(b)(2) of such Act (15 U.S.C. 1397(b)(2)) is amended by striking "or importer".

(i) The General Accounting Office shall prepare and submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives on July 1, 1988 and on or before July 1 of each year thereafter a comprehensive report on the administration of sections 108(c), (d) and (e) of the National Traffic and Motor Vehicle Safety Act of 1966, as added by this section. Such report shall include, but need not be restricted to—

(1) a listing of the registered importers and the determinations made by the Secretary under section 108(c)(3)(C) of such Act;

(2) a description by model year and make of the vehicles entered under such section;

(3) an itemization of the number of such vehicles entered, segregated by model number and year;

(4) the degree of observed compliance with applicable Federal motor vehicle safety standards;

(5) a description of the efforts undertaken by the Secretary under section 108(c)(3) and (4) of such Act, including tests and investigations conducted and the results of such tests and investigations;

(6) an accounting of the fees collected and expended by the Secretary pursuant to section 108(c)(3)(A)(iii) and (iv) of such Act;

(7) an assessment of the Secretary's compliance in processing certification statements under section 108 of such Act in a timely manner and a compilation of the number of certification statements received;

(8) compliance with any requirement of applicable taxes and duties provided for under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064); and

(9) such other information as the General Accounting Office considers appropriate.

The report shall contain such recommendations for additional legislation as is considered necessary to ensure that motor vehicles not originally designed or manufactured for compliance with all applicable Federal motor vehicle safety standards are being properly brought into compliance following importation into the United States.

(j) The Secretary of Transportation shall prepare and make available to the public information on the importation of motor vehicles into the United States and procedures to be followed to bring such vehicles into conformity with Federal motor vehicle standards.

(k) The Secretary of Transportation shall conduct a study on the effectiveness of the amendments made by this section in ensuring compliance with applicable motor vehicle safety standards and enhancing motor vehicle safety. Such study shall be submitted to the Congress not later than 36 months after the date of enactment of this Act. Following receipt of such study, the Congress shall determine and enact, if any, those changes to existing law which it considers appropriate. Such changes may include termination of the conditional importation of nonconforming vehicles, repeal of this title, or appropriate modifications of procedures provided for under this title.

(l)(1) The Secretary of Transportation shall promulgate such regulations as may be necessary to implement the provisions of this title as soon as practicable, but in no case later than eight months after the date of enactment of this Act. The amendments made by this title shall take effect three months after such regulations become effective, except that such amendments shall take effect prior to the expiration of such three-month period with respect to any model of a vehicle for which a determination is made under section 108(c)(3)(C) of the National Traffic and Motor Vehicle Safety Act of 1966 (as added by subsection (a) of this section), as soon as such determination is made.

(2) Any person may commence a civil action on such person's own behalf against the Secretary of Transportation to compel the Secretary to promulgate regulations under this section where there is alleged a failure by the Secretary to promulgate such regulations by the date specified in paragraph (1) of this subsection. The United States Court of Appeals for the District of Columbia shall have jurisdiction over such action and may award costs of litigation (including reasonable attorney's fees) to the prevailing party (other than the United States Government) whenever the Court determines that such award is appropriate. Any petition under this paragraph shall be granted an expedited hearing by the Court.

(3) As soon as possible after the date of enactment of this Act, the Secretary of Transportation shall take steps designed to encourage notification regarding the changes made by this section to members of the uniformed services and other individuals who may be affected by such changes.

Mr. INOUYE. Mr. President, I am pleased to join with my colleague from New Hampshire in offering for consideration a substitute for title IV of S. 863, the National Highway Traffic Safety Administration Act of 1985. As my colleagues are aware, the bill as reported out of committee on April 18, 1985, effectively would have brought an immediate end to the so-called gray market in automobiles. After months of extensive negotiations, we have agreed on compromise language that will more effectively regulate the current importation and modification process.

As many of you may recall, the Senator from New Hampshire and I inserted a summary of our amendment in the CONGRESSIONAL RECORD on December 19, 1985. At that time, the chairman of the Commerce Committee informed us that he would push for prompt consideration of this measure. We are very pleased to have the opportunity to pass this bill today and wish to again thank the chairman and the staff of the Commerce Committee for assisting us in that effort.

Our compromise is rather complicated and differs fundamentally from title IV as reported out of committee. Moreover, a few technical changes have been made to the draft since December 19, 1985. I therefore thought my colleagues would find it helpful if I described the specifics of this substitute amendment. This discussion should help clarify and amplify the summary we had printed in the CONGRESSIONAL RECORD.

Mr. President, at the outset I want to emphasize that I and many Members of Congress have become increasingly concerned that in many instances persons engaged in the business of bringing into compliance gray market motor vehicles have failed to modify the vehicles as required by existing safety and pollution laws and regulations. We have become further concerned that certain modifications made by these gray market modifiers have increased the risk of harm to human life and health, thereby undermining the longstanding efforts of the Congress to promote the protection of motor vehicle passengers through the enactment of motor vehicle safety laws. Finally, we have become concerned that gray market importers and modifiers are operating outside of the existing regulatory framework that governs both the manufacturing of motor vehicles by manufacturers in the United States and abroad and the sale of vehicles in the United States through their authorized dealers.

Our purpose in developing this compromise amendment has been to bring gray market importers and modifiers within the existing regulatory framework that governs the manufacturing and the sale of vehicles through authorized dealers. We have sought to level the playing field and hope our colleagues will agree that this objective has been accomplished.

Mr. President, under the program we are establishing, gray market vehicles may generally be imported into the United States only if they are substantially similar to a model manufactured for the U.S. market and are modified at an approved facility. We have included a special provision to ensure that military personnel and foreign service personnel returning from abroad may import an automobile for personal use and have it modified to meet U.S. safety and emission standards here in the United States. We also have included a provision providing that, even in those instances in which a substantially similar U.S.-made vehicle does not exist, a vehicle made for a foreign market may be imported and then modified if the Secretary determines, on the basis of destructive test data and other information, that the vehicle can be modified to comply with all applicable Federal motor vehicle safety standards.

To ensure that this new program does not drain taxpayer resources, registered importers must pay upon registration and annually thereafter what-

ever fee the Secretary calculates is necessary to cover the cost of administering the entire program. Such fees must cover, among other things, the cost of processing bonds, making determinations, and conducting tests and investigations. Additionally, persons registering to make modifications must pay upon registration and annually thereafter a sum sufficient to cover the cost of inspecting the facilities at which modifications may be made. We felt it was appropriate in this limited instance to require the payment of such fees by registered importers and modifiers because this new program is being established solely for their benefit and will continue to permit them to stay in business.

For the benefit of my colleagues, let me explain how this new process works. In short, the Secretary of Transportation makes a determination whether a vehicle can be modified to meet all applicable safety standards. The registered importers—or modifier—must make the modifications as approved by the Secretary and then file a statement confirming he has done so. At that point, the Secretary, if she approves the certification statement, provides the necessary paperwork authorizing release of the customs bond on the vehicle.

Once a determination has been made by the Secretary of Transportation with respect to a particular line or model of vehicle that the vehicle can meet the applicable standards, any other registered importer may, on the basis of that approval, modify the same line or model of vehicle. Of course, such a registered importer must perform the work in the same manner provided for in the approved petition. This should help lessen the regulatory burden that otherwise might have been imposed on the agency. We trust the Secretary will ensure that this provision is not abused to allow registered importers to make modifications without regard for the precise methods and procedures in the petition on which the determination was premised. Moreover, we trust the Secretary will be vigilant in ascertaining whether vehicles modified pursuant to the description provided for in petitions actually meet all applicable Federal motor vehicles safety standards. If she finds, for example, that modifications are not being made, the determination must be revoked. Once a determination has been revoked, vehicles of the same model or line may not be modified in accordance with the determination. These vehicles only can be modified after a new determination is made pursuant to the procedures established for making the initial determination.

With respect to this process, we have not required that the Secretray make such determination through traditional notice and comment rulemaking. However, while we have minimized the regulatory burden, the Secretary nonetheless must include the public in the process prior to making any determination on the merits. We do not want these determinations made solely on the basis of information supplied by petitioners. The petitions must be made available to the public, including original equipment manufacturers, so that they may submit comments and information relevant to the determination before it is made.

To monitor compliance with the law, the Secretary must conduct inspections and tests, including destructive tests, of vehicles imported under this new program. The Secretary also must periodically inspect approved facilities at which modifications are made. The status quo, under which voluntary compliance has been assumed, has proven to be ineffective in ensuring compliance with existing laws and regulations. We trust the Secretary will vigorously carry out her responsibilities to ensure that this pattern of noncompliance is brought to an end.

This amendment addresses other concerns aired in hearings held before the Commerce Committee. As my colleagues are aware, one of the principal concerns that has been raised is the failure of gray-market importers to pay the applicable gas guzzler tax due on each imported low-mileage vehicle. Recently, the Internal Revenue Service issued a revenue ruling confirming that the law has always required the payment of gas guzzler taxes on gray-market vehicles. To ensure that this tax avoidance comes to an end, we have included two provisions in the amendment. The first requires these importers to establish the fuel economy ratings on the vehicles they import for purposes of calculating the gas guzzler tax due. Once those ratings have been established and provided to the relevant Government agencies, no basis will exist for avoiding payment of gas guzzler taxes. The second provision requires registered importers to document payment of this tax in order to maintain their registration.

As a related matter, the amendment provides that each registered importer will be treated as a manufacturer for purposes of CAFE. Each registered importer will calculate a fleet fuel economy average on the basis of the vehicle he imports during each calendar year. To preclude registered importers from avoiding the responsibilities that come with being treated as a manufacturer under the Motor Vehicle Information and Cost Savings Act, the amendment specifically precludes them from claiming to be "small volume" manufacturers. To maintain a registration, each registered importer must document payment of any CAFE penalties due for the prior year.

Mr. President, there also has been a great deal of concern raised about vehicles being released to consumers before modifications have been made or in violation of the terms and conditions of the customs bond placed on each vehicle. To get at this problem, the amendment provides that it shall be unlawful to release custody of a vehicle, operate it—other than for testing—or ignore the conditions imposed by the applicable bond until the registered importer has filed a certification statement with the Secretary that the vehicle has been properly modified, the Secretary has reviewed the certification as valid, the Secretary has confirmed a consumer disclosure label has been placed on the vehicle, and the fuel economy ratings for the vehicle have been established and provided to the relevant Government agencies. We would hope this process would be completed within 30 days for each vehicle.

The amendment also provides that States may require registered importers to provide appropriate State authorities with a notarized English translation of all title and ownership documentation. This should assist those States that wish to enact such measures as part of their traditional police power function of setting the conditions under which vehicles may be titled and registered. We fully recognize that the gray-market presents unique and unanticipated concerns for State governments.

In an effort to reduce the opportunities for the unscrupulous to avoid making the modifications required under existing law, we have built a number of safeguards into the system.

First, the types of vehicles which may be imported generally are limited to those which are "substantially similar" to vehicles originally manufactured and certified for importation into the United States and which are capable of being readily modified to meet all U.S. standards. For certain safety features of a motor vehicle, such as the structural features protecting the passenger compartment, it is impossible to assess compliance with U.S. safety regulations merely by visual inspection. Destructive crash testing is needed. Because gray-market vehicles will not be crash tested before importation, these "concealed" safety features of the gray-market vehicles must be substantially the same as those on U.S. certified models before importation and modification. The term "readily modified" in the statute should be taken to mean the replacement or addition of components to a motor vehicle without significant change to the integrity of its structure.

Second, vehicles may be modified only at a facility inspected, approved, and registered by the Secretary.

Third, before any vehicles may be modified, a registered importer must first establish—with respect to the

particular line or model of vehicle involved—that the vehicle can be modified to meet all applicable Federal motor vehicle safety standards and that any modifications made for the purpose of compliance with any applicable law or regulation will not appear to create a violation of these standards or a defect relating to motor vehicle safety. The petition submitted to the Secretary should include an analysis by a qualified professional engineer certifying that this is the case with respect to the safety features of the vehicle.

Fourth, the Secretary must approve a certification statement filed by each registered importer before issuing the bond released letter applicable to each imported motor vehicle.

Finally, the Secretary by regulation must establish requirements to ensure that the registered importers who will be making these modifications have the financial capability to meet their obligations under our safety laws and regulations. We have suggested requiring the posting of a prepaid surety bond on each vehicle as one means of protecting consumers from financially irresponsible importers.

So that we can monitor how this new program works in operation, the amendment requires the GAO to provide us with an annual report beginning in 1988. Also, the Secretary must conduct a study of the effectiveness of the program within 3 years. At that point, the Congress will be in a good position to access whether modifications to the program are necessary.

In closing, I might add that we are very concerned that the provisions in this legislation may not be promptly implemented and the program may not be put into effect. I am sure each of my colleagues has shared the frustration of imposing statutory deadlines, only to have them ignored. Our legislation explicitly provides that the Secretary must publish regulations implementing this amendment within 8 months. We feel this is more than adequate time and, if the Secretary has not done so, any person may commence a civil action in the U.S. Court of Appeals for the District of Columbia Circuit. The court must grant an expedited hearing. We also have suggested that the court award reasonable attorney fees to private litigants if the Government fails to promulgate the regulations and thus occasions an otherwise unnecessary lawsuit. This should provide but one more incentive for the agency to comply with the law and meet the deadline we have set. We do not want to be in a position where through inadvertance or calculated delay the administration can keep the current, unworkable program in effect beyond the time period specified in the amendment.

Mr. President, I want to remind my colleagues that many months of negotiations were necessary to craft this compromise. My colleague from New Hampshire and I have put a great deal of thinking and effort into this amendment. We hope our colleagues will support us in agreeing to it without any further delay.

Mr. HOLLINGS. Mr. President, current regulations covering the importation of vehicles by individuals who intend to have foreign cars upgraded to U.S. specifications were developed over a decade ago to alleviate hardships for U.S. military and foreign service personnel returning to the United States from Europe with cars purchased overseas. Since the mid-1960's, these special importation provisions have become a loophole through which entrepreneurs, operating outside of the importing and distributing companies of manufacturers, have created a gray market for importing vehicles into the United States which do not meet U.S. safety and emissions standards. The vehicles are then supposed to be upgraded to meet these standards. At hearings held by the Commerce Committee, testimony was received that many of these cars are not modified correctly, and consequently, do not meet all U.S. safety standards.

When the Commerce Committee reported S. 863, an amendment, offered by Senators INOUYE and FORD, was added to the bill. This amendment would have prohibited the importation of gray market cars with a few limited exceptions. After the Commerce Committee acted, several Senators expressed concerns about this provision. Senator RUDMAN and Senator INOUYE as well as Senators FORD, RIEGLE, and DANFORTH met for months in an effort to work out a compromise. A compromise was reached at the end of our last session and Senators RUDMAN and INOUYE outlined the compromise on the Senate floor on December 19, 1985.

This is the language being offered today as a substitute to title IV of S. 863. I want to commend all the Senators who worked diligently on this amendment. I think it is a reasonable approach to the problem.

It provides for stricter supervision of those who import and modify these cars and better enforcement of the laws and regulations which govern the gray market.

I believe this program will result in safer cars and fewer injuries on our highways and I urge my colleagues to support this amendment.

(By request of Mr. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. CHILES. Mr. President, I would like to rise in support of the so-called gray market amendment that was put together by Senators RUDMAN and INOUYE.

This amendment, which is the result of rather extensive negotiations and compromise on both sides of the issue, is a product of the legislative process at its best. The result is one in which a small but valuable market for automobile consumers has been preserved, while at the same time it preserves the design and safety standards that all domestic U.S. cars must meet.

I feel it is important to retain the direct import market for automobiles because the price and choice competition that it creates is good for the American consumer.

But that competition should not be retained at the price of sacrificing needed and proven Federal motor vehicle safety standards.

This amendment meets both of those objectives.

First, it allows the continued direct marketing of automobiles from abroad so long as those cars meet American safety standards.

Second, a set of procedures is set up—including bonding and certification—to assure that direct import automobiles do indeed meet those standards once they are brought here. That, of course, includes modification of the automobiles when necessary.

Third, to assure that there is no cost to the Government, the importers will pay fees necessary to finance the program.

When the car is imported, the importer must post a bond with the U.S. Department of Transportation which is equal to the dutiable value of the car plus the duty pending its modification to meet U.S. safety standards.

After modification, the importer must submit a certification statement to DOT showing that the car has been modified in compliance with Federal safety standards. This certification statement must be approved or rejected by the Secretary within 30 days.

This set of procedures and the amendment itself establish an important principal—we will keep our markets open, but we will insist that safety standards be upheld.

I congratulate the sponsors of this statement for coming up with a workable compromise.●

Mr. RUDMAN. Mr. President, the Inouye-Rudman amendment addresses the importation of so-called gray market or direct import automobiles. This amendment represents a compromise worked out by the distinguished senior Senator from Hawaii, myself, and other members of the Commerce Committee. Its purpose is to ensure that gray market cars may continue to be imported into the United States so long as they are brought into compliance with applicable Federal motor vehicle safety standards.

Direct import cars, commonly known as gray market cars, are foreign-manufactured cars that are imported direct-

ly by independent importers. This activity is entirely legal provided that certain procedures are followed to ensure that these cars, which may not have been originally manufactured for distribution in the United States, are brought into compliance with Federal environmental and safety standards prior to their release into interstate commerce. It should be noted that there is a gray market for many products other than automobiles. The gray market generally arises when foreign manufacturers implement discriminatory pricing strategies whereby American consumers are charged a higher price for a product than is charged for the same or comparable item sold overseas. For example, a Mercedes-Benz sold in this country may cost $20,000 more than a comparable Mercedes sold in Germany. Independent importers take advantage of this dual pricing system by importing items directly and selling them to the American consumer for a price considerably lower than that offered by the foreign manufacturer's U.S. distributor.

The gray market provides enormous benefits to the consumers of this country by ensuring the existence of price and choice competition and, in this way, keeping prices down. When gray market importers introduced competition in other markets, the cost of products such as Seiko watches, Nikon cameras, and Canon cameras all dropped by about one-third. The U.S. Department of Justice recently estimated that the cost to the consumer of eliminating the gray market in automobiles would be millions of dollars.

When S. 863 was reported out of the Commerce Committee, it included an amendment sponsored by my good friend, Senator INOUYE, which had the effect of shutting down the gray market entirely. This provision was unacceptable to me. Free competition is the basis for our economy and one that should be preserved. As already indicated, any effort to prohibit the importation of gray market cars would cost our citizens millions of dollars. Furthermore, I see no justification for the discriminatory pricing schemes perpetrated by some foreign manufacturers and am not prepared to protect their profits by eliminating the gray market.

I do, however, understand my colleague's concern that some gray market cars are not adequately being brought into compliance with safety standards. Frankly, I believe that most gray market automobile importers are conscientiously modifying vehicles so that they are in complete compliance with Federal standards. I was nonetheless willing to work with the Senator from Hawaii to devise a program which will tighten up on enforcement of the gray market. I would like to take this opportunity to summarize the major provisions of our compromise.

The amendment requires importers to register with the Secretary of Transportation and pay such fees as are necessary to cover any additional costs to the Department of Transportation resulting from its administration of the provisions of this amendment, except those associated with registration of persons performing modifications and inspection of their facilities. Accordingly, individuals performing modifications to gray market cars, in the case where such person is not the importer, must also register with the Secretary and pay an appropriate fee. Thus, this amendment will allow the Department to meet its obligations without adding to the Federal budget deficit.

The amendment requires the Secretary to make determinations, upon the petition of registered importers, as to which cars are capable of being modified to meet Federal safety standards. The Secretary may make such determinations based on one of two findings. The first is that a vehicle is substantially similar to a vehicle originally manufactured for importation into the United States and the petitioner demonstrates that the car can be modified to fully comply with applicable standards. The second applies in the case where there is no substantially similar domestic vehicle but where the importer provides test data and other information required by the Secretary to show that the car can also be modified to meet all applicable Federal motor vehicle safety standards. Once a determination is made by the Secretary for a particular type of vehicle, any importer may bring in cars covered by the petition so long as the car is modified in accordance with procedures established in the petition. Petitioners shall be afforded an opportunity to appeal a negative determination by submitting additional evidence.

A registered importer may then import a vehicle covered by an approved determination and modify the vehicle in accordance with established procedures. Upon importation, the importer will post a bond equal to the dutiable value of the car plus the duty pending its modification to comply with U.S. standards. Once a vehicle has been modified, the importer submits a certification statement indicating that the vehicle has been modified to comply with applicable Federal motor vehicle safety standards. The Secretary must approve or reject the certification statement within 30 days and issue a bond release letter. It should be noted that the effective motor vehicle standards applicable to any vehicle, including gray market vehicles imported under this section, are those in effect on the date of its original manufacture. This is in conformance with the basic requirements of the Motor Vehicle Safety Act and its implementing regulations. Title 49, section 571.7 of the Code of Federal Regulations states that "each standard set forth in subpart B of this part applies according to its terms to all motor vehicles * * * the manufacture of which is completed on or after the effective date of the standard." Thus, when a new safety standard is issued, it applies only to vehicles manufactured after the effective date specified in the standard. This amendment does not intend that an older vehicle be modified to conform to standards that went into effect after it had been manufactured.

The Secretary is authorized to inspect and test vehicles to determine compliance with the requirements of this amendment. The Secretary is also directed to inspect facilities performing modifications. The direct importer will be responsible for recordkeeping, payment of applicable gas guzzler taxes, and compliance with CAFE requirements. Failure to meet the requirements of this amendment may result in revocation or suspension of registrations or civil penalties of up to $5,000. The registered importer is responsible for defect recalls as is the case with the original manufacturers. In the case of a recall, however, the original manufacturer must cooperate to facilitate a successful and timely recall.

We have also mandated a Department of Transportation study of the effectiveness of this amendment as well as regular GAO reports. The Secretary is directed to promulgate regulations within 8 months after enactment of this legislation. This amendment shall take effect 3 months after the effective date of regulations as established by the Secretary. This 3-month grace period is intended to ensure that importers will be able to continue to import vehicles after the effective date of the regulations and while the Secretary is making determinations. Even within this 3-month period, however, once a determination has been made for a type of vehicle, the regulations shall be effective for vehicles imported under that determination.

This amendment is the product of many hours of negotiation and compromise. I believe it represents a workable program which will meet the concerns of the Senator from Hawaii without closing down the gray market and denying the American consumer the greatest choice at the best price. I urge my colleagues to act favorably on this measure.

Mr. SPECTER. Mr. President, I am pleased to support the amendment being offered today by my colleagues, Senator INOUYE and Senator RUDMAN. The amendment represents a compromise proposal that addresses impor-

tant issues relating to the importation of gray market automobiles. The compromise will allow the continued importation of these cars into the United States, provided that these cars are brought into compliance with applicable Federal motor vehicle safety standards.

In the past, there has been real concern that cars were being brought into the country and being sold to consumers without complying with safety standards. I have met with authorized dealers, whose business and reputation is affected by illegal imports, to discuss this matter. I have also met with gray market importers who believe that a regulatory scheme can be devised which will prevent bad apples from selling cars which are not in compliance while permitting legitimate business people to continue operations while complying with safety standards. I am hopeful that this proposal will resolve this problem and insure that consumers are properly protected.

My colleagues on the Senate Commerce Committee and Appropriations Committee—in particular, Senator DANFORTH, Senator INOUYE, Senator FORD, and Senator RUDMAN—worked many hours to reach this agreement. I wish to commend them for their efforts. This solution appears reasonable and fair to all sides and I urge my colleagues to join me in support of this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 1966) was agreed to.

Mr. BYRD. Mr. President, I move that the vote by which the amendment was agreed to be reconsidered.

Mr. SIMPSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there further amendments? If not, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

Mr. HOLLINGS. Mr. President, I urge my colleagues to vote for S. 863, the NHTSA authorization bill. The National Highway Traffic Safety Administration of the Department of Transportation is responsible for motor vehicle safety on our Nation's highways. While many advances have been made in highway safety, the toll from death and injury from highway accidents remains too high. S. 863 authorizes appropriations for NHTSA for fiscal year 1987 to carry out its highway safety programs.

Senator DANFORTH, chairman of the Commerce Committee, and Senator RIEGLE have worked on some amendments to the bill, as reported, to further improve the bill. First, S. 863 directs NHTSA to reopen its side impact crash protection standard. More than 9,000 Americans die each year in side crashes and this standard needs to be reexamined and strengthened, if technologically feasible. Second, S. 863 requires the National Academy of Sciences [NAS] to do a study on the feasibility of establishing a crashworthiness ratings system for cars. After the NAS study is completed, the Secretary of Transportation would be required to examine their recommendations and solicit public comments on them. If DOT determines that a crashworthiness system is feasible, it is required to promulgate a rule setting up such a system.

I would like to commend both Senator DANFORTH and Senator RIEGLE for their cooperative efforts on S. 863. They have worked long and hard to reconcile their differences and I am pleased they have arrived at a compromise.

A provision on gray-market automobiles was added to S. 863 by Senators INOUYE and FORD when the Commerce Committee considered the bill. Gray-market automobiles are automobiles which do not meet all U.S. safety and environmental standards. These cars must be modified to comply with U.S. law. At hearings held by the committee, testimony was received that many of these cars are not modified correctly and often do not meet U.S. standards. Senators INOUYE, RUDMAN, FORD, RIEGLE, and DANFORTH have crafted a compromise on this issue. This compromise would provide stricter supervision of the people who modify these cars to help ensure that the cars do meet all U.S. safety and emissions standards.

This bill is the result of months of effort by many Senators interested in highway safety. This work has produced a bill which will further improve safety on our highways and I urge my colleagues to vote for passage of S. 863.

Mr. FORD. Mr. President, I rise in support of S. 863, the National Highway Traffic Safety Administration [NHTSA] authorization bill.

There is no doubt that since it was created by Congress two decades ago, NHTSA has made great strides in reducing our Nation's highway accident fatality rate. In 1984, that rate hit an all-time low of 2.55 deaths per hundred million vehicle miles. NHTSA is to be commended for its initiatives intended to further reduce this rate, particularly its drunk driving and child passenger safety programs.

But the death toll is still far too high. In 1984, nearly 44,000 people were killed in highway accidents in the United States. Think about it. That is four-fifths the population of the entire city of Owensboro, KY, my hometown—or the capacity of some major league baseball stadiums.

We simply cannot sit back and accept that figures as the highest level of safety we can achieve on our highways. We must do better.

S. 863, which authorizes appropriations for NHTSA for fiscal years 1986 and 1987 to carry out its highway safety programs, contains several provisions designed to improve highway safety. They are the products of months of negotiation and compromise. I believe we now have a good bill, one that deserves Senate approval.

One of the compromise provisions concerns gray-market automobiles. These are cars which are privately imported from other countries, and thus are not designed to comply with U.S. safety and environmental standards. Commerce Committee hearings produced testimony pointing to a large increase in the number of gray-market automobiles which are not modified to meet these standards, as is required under current law. Senator INOUYE and I originally added an amendment to S. 863 in the Commerce Committee, one which would have prevented the importation of these gray-market autos in all but a few cases. After lengthy negotiations involving Senators INOUYE, DANFORTH, RIEGLE, and RUDMAN, we have crafted an agreement which will provide strict supervision of the people who modify these cars. I am hopeful that this compromise language will go a long way toward ensuring that gray-market automobiles are brought into compliance with U.S. standards. I would like to commend Senator INOUYE and his staff for their efforts on this compromise.

In addition, I am pleased to see that Senators DANFORTH and RIEGLE have worked out a compromise on the side impact standard and crashworthiness ratings. Their amendments will further improve safety on our highways. One requires NHTSA to reexamine its side impact crash protection standard. The other directs the National Academy of Sciences to perform a study on the feasibility of establishing a crashworthiness rating system for automobiles and submit the results to the Department of Transportation. If DOT determines from this study that a crashworthiness system is feasible, it is required to promulgate a rule creating such a system.

Mr. President, it is important that we in the Congress exercise our oversight responsibilities to ensure that NHTSA effectively carries out its mandate to save lives, reduce injuries, and reduce the consumer costs of accidents. S. 863 is a clear demonstration that we are doing so. I urge my colleagues to approve this bill.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 863) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 863

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Highway Traffic Safety Administration Authorization Act of 1985".

DEFINITIONS

SEC. 2. As used in this Act, the term—

(1) "multipurpose passenger vehicle" means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation;

(2) "passenger automobile" means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less; and

(3) "Secretary" means the Secretary of Transportation.

TITLE I—AUTHORIZATIONS OF APPROPRIATIONS

GENERAL AUTHORIZATIONS

SEC. 101. (a) Section 121 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1409) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", and $54,157,125 for fiscal year 1987.".

(b) Section 111 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1921) is amended—

(1) by striking "and", and

(2) by striking the period and inserting in lieu thereof ", and $345,895 for fiscal year 1987.".

(c) Section 209 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1949) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", and $2,030,435 for fiscal year 1987.".

(d) Section 417 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1990g) is amended—

(1) by striking "and"; and

(2) by striking the period and inserting in lieu thereof ", and $496,375 for fiscal year 1987.".

OCCUPANT CRASH PROTECTION PROGRAM

SEC. 102. In order to carry out a national program to encourage the use of safety belts and passive restraints in passenger automobiles, as authorized by section 403 of title 23, United States Code, the Secretary may derive an additional amount not to exceed $20,000,000 from unobligated balances of funds made available for highway safety programs under title 23, United States Code. Not less than one-half of the total of such amounts shall be used for educational efforts related to the use of air bags. Of the funds allocated to such efforts, not less than $5,000,000 shall be used to carry out a program to demonstrate the effectiveness of air bag technology, with emphasis on lowest-cost technologies. Such amounts shall remain available until expended.

TITLE II—HIGHWAY SAFETY GRANTS

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. (a) Section 203(a)(1) of the Surface Transportation Assistance Act of 1982 (Public Law 97-424; 96 Stat. 2138) is amended—

(1) by striking "and" after "1985,"; and

(2) by inserting immediately before the period at the end thereof the following: ", and $132,000,000 for the fiscal year ending September 30, 1987".

(b) Section 203(b) of the Surface Transportation Assistance Act of 1982 (Public Law 97-424; 96 Stat. 2138) is amended—

(1) by striking "and" after "1985," whenever it appears;

(2) by inserting immediately after "1986," the following: ", $132,000,000 for the fiscal year ending September 30, 1987,"; and

(3) by inserting immediately before the period at the end thereof the following: ", and September 30, 1987".

DRUNK DRIVING INCENTIVE GRANTS

SEC. 202. The first sentence of section 408(g) of title 23, United States Code, is amended by striking all after "Fund," and inserting in lieu thereof "$29,232,000 for the fiscal year ending September 30, 1987.".

TITLE III—AUTOMOBILE CRASHWORTHINESS

PURPOSE AND FINDINGS

SEC. 301. (a) This title is part of the continuing effort by Congress to address the critical highway safety problems facing this Nation.

(b) The Congress finds that—

(1) the Department of Transportation should be given explicit direction as to actions to be taken to save lives, reduce injuries, and decrease consumer costs of accidents;

(2) the current trend toward purchases of smaller and lighter passenger automobiles increases the importance of and the need for effective occupant crash protection;

(3) crashworthiness information should be available upon the introduction of each new passenger automobile model, and a systematic effort must be made to disseminate this information.

SIDE IMPACT PROTECTION

SEC. 302. Not later than 60 days after the date of enactment of this Act, the Secretary shall reopen the rulemaking proceeding terminated on July 12, 1982, to implement Federal Motor Vehicle Safety Standard 214 (49 CFR 571.214). The Secretary shall, not later than one year after the date of enactment of this Act—

(1) establish performance criteria for improved occupant protection in side impact; and

(2) issue an Advance Notice of Proposed Rulemaking to extend the applicability of such Standard to light trucks, vans, and multipurpose passenger vehicles.

AUTOMOBILE CRASHWORTHINESS DATA

SEC. 303. (a) Section 201 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941) is amended by adding at the end thereof the following:

"(f)(1) The Secretary shall enter into appropriate arrangements with the National Academy of Sciences to conduct a comprehensive study and investigation regarding means of establishing a method for calculating a uniform numerical rating which will enable consumers to compare meaningfully the crashworthiness of different passenger automobile models.

"(2) Such study shall include examination of current and proposed crashworthiness tests and testing procedures and shall be directed to determining whether objective, accurate and relevant information regarding the comparative crashworthiness of different passenger automobile models reasonably can be provided to consumers by means of a crashworthiness rating rule. Such study shall include examination of at least the following proposed elements of a crashworthiness rating rule:

"(A) information on the degree to which different passenger automobile models will protect occupants across the range of motor vehicle crash types when in use on public roads;

"(B) a repeatable and objective test which is capable of identifying meaningful differences in the degree of crash protection provided occupants by the vehicles tested, with respect to such aspects of crashworthiness as occupant crash protection with and without use of manual seat belts, fuel system integrity, and other relevant aspects;

"(C) ratings which are accurate, simple in form, readily understandable and of benefit to consumers in making informed decisions in the purchase of passenger automobiles;

"(D) dissemination of comparative crashworthiness ratings to consumers either at the time of introduction of a new passenger automobile model or very soon after such time of introduction; and

"(E) the development and dissemination of crashworthiness data at a cost which is reasonably balanced with the benefits of such data to consumers in making informed purchase decisions.

"(3) Any such arrangement shall require the National Academy of Sciences to report to the Secretary and the Congress not later than 18 months after the date of enactment of this subsection on the results of such study and investigation, together with its recommendations. The Secretary shall, to the extent permitted by law, furnish to the Academy upon its request any information which the Academy considers necessary to conduct the investigation and study required by this subsection.

"(4) Within 60 days after transmittal of the report of the National Academy of Sciences to the Secretary and the Congress under paragraph (3) of this subsection, the Secretary shall initiate a period (not longer than 90 days) for public comment on implementation of the recommendations of the National Academy of Sciences with respect to a rule promulgated under this title establishing an objectively based system for determining and publishing accurate comparative crashworthiness ratings for different passenger automobiles.

"(5) Not later than 180 days after the close of the public comment period provided for in paragraph (4) of this subsection, the Secretary shall determine, on the basis of the report of the National Academy of Sciences and the public comments on such report, whether an objectively based system can be established by means of which accurate and relevant information can be derived that reasonably predicts the degree to which different makes and models of passenger automobiles provide protection to occupants against the risk of personal injury or death as a result of motor vehicle accidents. The Secretary shall promptly publish the basis of such determination.

"(g)(1) If the Secretary determines that the system described in subsection (f)(5) of this section can be established, the Secretary shall, subject to the exception provided in paragraph (2) of this subsection, not later than three years after the date of enact-

ment of this subsection, promulgate a rule under this title establishing an objectively based system for determining and publishing accurate comparative crashworthiness ratings for different passenger automobiles. The rule promulgated under this subsection shall be practicable and shall provide the public relevant objective information in a simple and readily understandable form in order to facilitate comparison among the various makes and models of passenger automobiles so as to contribute meaningfully to informed purchase decisions.

"(2) The Secretary shall not promulgate such rule unless (A) a period of 60 calendar days has passed after the Secretary has transmitted to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Energy and Commerce of the House of Representatives a summary of the comments received during the period for public comment specified in subsection (f)(4) of this section or (B) each such committee before the expiration of such 60-day period has transmitted to the Secretary written notice to the effect that such committee has no objection to the promulgation of such rule.".

(b)(1) Section 201 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1941), as amended by this Act, is further amended by adding at the end thereof the following:

"(h) If the Secretary promulgates a rule under subsection (g) of this section, not later than 3 years after the date of enactment of the National Highway Traffic Safety Administration Authorization Act of 1985, the Secretary shall by rule establish procedures requiring passenger automobile dealers to make available to prospective passenger automobile purchasers information developed by the Secretary and provided to the dealer which contains data comparing the crashworthiness of passenger automobiles.".

(2) Section 2 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901) is amended by adding at the end thereof the following new paragraph:

"(19)(A) The term 'passenger automobile' means a motor vehicle with motive power, except that the term does not include a multipurpose passenger vehicle, a motorcycle, a bus, a truck, or a trailer designed for carrying 10 persons or less.

"(B) As used in subparagraph (A) of this paragraph, the term 'multipurpose passenger vehicle' means a motor vehicle with motive power, other than a trailer, which is designed to carry 10 persons or less and which is constructed either on a truck chassis or with special features for occasional off-road operation.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 304. Section 403 of title 23, United States Code, is amended by adding at the end thereof the following:

"(g) There is authorized to be appropriated for purposes of carrying out this section not to exceed $31,000,000 for fiscal year 1987.".

TITLE IV—CONTROL OF IMPORTATION OF CERTAIN VEHICLES TO ENSURE COMPLIANCE WITH SAFETY STANDARDS

AMENDMENTS TO THE NATIONAL TRAFFIC AND MOTOR VEHICLE SAFETY ACT OF 1966

SEC. 401. (a) Section 108(b) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(b)) is amended—

(1) by striking paragraphs (3) and (4); and

(2) by redesignating paragraph (5) as paragraph (3).

(b) Section 108 of such Act (15 U.S.C. 1397) is amended—

(1) by redesignating subsection (c) as subsection (f); and

(2) by inserting after subsection (b) the following:

"(c)(1) Except as provided in this subsection and subsection (d), a motor vehicle or item of motor vehicle equipment offered for importation in violation of subsection (a)(1)(A) shall be refused entry into the United States.

"(2) In the case of any vehicle imported under this subsection, the person importing the vehicle shall furnish a bond in the amount of the dutiable value of the vehicle plus the duty, and shall comply with such terms and conditions as it appears to the Secretary appropriate to ensure that any such vehicle—

"(A) will be brought into conformity by such person with all applicable Federal motor vehicle safety standards prescribed under this title within a reasonable time after such importation (as specified by the Secretary); or

"(B) will be exported (at no cost to the United States) or abandoned to the United States.

"(3)(A) Subsection (a)(1)(A) and paragraph (1) of this subsection shall not apply to any motor vehicle if—

"(i) the vehicle is imported by an importer registered under procedures established by the Secretary;

"(ii)(I) the vehicle is determined under subparagraph (C) to be substantially similar to motor vehicles originally manufactured for importation into the United States and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards; or

"(II) where there is no substantially similar United States motor vehicle, as determined by the Secretary, the Secretary determines that the safety features of the vehicles comply with or are capable of being modified to comply with all applicable Federal motor vehicle safety standards, as determined on the basis of destructive test data and such other evidence as the Secretary determines to be adequate;

"(iii) the registered importer pays upon registration and annually each year thereafter (I) such fee as the Secretary reasonably establishes to cover the cost of administering the requirements of this subsection, except those referred to in clause (iv), and (II) such other fee or fees as the Secretary reasonably establishes to cover the cost of processing the bond furnished under paragraph (2), making the determinations under clause (ii), and conducting tests and investigations pursuant to subparagraph (D);

"(iv) the person making modifications to the motor vehicle pays upon registration such fee as the Secretary reasonably establishes to cover the cost of registration and inspection of facilities at which modifications are performed; and

"(v) any modifications to the motor vehicle are performed pursuant to procedures described in support of the petitions approved under subparagraph (C) and are performed at a facility which has been registered by the Secretary under procedures established by the Secretary.

"(B)(i) The amount or rate of fees under subparagraph (A) (iii) and (iv) shall be reviewed by the Secretary and adjusted, if appropriate, by the Secretary at least every 2 years.

"(ii) The amount or rate of any such fee applicable in any calendar year shall be established by the Secretary before the beginning of such year.

"(iii) Fees collected shall be available, to the extent provided in advance by appropriation Acts, solely for use by the Secretary in the administration of the requirements of this subsection.

"(iv) The Secretary shall publish such regulations as may be necessary to ensure that the requirements of this section are fully met.

"(C)(i) The Secretary shall make determinations under subparagraph (A)(ii) upon the petition of a registered importer, and shall expend every reasonable effort to make any such determination within 45 days after the receipt of such a petition. The Secretary shall establish by regulation the information required in any such petition, except that each such petition shall contain information that clearly shows that the vehicle is capable of being brought into compliance with all applicable Federal motor vehicle safety standards. Such information shall include a complete description of all the work to be performed, an engineering analysis (where applicable), and evidence that any modification to be made for purposes of such compliance does not appear to create a violation of any applicable Federal motor vehicle safety standard or a defect relating to motor vehicle safety.

"(ii) In considering any such petition, the Secretary shall give due consideration to any tests or other information available to the Secretary, including any information provided by the manufacturer or other interested parties. The Secretary shall in a timely manner compile a list of petitions received, and shall make such lists available to the public. After such a determination is made, petitioners shall be offered an opportunity to present views and evidence relevant to the determinations made by the Secretary.

"(iii) The Secretary shall annually publish in the Federal Register a list of all determinations made under subparagraph (A)(ii) and shall make available to the public all information and evidence submitted by petitioners after such determinations are made. Other interested parties may also comment on such information.

"(iv) The approval of any such petition shall be sufficient authority for any other importer or manufacturer to take any action which the registered importer or manufacturer who submitted such petition was authorized to take under such approved petition, if the other importer or manufacturer complies with all terms and conditions of such petition.

"(D) The Secretary shall establish procedures for periodically conducting inspections and tests, including destructive tests, of vehicles imported pursuant to this subsection to determine compliance with all applicable Federal motor vehicle safety standards. The Secretary shall also establish procedures for periodically inspecting facilities registered under this subsection to ascertain whether such facilities are performing modifications pursuant to this section. The Secretary shall inspect each such facility within one year after the effective date of regulations promulgated under this section or six months after a facility is registered under this subsection, whichever is later. The Secretary may, to the extent funds for such purposes are available, retain the services of temporary employees for the performance of such inspections, if the Secre-

tary determines that it is necessary to retain such services. Such employees shall not, by reason of such employment, be deemed to be Federal employees for any purpose.

"(E) Determinations made under subparagraph (C)(i) shall be revoked if, on the basis of tests and inspections conducted by the Secretary, the Secretary finds that a clear pattern of noncompliance exists with respect to motor vehicles covered by any such determination. The Secretary shall give due consideration to any relevant information submitted to the Secretary under this subsection.

"(4)(A) In order to acquire and maintain registration under this subsection, an importer shall comply with all requirements which the Secretary shall establish under this subsection. Such requirements shall include requirements for recordkeeping, including a record of the make and model of each vehicle and its vehicle identification number, inspection of records and facilities relating to each vehicle which such person has imported or modified, or both, and, for purposes of maintaining registration under this subsection, annual payment and documentation of payment of any applicable taxes and duties provided for under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064) and penalties due under section 508(b)(1) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2008(b)(1)). Upon terminating or transferring its business, such importer shall submit such records to the Secretary.

"(B) The Secretary shall establish procedures for (i) the revocation or suspension of a registration issued under this subsection for failure to comply with any requirement of this Act, including the requirements of subparagraph (A), or regulations issued under this Act, (ii) automatic suspension of registrations for failure to pay any fee referred to in paragraph (3)(A) (iii) or (iv) in a timely manner, and (iii) reinstatement of suspended registrations.

"(5)(A) Prior to the date described in subparagraph (B), a registered importer shall not—

"(i) release custody of an imported motor vehicle to any person for license or registration for use on public roads, streets, or highways; or

"(ii) license or register an imported vehicle for use on public roads, streets, or highways or otherwise operate such vehicle (other than for testing).

"(B) An importer shall not take any action set forth in subparagraph (A) until—

"(i) the registered importer has filed a certification statement with the Secretary signed and containing the following statement: 'This vehicle has been modified in accordance with procedures established in an approved determination and conforms to all applicable Federal motor vehicle safety standards in effect on .' (with the date such certification statement is filed being inserted in the blank space);

"(ii) the Secretary has reviewed and accepted such certification as valid;

"(iii) the Secretary has confirmed that the importer has labeled the vehicle and that the label is prominently displayed in a form to be determined by the Secretary, stating that the vehicle was not originally manufactured to comply with all applicable Federal motor vehicle safety standards but has been modified by the registered importer to comply with such standards, and stating the obligations of the registered importer under this subparagraph; and

"(iv) the Secretary has confirmed that the importer has established the fuel economy ratings for purposes of determining the tax due under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064) and has labeled the vehicle to meet the requirements of section 506(a)(1)(C) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2006(a)(1)(C)).

Within 30 days after the date on which a certification statement is filed under clause (i) of this subparagraph, the Secretary shall accept such certification statement and issue a bond release letter, or reject such certification statement.

"(C) A State may require the registered importer to provide to appropriate State authorities a notarized English translation of all title and ownership documentation.

"(D) The Secretary may require that any such certification statement be accompanied by such evidence of compliance as the Secretary considers appropriate, or that the vehicle be inspected by the Secretary, or both.

"(6) For purposes of part B of this title—

"(A) the registered importer shall be deemed to be the manufacturer with respect to all motor vehicles imported by such importer;

"(B) in the case of any defect or failure to comply with any applicable motor vehicle safety standard in or regarding any motor vehicle which was originally manufactured for importation into the United States, any imported motor vehicle that has a valid certification under this subsection and that is determined to be substantially similar to such motor vehicle shall be treated as having the same defect or failure unless the manufacturer or registered importer demonstrates otherwise to the Secretary;

"(C) the Secretary shall publish in the Federal Register notice of any defect or failure referred to in subparagraph (B), and any defect in or failure to comply regarding any motor vehicle imported under this subsection which is reported by the manufacturer of such motor vehicle; and

"(D) the registered importer shall be treated as the manufacturer with respect to the motor vehicles imported, except that in the case of defects referred to in subparagraphs (B) and (C), the Secretary shall establish procedures to ensure that the original manufacturer of the vehicle or one of its domestic subsidiaries or affiliates shall, at the time of any recall determination affecting such vehicle, cooperate with the Secretary to facilitate a successful and timely recall.

"(7) The Secretary shall, by regulation, establish requirements to ensure that the registered importer (or any successor in interest) will be capable of carrying out the importer's responsibilities under part B of this title. The Secretary shall require each registered importer to provide evidence of sufficient financial responsibility to meet such obligations. Such evidence may include the posting of a prepaid surety bond for each motor vehicle or similar guarantee measures.

"(8) Section 109 shall apply in the case of any violation of the requirements of this subsection, except that the amount of any civil penalty imposed under such section for any such violation shall not exceed $5,000 for each such violation and shall not exceed $800,000 for any related series of violations.".

(c) Section 108 of such Act (15 U.S.C. 1397) is amended by inserting after subsection (c), as added by subsection (b) of this section, the following:

"(d) Subsection (a)(1)(A) and subsection (c)(1) shall not apply to any motor vehicle or item of motor vehicle equipment if—

"(1) it requires further manufacturing to perform its intended function (as determined under regulations prescribed by the Secretary); and

"(2) it is accompanied at the time of entry by a written statement issued by the manufacturer of the incomplete vehicle or item of equipment which indicates the applicable Federal motor vehicle safety standard with which such vehicle or item is in compliance.".

(d) Section 108 of such Act (15 U.S.C. 1397) is amended by inserting after subsection (d), as added by subsection (c) of this section, the following:

"(e)(1) Subsections (a)(1)(A) and (c)(1) shall not apply to any motor vehicle if the vehicle is imported for personal use, and not for resale, by a member of the uniformed services (as defined in section 2101 of title 5, United States Code) or the foreign service (as defined in section 103 of the Foreign Service Act of 1980 (22 U.S.C. 3903))—

"(A) whose permanent duty station or assigned place of employment is outside the United States;

"(B) who has not previously imported a vehicle into the United States under the authority of this section (or subsection (b)(3) with respect to the period before the date of enactment of the National Highway Traffic Safety Administration Authorization Act of 1985); and

"(C) who agrees to have the vehicle modified to meet all applicable Federal motor vehicle safety standards at a facility registered under subsection (c)(3)(A)(iv).

"(2) Subsections (a)(1)(A) and (c)(1) shall not apply to any motor vehicle if the vehicle is imported on a temporary basis for personal use, and not for resale, by any individual who is a member of—

"(A) the personnel of a foreign government on assignment in the United States who is within the class of persons for whom free entry of vehicles has been authorized by the Secretary of State;

"(B) the armed forces of a foreign country on assignment in the United States; or

"(C) the Secretariat of a public international organization so designated under the International Organizations Immunities Act (22 U.S.C. 288 et seq.).

The Secretary may require such verifications of such status as the Secretary considers appropriate. The Secretary shall ensure that any vehicle entered under this subsection will be exported (at no cost to the United States) or abandoned to the United States when the individual involved ceases to reside in the United States and to hold such status.

"(3) The Secretary may exempt any motor vehicle or item of motor vehicle equipment from subsections (a)(1)(A) and (c)(1) upon such terms and conditions as the Secretary may find necessary solely for the purpose of research, investigations, studies, demonstrations or training, or competitive racing events.".

(e)(1) The first sentence of section 501(8) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2001(8)) is amended by inserting immediately before the period the following: "and any importer registered to import vehicles pursuant to section 108(c) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(c))".

(2) Section 502(c)(1) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C.

2002(c)(1)) is amended by inserting immediately after "manufacturer" the first time it appears the following: "(except a manufacturer registered to import vehicles pursuant to section 108(c) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1397(c))".

(f) Section 108(a)(1)(A) of such Act (15 U.S.C. 1397(a)(1)(A)) is amended by inserting immediately after "such standard" the following: "and is covered by a certification issued under section 114,".

(g) Section 114 of such Act (15 U.S.C. 1403) is amended—

(1) by inserting ", as appropriate," immediately after "dealer";

(2) by striking "or distributor" wherever it appears;

(3) by inserting immediately after the first sentence the following: "Every distributor of a motor vehicle or item of motor vehicle equipment shall furnish to a dealer or subsequent distributor at the time of delivery of such vehicle or item of equipment the manufacturer's certification that was previously furnished to the distributor."; and

(4) by adding at the end thereof the following: "As used in this section and section 108, the term 'manufacturer' means any person engaged in the manufacturing or assembling of motor vehicles or items of motor vehicle equipment, including any other person who acts for or is under the control of such person with respect to the importation of such vehicles or items of equipment.".

(h)(1) Section 108(a)(1)(A) of such Act (15 U.S.C. 1397(a)(1)(A)) is amended by striking "subsection (b)" and inserting in lieu thereof "subsections (b), (c), (d), and (e)".

(2) Section 108(b)(2) of such Act (15 U.S.C. 1397(b)(2)) is amended by striking "or importer".

(i) The General Accounting Office shall prepare and submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives on July 1, 1988 and on or before July 1 of each year thereafter a comprehensive report on the administration of sections 108(c), (d) and (e) of the National Traffic and Motor Vehicle Safety Act of 1966, as added by this section. Such report shall include, but need not be restricted to—

(1) a listing of the registered importers and the determinations made by the Secretary under section 108(c)(3)(C) of such Act;

(2) a description by model year and make of the vehicles entered under such section;

(3) an itemization of the number of such vehicles entered, segregated by model number and year;

(4) the degree of observed compliance with applicable Federal motor vehicle safety standards;

(5) a description of the efforts undertaken by the Secretary under section 108(c)(3) and (4) of such Act, including tests and investigations conducted and the results of such tests and investigations;

(6) an accounting of the fees collected and expended by the Secretary pursuant to section 108(c)(3)(A)(iii) and (iv) of such Act;

(7) an assessment of the Secretary's compliance in processing certification statements under section 108 of such Act in a timely manner and a compilation of the number of certification statements received;

(8) compliance with any requirement of applicable taxes and duties provided for under section 201(a) of the Energy Tax Act of 1978 (26 U.S.C. 4064); and

(9) such other information as the General Accounting Office considers appropriate.

The report shall contain such recommendations for additional legislation as is considered necessary to ensure that motor vehicles not originally designed or manufactured for compliance with all applicable Federal motor vehicle safety standards are being properly brought into compliance following importation into the United States.

(j) The Secretary of Transportation shall prepare and make available to the public information on the importation of motor vehicles into the United States and procedures to be followed to bring such vehicles into conformity with Federal motor vehicle safety standards.

(k) The Secretary of Transportation shall conduct a study on the effectiveness of the amendments made by this section in ensuring compliance with applicable motor vehicle safety standards and enhancing motor vehicle safety. Such study shall be submitted to the Congress not later than 36 months after the date of enactment of this Act. Following receipt of such study, the Congress shall determine and enact, if any, those changes to existing law which it considers appropriate. Such changes may include termination of the conditional importation of nonconforming vehicles, repeal of this title, or appropriate modifications of procedures provided for under this title.

(l)(1) The Secretary of Transportation shall promulgate such regulations as may be necessary to implement the provisions of this title as soon as practicable, but in no case later than eight months after the date of enactment of this Act. The amendments made by this title shall take effect three months after such regulations become effective, except that such amendments shall take effect prior to the expiration of such three-month period with respect to any model of a vehicle for which a determination is made under section 108(c)(3)(C) of the National Traffic and Motor Vehicle Safety Act of 1966 (as added by subsection (a) of this section), as soon as such determination is made.

(2) Any person may commence a civil action on such person's own behalf against the Secretary of Transportation to compel the Secretary to promulgate regulations under this section where there is alleged a failure by the Secretary to promulgate such regulations by the date specified in paragraph (1) of this subsection. The United States Court of Appeals for the District of Columbia shall have jurisdiction over such action and may award costs of litigation (including reasonable attorney's fees) to the prevailing party (other than the United States Government) whenever the Court determines that such award is appropriate. Any petition under this paragraph shall be granted an expedited hearing by the Court.

(3) As soon as possible after the date of enactment of this Act, the Secretary of Transportation shall take steps designed to encourage notification regarding the changes made by this section to members of the uniformed services and other individuals who may be affected by such changes.

□ 1900

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. SIMPSON. Mr. President, I inquire now of the minority leader if he is in a position to pass or indefinitely postpone the following calendar items: Calendar No. 644 (S.J. Res. 334) indefinitely postpone; and Calendar No. 650 (H.J. Res 613) to be passed.

Mr. BYRD. Mr. President, the items that have been identified by the distinguished acting Republican leader have been cleared on this side and we are ready to proceed.

Mr. SIMPSON. I thank the distinguished Democratic leader.

SENATE JOINT RESOLUTION 344 INDEFINITELY POSTPONED

Mr. SIMPSON. Mr. President, I ask unanimous consent that Calendar Item No. 644 (S.J. Res. 334), be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATURALIZATION OF CERTAIN QUALIFIED PERSONS ON ELLIS ISLAND ON JULY 3 OR 4, 1986

The Senate proceeded to consider the Joint Resolution (H.J. Res. 613) allowing qualified persons representing all the States to be naturalized on Ellis Island on July 3 or 4, 1986.

JULY 3 NATURALIZATION CEREMONIES ON ELLIS ISLAND

● Mr. LAUTENBERG. Mr. President, I rise in support of House Joint Resolution 613, a resolution to provide for national participation in the naturalization ceremonies planned on July 3 on Ellis Island. This measure is a companion bill to Senate Joint Resolution 334, which I introduced on April 29. It was approved by the Senate Judiciary Committee last week.

Mr. President, I would like to thank the leadership of the Senate Judiciary Committee for its expeditious consideration of this resolution. Senators SIMPSON and KENNEDY, chairman and ranking minority member of the Immigration Subcommittee, cosponsored this legislation and were instrumental in its swift passage.

Mr. President, immigration regulations state that residents must be naturalized at the place where they file their papers, and where they have resided for the required period of time. Under these rules, the naturalization ceremonies surrounding Liberty Weekend would have been open only to residents of New York.

As the son of immigrant parents who, along with thousands of other new citizens, first entered this country through Ellis Island, I felt that this limited participation was the wrong way to celebrate the rededication of the Statue of Liberty. Only a truly national ceremony can symbolize what the Statue of Liberty continues to

mean to all Americans—an affirmation of the spirit of freedom and opportunity.

This legislation has the support of the Immigration and Naturalization Service, whose regulations were the source of the earlier restrictions. The INS recognizes that becoming a naturalized citizen of the United States is a lifelong dream for the great numbers of people who have emigrated here and settled in every State.

Mr. President, this legislation will ensure that representatives of each of the 50 States will have the opportunity to participate in this once-in-a-lifetime ceremony. Given the complicated logistices of arranging this ceremony, I am pleased that the bill has moved so quickly through the legislative process. Our speedy consideration of House Joint Resolution 613 will allow the INS as much time as possible to carry out this plan.

Mr. President, I urge adoption of the resolution.●

● Mr. BRADLEY. Mr. President, this July Fourth holiday is a special one. Not only do we remember the 210th anniversary of this Nation's birth, but we also celebrate the renovation of one of this Nation's most cherished and revered landmarks. Of course, I am speaking of the Statue of Liberty. After extensive effort and at considerable expense, the "Lamp of Liberty" will shine once again.

The Statue of Liberty is one of the greatest symbols of the freedom for which this Nation stands. Her lamp is a beacon to the world, calling forth those who Emma Lazarus deemed the "huddled masses yearning to be free." But, while the Statue of Liberty was the first sight American immigrants saw as they arrived in America, until only a few decades ago, Ellis Island was the first bit of American ground they touched.

Like the Statue of Liberty, Ellis Island is also a national landmark. Mr. President, the United States is a nation of immigrants, and nothing so symbolizes our great melting pot as Ellis Island. In order to commemorate our heritage, a special naturalization ceremony on Ellis Island has been set for July 1986.

Since every State in the Union has enjoyed the fruits of immigration, I believe that it is only appropriate that every State should be allowed to participate in this ceremony. And this is why I joined with my colleague from New Jersey [Mr. LAUTENBERG] in introducing a bill that requests each Governor to designate two persons to participate in the Ellis Island naturalization cermony scheduled for July 1986.

Mr. President, this ceremony promises to be both moving and meaningful for its participants. I urge my colleagues to join us in this effort to allow future American citizens from each State to participate.●

● Mr. MOYNIHAN. Mr. President, I rise today in strong support of House Joint Resolution 613, to allow qualified residents of all 50 States to participate in the naturalization ceremonies on Ellis Island scheduled during the Statue of Liberty centennial celebration this July.

As we all know, the Statue of Liberty and Ellis Island are monuments which belong to all Americans, native born and naturalized. Ellis Island served as the principal immigration station for the United States from 1892 to 1954. During its years of peak operation, from 1892 to 1928, more than 15 million immigrants passed through its gates in New York. Of those millions, many stayed in New York City and New York State, but many more moved on to populate every State and territory in America. Were we not to pass this measure, only those qualified for naturalization within the jurisdiction of the U.S. District Court serving the Bronx and Manhattan would be eligible to be sworn in on Ellis Island.

As we celebrate the centennial of the Statue of Liberty this summer, we celebrate as a nation. It is only fitting, then, that on this unique occasion, we ensure that residents of all 50 States are eligible to be sworn in on Ellis Island.●

The joint resolution (H.J. Res. 613) was ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. SIMPSON. I move to reconsider the vote by which the House joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JUDICIARY COMMITTEE DISCHARGED—H.J. RES. 427

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the following joint resolutions:

S.J. Res. 342, designating May 25, 1986, as "Missing Children's Day;"

S.J. Res. 344, designating the week of June 8 as "Children's Accident Prevention Week;"

H.J. Res. 234, designating the week of May 18 as "National Food Bank Week;" and

H.J. Res. 492, designating the week of June 1 as "National Neighborhood Services Week."

Mr. BYRD. Mr. President, there is no objection to discharging the committee from further consideration of the joint resolutions that have been identified.

The PRESIDING OFFICER. Without objection, it is so orderd.

MISSING CHILDREN'S DAY

The Senate joint resolution (S.J. Res. 342) to designate May 25, 1986, as "Missing Children's Day" was considered, ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

S.J. RES. 342

Whereas on May 25, 1979, six-year old Etan Patz disappeared from his home in New York City and is still missing;

Whereas over one million eight hundred thousand children disappear from home annually;

Whereas children who are missing from home and are not living in a family environment are frequently the victims of sexual and physical exploitation;

Whereas an estimated 60 per centum of missing children are sexually abused while away from home;

Whereas the search for missing children is frequently a low-priority investigation in many law enforcement agencies;

Whereas efforts between Federal and local law enforcement agencies in child abduction cases are usually uncoordinated, haphazard, and ineffective; and

Whereas the problem of the missing child has been plagued by misinformation and there is a need to increase public understanding and awareness of this problem: Now, therefore, be

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That May 25, 1986, is designated as "Missing Children Day", and the President is authorized and requested to issue a proclamation calling upon all Government agencies and the people of the United States to observe the day with appropriate ceremonies, programs, and activities.

Mr. SIMPSON. I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL CHILDREN'S ACCIDENT PREVENTION WEEK

The Senate joint resolution (S.J. Res. 344) to designate the week beginning June 8, 1986, as "National Children's Accident Prevention Week" was considered, ordered to be engrossed for a third reading, was read the third time and passed.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

S.J. RES. 344

Whereas the children of the United States are the most precious resource of the United States;

Whereas approximately 25 percent of all children in the United States under the age of 14 suffer accidental injuries each year;

Whereas accidental injury is the leading cause of death among children in the United States, resulting in more than 10,000 such deaths each year;

Whereas the incidence of such deaths can be greatly reduced by taking precautions to prevent such accidental injuries and seeking expert pediatric emergency care when such accidental injuries do occur;

Whereas the incidence of accidental injuries among children is greatest during the summer months of each year, when children are usually not in school and are outdoors much of the time; and

Whereas the adults of the United States should become aware of the significant incidence of accidental injuries to children, the increased incidence of such accidental injuries during the summer months, and the need to take precautions to prevent such addicental injuries: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning June 8, 1986, is designated "National Children's Accident Prevention Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

Mr. SIMPSON. I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL FOOD BANK WEEK

The House joint resolution (H.J. Res. 234) designating the week of May 18, 1986, through May 24, 1986, as "National Food Bank Week," was considered, read the third time, and passed.

The preamble was agreed to.

Mr. SIMPSON. I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL NEIGHBORHOOD HOUSING SERVICES WEEK

The House joint resolution (H.J. Res. 492) designating the week beginning June 1, 1986, as "National Neighborhood Housing Services Week," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. SIMPSON. I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL ASTHMA AND ALLERGY AWARENESS WEEK

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of House Joint Resolution 427, designating the week beginning on May 11, 1986, as "National Asthma and Allergy Awareness Week," and ask for its immediate consideration.

Mr. BYRD. Mr. President, there is no objection that the committee be discharged and that the Senate proceed immediately to the consideration of the joint resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A House joint resolution (H.J. Res. 427) to designate the week beginning on May 11, 1986, as "National Asthma and Allergy Awareness Week."

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The question is on passage of the joint resolution.

The joint resolution (H.J. Res. 427) was passed.

The preamble was agreed to.

Mr. SIMPSON. I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MEASURE HELD AT DESK

Mr. SIMPSON. Mr. President, I send a concurrent resolution (S. Con. Res. 140) to the desk on behalf of Senator HELMS and ask that it be held at the desk until Monday, May 19, 1986.

Mr. BYRD. Mr. President, this is a request that has been agreed to on this side of the aisle. There is no objection.

Mr. SIMPSON. Mr. President, the resolution pays tribute to General Willim Lee.

The PRESIDING OFFICER. Without objection it is so ordered.

EXECUTIVE CALENDAR

Mr. SIMPSON. Mr. President, I inquire now of the minority leader if he is in a position to confirm the following nominations on the Executive Calendar:

Calendar No. 784, Paul H. Nitze.

Calendar No. 785, Warren Zimmermann.

Calendar No. 786, Ronald Frank Lehman II.

Mr. BYRD. Mr. President, the nominations that have been identified by the distinguished acting Republican leader have been cleared on this side. There is no objection to proceeding to their consideration.

Mr. SIMPSON. I thank the Democratic leader.

EXECUTIVE SESSION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate go into executive session in order to consider the nominations.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The clerk will state the nominations.

DEPARTMENT OF STATE

Mr. SIMPSON. I ask unanimous consent that the nominations be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

Mr. SIMPSON. I move to reconsider the vote.

Mr. BYRD. Mr. President, I move to lay that motion to reconsider on the table.

The motion to lay on the table was agreed to.

The nomination considered and confirmed en bloc are as follows:

DEPARTMENT OF STATE

Paul H. Nitze, of the District of Columbia, to be Ambassador at Large;

Warren Zimmermann, of Virginia, for the rank of Ambassador in his capacity as Chief of the United States Delegation to the Vienna Conference on Security and Cooperation in Europe Follow-up Meeting; and

Ronald Frank Lehman II, of Virginia, for the rank of Ambassador.

□ 1850

Mr. SIMPSON. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. SIMPSON. Mr. President, I move that the Senate now resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR FILING OF REPORT

Mr. SIMPSON. Mr. President, I ask unanimous consent, at the request of the Committee on Governmental Affairs, that conferees may have until the hour of 4 p.m. Friday, May 16, to file a conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE OF REPRESENTATIVES—*Thursday, May 15, 1986*

The House met at 10 a.m.

The Reverend A. John Wilson III, director of pastoral services, Greenleaf Health Systems, Chattanooga, TN, and former chaplain, U.S. Military Academy, West Point, NY, offered the following prayer:

Almighty and eternal God, at the beginning of another day we lift our prayers to Thee. We thank Thee for the gift of life, for Thy guiding presence with us, and for the revelation of Thy love within us. Grant that in the midst of difficult and demanding responsibilities we may be sustained by Thy goodness and strengthened by Thy grace.

Enable us to remove our prejudices and indifferences, keep us from self-centered pride, quiet our fears, and deepen our affections. Make us instruments of Thy peace and, for that end, grant us patience, courage, and faith.

Patience: To discipline our wills and control our powers;

Courage: To fulfill our responsibilities and to overcome our weaknesses; and

Faith: To maintain our commitments to serve Thee and the people who place their trust in us.

We offer this prayer in Thy holy name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 4382. An act to require the Architect of the Capitol to place a plaque at the original site of Providence Hospital.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 974) "An act to provide for protection and advocacy for mentally ill persons."

APPOINTMENT OF CONFEREES ON H.R. 6, WATER RESOURCES CONSERVATION, DEVELOPMENT, AND INFRASTRUCTURE IMPROVEMENT AND REHABILITATION ACT OF 1985

Mr. HOWARD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6) to provide for the conservation and development of water and related resources and the improvement and rehabilitation of the Nation's water resources infrastructure, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey? The Chair hears none, and appoints the following conferees:

From the Committee on Public Works and Transportation, for consideration of the House bill (except title XV), and the Senate amendment (except title VIII): Messrs. HOWARD, ANDERSON, ROE, BREAUX, MINETA, OBERSTAR, SNYDER, HAMMERSCHMIDT, STANGELAND, and CLINGER.

As additional conferees:

For consideration of sections 510, 605(b), 752, 1110(b), 1159, and 1185 of the House bill, and modifications committed to conference: Mr. NOWAK.

For consideration of the paragraph entitled "Island Creek Basin, West Virginia" of section 301(a), and sections 302 and 813(21) of the House bill, and section 701 (a)(1) and (b) of the Senate amendment: Mr. RAHALL.

For consideration of the paragraph entitled "Crown Bay Channel-St. Thomas Harbor, Virgin Islands" of section 102 and section 813(4) of the House bill, and section 609(29) of the Senate amendment: Mr. DE LUGO.

For consideration of section 536 of the House bill, and modifications committed to conference: Mr. Bosco.

For consideration of the paragraphs entitled "Gallipolis Locks and Dam Replacement, Ohio River, Ohio and West Virginia" and "Windfield Locks and Dam, Kanawha River, West Virginia" of section 201(a), the paragraph entitled "Cabin Creek, West Virginia" of section 501(a), and sections 507, 538, and 1120 of the House bill, and sections 317, 502(2), and 703(g) of the Senate amendment: Mr. WISE.

For consideration of section 1199E of the House bill, and section 333 of the Senate amendment: Mr. SHAW.

For consideration of the paragraph entitled "Santa Ana River Mainstem, California" of section 301(a) of the House bill, and section 703(a)(10) of the Senate amendment: Mr. PACKARD.

From the Committee on Interior and Insular Affairs, for consideration of the paragraph entitled "Saipan Harbor, Commonwealth of the Northern Mariana Islands" of section 102, sections 814, 1102(c), 1121, 1199B, 1199G and title XII of the House bill, and sections 219, 223(c), 238, 308, 314, 338, 339, 340, 348, 358, 504, 701(a)(2), and 703(b)(7) of the Senate amendment: Messrs. UDALL, MILLER of California, DE LUGO, YOUNG of Alaska, and CHENEY.

From the Committee on Merchant Marine and Fisheries, for consideration of 104, 107, 109, 110, 112, 113, 115, 116, 605, 1114, 1121, 1122, 1186, 1199E, 1199P, and titles XIII and XIV of the House bill, and sections 209, 221, 224, 316, 326, 333, 351, 504, 604, 605, 606, 608, 703(e)(2) and 704 of the Senate amendment: Messrs. JONES of North Carolina, BIAGGI, and STUDDS, Ms. MIKULSKI, and Messrs. LOWRY of Washington, HUGHES, LENT, YOUNG of Alaska, DAVIS, CARNEY, and FIELDS (in lieu of Mr. YOUNG of Alaska for consideration of section 1121 of the House bill and section 504 of the Senate amendment).

From the Committee on Ways and Means, for consideration of title XV of the House bill, and title VIII of the Senate amendment: Messrs. ROSTENKOWSKI, GIBBONS, PICKLE, RANGEL, STARK, DUNCAN, VANDER JAGT, and FRENZEL.

PERMISSION TO HAVE UNTIL 6 P.M. TOMORROW, FRIDAY, MAY 16, 1986, TO FILE CONFERENCE REPORT ON H.R. 2672, NEW JERSEY INTERNATIONAL AND BULK MAIL CENTER AND MICHAEL McDERMOTT PLACE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the managers may have until 6 p.m. on Friday, May 16, 1986, to file a conference report on the bill (H.R. 2672) to redesignate the New York International and Bulk Mail Center in Jersey City, NJ, as the "New Jersey International and Bulk Mail Center," and to honor the memory of a former postal employee by dedicating a portion of a street at the New York International and Bulk Mail Center in Jersey City, NJ, as "Michael McDermott Place."

The SPEAKER. Is there objection to the request of the gentleman from New Jersey.

There was no objection.

CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1987

The SPEAKER. Pursuant to House Resolution 455 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the concurrent resolution, House Concurrent Resolution 337.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the concurrent resolution (H. Con. Res. 337) setting forth the congressional budget for the U.S. Government for the fiscal years 1987, 1988 and 1989, with Mr. NATCHER in the chair.

The Clerk read the title of the concurrent resolution.

The CHAIRMAN. When the Committee of the Whole rose on Wednesday, May 14, 1986, all time for general debate had expired.

Pursuant to House Resolution 455, the concurrent resolution is considered as having been read for amendment under the 5-minute rule. No amendments are in order except the following amendments, which shall be considered only in the following order, shall not be subject to amendment, shall be considered as having been read, shall be in order even if a previous amendment in the nature of a substitute has been adopted, and shall be debatable as specified in House Resolution 455:

First, the amendment in the nature of a substitute printed in the CONGRESSIONAL RECORD of May 13, 1986, by, and if offered by, Representative DANNEMEYER;

Second, the amendment in the nature of a substitute printed in the CONGRESSIONAL RECORD of May 13, 1986, by, and if offered by, Representative LELAND, or his designee; and

Third, the amendment in the nature of a substitute printed in the CONGRESSIONAL RECORD of May 13, 1986, by, and if offered by, Representative LATTA, or his designee.

It shall also be in order to consider the amendment or amendments provided in section 305(a)(5) of the Congressional Budget Act of 1974, as amended, necessary to achieve mathematical consistency.

The text of the concurrent resolution, House Concurrent Resolution 337, is as follows:

H. CON. RES. 337

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1987 is established and the appropriate budgetary levels for fiscal years 1988 and 1989 are set forth.

(a) The following levels and amounts are set forth for purposes of determining, in accordance with section 301(i) of the Congressional Budget and Impoundment Control Act of 1974, as amended by the Balanced Budget and Emergency Deficit Control Act of 1985, whether the maximum deficit amount for a fiscal year has been exceeded:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $857,200,000,000.
Fiscal year 1988: $941,200,000,000.
Fiscal year 1989: $1,011,900,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1987: $1,086,350,000,000.
Fiscal year 1988: $1,159,650,000,000.
Fiscal year 1989: $1,205,350,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $994,250,000,000.
Fiscal year 1988: $1,047,050,000,000.
Fiscal year 1989: $1,076,150,000,000.

(4) The amounts of the deficits are as follows:

Fiscal year 1987: $137,050,000,000.
Fiscal year 1988: $105,850,000,000.
Fiscal year 1989: $64,250,000,000.

(b) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $643,850,000,000.
Fiscal year 1988: $700,550,000,000.
Fiscal year 1989: $750,750,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1987: $10,700,000,000.
Fiscal year 1988: $17,400,000,000.
Fiscal year 1989: $17,700,000,000.

and of those amounts by which revenues should be increased, the following amounts shall be used solely for the purpose of reducing the deficits below the maximum deficit amounts:

Fiscal year 1987: $4,700,000,000.
Fiscal year 1988: $11,200,000,000.
Fiscal year 1989: $10,500,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1987: $55,700,000,000.
Fiscal year 1988: $60,150,000,000.
Fiscal year 1989: $64,250,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1987: $873,000,000,000.
Fiscal year 1988: $918,950,000,000.
Fiscal year 1989: $944,050,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $798,200,000,000.
Fiscal year 1988: $840,150,000,000.
Fiscal year 1989: $857,650,000,000.

(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1987: $154,350,000,000.
Fiscal year 1988: $139,600,000,000.
Fiscal year 1989: $106,900,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1987: $2,319,600,000,000.
Fiscal year 1988: $2,516,900,000,000.
Fiscal year 1989: $2,685,100,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988, are as follows:

Fiscal year 1987:
(A) New direct loan obligations, $34,250,000,000.
(B) New primary loan guarantee commitments, $85,400,000,000.

Fiscal year 1988:
(A) New direct loan obligations, $32,250,000,000.
(B) New primary loan guarantee commitments, $87,300,000,000.

Fiscal year 1989:
(A) New direct loan obligations, $30,600,000,000.
(B) New primary loan guarantee commitments, $87,650,000,000.

(c) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations, and new primary loan guarantee commitments for fiscal years 1987 through 1989 for each major functional category are:

(1) National Defense (050):

Fiscal year 1987:
(A) New budget authority, $285,000,000,000.
(B) Outlays, $276,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:
(A) New budget authority, $295,500,000,000.
(B) Outlays, $281,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:
(A) New budget authority, $306,500,000,000.
(B) Outlays, $290,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

(2) International Affairs (150):

Fiscal year 1987:
(A) New budget authority, $17,000,000,000.
(B) Outlays, $13,800,000,000.
(C) New direct loan obligations, $7,150,000,000.
(D) New primary loan guarantee commitments, $11,400,000,000.

Fiscal year 1988:
(A) New budget authority, $17,300,000,000.
(B) Outlays, $13,550,000,000.
(C) New direct loan obligations, $7,100,000,000.
(D) New primary loan guarantee commitments, $11,400,000,000.

Fiscal year 1989:
(A) New budget authority, $15,900,000,000.
(B) Outlays, $12,850,000,000.
(C) New direct loan obligations, $7,100,000,000.
(D) New primary loan guarantee commitments, $11,400,000,000.

(3) General Science, Space, and Technology (250):

Fiscal year 1987:
(A) New budget authority, $8,800,000,000.
(B) Outlays, $8,750,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:
(A) New budget authority, $8,750,000,000.
(B) Outlays, $8,750,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:
(A) New budget authority, $8,800,000,000.
(B) Outlays, $8,650,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

(4) Energy (270):

Fiscal year 1987:
(A) New budget authority, $4,900,000,000.
(B) Outlays, $4,850,000,000.
(C) New direct loan obligations, $1,950,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $4,650,000,000.
(B) Outlays, $4,150,000,000.
(C) New direct loan obligations, $1,950,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $4,800,000,000.
(B) Outlays, $3,750,000,000.
(C) New direct loan obligations, $1,950,000,000.
(D) New primary loan guarantee commitments, $0.
(5) Natural Resources and Environment (300):
Fiscal year 1987:
(A) New budget authority, $11,950,000,000.
(B) Outlays, $12,250,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $12,000,000,000.
(B) Outlays, $12,150,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $11,800,000,000.
(B) Outlays, $12,200,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(6) Agriculture (350):
Fiscal year 1987:
(A) New budget authority, $23,800,000,000.
(B) Outlays, $23,550,000,000.
(C) New direct loan obligations, $14,300,000,000.
(D) New primary loan guarantee commitments, $8,000,000,000.
Fiscal year 1988:
(A) New budget authority, $26,000,000,000.
(B) Outlays, $24,800,000,000.
(C) New direct loan obligations, $12,100,000,000.
(D) New primary loan guarantee commitments, $8,500,000,000.
Fiscal year 1989:
(A) New budget authority, $25,300,000,000.
(B) Outlays, $21,550,000,000.
(C) New direct loan obligations, $11,350,000,000.
(D) New primary loan guarantee commitments, $8,650,000,000.
(7) Commerce and Housing Credit (370):
Fiscal year 1987:
(A) New budget authority, $9,800,000,000.
(B) Outlays, $2,200,000,000.
(C) New direct loan obligations, $4,450,000,000.
(D) New primary loan guarantee commitments, $38,750,000,000.
Fiscal year 1988:
(A) New budget authority, $9,350,000,000.
(B) Outlays, $5,100,000,000.
(C) New direct loan obligations, $4,600,000,000.
(D) New primary loan guarantee commitments, $39,100,000,000.
Fiscal year 1989:
(A) New budget authority, $7,550,000,000.
(B) Outlays, $1,300,000,000.
(C) New direct loan obligations, $4,850,000,000.
(D) New primary loan guarantee commitments, $38,450,000,000.
(8) Transportation (400):
Fiscal year 1987:
(A) New budget authority, $24,600,000,000.
(B) Outlays, $25,500,000,000.
(C) New direct loan obligations, $500,000,000.
(D) New primary loan guarantee commitments, $50,000,000.
Fiscal year 1988:
(A) New budget authority, $26,350,000,000.
(B) Outlays, $26,450,000,000.
(C) New direct loan obligations, $400,000,000.
(D) New primary loan guarantee commitments, $50,000,000.
Fiscal year 1989:
(A) New budget authority, $26,300,000,000.
(B) Outlays, $26,350,000,000.
(C) New direct loan obligations, $200,000,000.
(D) New primary loan guarantee commitments, $50,000,000.
(9) Community and Regional Development (450):
Fiscal year 1987:
(A) New budget authority, $6,300,000,000.
(B) Outlays, $7,000,000,000.
(C) New direct loan obligations, $950,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
Fiscal year 1988:
(A) New budget authority, $6,450,000,000.
(B) Outlays, $7,050,000,000.
(C) New direct loan obligations, $1,200,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
Fiscal year 1989:
(A) New budget authority, $6,500,000,000.
(B) Outlays, $6,600,000,000.
(C) New direct loan obligations, $1,050,000,000.

(A) New budget authority, $40,500,000,000.
(B) Outlays, $40,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $300,000,000.
Fiscal year 1989:
(A) New budget authority, $42,700,000,000.
(B) Outlays, $42,800,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
(12) Medicare (570):
Fiscal year 1987:
(A) New budget authority, $83,000,000,000.
(B) Outlays, $73,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $91,400,000,000.
(B) Outlays, $81,850,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $101,450,000,000.
(B) Outlays, $91,350,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(13) Income Security (600):
Fiscal year 1987:
(A) New budget authority, $165,250,000,000.
(B) Outlays, $121,400,000,000.
(C) New direct loan obligations, $1,800,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $172,900,000,000.
(B) Outlays, $127,200,000,000.
(C) New direct loan obligations, $1,900,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $176,500,000,000.
(B) Outlays, $130,600,000,000.
(C) New direct loan obligations, $1,450,000,000.
(D) New primary loan guarantee commitments, $0.
(14) Social Security (650):
Fiscal year 1987:
(A) New budget authority, $5,500,000,000.
(B) Outlays, $5,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $6,150,000,000.
(B) Outlays, $6,150,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $6,900,000,000.
(B) Outlays, $6,850,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(15) Veterans Benefits and Services (700):
Fiscal year 1987:
(A) New budget authority, $27,050,000,000.
(B) Outlays, $26,700,000,000.
(C) New direct loan obligations, $1,550,000,000.
(D) New primary loan guarantee commitments, $16,300,000,000.
Fiscal year 1988:
(A) New budget authority, $27,450,000,000.
(B) Outlays, $27,050,000,000.
(C) New direct loan obligations, $1,500,000,000.

(D) New primary loan guarantee commitments, $16,950,000,000.
Fiscal year 1989:
(A) New budget authority, $27,300,000,000.
(B) Outlays, $26,900,000,000.
(C) New direct loan obligations, $1,300,000,000.
(D) New primary loan guarantee commitments, $17,550,000,000.
(16) Administration of Justice (750):
Fiscal year 1987:
(A) New budget authority, $7,200,000,000.
(B) Outlays, $7,150,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $7,150,000,000.
(B) Outlays, $7,250,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $7,250,000,000.
(B) Outlays, $7,350,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(17) General Government (800):
Fiscal year 1987:
(A) New budget authority, $5,750,000,000.
(B) Outlays, $5,650,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $6,150,000,000.
(B) Outlays, $6,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $6,150,000,000.
(B) Outlays, $6,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(18) General Purpose Fiscal Assistance (850):
Fiscal year 1987:
(A) New budget authority, $1,850,000,000.
(B) Outlays, $2,650,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $1,900,000,000.
(B) Outlays, $1,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $2,000,000,000.
(B) Outlays, $2,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(19) Net Interest (900):
Fiscal year 1987:
(A) New budget authority, $148,150,000,000.
(B) Outlays, $148,150,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $157,950,000,000.
(B) Outlays, $157,950,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $158,050,000,000.
(B) Outlays, $158,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(20) Allowances (920):
Fiscal year 1987:
(A) New budget authority, $550,000,000.
(B) Outlays, $600,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $1,600,000,000.
(B) Outlays, $1,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $2,650,000,000.
(B) Outlays, $2,850,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(21) Undistributed Offsetting Receipts (950):
Fiscal year 1987:
(A) New budget authority, $−35,850,000,000.
(B) Outlays, $−36,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $−33,400,000,000.
(B) Outlays, $−33,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $−34,150,000,000.
(B) Outlays, $−34,150,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

RECONCILIATION

SEC. 2. (a) Not later than June 5, 1986, the committees named in subsections (b) through (u) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

HOUSE COMMITTEES

(b) The House Committee on Agriculture shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $80,000,000 and outlays by $79,000,000 in fiscal year 1987; decrease budget authority by $83,000,000 and outlays by $83,000,000 in fiscal year 1988; and decrease budget authority by $84,000,000 and outlays by $84,000,000 in fiscal year 1989.

(c) The House Committee on Banking, Finance, and Urban Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: increase budget authority by $642,000,000 and decrease outlays by $1,158,000,000 in fiscal year 1987; decrease budget authority by $0 and outlays by $23,000,000 in fiscal year 1988; and increase budget authority by $164,000,000 and decrease outlays by $46,000,000 in fiscal year 1989.

(d)(1) The House Committee on Education and Labor shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $25,000,000 and outlays by $25,000,000 in fiscal year 1987; decrease budget authority by $150,000,000 and outlays by $135,000,000 in fiscal year 1988; and decrease budget authority by $250,000,000 and outlays by $235,000,000 in fiscal year 1989.

(d)(2) The House Committee on Education and Labor shall report changes in laws within its jurisdiction which provide credit authority as defined in section 3(10) of the Congressional Budget and Impoundment Control Act of 1974, sufficient to reduce direct loan obligations by $0 in fiscal year 1987, $18,000,000 in fiscal year 1988, and $97,000,000 in fiscal year 1989; and to reduce primary loan guarantees by $235,000,000 in fiscal year 1987, $15,000,000 in fiscal year 1988, and increase primary loan guarantees by $55,000,000 in fiscal year 1989.

(e) The House Committee on Energy and Commerce shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $2,713,000,000 and outlays by $2,955,000,000 in fiscal year 1987; decrease budget authority by $415,000,000 and outlays by $886,000,000 in fiscal year 1988; and decrease budget authority by $402,000,000 and outlays by $1,114,000,000 in fiscal year 1989.

(f) The House Committee on Interior and Insular Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $448,000,000 and outlays by $448,000,000 in fiscal year 1987; decrease budget authority by $383,000,000 and outlays by $383,000,000 in fiscal year 1988; and decrease budget authority by $374,000,000 and outlays by $374,000,000 in fiscal year 1989.

(g) The House Committee on Merchant Marine and Fisheries shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $170,000,000 and outlays by $170,000,000 in fiscal year 1987; decrease budget authority by $180,000,000 and outlays by $180,000,000 in fiscal year 1988; and decrease budget authority by $200,000,000 and outlays by $200,000,000 in fiscal year 1989.

(h) The House Committee on Post Office and Civil Service shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: increase budget authority by $950,000,000 and decrease outlays by $700,000,000 in fiscal year 1987; increase budget authority by $1,500,000,000 and decrease outlays by $950,000,000 in fiscal year 1988; and increase budget authority by $850,000,000 and decrease outlays by $2,150,000,000 in fiscal year 1989.

(i) The House Committee on Public Works and Transportation shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $836,000,000 and outlays by $119,000,000 in fiscal year 1987; decrease budget authority by $836,000,000 and outlays by $479,000,000 in fiscal year 1988; and decrease budget authority by $836,000,000 and outlays by $544,000,000 in fiscal year 1989.

(j) The House Committee on Science and Technology shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $50,000,000 and outlays by $50,000,000 in fiscal year 1987; decrease budget authority by $0 and outlays by $0 in fiscal year 1988; and decrease budget authority by $0 and outlays by $0 in fiscal year 1989.

(k) The House Committee on Small Business shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $438,000,000 and outlays by $343,000,000 in fiscal year 1987; decrease budget authority by $399,000,000 and outlays by $55,000,000 in fiscal year 1988; and decrease budget authority by $223,000,000 and outlays by $14,000,000 in fiscal year 1989.

(l) The House Committee on Ways and Means shall report changes in law within the jurisdiction of that committee sufficient to reduce the budget deficit by $4,200,000,000 in fiscal year 1987; to reduce the budget deficit by $3,695,000,000 in fiscal year 1988; and to reduce the budget deficit by $3,740,000,000 in fiscal year 1989.

SENATE COMMITTEES

(m) The Senate Committee on Agriculture, Nutrition, and Forestry shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $80,000,000 and outlays by $79,000,000 in fiscal year 1987; decrease budget authority by $83,000,000 and outlays by $83,000,000 in fiscal year 1988; and decrease budget authority by $84,000,000 and outlays by $84,000,000 in fiscal year 1989.

(n) The Senate Committee on Banking, Housing, and Urban Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: increase budget authority by $642,000,000 and decrease outlays by $1,158,000,000 in fiscal year 1987; decrease budget authority by $0 and outlays by $23,000,000 in fiscal year 1988; and increase budget authority by $164,000,000 and decrease outlays by $46,000,000 in fiscal year 1989.

(o) The Senate Committee on Commerce, Science, and Transportation shall report (1) changes in laws within its juridiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its juridiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $170,000,000 and outlays by $170,000,000 in fiscal year 1987; decrease budget authority by $180,000,000 and outlays by $180,000,000 in fiscal year 1988; and decrease budget authority by $200,000,000 and outlays by $200,000,000 in fiscal year 1989.

(p) The Senate Committee on Energy and Natural Resources shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $2,185,000,000 and outlays by $2,377,000,000 in fiscal year 1987; increase budget authority by $82,000,000 and outlays by $61,000,000 in fiscal year 1988; and increase budget authority by $78,000,000 and outlays by $66,000,000 in fiscal year 1989.

(q) The Senate Committee on Environment and Public Works shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $1,124,000,000 and outlays by $407,000,000 in fiscal year 1987; decrease budget authority by $1,101,000,000 and outlays by $744,000,000 in fiscal year 1988; and decrease budget authority by $1,088,000,000 and outlays by $796,000,000 in fiscal year 1989.

(r) The Senate Committee on Finance shall report changes in law within the jurisdiction of that committee sufficient to reduce the budget deficit by $4,200,000,000 in fiscal year 1987; to reduce the budget deficit by $3,695,000,000 in fiscal year 1988; and to reduce the budget deficit by $3,740,000,000 in fiscal year 1989.

(s) The Senate Committee on Governmental Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: increase budget authority by $950,000,000 and decreased outlays by $700,000,000 in fiscal year 1987; increase budget authority by $1,500,000,000 and decrease outlays by $950,000,000 in fiscal year 1988; and increase budget authority by $850,000,000 and decrease outlays by $2,150,000,000 in fiscal year 1989.

(t)(1) The Senate Committee on Labor and Human Resources shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $25,000,000 and outlays by $25,000,000 in fiscal year 1987; decrease budget authority by $150,000,000 and outlays by $135,000,000 in fiscal year 1988; and decrease budget authority by $250,000,000 and outlays by $235,000,000 in fiscal year 1989.

(2) The Senate Committee on Labor and Human Resources shall report changes in laws within its jurisdiction which provide credit authority as defined in section 3(10)

of the Congressional Budget and Impoundment Control Act of 1974, sufficient to reduce direct loan obligations by $0 in fiscal year 1987, $18,000,000 in fiscal year 1988, and $97,000,000 in fiscal year 1989; to reduce primary loan guarantees by $235,000,000 in fiscal year 1987, $15,000,000 in fiscal year 1988; and increase primary loan guarantees by $55,000,000 in fiscal year 1989.

(u) The Senate Committee on Small Business shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $438,000,000 and outlays by $343,000,000 in fiscal year 1987; decrease budget authority by $399,000,000 and outlays by $55,000,000 in fiscal year 1988; and decrease budget authority by $223,000,000 and outlays by $14,000,000 in fiscal year 1989.

ESTABLISHMENT OF DEFICIT REDUCTION ACCOUNT

SEC. 3. (a) Revenues increased through legislative action above $6,000,000,000 in fiscal year 1987, $6,200,000,000 in fiscal year 1988, and $7,200,000,000 in fiscal year 1989, shall be used solely for the purpose of reducing the Federal deficit.

(b) These additional revenues shall be set forth separately in the congressional budget and clearly identified as for the purpose of deficit reduction only.

(c) The President shall immediately take such steps as are necessary to establish a separate account in the Treasury into which revenues referred to in subsection (a) shall be deposited. The account shall be administered in such a way as to insure that moneys deposited in the fund are available solely for the purpose of deficit reduction. The President shall report on an annual basis to the Congress on the financial condition of the fund and the extent to which the fund has reduced the Federal deficit.

RESERVATION OF DEFENSE BUDGET AUTHORITY

SEC. 4. (a) Of the recommended level of fiscal year 1987 budget authority set forth in section 1 of this resolution for Function 050 (National Defense), $3,000,000,000 is hereby reserved from allocation to the Committee on Appropriations under section 302(a) of the Congressional Budget Act of 1974.

(b) The Secretary of Defense is directed to transmit a report to the Speaker of the House of Representatives and the President pro tempore of the Senate setting forth a full and complete accounting of all moneys appropriated to the Department of Defense for fiscal year 1986 in excess of sums needed to cover inflation. Such report shall be referred to the Committee on Appropriations and Committee on Armed Services of each House. The Committee on the Budget of each House shall be notified upon the transmittal of such report.

(c) The report described in subsection (b) shall also be submitted to the General Accounting Office which shall report to the Congress within a period of fourteen days on its findings as to that report.

(d) After the date on which the report of the General Accounting Office described in subsection (c) is transmitted, the Committee on the Budget of each House is authorized and directed to report to its respective House within five legislative days a revised allocation pursuant to section 302(a) of the Congressional Budget Act of 1974 of new budget authority to the Committee on Appropriations reflecting the full amount of budget authority described in subsection (a).

(e) For fiscal years 1988 and 1989, the Secretary of Defense shall, within ninety days of the close of each such fiscal year, issue to the Speaker of the House of Representatives and the President pro tempore of the Senate, a report accounting for any moneys appropriated for each respective prior fiscal year to cover inflation, which have not been obligated for such purposes.

GNP DEFLATOR

SEC. 5. The Committees on Armed Services of the House and Senate shall report legislation prohibiting the Department of Defense from using an arbitrary deflator (one not based on historical or factual data) for major weapons systems which would provide funding for major weapons systems inflation in excess of the GNP deflator.

SHUTTLE ORBITER REPLACEMENT

SEC. 6. Notwithstanding the spending levels contained in section 1 of this resolution, funding for a shuttle orbiter to replace NASA's Challenger, lost on January 28, 1986, would be appropriate if an authorization for such funding is enacted into law.

GENERAL REVENUE SHARING

SEC. 7. The spending levels contained in section 1 of this resolution would not preclude funding for an extension of general revenue sharing under the State and Local Assistance Act of 1972 through the end of fiscal year 1989 if an authorization for such funding is enacted into law.

STRATEGIC PETROLEUM RESERVE

SEC. 8. It is the sense of the Congress that the policy to fill the Strategic Petroleum Reserve to an ultimate capacity of 750 million barrels be reaffirmed. It is also recommended that the Federal Government purchase oil for the Reserve in a way designed to help domestic stripper oil well producers so as to minimize the shutting-in of stripper production.

COOPERATIVE EXTENSION SERVICE

SEC. 9. It is the sense of the Congress that Federal funds for the Cooperative Extension Service of the Department of Agriculture should be maintained at a level sufficient to carry out fully the vital services it is providing to rural America during a time of extreme stress. It is further assumed that this funding will be used especially to support and strengthen such core programs as 4-H Youth Development, Home Economics and Family Living, Natural Resources and Community Development, and services that provide agricultural financial analysis and farm management instruction.

FOREIGN AGRICULTURAL INVESTMENT REFORM

SEC. 10. It is the sense of the Congress that the use of foreign aid funds for financing the foreign production for export use of agricultural commodities already in surplus on world markets is a counter-productive use of American tax dollars as well as devastating to the American farmer who loses export markets from the unfairly subsidized competition.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. DANNEMEYER

Mr. DANNEMEYER. Mr. Chairman, I offer an amendment in the nature of a substitute that has been made in order under the rule.

The CHAIRMAN. The Clerk will designate the amendment in the nature of a substitute.

The text of the amendment in the nature of a substitute is as follows:

Amendment in the nature of a substitute offered by Mr. DANNEMEYER: Strike everything after the resolving clause and insert in lieu thereof the following:

(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $630,600,000,000.
Fiscal year 1988: $678,200,000,000.
Fiscal year 1989: $727,300,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1987: $0.
Fiscal year 1988: $0.
Fiscal year 1989: $0.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1987: $871,764,000,000.
Fiscal year 1988: $859,330,000,000.
Fiscal year 1989: $913,196,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $771,136,000,000.
Fiscal year 1988: $752,463,000,000.
Fiscal year 1989: $799,228,000,000.

(4)(A) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1987: $140,536,000,000.
Fiscal year 1988: $74,263,000,000.
Fiscal year 1989: $71,928,000,000.

(B) For purposes of the maximum deficit amount mandated by the Balanced Budget and Emergency Deficit Control Act of 1985 and section 301(i) of the Congressional Budget Act of 1974 only, the appropriate levels of total new budget authority, budget outlays, Federal revenues, and deficits, including receipts and disbursements of the Federal Old-Age and Survivors Trust Fund and the Federal Disability Trust Fund, are as follows:

New budget authority:
Fiscal year 1987: $1,086,794,000,000.
Fiscal year 1988: $1,104,556,000,000.
Fiscal year 1989: $1,180,760,000,000.
Outlays:
Fiscal year 1987: $971,117,000,000.
Fiscal year 1988: $967,241,000,000.
Fiscal year 1989: $1,027,612,000,000.
Revenues:
Fiscal year 1987: $844,000,000,000.
Fiscal year 1988: $918,100,000,000.
Fiscal year 1989: $987,400,000,000.
Deficit:
Fiscal year 1987: $127,117,000,000.
Fiscal year 1988: $49,141,000,000.
Fiscal year 1989: $40,212,000,000

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1987: $2,319,600,000,000.
Fiscal year 1988: $2,516,900,000,000.
Fiscal year 1989: $2,685,100,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988, are as follows:

Fiscal year 1987:
(A) New direct loan obligations, $30,510,000,000.

(B) New primary loan guarantee commitments, $79,765,000,000.
(C) New secondary loan guarantee commitments, $55,357,000,000.
Fiscal year 1988:
(A) New direct loan obligations, $27,961,000,000.
(B) New primary loan guarantee commitments, $81,701,000,000.
(C) New secondary loan guarantee commitments, $51,875,000,000.
Fiscal year 1989:
(A) New direct loan obligations, $24,746,000,000.
(B) New primary loan guarantee commitments, $83,340,000,000.
(C) New secondary loan guarantee commitments, $52,632,000,000.
(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations and new loan guarantee commitments for fiscal year 1987 through 1989 for each major functional category are:
(1) National Defense (050):
Fiscal year 1987:
(A) New budget authority, $320,340,000,000.
(B) Outlays, $282,238,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $341,572,000,000.
(B) Outlays, $299,129,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $363,229,000,000.
(B) Outlays, $322,282,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(2) International Affairs (150):
Fiscal year 1987:
(A) New budget authority, $20,217,000,000.
(B) Outlays, $15,294,000,000.
(C) New direct loan obligations, $8,087,000,000.
(D) New primary loan guarantee commitments, $12,150,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $20,791,000,000.
(B) Outlays, $15,782,000,000.
(C) New direct loan obligations, $8,221,000,000.
(D) New primary loan guarantee commitments, $12,150,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $24,367,000,000.
(B) Outlays, $15,840,000,000.
(C) New direct loan obligations, $8,335,000,000.
(D) New primary loan guarantee commitments, $12,000,000,000.
(E) New secondary loan guarantee commitments, $0.
(3) General Science, Space, and Technology (250):
Fiscal year 1987:
(A) New budget authority, $9,285,000,000.
(B) Outlays, $9,070,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $9,722,000,000.
(B) Outlays, $9,435,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $10,189,000,000.
(B) Outlays, $9,859,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(4) Energy (270):
Fiscal year 1987:
(A) New budget authority, $5,178,000,000.
(B) Outlays, $5,198,000,000.
(C) New direct loan obligations, $2,506,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $5,707,000,000.
(B) Outlays, $5,264,000,000.
(C) New direct loan obligations, $2,025,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $6,021,000,000.
(B) Outlays, $5,250,000,000.
(C) New direct loan obligations, $1,657,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(5) Natural Resources and Environment (300):
Fiscal year 1987:
(A) New budget authority, $12,956,000,000.
(B) Outlays, $13,065,000,000.
(C) New direct loan obligations, $48,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $13,303,000,000.
(B) Outlays, $13,145,000,000.
(C) New direct loan obligations, $37,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $13,723,000,000.
(B) Outlays, $13,511,000,000.
(C) New direct loan obligations, $42,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(6) Agriculture (350):
Fiscal year 1987:
(A) New budget authority, $23,937,000,000.
(B) Outlays, $23,683,000,000.
(C) New direct loan obligations, $13,023,000,000.
(D) New primary loan guarantee commitments, $5,500,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $26,482,000,000.
(B) Outlays, $25,227,000,000.
(C) New direct loan obligations, $11,940,000,000.
(D) New primary loan guarantee commitments, $6,000,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $25,619,000,000.
(B) Outlays, $21,852,000,000.
(C) New direct loan obligations, $9,812,000,000.
(D) New primary loan guarantee commitments, $6,500,000,000.
(E) New secondary loan guarantee commitments, $0.
(7) Commerce and Housing Credit (370):
Fiscal year 1987:
(A) New budget authority, $10,852,000,000.
(B) Outlays, $4,655,000,000.
(C) New direct loan obligations, $1,790,000,000.
(D) New primary loan guarantee commitments, $37,514,000,000.
(E) New secondary loan guarantee commitments, $55,357,000,000.
Fiscal year 1988:
(A) New budget authority, $11,257,000,000.
(B) Outlays, $7,077,000,000.
(C) New direct loan obligations, $1,613,000,000.
(D) New primary loan guarantee commitments, $37,442,000,000.
(E) New secondary loan guarantee commitments, $51,875,000,000.
Fiscal year 1989:
(A) New budget authority, $9,405,000,000.
(B) Outlays, $3,061,000,000.
(C) New direct loan obligations, $1,481,000,000.
(D) New primary loan guarantee commitments, $37,392,000,000.
(E) New secondary loan guarantee commitments, $52,632,000,000.
(8) Transportation (400):
Fiscal year 1987:
(A) New budget authority, $29,107,000,000.
(B) Outlays, $27,381,000,000.
(C) New direct loan obligations, $168,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $29,749,000,000.
(B) Outlays, $27,358,000,000.
(C) New direct loan obligations, $87,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $30,577,000,000.
(B) Outlays, $28,066,000,000.
(C) New direct loan obligations, $65,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(9) Community and Regional Development (450):
Fiscal year 1987:
(A) New budget authority, $7,023,000,000.

(B) Outlays, $7,679,000,000.
(C) New direct loan obligations, $430,000,000.
(D) New primary loan guarantee commitments, $30,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $8,390,000,000.
(B) Outlays, $7,844,000,000.
(C) New direct loan obligations, $122,000,000.
(D) New primary loan guarantee commitments, $25,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $8,467,000,000.
(B) Outlays, $7,953,000,000.
(C) New direct loan obligations, $72,000,000.
(D) New primary loan guarantee commitments, $20,000,000.
(E) New secondary loan guarantee commitments, $0.
(10) Education, Training, Employment, and Social Services (500):
Fiscal year 1987:
(A) New budget authority, $32,087,000,000.
(B) Outlays, $31,023,000,000.
(C) New direct loan obligations, $1,567,000,000.
(D) New primary loan guarantee commitments, $9,756,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $33,531,000,000.
(B) Outlays, $32,364,000,000.
(C) New direct loan obligations, $1,716,000,000.
(D) New primary loan guarantee commitments, $11,420,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $34,922,000,000.
(B) Outlays, $33,630,000,000.
(C) New direct loan obligations, $1,806,000,000.
(D) New primary loan guarantee commitments, $12,888,000,000.
(E) New secondary loan guarantee commitments, $0.
(11) Health (550):
Fiscal year 1987:
(A) New budget authority, $38,404,000,000.
(B) Outlays, $33,527,000,000.
(C) New direct loan obligations, $3,000,000.
(D) New primary loan guarantee commitments, $100,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $41,016,000,000.
(B) Outlays, $40,865,000,000.
(C) New direct loan obligations, $3,000,000.
(D) New primary loan guarantee commitments, $100,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $43,628,000,000.
(B) Outlays, $43,246,000,000.
(C) New direct loan obligations, $3,000,000.
(D) New primary loan guarantee commitments, $100,000,000.
(E) New secondary loan guarantee commitments, $0.
(12) Medical Insurance (570):
Fiscal year 1987:
(A) New budget authority, $83,573,000,000.
(B) Outlays, $75,252,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $92,236,000,000.
(B) Outlays, $84,645,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $102,052,000,000.
(B) Outlays, $94,772,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(13) Income Security (600):
Fiscal year 1987:
(A) New budget authority, $163,919,000,000.
(B) Outlays, $124,082,000,000.
(C) New direct loan obligations, $1,722,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $171,553,000,000.
(B) Outlays, $130,560,000,000.
(C) New direct loan obligations, $1,124,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $176,415,000,000.
(B) Outlays, $135,226,000,000.
(C) New direct loan obligations, $488,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(14) Social Security (650):
Fiscal year 1987:
(A) New budget authority, $5,522,000,000.
(B) Outlays, $5,522,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $6,156,000,000.

(E) New secondary loan guarantee commitments, $0.

The CHAIRMAN. Pursuant to House Resolution 455, the amendment in the nature of a substitute is considered as having been read.

The gentleman from California [Mr. DANNEMEYER] will be recognized for 30 minutes and a Member opposed will be recognized for 30 minutes.

The Chair recognizes the gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, when we consider the budget process this year, there is one note that is dominant in our consideration, namely, the realization that from the beginning of the history of our Republic, 1789 until about 1980, we developed a national debt of close to a trillion dollars. The sobering reality is that, in the intervening 5 or 6 years since that time, we have added almost another trillion dollars to our national debt. We are in an era of $200 billion annual deficits. The national debt by the end of this fiscal year, September 30, will be close to or in excess of $2 trillion, and the annual interest expense on that debt is about $196 billion, which represents on the chart to my left 43 percent of the undesignated revenue coming to the Federal Government. "Undesignated revenue" means revenue exclusive of trust fund money, such as that which comes to the Social Security Trust Fund or the Highway Trust Fund or the Unemployment Insurance Trust Fund.

Just as early as 9 years ago, the percentage of money going to service the national debt was in the range of 18 percent. If projections continue as the course now indicates, by 1990 we will be spending about 48 percent of our undesignated revenue to the Federal Government as interest on the national debt. Truly it is a course that we cannot continue.

The budget alternative that I am offering to the House this morning is an alternative I believe whose time has come, namely, to cut the interest expense in servicing the national debt.

All of us experience varying degrees of political pain when we think about implementing the cuts that are called for by Gramm-Rudman, some $36 billion in fiscal year 1987, whether they relate to slowing down the projected increase in defense spending or reducing certain social programs or causing a freeze to certain beneficiaries who now receive money from various Federal programs or, in the alternative, in order to reduce the deficit, the suggestion that we raise taxes. The American people in November 1984, made very clear that they did not choose to pursue an option of raising taxes as a means of reducing the deficit. They desire to have the deficit reduced by cutting spending as opposed to raising taxes. And it is in this spirit that this alternative is being offered to the House this morning.

The gross debt, as indicated, is close to $2 trillion. The annual interest expense is carried at almost a 10-percent annual rate, or $196 billion in fiscal year 1986. We have it within our means to reduce that annual interest cost on the national debt down to around 2 percent or 2¼ percent.

I have sent to the Members for their consideration a letter from a former Ambassador of this country to France under President Reagan, Mr. Galbraith, of Morgan Stanley in New York, confirming the fact that we can sell a bond of the U.S. Government backed by gold at an interest cost of 2 percent. This, of course, is crucial to the whole approach that this Member from California is urging the House to adopt at this time.

Specifically, we refinance the national debt. We can do so at an interest cost of some 2 percent. We are currently paying 10. If you take 8 points off of the existing national debt of some $2 trillion, you can see that we can drive $160 billion out of the annual interest cost expense.

This chart to my left is one of the most sobering that we can look at. It indicates that of the debt held by private investors today—these total a little over a trillion dollars of the total, the rest is in public-entity hands—maturing within a year is $464 billion of debt. That comes due within a year. The Treasury has to refinance that debt every week at auctions or every 2 weeks, whatever the demands of the cash flow appear to be. And then within 1 to 5 years, it is $367 billion and on up to the top, $19 trillion.

In the management of the economy of our Federal Government, this is the way the chart should read: The quantity of debt that is coming due within a year should be $19 trillion rather than the other way around. We have virtually no long-term debt in this country today. Why? Because the investors who loan the money are fearful that we in Congress will pursue policies that will result in the resumption of inflation. That is why the inflation premium is in the interest rate that all of us have to pay, whether we are the U.S. Government, the homebuyer or a car-buyer or a college student, or what have you. What this means to the consumers of the country is the ability to have a first trust deed mortgage rate of 5 percent or 6 percent and the same rate to a college student. Again, a student loan of 5 per-

cent to 6 percent, and also a person in business of 5 percent or 6 percent, in order to reduce the cost of borrowing money to run the economy of our Nation.

It may be appropriate to observe as to how we got ourselves into this dilemma that I am speaking about. Back in 1968, President Johnson had a very severe problem on his hands, namely, how do we pay for the Great Society and the Vietnam war all at the same time, in the face of a Congress that did not want to increase taxes to pay for either?

Mr. Johnson at that time chose to ask Congress to remove the coverage of gold behind our currency in circulation, currently at that time required to be backed by 25 percent.

Congress obliged that request of President Johnson, and in so doing we removed the requirement that our currency be backed by 25 percent of gold.

In taking that step, one of the results that was inevitable was that we incurred a period of inflation that reached a virulent stage during the 1970's. It resulted in 20 percent interest rates and inflation rates of over 14 percent or 15 percent and resulted in the action taken by the Federal Reserve Board in October 1979, to change its policy of managing the money supply of the country, which up until that time had been on the basis of managing price, irrespective of what happened to quantity, and the quantity went through the roof.

And then in October 1979 Mr. Volcker changed that policy from price to quantity and we followed a quantity rule from October 1979 to July 1982, and we experienced a squeezing of inflation out of our economy but at a terrible price of high interest rates. Since July 1982 this country has been essentially following a mixed policy of price and quantity and, as a result, we have maintained high interest rates that are still threatening to choke the economy of our world.

When you reflect on the fact that today 15 percent to 20 percent of the farmers in America are in default or close to it, that Third World nations are unable to finance the huge debts that they carry, that we have a $160 billion negative trade balance with the rest of the world, and the interest cost of the national debt is 43 percent of the undesignated revenue, these are all manifestations of the fact that we have unstable currency in the country.

When we back our currency with gold, we supply a rudder to our ship of state. We reduce the interest cost expense for all of us, including the Federal Government, and permit our Federal Government to sell its debt at 2 percent rather than 10 percent, and drive out over the course of the next 3 or 4 years $150 billion of annual interest cost expense.

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from Texas.

Mr. GONZALEZ. I appreciate the gentleman's yielding, because I think the gentleman would not want the record to show a misstatement in relation of an historical fact.

The gentleman stated that President Johnson in 1968 removed the gold backing. The truth of the matter is that in 1968 what you had was the Rossa two-tier gold formula that enabled the country to go until 1971, when President Nixon removed the gold stabilization system and devalued the dollar, in effect.

Mr. DANNEMEYER. That is right.

Mr. GONZALEZ. Also I think history should show that President Johnson, as early as 1966, on the urging of some of us—I ought to know because I wrote him several letters, pointing out that the soft underbelly of the economy was beginning to be impacted because the war in Vietnam and the heavy call on labor and essential material, copper, lumber, and the like.

□ 1025

My school districts were reporting that their bond issues were inadequate because of the increase in the cost of materials. The President finally recommended to Wilbur Mills, and he left it open to Congress.

The CHAIRMAN. The time of the gentleman from California [Mr. DANNEMEYER] has expired.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. I thank the gentleman from Pennsylvania for yielding me this time.

Mr. Chairman, Lyndon Johnson has been treated pretty roughly by history, and the fact is that I spoke with the then chairman of the Ways and Means Committee who said in 1967 and 1968 that over his dead body would he even consider a tax increase.

Finally, in 1968, in July, there was no alternative, they passed the 10-percent surtax if you remember. It had a sunset; it lasted 1 year. The truth of the matter is that the gold exchange system was not abolished until President Nixon did it in 1971.

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman.

Mr. DANNEMEYER. I thank the gentleman.

Mr. Chairman, in 1968, when President Johnson asked Congress to do what Congress then did, we had gold valued at the time of $35 an ounce of $11.9 billion. We had claims against our gold in central banks of foreign countries at $31 billion.

Mr. GONZALEZ. That is right.

Mr. DANNEMEYER. Then, 3 years later, our gold stock had declined to $10.5 billion, and the claims against that gold in foreign central banks had risen to $46.3 billion, and that dilemma was what President Nixon was faced with in 1971 and caused him to close the gold window.

Mr. GONZALEZ. There is no question. But what I am saying, and I wish the RECORD to show, is that the gentleman was in error in placing the date of the actual removal of the United States from the gold exchange system, not in 1968, but in 1971. In 1968, our monetary expert——

Mr. DANNEMEYER. Listen, there is enough blame to go around.

Mr. GONZALEZ. No, no, no; I just think the RECORD ought to show. Now what Mr. Nixon did, of course, history shows it was inevitable. He had not one but two devaluations of the dollar within 2 years.

Mr. DANNEMEYER. There was another option that President Nixon I think could have taken in 1971. If he had elected to issue U.S. bonds on which the interest would be payable in gold, at 2-2¼ percent, gold would have flowed to the United States and convinced the world that the United States would continue with the gold standard.

Mr. GRAY of Pennsylvania. Mr. Chairman, I reserve the balance of my time.

Mr. DANNEMEYER. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding me this time.

Mr. Chairman, let me congratulate the gentleman from California for the budget that he has brought to the floor today. This is the only idea-driven budget that we will have on the floor during the consideration of the budget this year.

I say it is idea-driven because it is in fact a budget that proposes a major policy change so that we can in fact achieve the priorities that we want to meet as a nation, and at the same time, meet the overwhelming priority of having to reduce our national deficit.

I would characterize the budget that was brought before this body by the gentleman from California as an honest-money budget. This is the honest-money budget. I mean that to be contrasted with the other budgets that we will consider that are in fact corrupt-money budgets.

What do I mean by corrupt money? I mean corrupt money in the sense that they are based upon money that is manipulated politically. That, in fact, every other budget proposal will be brought out there with the assumption that interest rates are in fact partially based upon the fact that there is no faith in the economy by investors;

that we will not have a manipulation of the money supply by the politicians.

We pay a terrible price for all of that manipulation. We pay, really, a nonconfidence premium on all of the interest in this country, be that consumer interest or be it interest that the Government pays. In the case of the gentleman's budget, what he is suggesting is that because of that nonconfidence factor, because of the corrupt money that we use in our society, that we are in fact paying a terrible premium in the third largest budget item of the Federal Government: payment on the national debt.

What the gentleman is suggesting is that if we would go to honest money, money backed by a true international commodity, money in which there was confidence about the stability of its worth, that you could lower those interest premiums dramatically. By bringing down those interest premiums, we could afford to do the things that we want to do as a society, and at the same time, we could begin the process of lowering the deficits.

Let us think for a minute what corrupt money has done. The farmers in the Midwest who are now suffering deflation on their farms are in large part victims of corrupt money. At a time when inflation was driving the economy, they felt that the politicians were accommodating to inflation. They in fact accommodated too and bought land at higher and higher prices.

Now, all of a sudden, the politicians found that we could not live with long periods of inflation, and, in fact, what we began then is a process of devaluation. The devaluation has gone to the farm crisis and so on and has devalued the land, and these fellows find themselves in major, major difficulty. But that is as a result of corrupt money.

What the gentleman from California is saying is, "Let us have honest money." The same kind of situation is faced by small businessmen. It is faced by individual people who are in the marketplace; the consumers of this country. The gentleman from California brings forth an honest-money, idea-driven budget that says, "Let us change it. Let us make a real change."

It seems to me that we ought to listen to the gentleman, and if the gentleman from California would just answer a couple of questions for me, I think maybe we would help clear up just exactly how far down the line we go toward meeting the legitimate needs of this country and yet taking the money out of the interest payments.

Can the gentleman tell me, does your budget gut defense the way the Budget Committee's budget tends to do in order to get down their deficit figures?

I yield to the gentleman for his response.

Mr. DANNEMEYER. I thank the gentleman.

On the contrary, the defense numbers in the budget alternative are what the President has requested which is really 3 percent after inflation for budget authority, and I think it is a fair assessment of the need for the defense budget.

Mr. WALKER. I might say to the gentleman that I think maybe that figure is a little high. I suggest you can cut defense, but I also suggest that you cannot gut defense. That at this point in our history we cannot afford to be gutting the defense establishment the way the Budget Committee does. So what the gentleman is saying that the defense priority of this country is met in his budget?

How about raising taxes? Does the gentleman's budget anticipate a tax increase like the Budget Committee proposal in order to lower deficits?

Mr. DANNEMEYER. Not at all. It assumes that the revenue which will come to the Government in fiscal year 1987 is a result of the existing tax structures. No tax increases are contemplated.

Mr. WALKER. There are no tax increases; the American people would not have to pay additional taxes in order to get down deficit numbers as you do in your budget?

Mr. DANNEMEYER. None at all.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. DANNEMEYER. Mr. Chairman, I yield an additional 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding me additional time.

I would ask the gentleman: Does the gentleman have to cut the priority social programs of this country in order to bring down deficit numbers?

I yield to the gentleman for his response.

Mr. DANNEMEYER. There is no reduction of any social program in this budget at all. The only thing we cut is interest rates.

Mr. WALKER. The gentleman does not have to take away Social Security COLA's or COLA's from Federal retirees or COLA's from Federal employees and so on in his budget?

Mr. DANNEMEYER. Any person that is now receiving benefits from the Federal Government that is entitled to a COLA will receive the full COLA as contemplated in the CBO estimate for fiscal year 1987.

Mr. WALKER. In other words, the priorities that we have set into law over a period of years are maintained under the gentleman's budget, and yet he brings down the deficit numbers, as I understand it, $16 billion to $17 billion below what Gramm-Rudman requires of us this year. His budget deficit figure is $127 billion versus $144 billion that Gramm-Rudman requires, and versus the $137 billion of the Budget Committee.

So the gentleman is much lower in deficits and yet does not make the cut and he does it by taking away from interest payments. I would say that some people will say that what the gentleman is doing is practicing the voodoo economics that we hear about around here every so often. The gentleman is not, however.

□ 1035

Let it be made absolutely clear: The gentleman is suggesting a major change in policy, a rightful change in policy, that in fact would improve this economy, bring about additional growth, and bring about reduced deficits. This is truly the honest-money budget, and I urge my colleagues to support it.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. RUSSO].

Mr. RUSSO. Mr. Chairman, we have no speakers, and we reserve the balance of our time.

Mr. DANNEMEYER. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. Mr. Chairman, I, too, want to join in congratulating my colleague from California. I think this is the most significant proposal that I will have had the opportunity to vote on in almost 17 years in this Congress.

I say that as a former student of history, one who fought for restoration of gold ownership for 5 years as a member of the Banking Committee when I first came here. We managed to succeed in that effort, and it was a first step, it struck me, toward restoration of honest money.

Honest money is the component of this budget that enables us to achieve the objectives that everybody in this Chamber has embraced from time to time with regard to defense, as the gentleman from Pennsylvania pointed out, and with regard to the social issues, many of which I have been critical of, but on this side of the aisle you do not have to sacrifice anything in this budget. Conversely, those of us who are concerned about the security of the country do not have to make sacrifices either, and we simultaneously reduce that deficit $77 billion instead of the lesser figures proposed by the House Budget Committee. More importantly, and it goes back to the chart that the gentleman from California had down here in the well, that short-term refinancing cost, as he noted, the pyramid that you saw in that chart really should be turned upside down, and it will not be so long as people are not sure what the value of money will be 10 or 20 years into the future.

The dollar today is worth only approximately 30 cents—less than 30 cents—of the 1967 dollar. If you go back to a pre-World War II dollar, this dollar today is probably worth somewhere in the neighborhood of 2 or 3 cents. In fact, according to projections made of increased governmental expenditures over the next 15 years in this country, if we spend at the rates that are the average of the previous 20 years, we will reduce the value of our dollar by the year 2000 to roughly 2 cents—less than 2 cents—of the 1967 dollar.

The importance of this should have been brought home to people who have studied history in the past. I used one of the great classic examples to illustrate this when I was teaching students about the importance of honest money.

In 1914 in Germany they printed this note. This was a 50-mark note. It is pretty careworn from the time I have had it in my wallet. This 50-mark note at that time was worth roughly $12.50 American. The German national debt at that time was in the neighborhood of 400 million marks, an astronomical sum of money. Nine years after they printed this 50-mark note they printed this note. This is a 500-million-mark note. They did not even bother to print these on both sides, and no German, if he saw one of these lying in the gutter, would have bothered to bend over and pick it up.

That is why you have the $454 billion 1-year debt turnover, and $19 billion lying out there 30 years from this point, because people do not trust their Government. Governments are designed to protect life, liberty, and property, and when they commit these depredations against thrift and industry and savings, they have themselves become the instruments of chief trespass against life, liberty, and property.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. CRANE. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I suggest that the gentleman is absolutely historically correct. In retrospect, the German Government inflated the mark 25 quintrillion times, and it turned out to where a postage stamp in 1919, which was but a shade of that, cost a million marks by 1923, August, and it caused the collapse of democracy ultimately in Germany.

Mr. CRANE. That, I think, is a second point that has to be stressed, and I am glad the gentleman brought that up. The German society did not die just because everyone now had worthless paper money. The farmers continued to come into the cities, and they swapped their foodstuffs for gold wedding bands and the ladies' earrings and art treasures. Finally there were no more art treasures to swap in exchange for food, and the farmers decided that they would ride it out, they would sit on their farms, feed their families, and wait until order was restored.

The fact is that the city populations got hungry, they started fanning out over the countryside plundering the farmers and order was restored at bayonet point. They struggled to try to reestablish a sound-money system desperately, and then they got hit with the crash of 1929 on the heels of this, and their whole economy collapsed, as ours did. But theirs led to the loss directly of their political institutions as well, and that led to the rise of Adolf Hitler, and we all know the rest of that story.

In short, what I am suggesting is that when you engage in unsound money practices, sooner or later you are led down the garden path that this Congress has been led down in terms of mortgaging the future of our children. We have a chance to do something about that: Not only restore honest money, not only get our budgets back in balance, preserve all of our social and defense priorities simultaneously, but, God willing, preserve our political institutions as well.

The gentleman from California is probably before his time, but sooner or later he is going to be recognized for the great accomplishment that he has achieved in even getting this before this Congress for debate.

Mr. DANNEMEYER. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. KEMP].

Mr. RUSSO. Mr. Chairman, I yield 4 minutes to the gentleman from New York [Mr. KEMP].

The CHAIRMAN. The gentleman from New York [Mr. KEMP] is recognized for 9 minutes.

Mr. KEMP. Mr. Chairman, I thank my colleague, the gentleman from California [Mr. DANNEMEYER], and my friend, the gentleman from Illinois [Mr. RUSSO] for their extraordinary generosity in yielding time to me so that I might attempt to share with my colleagues some important ideas about what the gentleman from California and we are attempting to do with the amendment.

My friend, the gentleman from Pennsylvania [Mr. WALKER] called this the honest money amendment. That is interesting and very accurate. The gentleman from Illinois [Mr. CRANE] alluded to the fact that with honest money, interest rates would be low and with a currency that is debased, interest rates are high. Equally accurate.

Clearly, bringing honest money to America to our constituents and to the world, would have a positive impact upon commerce, industry, jobs, entrepreneurship, and trade. And it would reduce tensions between nations.

John F. Kennedy in 1961 suggested that the linchpin of the whole world's trading system and its financial system was the fact that the dollar in 1961 was as good as gold. In other words, it was honest money.

The gentleman from California was called a prophet by our friend, the gentleman from Illinois [Mr. CRANE]. Prophets, it seems to me, are not people who predict the future. More importantly, they are people who can interpret the present. And that's what we need more of today. What the gentleman from California is saying today is that there is a disequilibrium being caused in our economy and in the world by the failure of the United States to maintain a predictable, sound, honest, long-term policy for the dollar that will once again guarantee its value. If we had that type of dollar, this type of currency, the interest rates would be cut in half, in my view. The gentleman from California says it might even be lower.

Then ask yourself—How do you think the budget would look with an interest rate of 5 percent or even lower? How do you think automobile sales and home sales would be doing in an economy where consumer interest rates were 6 percent, mortgage rates were 7 percent, long-term rates were 1½ or 2 or even 3 percent.

The honest-money budget amendment is, in my view, ahead of its time, but I think that it would help to bring the budget into balance by bringing the American economy into balance.

What we are saying here today is that there is only one real way to balance a budget, and that is to create through economic policy the conditions for full employment without inflation. We are also saying you can't balance the Federal budget by unbalancing the family balance with a tax increase.

Incidentally, if you look at the economy and the assumptions upon which the budgets are made—including the major Republican alternative and the Democratic Party's budget—they accept inflation, they accept unemployment, they accept a less than full utilization of the resources—both physical and human—in our American economy.

Think about assumptions for a moment. The assumptions, unfortunately, upon which the Republican budget and the Democratic budget have been based are predicated upon high-interest rates and higher energy prices. Actually they are lower now than they were predicted to be.

□ 1045

I think most of us know that the price of a barrel of oil is closer to $13.50, not $26.

Assumptions are important, because all those assumptions drive those long-term deficit figures. It used to be the assumption that deficits caused infla-

tion. Then some said, deficits cause recession.

I can remember the assumption made just a few years ago when the dollar was rising inordinately against the yen and the deutsche mark that the deficit is causing a strong dollar. Back in the seventies, the deficit was accused of causing a weak dollar. Assumptions are important. The assumption, the predicate, the linchpin that bolds the Dannemeyer budget together is the basic premise that with sound money, honest money, low long-term-interest rates and a modified flat tax, or the flat tax that is moving through the Senate and hopefully will come to conference along the lines that some of us have been talking about for a long time, with less spending for Government and more investment by the working and saving Americans who make up the real driving engine behind the American economy, the budget comes into balance.

Every 1 percent drop in interest rates drops the deficit, over 5 years by about $25 billion. Every 1 percent drop in unemployment drops the deficit by $35 to $40 billion. Every 1 percent of gross national product drives the deficit down by over $320 billion over 5 years.

The Dannemeyer budget recognizes that high interest rates are causing the deficit. Let me say it again. It is the high interest rates that have been held inordinately high from 1980 through 1986 that are exacerbating the economic climate in America which is manifesting itself in deficits.

The fastest rising part of the deficit is debt service. I think the point has been made by three or four previous speakers. I think it is up to about $120 to $125 billion a year. If we have interest rates half of what they are today, debt service would drop in 1 year by roughly $30 billion.

Now, obviously that will not happen, but it can happen. Right policies can create the conditions for the honest money that we want in this country.

I want to make a point to all my colleagues who are either in the Chambers or watching on television. We do not have honest money. I am not accusing anybody of dishonesty. I am just suggesting that today we do not have a standard. There is no measure. There is no reliable way to decide what the value of the dollar is going to be.

Listen to the Chairman of the Federal Reserve Board just a few weeks ago, quoted in the New York Times. He was asked what the Federal Reserve Board was doing with regard to the value of the dollar in the previous meeting and he said, "We did what we did and we didn't do what we didn't do."

We now have a Volcker standard. That is what I call the Volcker standard. No standard. It is a rumor standard. Lest you think I am exaggerating, here is an article from the Financial Times of several weeks ago. Listen to this:

A turbulent day in the foreign exchange market yesterday saw the dollar fluctuate sharply as traders tried to make sense of U.S. official policy towards the currency's weakness. The dollar plunged against the Deutsche mark . . ., only to recover on rumors that Japan and West Germany might move together to reduce their interest rates. If fell back again when these rumors were denied.

Then it goes on to suggest what was happening in Japan.

The report quoted Preston Martin, Vice Chairman of the U.S. Federal Reserve Board, who quickly denied that he had suggested Japan should cut its discount rate. And then the dollar fell again. It was weaker for much of the day as traders interpreted remarks on Wednesday by Paul Volcker, Federal Reserve Board Chairman, and Karl Otto Pohl, president of the German Bundesbank, as signals that the dollar would fall even further. Then, the article continues, U.S. bond prices "surged on hopes that a Group of Five meeting would lead to lower world interest rates. Although the rally pursued after Mr. Martin's denial, it resumed shortly afterward."

How is it possible, my colleagues, how is it possible to conduct international trade and international commerce, make an investment or make long range plans with regard to one's own family or business or commercial interest or to save for a college education or put something away for something that someone wants to buy in the future, and not know that the value of the currency will maintain its integrity?

I want to say, even though the budget will not pass, I know that is a shock to some of my bleeding heart conservative friends, it may not pass, my friends, but it is important for us to consider today what would be the impact upon the deficit of sound, honest, predictable money.

One other point I want to make. I am disappointed in the Democratic budget, primarily because it buys the hysteria that was created by the former Director of the Office of Management and Budget, David Stockman. Dave said that the deficit would be about $300 billion in the year in which we are working on the budget. Well, it did not turn out to be $300 billion.

Mr. CHAIRMAN. The time of the gentleman from New York has expired.

Mr. RUSSO. Mr. Chairman, I yield 1 additional minute to the gentleman from New York [Mr. KEMP].

Mr. KEMP. Mr. Chairman, the gentleman is gracious and a good friend and I deeply appreciate his willingness to allow us to continue.

The deficit is not $300 billion. It is not $200 billion. Frankly, Mr. Miller of OMB, Stockman's successor, is now saying it is about $172 billion. My friend Paul Craig Roberts recently wrote "The deficit hysteria turned out to be based in politics and not analysis." And he is right. The deficit is coming down. The deficit is coming down because the economy, interest rates, unemployment rates, all have an impact upon this deficit and the assumptions that Dave made were wrong. His book is wrong. Reagan did not fail. Dave failed. The American people know it. Even the gentleman from Michigan, Mr. Stockman, knows it.

I want to suggest that we don't have to gut the social safety net programs of this country. We need a safety net or platform under which all people should not be allowed to fall, but we also need a ladder of opportunity upon which all people can climb. That is what more jobs and economic growth can help accomplish.

The answer to welfare is jobs and economic growth, not austerity and sacrifice.

The answer to balancing the budget—this will shock my friends—is more growth, more jobs, lower interest rates, a flat tax, sound money, sound trade policies, enterprise zones, and those liberal democratic values upon which our Judeo Christian Nation and free enterprise economy is based.

Mr. Chairman, I would also like to say a few words about our defense budget for next year. In my judgment, both the House and Senate budget resolutions do not provide enough money for our defense needs. Defense is not cheap. But it makes all other priorities possible. It is our first and foremost responsibility.

The sort of defense reductions we are being asked to endorse are unnecessary to balance the budget, would do severe damage to our long-term defense capabilities, and, as a continuing pattern, would halt the march of freedom in the world, just as it was beginning to gather momentum in such places as Grenada, El Salvador, and Afghanistan.

Last year, Congress made a 6-percent real cut in the fiscal year 1985 defense budget, the first absolute cut in defense spending levels in 15 years. This year, the House Democratic budget cuts $35 billion from Reagan's request and $16 billion from a real freeze level—nearly a 6-percent real defense reduction from fiscal year 1986 levels. Thus the combined cut from the Democrat's proposal amounts to almost a 12-percent real decline from the fiscal year 1985 defense budget.

It is not too strong to say that the Democrat's defense number is sheer capitulation, but even the House Republican defense level is inadequate. The House Republican alternative would cut a $8 billion below the Senate-agreed level, which is the bare minimum necessary to just cover inflation. This pattern of real defense reductions is extremely disappointing and dangerous to our national security.

President Reagan was right in his recent letter to Representative ROBERT MICHEL:

The decisions we make about our defense budget today determine the strength with which we can underwrite our security for years to come. The threat we anticipate, unfortunately, continues to grow. The House Budget Committee's proposed level for defense spending would increase the risks to each one of us by reversing the progress we have made and causing the gap between our national security requirement and our military capabilities to widen once again.

The fiscal year 1986 congressional budget resolution promised 3 percent real growth in defense for the next 3 years. That commitment was agreed to by both parties. Now every budget proposal is reneging on that commitment, threatening to go back to the days of underfunding our defense needs. We will pay the consequences of inadequate preparedness if this pattern is not halted immediately.

I must oppose any plan—whether Democratic or Republican—which threatens to lead us down the road to weakness and isolationism. Defense must be a continuing commitment, it cannot be an effort that is given up after 4 or 5 years. We absolutely must avoid feast and famine cycles of defense spending.

We cannot go hacking away at defense for the fourth year in a row without serious consequences for our efforts to fight state-terrorism, respond to the continuing unprecedented Soviet military buildup, and promote the cause of freedom-fighters throughout the world.

How U.S. forces might fare in any potential conflict will hinge upon our willingness to vote an adequate defense budget today. I am deeply disappointed that the budget this year breaks faith with the promises we made last year and sacrifices our defense to short-term deficit reduction.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. DANNEMEYER], who has 2 minutes remaining.

Mr. DANNEMEYER. Mr. Chairman, may I ask, was the gentleman from Pennsylvania [Mr. GRAY] going to yield some time to the gentleman from Michigan?

Mr. GRAY of Pennsylvania. Mr. Chairman, I am glad to yield some time to the gentleman from Michigan [Mr. SILJANDER], so that the gentleman from California [Mr. DANNEMEYER] can save his last 2 minutes for his closing remarks. I will be glad to yield 3 minutes from my side to the gentleman from Michigan so that the gentleman from California may have 2 minutes for closing.

Mr. DANNEMEYER. Mr. Chairman, I thank the gentleman. I would like to reserve 2 minutes for closing comments, and the gentleman from Michigan now has 3 minutes.

The CHAIRMAN. The gentleman from California [Mr. DANNEMEYER] reserves his 2 minutes and the gentleman from Michigan [Mr. SILJANDER] is recognized for 3 minutes.

Mr. SILJANDER. Mr. Chairman, I would like to thank both the chairman and the gentleman from California [Mr. DANNEMEYER] for their generosity in giving of their time.

The gentleman from New York [Mr. KEMP] said that the gentleman from California [Mr. DANNEMEYER] is prophetic, and indeed, he is prophetic, but prophets often are not recognized within their own time. I appreciate the gentleman bringing up this debate. There is no question that there will be a very select few that will vote for his particular budget, but there will be a day in American history when we will debate the issues that were brought up by so many of the eloquent speakers this afternoon.

Mr. Chairman, it gives me a great deal of pleasure to rise in support of the Dannemeyer substitute. I don't think any of us expect this budget will pass, yet I believe my good friend from California has done a great service to this country by opening this debate. This issue of floating exchange rates and the return to a price rule is extremely important. I look forward to the day when we will debate what type of fixed exchange rate system we will return to rather than whether or not we should abandon the present nonworking system.

The final abandoment of the gold standard in 1971 by Richard Nixon will be recorded in history as a greater error than the Watergate coverup. The problem of historically high interest rates, dangerous international debt, and the huge trade deficit can be directly linked to the U.S. departure from the international gold standard.

My congressional district is predominantly agricultural. It is interesting to see how the monetary policy of the Federal Reserve and the system of floating exchange rates has ignited the latest farm crisis. By reducing the money supply to control the economy the Fed caused a deflation in commodity prices. Inflation tends to rob lenders because debtors pay back their loans in dollars that are worth less. Deflation robs the debtors, because they have to pay back their loans in dollars that are worth more than they borrowed. When deflation occurs, farm loans begin to default and the value of the land which is held in collateral begins to shrink. At the same time, farmers need to grow as many crops as possible so they can get the cash to pay off their existing loans. Naturally, the market becomes oversaturated with crops, driving farm prices down, giving farmers fewer dollars to pay back their loans. At the same time, the Fed pushes interest rates even higher, due to its monetarist paranoia, which prevents farmers from refinancing their debt.

Increasing interest rates to artificially high levels also increases the value of the dollar in foreign exchange rates. When interest rates are high, foreign investors are attracted to American markets, thus making the value of other currencies comparatively less. When that happens, imports become cheap, since Americans are buying them with overvalued dollars, but exports become expensive, since foreigners have to buy U.S. exports with currencies that are shrinking in value.

The cycle thus deepens for the farmer. Since the largest U.S. export is agriculture, a high U.S. dollar is easier for other nations to compete with us. American farmers suddenly find that they cannot sell their goods abroad. This means that there are now more farm products being dumped on U.S. domestic markets driving the price of agriculture goods down further. Eventually, the price of the products become lower than the cost to produce it and an agriculture-led depression becomes possible.

Perhaps the single greatest cause for our trade deficit is the monetary policy of the Federal Reserve which has promoted artificially high interest rates in the United States. These interest rates make the dollar attractive to foreign investors in relation to other currencies, thus causing the dollar's value to rise. American farmers, manufacturers, and mineral producers, industries that are the backbone of U.S. exports, have been priced out of the world market by the dollar's rise. Just as the fall of the dollar in the early 1970's provoked protectionism abroad, the high value of the dollar in the 1980's has led to calls for protectionism in the United States. The instability of exchange rates has cost jobs in both the United States and the Third World.

The obvious answer to a monetary policy that permits a rising dollar or a falling dollar is a monetary policy that preserves a stable dollar. We need a domestic monetary policy geared to the value rather than the quantity of money. The way to accomplish this would be to have the Federal Reserve tie the dollar to a price rule—an index based on gold, silver, and other valuable minerals. Since the abandonment of the international gold standard in 1971, world trade has been on a roller coaster and the value of the dollar has been erratic.

A gold-based economy is after all a simple matter of justice. By lenders and borrowers, sellers and buyers, exporters and importers all knowing the fixed value of a currency, speculation and fear are removed from purchases. The key to restoring low interest rates and a stable world trading system would be for the Federal Reserve to abandon floating exchange rates and the targeting of the money supply for a price rule based on the value of gold.

Once again, I wish to thank my colleague [Mr. DANNEMEYER] for his leadership on this issue.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. DANNEMEYER] for his remaining 2 minutes.

Mr. DANNEMEYER. Mr. Chairman, there is a statesman in the history of America who spoke eloquently to the issue that we are addressing this morning, Daniel Webster, who spoke in 1832 in a room down the hall from where we are speaking today. This is what he said, and I think it is appropriate for his words to be repeated today:

Of all the contrivances for cheating the laboring classes of mankind, none have been more effectual than that which deludes them with paper money. This is the most effectual of inventions to fertilize the rich man's field by the sweat of the poor man's brow. Tyranny, oppression, excessive taxation—these bear lightly, compared with fraudulent currencies and the robberies committed by depreciated paper.

They were true then. They are true today.

We should not kid ourselves about the status of the international banking system. It is close to hemorrhage.

When the Mexican Government—pray that they do not, but if they choose to do it—declares a default on their loans, that places those loans in default in the banks which have lent the money in New York City and elsewhere. Those banks will offset those defaulting loans against their reserves and then against equity and they are then in effect bankrupt. At that point they are knocking at the door of the Federal Reserve Board for liquidity and we have the choice of granting that request or ignoring it. If we grant it, we run the risk of pursuing a policy of hyperinflation that the gentleman from Illinois [Mr. CRANE] depicted took place in the Weimar Republic in Germany in the early part of this century.

□ 1100

We are at a crossroads in terms of a policy option that is desperately needed in America for the sake of leading the Western World out of this high-interest-rate mode in which we find ourselves.

I hope that this House will have the courage to adopt the policy option that is called for and approve this budget.

Mr. Chairman, I include at this point a letter dated April 29, 1986, from Mr. Galbraith of Morgan Stanley, on the point of the viability of the U.S. Government insuring a bond at a 2-percent rate.

The letter follows:

MORGAN STANLEY & CO., INC.,
New York, NY, April 29, 1986.

Hon. WILLIAM E. DANNEMEYER,
U.S. House of Representatives, Longworth House Office Building, Washington, DC.

DEAR CONGRESSMAN: Thank you for your letter of April 15th. I think the United States Government could sell $100 billion of 30 year bonds convertible into gold (not indexed—actually exchangeable for the metal) at an interest rate of no more than 2 percent. Moreover, there probably would be a conversion premium of at least 5 percent over the price of gold at the time of sale. The bonds should be non-callable for ten years. The underwriting and sales commission would be less than 1 percent.

These bonds would become the preferred way to hold gold and would soon fluctuate in value along with the price of gold. If the United States wished to issue another tranche they could, in my opinion, buy an option on additional gold from several reserve banks in the world and still, after paying the cost for the option, effect a reduction in the Treasury's present borrowing costs.

This effort to use our gold and the gold of other countries to reduce the Treasury's borrowing cost would have a beneficial effect on the world economy. I congratulate you on your efforts, but I am not optimistic that we will be able to convince the Treasury. I have tried for almost ten years. Perhaps we can discuss the matter sometime at your convenience.

Best regards.

Sincerely,

EVAN G. GALBRAITH.

Mr. GRAY of Pennsylvania. Mr. Chairman, I believe that it is my privilege to close in opposition and I yield myself such time as I may consume.

Mr. Chairman, I will take only one moment. I will simply say that I thank the gentleman from California [Mr. DANNEMEYER] for his substitute. However, I would point out that the gentleman uses the President's defense outlay proposals and estimates which, as we remember, according to the CBO have been underestimated by almost $15 billion.

Therefore, with the debt service there would actually not be a deficit of $127 billion. It would be closer to around $142 billion. Adding the $52 billion of additional interest costs which would not be realized in the first year but perhaps be realized in the out years as a result of going to the gold standard, it is my best judgment and that of the Committee on the Budget that the first year deficit would be substantially higher than the Gramm-Rudman targets.

Therefore, Mr. Chairman, I urge a "no" vote.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from California [Mr. DANNEMEYER].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. DANNEMEYER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 73, noes 338, not voting 22, as follows:

[Roll No. 124]

□ 1110

Messrs. BROOKS, HEFNER, COBLE, and WHITTAKER changed their votes from "aye" to "no."

Mr. LEWIS of California changed his vote from "no" to "aye."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

□ 1120

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. LELAND

Mr. LELAND. Mr. Chairman, I offer an amendment in the nature of a substitute made in order under the rule.

The CHAIRMAN. The Clerk will designate the amendment in the nature of a substitute.

The text of the amendment in the nature of a substitute is as follows:

Amendment in the nature of a substitute offered by Mr. LELAND: Strike out all after the resolving clause and insert in lieu thereof the following:

That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1987 is established and the appropriate budgetary levels for fiscal years 1988 and 1989 are set forth.

(a) The following levels and amounts are set forth for purposes of determining, in accordance with section 301(i) of the Congressional Budget and Impoundment Control Act of 1974, as amended by the Balanced Budget and Emergency Deficit Control Act of 1985, whether the maximum deficit amount for a fiscal year has been exceeded:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $868,100,000,000.

Fiscal year 1988: $955,000,000,000.

Fiscal year 1989: $1,024,800,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1987: $1,088,670,000,000.

Fiscal year 1988: $1,155,960,000,000.

Fiscal year 1989: $1,206,300,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $1,011,910,000,000.

Fiscal year 1988: $1,058,220,000,000.

Fiscal year 1989: $1,087,380,000,000.

(4) The amounts of the deficits are as follows:

Fiscal year 1987: $143,810,000,000.

Fiscal year 1988: $103,220,000,000.

Fiscal year 1989: $62,580,000,000.

(b) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $654,700,000,000.

Fiscal year 1988: $714,300,000,000.

Fiscal year 1989: $763,600,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1987: $14,890,000,000.

Fiscal year 1988: $25,470,000,000.

Fiscal year 1989: $29,840,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1987: $55,700,000,000.

Fiscal year 1988: $60,150,000,000.

Fiscal year 1989: $64,250,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1987: $85,320,000,000.

Fiscal year 1988: $909,180,000,000.

Fiscal year 1989: $1,022,310,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $813,590,000,000.

Fiscal year 1988: $847,770,000,000.

Fiscal year 1989: $865,440,000,000.

(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1987: $158,890,000,000.

Fiscal year 1988: $133,470,000,000.

Fiscal year 1989: $101,840,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1987: $2,319,600,000,000.

Fiscal year 1988: $2,516,900,000,000.

Fiscal year 1989: $2,685,100,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988, are as follows:

Fiscal year 1987:

(A) New direct loan obligations, $34,250,000,000.

(B) New primary loan guarantee commitments, $85,400,000,000.

Fiscal year 1988:

(A) New direct loan obligations, $32,250,000,000.

(B) New primary loan guarantee commitments, $87,300,000,000.

Fiscal year 1989:

(A) New direct loan obligations, $30,600,000,000.

(B) New primary loan guarantee commitments, $87,650,000,000.

(c) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations, and new primary loan guarantee commitments for fiscal years 1987 through 1989 for each major functional category are:

(1) National Defense (050):

Fiscal year 1987:

(A) New budget authority, $255,390,000,000.

(B) Outlays, $264,960,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:

(A) New budget authority, $259,980,000,000.

(B) Outlays, $261,660,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:

(A) New budget authority, $264,730,000.

(B) Outlays, $260,390,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(2) International Affairs (150):

Fiscal year 1987:

(A) New budget authority, $20,180,000,000.

(B) Outlays, $13,950,000,000.

(C) New direct loan obligations, $7,150,000,000.

(D) New primary loan guarantee commitments, $11,400,000,000.

Fiscal year 1988:

(A) New budget authority, $20,790,000,000.

(B) Outlays, $14,860,000,000.

(C) New direct loan obligations, $7,100,000,000.

(D) New primary loan guarantee commitments, $11,400,000,000.

Fiscal year 1989:

(A) New budget authority, $24,340,000,000.

(B) Outlays, $15,220,000,000.

(C) New direct loan obligations, $7,100,000,000.

(D) New primary loan guarantee commitments, $11,400,000,000.

(3) General Science, Space, and Technology (250):

Fiscal year 1987:

(A) New budget authority, $9,450,000,000.

(B) Outlays, $9,190,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:

(A) New budget authority, $9,960,000,000.

(B) Outlays, $9,280,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:

(A) New budget authority, $11,030,000,000.

(B) Outlays, $10,160,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(4) Energy (270):

Fiscal year 1987:

(A) New budget authority, $4,760,000,000.

(B) Outlays, $4,740,000,000.

(C) New direct loan obligations, $1,950,000,000.

(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:

(A) New budget authority, $5,710,000,000.

(B) Outlays, $5,270,000,000.

(C) New direct loan obligations, $1,950,000,000.

(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:

(A) New budget authority, $6,020,000,000.

(B) Outlays, $5,250,000,000.

(C) New direct loan obligations, $1,950,000,000.

(D) New primary loan guarantee commitments, $0.

(5) Natural Resources and Environment (300):

Fiscal year 1987:

(A) New budget authority, $12,900,000,000.

(B) Outlays, $12,740,000,000.

(C) New direct loan obligations, $100,000,000.

(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $13,320,000,000.
(B) Outlays, $14,100,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $13,750,000,000.
(B) Outlays, $13,930,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(6) Agriculture (350):
Fiscal year 1987:
(A) New budget authority, $23,770,000,000.
(B) Outlays, $23,170,000,000.
(C) New direct loan obligations, $14,300,000,000.
(D) New primary loan guarantee commitments, $8,000,000.
Fiscal year 1988:
(A) New budget authority, $25,210,000,000.
(B) Outlays, $23,610,000,000.
(C) New direct loan obligations, $12,100,000,000.
(D) New primary loan guarantee commitments, $8,500,000,000.
Fiscal year 1989:
(A) New budget authority, $24,310,000,000.
(B) Outlays $20,090,000,000.
(C) New direct loan obligations, $11,350,000,000.
(D) New primary loan guarantee commitments, $8,650,000,000.
(7) Commerce and Housing Credit (370):
Fiscal year 1987:
(A) New budget authority, $10,890,000,000.
(B) Outlays, $3,980,000,000.
(C) New direct loan obligations, $4,450,000,000.
(D) New primary loan guarantee commitments, $38,750,000,000.
Fiscal year 1988:
(A) New budget authority, $11,300,000,000.
(B) Outlays, $5,310,000,000.
(C) New direct loan obligations, $4,600,000,000.

(D) New primary loan guarantee commitments, $0.

The CHAIRMAN. The gentleman from Texas [Mr. LELAND] is recognized for 1 hour.

Mr. LELAND. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, before I begin my overtures about the budget, let me first commend the gentleman from the District of Columbia for this yeoman's leadership on developing this document. He served as chairman of the task force on behalf of the Congressional Black Caucus to develop and fashion this budget in the manner in which we will present it today.

Mr. Chairman, in 1981 President Reagan challenged the Congressional Black Caucus to propose a budget that reflected the problems confronting the Nation at that time.

Mr. Chairman, we met that challenge, although we received little support in this body and none from the White House when we offered our constructive alternative budget. Had we been given the kind of consideration we thought we were due, this Nation would be much better off today; our economy, of course, would have been much healthier.

Once again, this year we are faced with a similar challenge. We are challenged to develop a budget that provides needed domestic services, a strong defense and reduces this country's staggering deficit.

To meet this new challenge, we in the Congressional Black Caucus forged a new coalition—a coalition of Members from diverse regions of the country, but with shared concern for the future of our Nation. As a result, we have been successful in meeting the budget challenge of 1986.

This endeavor was made more difficult with the passage of Gramm-Rudman-Hollings. While I and many others did not support Gramm-Rudman-Hollings, I do support sensible and responsible efforts to reduce the hemorrhaging Federal budget deficit. Congress—and no other body—is given the responsibility for determining this Nation's spending priorities.

This is a responsibility we cannot and must not neglect.

Mr. Chairman, as chair of the Congressional Black Caucus, I am proud to present the fiscal year 1987 quality of life budget.

This year, as in previous years, we seek to reach out to all Americans who are in need. We have crafted a budget that improves, not the quality of government, but the quality of life for the American people.

Although our Nation is truly bountiful and blessed with an abundance of natural and human resources, many in this Nation do not share in that abundance. In fact many Americans do not enjoy the basics of decent housing, quality education, adequate health care, and freedom of opportunity.

There are millions of elderly poor who have seen Medicare costs rise 4 out of the last 5 years. Over half of the thousands of black and Hispanic children born in our country each year are born into poverty. The physically and mentally handicapped continue to face barriers to meaningful employment. And there are millions of unemployed men and women who have given up hope of ever finding a job.

We are not talking about faceless, anonymous Americans. We are talking about the constituents your and my district offices serve. I see them and you see them. We simply cannot pretend this group of underprivileged Americans does not exist.

The President's fiscal year 1987 budget continues the mean-spirited attack on the quality of life of economically depressed and politically disenfranchised Americans. Congress must address the needs of the poor, the elderly, and children since the Reagan administration repeatedly and callously ignores their pleas for assistance.

These, Mr. Chairman, are not the only people in need. We are seeing the emergence of a "new poor." These are the millions of Americans who because of economic dislocations are now suffering hardship.

These new poor includes families in our Farm Belt who are suffering from depressed crop prices; residents of the oil patch who are watching as energy prices collapse; and Rust Belt workers who are losing their jobs due to the technological revolution. These Americans have sacrificed to build America into the great nation we are today.

The budget we are presenting today is the only budget that addresses the attack on the quality of life of these Americans.

The quality of life budget is supported by a broad and regionally diverse coalition of members. The budget reflects responsible fiscal policy and confronts the goal of deficit reduction.

The quality of life budget provides for $1,011.91 billion in outlays in fiscal year 1987, and generates $868 billion in revenues. This results in a deficit of $143 billion—$190 million below the Gramm-Rudman-Hollings target.

Under the quality of life budget, the Federal deficit would decline to $62.58 billion by 1989—more than $9 billion below the third year goal of the Balanced Budget and Emergency Deficit Control Act of 1985.

Clearly the quality of life budget not only meets but beats the deficit targets contained in Gramm-Rudman-Hollings. And it does this in a responsible and human fashion.

Specifically, the quality of life budget reaffirms our Nation's promise to its senior citizens by taking Social Security programs off-budget, and increasing benefit payments. At the same time this budget attacks the problems of the very young through increased funding for programs targeted toward reducing—and eventually eliminating—the unacceptable rates of infant mortality.

As the quality of life budget addresses the needs of rural Americans by shifting agriculture programs away from large commercial farms back to smaller, family-owned farms; it also emphasizes a continued strong Federal role in urban development and housing programs to assist in rebuilding our core cities.

While our budget offers hope and compassion to millions starving in Africa and elsewhere around the world, it also fully funds the food and nutrition programs combating the problems of hunger in America.

The centerpiece of the quality of life budget is the increased allocation of resources toward education and employment.

The guiding principles of a truly just and democratic society are the education and employment of its citizens. It is incomprehensible that in the most powerful economic nation in the world, we cannot adequately combat illiteracy and unemployment.

The quality of life budget restores funding for all education programs targeted for reduction by the Reagan administration. The budget fully funds those programs authorized under the Job Training Partnership Act.

It proposes $278 million for the Work Incentive Program—a program that has assisted welfare recipients to move into jobs and away from public assistance.

The quality of life budget proposes an Omnibus Productivity and Trade Incentive Program, aimed at curtailing the continued decline in American industry and lessening the Nation's trade deficit.

The quality of life budget increases the efficiency and equity of the Tax Code by closing tax loopholes, and eliminating tax shelters.

At the same time, it ensures that those Americans living at or near the poverty line will no longer be subject to taxation. This budget broadens the tax base through 1989 and removes from the income tax rolls those earning less than the baseline poverty index by increasing the standard deduction from $3,540 to $4,000.

Mr. Chairman, a budget is not mearly a collection of stated ideas and goals, but the real life choice of how our Government cares and provides for its people. The quality of life budget addresses the difficult and complicated spending questions facing the Congress and the Nation in the most fair and humane manner.

Our budget provides for a strong and adequate defense, while it keeps our Nation's commitment to all of our peoples. And it accomplishes this, Mr. Chairman, with a continued emphasis toward true deficit reduction.

Mr. Chairman, I ask my colleagues to support this sensible alternative.

□ 1130

The CHAIRMAN. The gentleman from Texas [Mr. LELAND] has consumed 10 minutes.

Mr. DENNY SMITH. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Texas [Mr. LELAND].

The CHAIRMAN. The gentleman from Oregon [Mr. DENNY SMITH] is recognized for 1 hour.

Mr. DENNY SMITH. Mr. Chairman, I yield myself such time as I may consume.

You know, we talk about quality of life. I wonder what kind of quality of life we are really trying to provide for the citizens of this Nation. First off, with a tax increase in this budget of some $34.5 billion, we are talking about an increase in taxes that is unnecessary to solve the problem in this country. When I came to the Congress, I believe, in 1981 we had tax revenues of some $600 billion. The estimates in the budget are close to $850 billion this year. So we have had an increase of $250 billion. In this particular budget, however, you have decided that you are going to tax and tax, and spend and spend some more. I think that is wrong. So that is the first thing and the first reason I would not want to vote for this particular budget.

In the defense numbers I think it is important to know what kind of a quality of life we are going to have in this country if we do not have a credible defense capabiltiy.

You and I both would like to have that, I think, for the people we represent. We are talking about a defense budget that is maligned, and I suppose we are all a little guilty of that, but I think maybe a little review of where we are in the defense numbers is in order.

In 1980 we had a budget outlay of some $133 billion to where in 1986 we have grown to some $262 billion estimated for outlays.

So a doubling from 1980 to 1986 in outlays on the defense spending. In fact, the defense budget authority level is even more confusing. I might run through that.

The original 1986 budget resolution was $302.5 billion. The defense appropriation bill was $297.6 billion. Then we went through sequestration, and we got to $286.1 billion. Then we carried over the pay raise. So the budget that we are really talking about, comparing this year to 1987, next year, the quality of life budget, is $290 billion in budget authority.

One of the things that I stressed throughout the last couple of years is the importance to freeze the spending, not allow any of the spending to grow or to become greater than it was last year. Had we done that in 1981 or 1982, we would today have a balanced budget. Unfortunately, we did not. The combined wisdom of this Congress provided increasing amounts of money to spend. But I think that the area of $290 billion is responsible for this period of time that we are talking about.

Now, if I understand your budget correctly, you are taking the budget authority down to $255 billion. I think there are some savings can be made there. Certainly the Department of Defense has not been well managed. We have 138,000 more civilians working for the Department of Defense than we had in 1980. I think that is an outrage and a complete mismanagement of the Defense Department civilian force.

So I would like to see us take the fuel savings that are undoubtedly going to accrue because of the lower oil prices we are paying in the Department of Defense, and many other areas of government, and take those savings. But we do not know what they are. Certainly they are not going to take the level some $65 billion lower than the President has requested and $35 billion lower than what we are spending this year.

We can eliminate the military pay raise. We probably should. They have had some 40-percent pay increase in the last 5 years. We should treat everyone the same, however, and I think that means freezing other pay increases proposed in the Government.

We can try through attrition to eliminate some of these close calls on employment. We need to reduce the number of people working for the Federal Government and the Department of Defense. But I do not think you are going to get $35 billion by doing that. You are not going to get it from the fuel savings. So I guess my question would be for the gentlemen who are purporting to sponsor this amendment to the budget, which R&D projects, which research and development do you think we ought to cutback on? Which programs that have very low rates of production, weapons systems

in this instance, would you like to see eliminated completely?

Sure, we can do procurement reform. I think that is important. I have been involved in that. I think it is one of the things that this country needs and certainly one of the things that we can do in trying to remodel the way we operate the Department of Defense or, for that matter, any part of the Government.

I think the last thing—and my question to the gentlemen really goes right to the heart of the matter—if you are going to cut $35 billion of authority from the present authority that we are operating under, which bases are you going to close? Specifically, in each one of your districts I would like to see which military bases you are going to see completely cut out, because as far as this Member goes, my State is 49th in the Nation and there is no military spending.

I do not have to worry about having any bases cut out from my district. I will vote with you, though, if you would like to take some part of the defense budget, specifically. Let us look at a base, let us see what it does, let us see if we can reduce the cost to the taxpayer and still not reduce the quality of life, and that is the protection of this society with the defense spending that we have.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. DENNY SMITH. I yield to the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

Let me first suggest that I would assume that my distinguished colleague on the other side of the aisle voted in favor of the Gramm-Rudman proposition, is that not correct?

Mr. DENNY SMITH. The gentleman is correct. I did vote for that. I think it is important we try to bring this budget into halt.

I felt that was the best alternative that we had.

Mr. DELLUMS. I appreciate that very much.

As my colleague very well knows, the Congressional Budget Office estimated that if sequestration became a reality, that the outlays for the military function in this fiscal year, 1987, would be approximately $265 billion. I would say to my colleague that the outlay figure contained in the Congressional Black Caucus' alternative for the military function is $265 billion.

The point that this gentleman makes is that we took the issue of the politics of deficit reduction and Gramm-Rudman seriously. So we came to $265 billion, which means that if my colleague voted for Gramm-Rudman, he in fact then was prepared in the final analysis, at the bottom line, to support a budget that went down as far as $265 billion, if we had to implement sequestration.

Now, just one last quick point: If that then is the case, I would think my colleague would agree with me that you could come to a $265 billion outlay figure through the mindless approach of across-the-board cuts that Gramm-Rudman proposes, or you could take that $265 billion and start with a zero-base mentality, challenging the assumptions upon which a much larger military budget was based, develop alternative policies and come to a $265 billion budget that makes sense.

That is what this budget seeks to do. We did not thwart readiness, we did not thwart personnel benefits, but we do establish seven goals and priorities upon which we established our budget.

Mr. DENNY SMITH. If I could reclaim my time.

Mr. DELLUMS. I thank the gentleman for yielding.

Mr. DENNY SMITH. The way I view Gramm-Rudman-Hollings-Mack, however many other names you want to add on, it is a crisis. It has created a crisis for the Congress. We never do anything around here until there is a crisis.

□ 1145

So one of the reasons we passed that was to try to give ourselves enough corporate courage to do what needs to be done here.

Now we always get up and talk in these budget debates each year and talk about how we ought to do things for our people. If we are going to raise $34.5 billion more in taxes and we are going to take this defense number to this level, I think the gentleman missed the essence of the crisis that we have upon us. It is a lack of courage here for going in and specifically doing things like I would suggest.

Would the gentleman like to see the Alameda Naval Air Station shut down in Oakland? I doubt that the gentleman on the other side of the aisle would agree to do that. I think that whether we take the new *Missouri* that has just been moved into San Francisco Bay by the Navy or Travis Air Force Base, where in California would the gentleman say that we ought to remove some of the defense spending?

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. DENNY SMITH. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I appreciate the gentleman yielding to me.

Mr. Chairman, I think my colleague in some way, and I appreciate the gentleman's sincerity, does this gentleman some disservice, because this gentleman in the 16 years that I have been here has never taken the well to argue on the basis of a parochial concern. This gentleman has always said that national defense is something that should take us above and beyond our local jurisdictions and above and beyond the narrow confines of our parochial interests. That is what this gentleman chooses to do here today.

Let me make just one comment in response to the gentleman. There is nothing sacrosanct about these figures.

I might point out that our distinguished former colleague, Mr. Stockman, who is now receiving national and international acclaim for his most recent foray into the literary arena, he states in his book in a very interesting way that he thought he was basing the President's 4- or 5-year budget projection upon President Carter's 1980 base figure of $142 billion. When he then projected out for 5 years, he realized that he had made a tragic mistake and that he had based the President's budget projection for 4 or 5 years into the future, not on $142 billion, but on $220 billion.

He then called on the phone and said, "I have made a tragic mistake. We have to rethink the figures."

The response that he received from the Pentagon and the White House was, "You made a deal; you have to live with it."

The point is that we have built this mighty military budget on the basis of a $70 billion to $80 billion mistake that no one allowed David Stockman and OMB to back off of. So when we talk about dollars here, there is plenty of room to save billions of dollars for the American taxpayer.

Mr. DENNY SMITH. Mr. Chairman, if I could reclaim my time, I think to try to defend what the previous OMB Director has to say, whether it is in the media or in a book, is unimportant here, other than the fact that we are talking about real numbers. This year we are spending, according to what numbers we have, and they are certainly confusing, some $290 billion and we are going to go down to $255 billion.

Now, if we are going to do that, if it is going to require going in and picking line by line, then I think we need, each one of us, to be willing to stand up, not taking a parochial interest—I will take a parochial interest in the gentleman's district and the gentleman can take one in mine—but we are going to have to go down there and cut away on some of these programs.

What I am saying to those who are sponsoring this amendment to the Budget Act is, which specific basis are you going to go after?

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. DENNY SMITH. I am happy to yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, I want to answer the gentleman's question.

I come from Massachusetts, and we do not have many bases left, because

the previous Republican administration took them all.

In my district there is no base, but we do get in all of Massachusetts, my district included, a lot of money from the MX missile. We are in terms of expenditures for the MX the third largest State. And I would make the Treasury a present to that.

So if the gentleman wants us to come forward Billy Graham style and join in here, let me say that I have no base to contribute, because Richard Nixon took them all back. We do get a substantial amount for the MX.

I think the gentleman from California spoke eloquently when the gentleman said the defense budget ought not to be treated in a parochial way.

The MX missile is one with a lot of money, and I would vote for the MX missile.

Mr. DENNY SMITH. Mr. Chairman, if I could regain my time, I could not agree more. The gentleman had the opportunity to vote on the MX missile a number of times. We could probably go in and specifically work on many of these areas.

But I think the important thing that we need to recognize here is if we are going to have a real budget, and this is important, the $255 billion number appears to be lower than even the individuals who would be faced with that parochial interest would like to vote on specifically.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. DENNY SMITH. I am happy to yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, the gentleman was challenging us saying the gentleman could not reach the specific number without there being loss in certain of our districts. I simply wanted to make my contribution to say that, if there is going to be an MX vote, obviously I think the qualified people in Massachusetts ought to be able to compete as well as any other, but I think the Nation would be better off if we did not have it. That would cost us money in Massachusetts, and it is a contribution to deficit reduction and sensible fiscal planning that we would be willing to make.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield to me?

Mr. DENNY SMITH. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I appreciate my colleague yielding to me. Frankly, I deeply appreciate the fact that the gentleman is prepared to engage us at this level of discussion and debate.

When we come to the military authorization bill, we will pose this alternative again and we will have a greater opportunity.

But let me simply say that we tried to base our alternative military budget upon an alternative set of policies. For example, we believe that it is our responsibility to the next generation to reduce and ultimately remove the risk of nuclear war from our lives. If you apply that principle to the budget, then we can stop these first-strike weapons, we can stop these war-fighting weapons.

We oppose star wars. We oppose all the weapons that lead us into a first-strike capability or a nuclear war-fighting capability.

Mr. DENNY SMITH. Mr. Chairman, if I may reclaim my time, let me just pose some of the questions I asked the gentleman before.

Which systems in low rate production would the gentleman like to see terminated, the bases we have already talked about? And which research and development programs is the gentleman willing to terminate?

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. DENNY SMITH. I am happy to yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, we propose to eliminate all funding for the production or development of additional nuclear weaponry.

We eliminate all funds for 21 additional MX missiles, saving $1.5 billion; for the 21 Trident II [D-5] missiles, saving $1.4 billion; or for the production of additional sea-launched cruise missiles and ground-launched cruise missiles, $1 billion. Supplemental funding for the Pershing missile is rejected in our proposal.

We end new research authority for the B-1 bomber, the MX missile, the Trident II [D-5] missile, the Midgetman and for tactical missiles. We reject certain research moneys for programs, moneys in this bill that are yet unspent.

We would terminate funding for the development of chemical and biological warfare. We ought to move into the 21st century rather than back into the 19th century.

We make large reductions in Department of Energy atomic warhead production.

We establish a substantial new research program aimed at improving verification so that the issue of arms control can go forward intelligently, rationally, and sanely.

We cancel the purchase of the next Trident submarine. We reduce star wars.

We can show you specifically line by line how we arrived at $265 billion in outlays.

Mr. DENNY SMITH. Mr. Chairman, if I may reclaim my time, I am told that the total payroll for the Pentagon for military personnel is some $74 billion, and the civilian personnel some $28 billion, for $102 billion total.

With the gentleman's number of $255 billion, what level of employment does the gentleman see? Did the gentleman work that out in the budget?

Mr. Chairman, I yield to the gentleman from California for a response.

Mr. DELLUMS. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, let me just say that, with respect to the quality of life, we feel very deeply and very profoundly. In fact, we entitled this budget the "Quality of Life Budget." That not only includes civilian personnel, it includes military personnel.

We believe that there are forward deployments of our American troops that we oppose on policy grounds. But if we are going to deploy them, then they ought to live in good housing, they ought to work in healthy conditions, they ought to live in a steady environment. We do that.

We keep the pay raise for our troops. We try to bring back troops from Europe and other places where they are not needed. We do not close any bases here in this country. We do not thwart the quality of life for our troops.

Frankly, we believe that we can intelligently and rationally argue that we preserve readiness even more capably than the budget presented by the President of the United States.

Mr. DENNY SMITH. Mr. Chairman, I thank the gentleman for his response.

It just looks to me like if we go down to $255 billion and you take $102 billion off for personnel, it starts to pinch someplace. We are either going to have to close bases or we are going to have to shut down some procurement.

The gentleman has given me a list of the procurement, and I appreciate that.

Mr. Chairman, I reserve the balance of my time.

□ 1155

Mr. LELAND. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. RANGEL].

Mr. RANGEL. Mr. Chairman, I thank the gentleman for giving me this time, and it is very interesting to see, for the first time, that Gramm-Rudman has been described as legislation that created crises. Those of us in the Congressional Black Caucus thought that it would do just that. And that is the reason why we voted against it, because we thought we had a higher responsibility rather than to create crises, but to do what the people sent us down here to do, and that is to recognize the Nation's problems, to see what it costs to try to bring some resolution to those problems and to raise the revenues that are necessary to do that and at the same time deal with balancing the budget.

Now, I know that it is much easier for us to deal with the titles that the legislation has rather than dealing with the substance of the legislation. That is why we have Gramm-Latta, Gramm-Rudman, and even we go by this when the President in 1981 talked about the Economic Recovery Tax Act. It is so easy to talk about what the description is of the bill rather than what the impact of the bill is. And so today we are all hung in there supporting the concepts of tax reform, and there are some people in the House who believe that when you say "tax reform" that necessarily you are talking about tax reduction. Well, I think that we had enough of that reduction in 1981 when the President of the United States decided that he wanted to reduce taxes by some $750 billion. Now, at that time the President was not too concerned about the working poor, the low-income working people or the middle-income working people. But if you see where that amount of revenue losses and tax cuts really lie, it was for the very, very rich of this country and for the very profitable corporations. That is why it is sometimes shocking for me to hear that, notwithstanding my unequivocal support for H.R. 3838, we will think that this is a bill, just because we call it reform, that is designed to take care of just the working poor. Taking care of the 6-million working people who are paying taxes and should not be paying taxes is just a right and equitable thing to do.

If you think about what the President has truly achieved since 1981 that has nothing to do with tax reform but has been put together in that package, it is something that the Congressional Black Caucus at this time would like the House to focus attention on, and that is this: The high-income individual tax bracket when the President took office was 70 percent. He then was able to have that reduced to 50 percent. H.R. 3838 brought it down to 38 percent. And now the Senate is coming in and saying no matter how many billions of dollars an individual makes, the top bracket should be 27 percent.

In the course of talking about closing loopholes we never took the time to find out who put the loopholes in the tax law, in the first place. And a good look at the 1981 Economic Recovery Act will see that the President provided so many incentives, investment tax credits, rapid depreciation, that it was not a question as to whether or not the corporations will be paying a tax, but the question really was how much did the Federal Government owe them in terms of credits for not paying taxes.

So every time we talk about tax reform, the White House trots out the 6-million working poor that are paying more of their disposable income than the very rich in the United States.

Do not threaten me with Gramm-Rudman. Gramm-Rudman merely says that we should do something with the deficit. Let us see who does the most with the deficit, those of us who have worked with a program to say that we reduce it or those people who say that the bill has to be revenue neutral. Nothing in the Constitution, the House rules, the Democratic Party or the Republican Party says that you have to have revenue neutrality in order to bring about reform.

So what have we done? We have taken all of the reforms and attempted to improve upon them. We say with a great deal of pride that ever since Ronald Reagan has been in the White House he has brought out the best in the Congressional Black Caucus. There is not a reform in his tax bill that we have not always had in our alternative budget.

The only thing that he has done that we have not done is that he has taken care of his friends on the high-income side and we have said that it is better to take care of the Nation's business and our domestic policies than to give those cuts that we cannot afford, cannot afford because we are not willing to take a back seat to the programs which the U.S. Government and the House of Representatives have committed themselves, but, more importantly, we are not prepared to take a back seat and say that we have to deal with the deficit at some later date.

That is why when we came up with our bill we thought that the most serious thing that was facing us is not just the $2 trillion that we owe, not just the $230 billion deficit, but what concerns us in our district is that the third highest Federal expenditure that we are dealing with, and the President is dealing with neutrality, is just paying the interest on your indebtedness. You have to be poor or at least know somebody who has been poor to understand the frustration of trying to pay off the principal and you cannot get past the interest. The President of the United States thinks that it is far more important to bring the top individual tax rate down from 50 percent to 27 percent than to bring down our deficit in such a way that not only would the rich get a break today but maybe our kids and our grandkids would get a break sometime in the future because what we have done is reform the system and at the same time paid off the deficit without reducing the taxes.

So I am asking my colleagues to take a hard look at what has been presented to us. We have increased the standard deduction from $3,500 to $4,000, the personal exemption from $1,040 to $2,000. We have increased the investment tax credit to make certain that we can say that the bill is honest, it is equitable, it is fair, because what we have done is really dropped the responsibility of paying taxes off of the poor altogether. The most important thing I think that we have done is present a bill that reduces the deficit, brings tax reform and at the same time does not take care of the rich in the same manner as the Economic Recovery Act of 1981.

Mr. LELAND. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. I thank the gentleman from Texas for yielding and I thank him and his colleagues who have brought forward this extraordinarily thoughtful budget. None of us agree 100 percent with any budget that we vote for because we are presenting a broad conceptual thrust. This is a thoughtful, well-documented and very important budget.

The gentleman from California, in his colloquy which the gentleman from Oregon very graciously allowed to go forward, has presented, I think, the justification which many of us feel is quite compelling for the military number.

I want to talk about the other side of that, which is that this budget precisely because it is realistic in the military—and I would just add, parenthetically, I do not see how anyone can argue that we are going to lose anything important to the United States with this kind of budget. As nearly as I can tell, having spent all of what we spent over the last 5½ years, the net result was that we beat Grenada, which I think the Chicago Police Department probably could have done a little bit in 1981.

But now we get a chance to address also the issue of this enormous domestic damage that has been done. David Stockman has been quoted before, and people have said, "Well, we are not going to pay attention to him." I wish the people who do not want to pay attention to David Stockman now were not paying attention to him in 1981 and 1982 and 1983 when they were voting in lockstep on a document which he sent down here which they did not read, which did very serious damage.

We have had, overall, some reasonable economic results. But that has not meant uniform prosperity. The rising tide, even when it rises better than it is today, does not lift all boats. We have serious unemployment problems. The overall unemployment number, the one we use, has stayed about the same, at a high rate. Discouraged workers have not come down from this last recession. Ordinarily, the number of people counted by the Bureau of Labor Statistics as discouraged workers were dropped. It has not dropped. There are well over 1 million who are

not reflected in that in that 7-percent figure, who are discouraged workers. We have people who have worked hard all their lives who, because of unfairly subsidized imports, find themselves out of work. We have an increased number of homeless.

The budgets that this administration has sent year in and year out, first led by David Stockman and now continuing with the same lack of social concern, have done damage to the most vulnerable and needy people in our society.

In budget authority, the budget that the President sent us, if you take the major Federal income-support programs, Aid to Families with Dependent Children, Food Stamps, and Supplemental Security Income, the three programs whereby people are kept alive, and if you add up the budget authority that Ronald Reagan has requested for them, they are smaller in total in Federal funds than the increase he seeks for the Pentagon.

Now, who is responsible for a growing deficit with that kind of number? Take every penny, not just the abuses, not just the excesses—and I am being checked up on, so if I am wrong, we will hear from the other side, but I am sure I am right on this one—take the Federal budget authority for those three programs, and they want more to increase defense.

Mr. LELAND. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. DELLUMS].

Mr. DELLUMS. Mr. Chairman, it is with a great deal of pride and pleasure that I present the military budget function of the Congressional Black Caucus' alternative budget for fiscal year 1987.

I might point out at the beginning that our alternative provides, in our estimation, for a secure national defense; it meets the Gramm-Rudman outlay target for fiscal year 1987 without sacrificing personnel benefits or readiness.

I might say to my distinguished colleague that if you look at our proposal, we fully fund personnel and we give a pay raise to all personnel.

Our alternative proposal rejects, Mr. Chairman—and I might repeat: rejects—three fundamental tenets of the Reagan military buildup: First, that we need nuclear first-strike and war-fighting capabilities; second, that our forces should be used to impose our will in Third World nations; and, third, that we should prepare to refight World War II in Europe.

Rather, Mr. Chairman, our plan aims at seven goals:

First, reducing and ultimately removing from our lives the risk of nuclear war.

Increasing readiness while cutting forces committed to Third World intervention.

Reducing the number of troops stationed in Europe and Asia.

Eliminating overlapping and unnecessary weapons systems.

Reforming the procurement process to end waste.

Fully funding program for military families.

Finally, creating a capital investment and employment conversion program.

Mr. Chairman, under this alternative, budget authority would be $255.4 billion and outlays would be $265 billion.

As I indicated in my colloquy with my distinguished colleague, $265 billion outlays contained in this budget alternative is precisely the figure that the Congressional Budget Office estimates would be the budget outlay figure for fiscal year 1987 if sequestration were to take place.

So there is nothing sacrosanct about the figures. We do not have to talk about credibility at the level of numbers but at the level of policy.

This compares with the Reagan request of $320.3 billion in authority and outlays to the tune of $297 billion.

Mr. Chairman, despite the importance of the budgetary arithmetic, it is our belief that defense spending should be analyzed in terms of our foreign and military objectives, not in terms of some fallacious percentages of real growth or other statistical measures that have no meaning in the real world.

In our view, if high levels of spending are necessary to ensure national security, then sufficient moneys should be provided. If they are not necessary, then we should make those reductions, even substantial ones.

□ 1210

The deficit and Gramm-Rudman simply force us to do, for budgetary reasons, what we believe, in our humble opinion, should be the reasons for national security. That is to craft a defense budget that gives us a strong defense posture at an acceptable price.

The defense budget should be based on the verified reality of the national security threat and our military and foreign policy objectives. We should spend what we have to spend to meet those goals. But we should not waste money to meet arbitrary growth goals.

We strongly disagree with this administration's view as to what is in fact necessary for national security. In our view, the national security role of the United States must be to assert, aggressively, our international leadership to bring the world closer to peace; to have the audacity to think beyond the absurdity of war.

Military tensions must be eased; détente must be revived and the threat of nuclear war must be reduced and ultimately removed.

This latter point takes on even greater significance, Mr. Chairman, when we consider the human tragedy that is evolving in the Soviet Union at this very moment that not only endangers the lives of Soviet citizens but citizens of the entire world. I ask you to pause and reflect for a moment, if that level of threat occurs as a result of an explosion at a nuclear powerplant, multiply that several hundred times in terms of nuclear war and we understand the incredible absurdity of moving toward the development of greater levels of capacity to fight nuclear war which has only one ultimate result, and that is to destroy human life on this planet. Our responsibility is to turn the world over to our children.

The three tenets of the buildup I would like to speak to now. The extraordinary buildup over the last few years, however, has not been directed at our national defense, Mr. Chairman, instead it has been directed at three policy areas, all of which we find contrary to the national interest and to the interests of national security.

First, nuclear programs have been directed at developing a first-strike and nuclear war-fighting capability rather than deterrence. It is dangerous, unnecessary and frightening.

Second, a substantial part of the military buildup has been directed not at our defense nor at the Soviet Union, but in increasing our capacity to intervene in the Third World.

Third, somewhere between one-third and one-half, Mr. Chairman, of our military expenditures are dedicated to the preparation of refighting a World War II-type land war on European soil. We reject these premises which have been at the center of the administration's buildup.

Finally, in our view, the basic policy rationale of the enormous increases in the military budget are incorrect. Substantial reductions in military spending would be possible if Congress were to challenge these basic, underlying assumptions.

In our alternative, we make substantial efforts in this direction. The proposal before the body with respect to the military function, in our humble opinion, is in no way an ideal military budget. Rather, it is our view of what is immediately possible given the current world realities as well as the realities of the present budgetary considerations, and further, it gives us the opportunity, Mr. Chairman, to turn the corner, to begin to move in a direction that does not have us preparing for war but moving aggressively for peace.

Mr. LELAND. Mr. Chairman, I yield 5 minutes to the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. I thank the gentleman for yielding me this time.

Mr. Chairman, as Oliver Hardy might say, "This is a fine pickle you have got us in." The pickle is that, when you mate Gramm-Rudman with Rambo, you end up with a military stocked with high-tech gizmos but no soldiers who know how to use them. You end up with ray guns but no Buck Rogers to fight with them. You end up with Starship Enterprise but no Captain Kirk and no Mr. Spock. Let me explain.

We made a commitment last year in Gramm-Rudman to reduce the deficit to $144 billion in fiscal year 1987. Whether or not the Supreme Court upholds this law, we should get the deficit down to $144 billion. Since the deficit is calculated by subtracting revenues from outlays, Gramm-Rudman forces us to reduce outlays.

On the other hand, the foreign policy of the Reagan administration seems to be set by Sylvester Stallone. We all have to show how tough we are. There is more macho in Washington than in most fraternity houses. When it comes to budget resolutions, we show we are tough by jacking up the defense budget authority figures. The Senate set it at $301 billion, but the President demands $320 billion.

The result will likely be that we set budget authority high and outlays low. That would be a disaster. It would mean that we would obligate ourselves to buying billions of dollars' worth of new equipment but would not have the money to pay for the maintenance of our existing equipment. It would mean that we spend billions to research new ways to fight wars, but do not have the money to pay the men and women who we ask to fight wars today.

Simply put, if we buy nothing new in 1987 and maintain current levels of personnel, readiness, and research, we will have budget authority of $201 billion and outlays of $269 billion. For each new dollar of procurement we want, we raise outlays in fiscal year 1987 by 13 cents. For each new dollar of research we want, we raise outlays by 20 cents.

If we are serious about having outlays of $276 billion, as the resolution provides, and we want to protect personnel and readiness, we should have budget authority of around $255 billion. On the other hand, if we are serious about having $285 billion in budget authority, and we want to protect personnel and readiness, we have to assume outlays of $286 billion.

This means one of two things: either the various budget proposals do not contemplate full funding of military personnel and readiness or the outlay numbers are hokey. I regret this situation, but see how we got into it.

I would prefer if we could adopt a serious defense proposal, like the Dellums-Schroeder alternative, which is part of the Black Caucus budget. In that budget, we provide budget authority of $255 billion and outlays of $265 billion. By having the authority figure lower than the outlay figure we ensure that personnel and readiness are protected. And, we do not create enormous obligations in future years. Rather, we provide for the purchase of new equipment we need, but not just to get up to some arbitrary spending figure to show how tough we are.

Our Nation's defense is tough because we have motivated soldiers, sailors, and aviators. Our Nation's defense is tough because we have equipment ready to fight close to where it is needed. Our Nation's defense is tough because we have the logistics to sustain combat. This is the tough defense we should preserve. Fighting over how high we can ante up defense spending, while controlling outlays, is a sure way to weaken us.

□ 1220

Mr. DENNY SMITH. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Florida [Mr. BENNETT].

Mr. BENNETT. Mr. Chairman, when I look at these budgets, I do not find any of them that I like. There are deficiencies with regard to national defense which are alarming. And the attitude toward national defense is even more alarming, putting so much money into nuclear redundancy, going into outer space for war, which is like adding another weapon to the world, another plateau of destruction.

This kind of spectacle is disturbing to me. When I hear the Black Caucus presentation, I am inspired by the courage of these people to tells us things that we have not been listening to, to point out, as was pointed out a minute ago, reducing the tax structure from 70 percent, now fighting about whether it is going to be 30 or 27 percent.

Have the people that produce ideas like that ever been poor? Have they ever struggled? Have they ever seen people that have been poor? Have they seen that kind of problem in the world? Or do they totally overlook it, and think that poor people are to blame for all the poorness they have?

It is touching, it is disturbing to me, to see this great country of mine be so indifferent—or at least in its legislative policies—to the problems of little people in this country. It is really disturbing to me.

Then when I see them approach national defense with another big bang, another big atomic explosion when we have such tremendous redundancy in that field and to go head over heel for SDI, outer space weaponry, we ought to be doing everything that we can to prevent that from occurring.

The best thing that has ever been done by the President with regard to the SDI is to put a bargaining chip out there. We might get everybody to stop doing that, and everybody to stop trying to blow up the world like we are presently trying to blow it up.

So, Mr. Chairman, I must say that I am very, very sad that our country is approaching this matter in this way.

Mr. Chairman, the Constitution of the United States says the Federal Government is solely responsible for national defense. This makes sense. National security is the prerequisite for all other functions of Federal, State, and local government, yet it can only be effectively provided at the Federal level.

This is simply not so for many other programs currently paid for by the Federal Government.

We should evaluate any budget proposal with these facts in mind. Our top priority should be providing for the national defense. Providing for the national defense includes paying for it. Any budget that fails to do this should not pass the House or Senate.

This body should remember that dollars do not defend us, military capability does. We cannot evaluate how much security a given budget will provide merely by looking at the number it allocates to defense. It is our duty to go farther than that.

We must ask what are our defense priorities? I submit that our top, most urgent priority is to improve our conventional warfare capability.

This can be achieved only by spending considerably more on defense than we are spending today, in fact more than any of the budgets we are considering. We can safely enhance our security by spending less on strategic arms, and using the money saved to improve our ability to fight and win at the conventional level. No one can win a nuclear war—funds for such arms have value to deter such war and we are more than adequately funding atomic arms deterrence.

Neither budget resolution before us is based on such a redirection of our defense effort to conventional capabilities. Neither bill will provide sufficient funds for our conventional forces if we continue to spend large sums on ill-advised strategic programs such as MX and SDI.

Reductions in overall defense spending would not necessarily make us less secure, just as increases in defense spending do not automatically make us more secure. It is how we spend the defense budget that is important. I don't intend to support either budget resolution before us today because, without cuts in strategic weapons spending and increased spending on conventional forces, neither one will sufficiently provide for our security.

Mr. LELAND. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. HAYES].

Mr. HAYES. Mr. Chairman, I rise in strong support of the quality-of-life budget amendment.

While it is the fairest, the most progressive, and the most equitable budget that we will consider, I do not wish to repeat the same things that so many of my colleagues have already stated. Let me concentrate instead, on what I feel is the heart and soul of our

budget—or of any budget that sincerely speaks to the needs of our citizens: education, training, employment and social service. This is where our budget began. We could not begin with what President Reagan proposed, because the President's proposals would be a disaster for our Nation. Unlike the President, who seems not to notice the unemployed or the undereducated, we cannot ignore them.

That is why the quality-of-life budget allocates $7.8 billion for elementary and secondary education and $8.63 billion for higher education. That is why this budget allocated $7.36 billion for employment and training programs. Some will ask how we can afford to spend so much for these programs. My responsed is, "How can we afford not to?"

The quality-of-life budget is a prime example of how our Nation should adequately fund the programs that support our Nation's human infrastructure—to ensure the education of our children, the employment and training of our citizens, and to preserve our Government's basic responsibilities to it's people.

Mr. LELAND. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Chairman, I want to commend the gentleman from Texas [Mr. LELAND] for offering this substitute. I fully support it.

I also want to respond to our good friend, the gentleman from Florida [Mr. BENNETT], one of the foremost thinkers in the area of defense. What he is saying is so true. We have already militarized the Earth with nuclear weapons, and now they want to militarize the heavens. This is the only budget that has a sensible approach in the whole area.

Defense is certainly covered. As Congresswoman SCHROEDER and Congressman DELLUMS said, it is a quality budget, not quantity. It has fairness to all the American people. It treats the retirees of this country fairly. It treats our young people fairly with respect to their educational needs and their nutrition programs. And frankly, it treats the American family fairly.

I want to compliment the gentleman from Texas and all those responsible for this budget, and I am proud to say that once again I am going to vote for the best budget offered to this Congress.

Mr. LELAND. Mr. Chairman, I yield 5 minutes to the gentleman from the District of Columbia, the Honorable WALTER FAUNTROY, the chairman of the Task Force on the Budget for the Congressional Black Caucus.

Mr. FAUNTROY. Mr. Chairman, I rise in support of the quality of life budget, and in so doing, I need not remind the Members that this budget is clearly the most socially responsible and fiscally responsible budget before us today. It is socially responsible because recognizing that the 20 percent of our national budget that has addressed human need sustained 60 percent of the cuts over the past 5 years, we have said "Enough is enough." We have said that we will maintain those programs at current service levels. That is socially responsible.

It is a fiscally responsible budget, as the distinguished gentleman from New York [Mr. RANGEL] has clearly pointed out. We go farther in reducing the deficit—paying on the principal, and not just the interest—than any budget before us. We deposit $18.8 billion on the principal over the next 3 years, which is $2 billion more than the House Budget Committee resolution, and $16 billion below what the Gramm-Rudman requirements are. We are fiscally responsible—fiscally responsible in that in addition we expand the investment tax credit so that those who want to invest to create jobs for the American people and to improve the quality of life for them will in fact be rewarded. We are fiscally responsible in that we raise the minimum corporate tax in the face of the fact that last year 40,000 corporations which made over $1 million in profits paid absolutely nothing in Federal taxes. That is fiscally irresponsible to allow that to continue, and we raise $3.5 billion with a minimum corporate tax of 25 percent and $28 billion in order to contribute to that deficit-reduction effort.

In the areas of housing and community development the budget is most clear in terms of supporting the quality of life. It supports local development efforts and the need of individuals and businesses to finance housing for the American people.

Even in these days of fiscal austerity and Gramm-Rudman-Hollings, the alternative budget rejects the proposals of the administration and cries out for social responsibility. Let me give you a few examples. Secion 202, which allocates money to housing for the elderly and the handicapped would have been eliminated under the administration's program, but the quality of life budget rejects this proposal and proposes $605 million in budget authority, enough money to build 12,000 new units. That does better than even the House budget proposal, which contains really a 3.5-percent cut, because if freezes the levels.

Similarly, the President's budget would eliminate the Farmers Home Loan Administration in 1986, choosing to combine it with HUD. Here again we reject this proposal, and we make it possible for 52,000 housing units to be built for the rural citizens of our Nation, and that does better than the House Budget Committee proposal, because it allows the 3.5-percent rise in current services dictated by inflation.

In addition, to contrast again with the President's budget, which proposes the elimination of credit programs of the Small Business Administration, our quality of life budget urges that these continue, and again we do not cut the Small Business Administration as does the freeze in the House committee budget proposal, but we allow that 3.5-percent increase or adjustment for inflation.

In the area of community and regional development, the quality of life budget again rejects the administration's proposals to decimate HUD-federally funded programs in housing. Instead, we retain the commitment at least at the present level, and thus do not cut it by 3.5-percent, as does the House Budget Committee proposal.

In support of housing for all Americans and their right to home ownership, we also reject the administration's efforts to assess user fees on Fannie Mae and to increase fees levied on Ginnie Mae.

Finally, we reject the administration's intent to cut both UDAG and the community development block grants. We not only reject the cuts, but we provide the increase in terms of adjustment for inflation.

These programs serve an indispensable role in revitalizing areas in which many poor and disadvantaged people live. Additionally, these funds will stimulate additional investments that will lead to new job opportunities, with increased employment and more taxpaying citizens, thereby enabling us to lower our deficit and the cost of unemployment.

The CHAIRMAN. The time of the gentleman from the District of Columbia [Mr. FAUNTROY] has expired.

Mr. FAUNTROY. Mr. Chairman, may I ask the distinguished gentleman from Oregon [Mr. DENNY SMITH] for 1 additional minute?

Mr. DENNY SMITH. I am sorry, I do not have the time.

Mr. FAUNTROY. The gentleman refuses, and I therefore terminate my presentation at this point.

Mr. LELAND. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Chairman, let me say as a member of the House Committee on the Budget, and as the chairman of the House Select Committee on Children, Youth and Families, that the challenge that this budget brings to the Congress is whether or not we as policymakers are going to match the rhetoric that we espouse on a daily basis to our constituents with the money to provide the benefits of the goals that we say we want to achieve in this country. And that is whether or not we want healthy families with healthy children, with healthy infants in those families. Because if we do not adopt this budget, it is just so much rhetoric, because both the House budget or the committee budget, the President's budget, and the alternatives by the other side fail to address the epidemics that are running amok in our society within our families.

□ 1230

They fail to address the 54 percent of our children in households headed by females who are living in poverty. They fail to address the headlong rush of women and children in this country, be they black, be they white, be they Hispanic, into poverty in numbers that we have never seen before.

They fail to address the political fact that all the numbers concerning families in this country are worse today than they were in 1980. We have more children in poverty, more women in poverty, more households split up, more youngsters on drugs, more youngsters taking their lives in suicide than in 1980.

We have tried this administration's plan and it has failed the American family.

For those politicians who recently participated in the Special Olympics around the country in their districts, you ought not to go back next year if you do not vote for this budget, because this is the only budget that addresses the serious problems of damaged pregnancies, of damaged children, because this is the only budget that expands the women's, infant's, and children's program at any meaningful level, the most vital program that we have in fighting the problem of retarded children, physically defective children through pregnancies that are at high risk.

The rest of the budget suggests that those women who are pregnant, who are at risk of giving birth to a low birth weight baby, they should just have to wait. Well, it may be news to people in this Congress, but pregnancies do not wait for fiscal years. They do not wait for continuing resolutions. They just continue to go along.

What we see is that we have a program that now dramatically reduces the incidence of low birth rate babies, the incidence of defective children being born and we refuse to fund it. This budget funds it.

This budget is the only budget that addresses what every one of us has talked about to our constituencies, teenage pregnancies, because it funds programs that in the last several years have been effective in reducing the teenage pregnancies where those programs exist by better than half, a 50-percent reduction in the pregnancies of babies having babies, and yet the other budgets refuse to address that problem.

What this budget does, it invests in our children. What the other budgets do is spend money on our failures. The choice is ours. Do we want to invest in these future generations so their opportunities and their chances for success, their opportunities to participate in American lifestyles that we cherish and hold dear, will we invest in an expansion of that opportunity or will we simply do as we have now done for many, many years, spend money on the failures? We will spend money on children in institutions. We will spend money on broken families. We will spend money on the handicapped, but we will not spend money to prevent it.

We know now today through all the medical studies, through all the changes in technology, we can now dramatically reduce those tragic incidents that occur in all American families should we desire to. Unfortunately, I think what the House will say today is that they really do not desire to.

Mr. LELAND. Mr. Chairman, I yield 5 minutes to the gentleman from Memphis, Tennessee [Mr. FORD].

Mr. FORD of Tennessee. Mr. Chairman, I rise in support of the Congressional Black Caucus alternative budget. As chairman of the Ways and Means Subcommittee on Public Assistance and Unemployment Compensation, I am deeply concerned that the Reagan administration's pro family rhetoric has translated into antifamily policy.

The administration has consecutively proposed and implemented budgetary policies which have resulted in the loss of $10 billion annually to programs serving the poor and children since 1980.

Today, as we debate the 1987 Federal budget, over 13 million children in America are poor; 12.4 percent of our elderly have incomes below the poverty line; and America ranks 14th in infant mortality. The plights of our poor, our elderly and our children are well documented.

The CBC alternative budget represents sound budgetary policy which not only reduces the Federal deficit below Gramm-Rudman-Hollings targets, but places the quality of life as its No. 1 priority.

We in this Congress must ensure future generations of a solvent government and a decent quality of life. The alternative budget does just that. I am pleased that the alternative budget contains provisions to help combat the rising tide of teen pregnancy and expansion of the AFDC Program to include unemployed parents.

The teen pregnancy grant allocations contained in this budget allows professionals and private citizens to work together in addressing ways in which to decrease the rising incidents of teen pregnancy and to promote the development of responsible, self sufficient teen parents.

The increased funding under the AFDC Program would allow for the implementation of AFDC benefits for unemployed two-parent families in all States.

Currently, it is estimated that 100,000 eligible families are falling deeper into poverty or facing the decision to break up their families in an effort to survive.

The CBC alternative provides $11.8 billion in budget authority for AFDC Programs. In contrast, the President's $9.2 billion budget authority is $278 million less than the 1986 budget authority level.

The Food Stamp Program, our Nation's major line of defense against hunger, calculates food costs based on June figures from the previous year. It would be unconscionable to prevent many of our Nation's poor from full access to nutritionally balanced meals.

The alternative budget would update the determination of food stamps to reflect an entire fiscal year.

The budget would also provide an additional 100 million to allow approximately 200,000 low-income women, infants and children at nutritional risk to receive desperately needed benefits.

Mr. Chairman, the alternative budget provides for $20.4 billion in food and nutritional assistance.

The administration's $18.1 billion budget authority is $775 million less than the 1986 budget authority to feed the poor, the elderly and most importantly, the children.

The 1987 quality of life budget proposes $1.01 trillion in outlays and $868.1 billion in revenues for a deficit of $143.81 billion, a figure below the specified Gramm-Rudman target of $144 billion.

The CBC alternative budget will not solve all of our problems, but it does address our Nation's social needs in a responsible and fiscally prudent manner.

We must remember that an investment in our basic needs today will pay long-range dividends in the future.

The alternative budget is a budget that I am prepared to support and I urge my colleagues to join with me in this effort.

Mr. LELAND. Mr. Chairman, I yield 1 minute to the gentleman from New Jersey [Mr. RODINO].

Mr. RODINO. Mr. Chairman, I rise to give my strong support to the "quality of life budget" substitute offered by the Congressional Black Caucus. As an original sponsor of this proposal, I believe that this budget satisfies our national budget priorities in a fair, balanced, and effective manner.

Most important, this budget meets our national deficit reduction goals without hurting the people who need Government assistance the most. It fully funds our social safety net and maintains the integrity of our domestic programs. It provides increased funding for hunger programs here in the United States. It targets money to meet the enormous challenges our Nation faces in education, housing, transportation, health, agriculture, and industry. And it will bring us into the future by rebuilding the country's

infrastructure and providing resources for essential research and development.

At the same time, the "quality of life budget" makes sure that our military is adequately funded to protect our Nation by maintaining sufficient spending for military personnel and readiness.

This budget achieves these goals by making sure that those who can afford it shoulder their proper burden in paying for our National Government. It calls for a reformed and equitable tax structure in which loopholes are closed and new revenues are raised through selected corporate and individual tax increases. At the same time, it reduces the tax burden on low- and moderate-income families.

Mr. Chairman, this is a fair budget—a "People" budget. It preserves "People Programs," maintains a strong defense, and lowers the deficit. I urge that we vote for this budget—make it a vote for our quality of life.

Mr. LELAND. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Illinois [Mrs. COLLINS].

Mrs. COLLINS. Mr. Chairman, I rise as a determined advocate of compassionate Federal spending. I rise to urge my colleagues to join with me in support of the Congressional Black Caucus alternative budget.

This alternative is as much an important statement of national policy as it is a prudent, efficient blueprint for Federal spending. This alternative is aimed at achieving objectives which no Member of this House would dispute—preserving a decent quality of life for all Americans while reducing the Federal deficit. This alternative offers an option we all can support. Indeed, I believe this is an alternative we all should support.

In crafting this alternative, quality of life budget, the Congressional Black Caucus has issued a challenge to this distinguished body. It is a challenge to exercise leadership; a challenge to set a new course; a challenge to forge public-private partnerships; not for the purpose of cutting back on social programs, but because we want to provide for the social good.

Certainly we all recognize the important responsibility we have to encourage the maximum use of all of our human resources—providing for a sensible, effective defense, while also guarding against any assaults on critical domestic programs.

We must question whether the proposals we have seen up to now really help us to meet our responsibility. I say no.

Recently, there have been many among us who have fought long and hard for some questionable goals. Instead of realizing efficiency in Federal spending, we have only experienced a painful shift in our national priorities.

THE ADMINISTRATION BUDGET

In recent years, we have heard a call to arms on one front, while we have thrown in the towel in fighting the good fight to protect the most defenseless among us. We have seen an unparalleled peacetime military buildup at the same time we have been witness to a cut and slash assault on programs that deal with real human need.

I am particularly concerned about the impact the administration budget will have for our Nation's cities. The city of Chicago—my home—offers a good example of this impact. Cuts in the Community Development Black Grant Program threaten dozens of programs providing for real need—everything from day care centers to home-delivered meals for senior citizens.

Cuts in urban development action grants could cost my city literally thousands of needed jobs along with the progress of many of our small businesses.

Other areas also are threatened. Millions of dollars are being diverted from health care for the poor, from education, from job training. The ability of cities, like Chicago, to provide a whole array of needed social services, to undertake critically needed improvements in housing and mass transit and to spark continued economic growth, all of these valid local interests stand to be seriously limited. Unquestionably, it is essential to the livelihood of our urban centers that drastic cuts be avoided.

Not only does the quality of life budget meet Gramm-Rudman goals, but it also meets important social goals. The quality of life budget truly lives up to its name in this regard: It restores life to education programs which have been targeted for reduction. It restores life to federally assisted housing programs threatened with decimation. It breathes life into health care programs—the Medicare and Medicaid Programs—relied upon by so many among us who have no alternatives.

The quality of life budget promises new life for the millions of Americans who need training to keep pace in a dynamic workplace. It avoids pulling the plug on our life supports in the area of farming—ensuring that we can provide the necessary food to wipe out hunger and malnutrition in this country.

Just as important, the quality of life budget provides for the effective protection of all our lives by providing for sensible defense funding—securing the national defense without sacrificing personnel benefits or readiness.

Just a word, Mr. Chairman, on this budget's proposed $300 million reduction for the Military Assistance Program [MAP]: A $300 million reduction in ESF—which still provides the levels proposed by the House Foreign Affairs Committee for Israel and Egypt.

There is no question that we have a duty to be mindful of fiscal responsibility as we attempt to balance competing needs and interests for the overall good. The Congressional Black Caucus quality of life budget is a shining example of just that kind of balance—ensuring that, while we are striving for fiscal responsibility, we do not, in turn, foresake other compelling responsibilities.

I urge my colleagues to consider the responsible alternative and vote in support of the Black Caucus quality of life budget.

Mr. LELAND. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. OWENS].

Mr. OWENS. Mr. Chairman, as previous speakers have noted, this quality of life budget is far more than just for the poor. It is budget for all American families. The quality of life budget is also a budget which takes into full consideration the long-term security of America in more ways than one. It not only has a budget amount for defense, which is above what Gramm-Rudman would be, but in many other ways it seeks to bolster the long-term security of America by addressing itself to the basic problems that we are facing over a long period of time.

Nobody wants a hot war. Nobody looks forward to a hot war, so there will be a long-term struggle between the Soviet Union's way of life and the way of life of the United States. In that long-term struggle, the winner will be that nation which addresses the problem of education and does it best.

Our star wars program, with the funding decreased in this budget, is a program which many of the leading scientists of this country have declared not only a wasteful program, but a dangerous program.

Of the brain power we need for the weapons of the future or the brain power we need to solve the problems of the future, whether those are problems in international diplomacy or problems of productivity, those problems will be solved by those coming from our colleges and universities.

This budget increases the amount of money for education. It launches a new initiative under the Effective Schools and Education Development Act.

It also has even with those increases the paltry sum of $16.2 billion. Both elementary and secondary education funding and higher education together amount to only about $16.2 billion. That total figure of $16.2 billion is actually only 6 percent—6 percent of the total Department of Defense budget in the regular budget offered by the Budget Committee.

This is a paltry sum when you stop to think that the security of the Nation in the long-run is dependent on the brain power pool that we have, the number and the quality of people we have who are able to do things that we have not yet even dreamed of.

Our elementary schools, our secondary schools, our higher education institutions will provide that kind of brain power. We will have that brain power only with Federal participation. Even though the Federal Government has only a small role to play, that role is a stimulant role. It is a role that if it were not there, many things would not happen as a result.

We have documented what the Federal involvement has already accomplished in the area of Head Start. We have documented how the Federal dollars have demonstrated what early childhood education can do. We have documented the role of the Federal Government in providing the funding for any youngster who wants to go to college, who has the ability to be able to do that under the various aid programs that we offer.

So education is for national security as well as for the improvement of the quality of life and this budget provides adequately for the funding of education.

□ 1245

Mr. LELAND. Mr. Chairman, I yield 4½ minutes to the gentleman from Ohio [Mr. STOKES].

Mr. STOKES. I thank the gentleman for yielding this time to me.

Mr. Chairman, the Congressional Black Caucus quality of life budget for fiscal year 1987 is a budget that distributes this Nation's massive Federal resources in a way that is fair, equitable, and economically responsible. The CBC budget proposes $1.012 trillion in outlays, $868.1 billion in revenues, resulting in a deficit of $143.81 billion. By meeting and exceeding the fiscal year 1987 Gramm-Rudman deficit target of $144 billion, the CBC quality of life budget casts aside the conventional wisdom that our Nation lacks the necessary resources to maintain socially productive investments in education, health care, housing, and the public infrastructure, at the same time that we provide for the national defense.

Four years ago, the Reagan administration decided that reducing taxes and expanding the defense budget were more critical than protecting our most vulnerable citizens. As a result, from 1980 to 1983, Federal spending for low-income individuals dropped more than 15 percent, after adjusting for inflation. From 1979 to 1984, the average family income for the poorest fifth of all families, adjusted for inflation, dropped by nearly 24 percent. Thirteen million of America's children now live in poverty—half of them black children.

We as a nation no longer have any margin for human neglect. The CBC quality of life budget promotes a new investment policy in our Nation's children, youth, families, workers—our human resources.

An important element of this investment policy is a renewed commitment to the health of our Nation's citizens. The CBC has long believed that poor health, inadequate nutrition, and poverty can form a vicious cycle leading to loss of employment, productivity, and well-being. Ultimately, the progress and prosperity of the Nation rests upon a populace that is healthy and fit.

The CBC budget includes $40.2 billion in budget authority and $39.6 billion in outlays for function 550—Health. Compared to the amounts required to maintain current health services, after adjusting for inflation, the CBC budget recommends an additional $1.8 billion in budget authority and $1.1 billion in outlays for Medicaid and discretionary health programs. These recommendations will continue the Medicaid Program as it currently operates, including newly expanded services to pregnant women, children, and two-parent, low-income families. Additionally, the CBC budget includes the full amount required in fiscal year 1987 to maintain current law Medicare benefits and rejects proposed administration cuts.

The CBC budget also includes long overdue resources to expand health services provided in community health and mental health centers, family planning clinics, child and maternal health clinics, and through the National Health Service Corps. The need to expand the capacity of these programs has grown dramatically as the number of families living in poverty and without health insurance has multiplied and the number of elderly Americans unable to afford the high cost of medical care has grown. More than 10 million Americans, many living in medically underserved areas, now rely upon these programs for basic health care needs. Increasing the level of Federal support in this area is not only a cost-effective method of providing health care to those who need it, but also it is sound economic policy. Finally, the CBC budget includes $527 million over current services for health research activities and maintains current spending on health education and training activities, in contrast to the reductions proposed by the Reagan administration in these areas. The administration would set back our Nation's efforts to ameliorate the morbidity and mortality associated with diseases that kill millions of Americans each year. Moreover, the administration's budget proposals do not seriously consider the real health status gap that exists among blacks and whites in this Nation and the coexisting disparity among health professionals.

Mr. Chairman, today we face a major choice. We can continue down a bleak and desolate path of retreat and retrenchment in health care, or we can support the CBC quality of life budget which puts us on the road toward a responsible and compassionate Federal health policy. I urge you to adopt the CBC alternative. It leads us in the right direction.

Mr. LELAND. Mr. Chairman, I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. I thank the gentleman for yielding this time to me.

Mr. Chairman, it was said here today that we cannot do everything for everybody, but one thing is for sure: When we are overspending almost $50 billion in defense that is unnecessary and the Pentagon cannot even find, or has led us to believe it has not even expended almost $40 billion, that certainly will not do very much for this country.

The Black Caucus budget, and I commend the gentleman from Texas [Mr. LELAND], and all those Members who put this vehicle together, truly addresses the needs of the American people in the living rooms and the streets and in the actual life that they lead.

I am just hoping that the Members of this House take a look at this budget, because many people have a tendency, when they hear Black Caucus, not to look at it. This is the finest budget we have. Unfortunately it probably does not have a shot.

That is all I have to say. Mr. Chairman, I commend you, I commend the gentleman from California [Mr. DELLUMS], the gentlewoman from Colorado [Mrs. SCHROEDER], the gentleman from Florida [Mr. BENNETT], and all of you who have come together here who have let this country know that we are overexpending money for defense and we should start dealing with it equitably for all of our people.

Mr. LELAND. Mr. Chairman, I yield the remainder of my time to the honorable gentleman from Michigan [Mr. CONYERS], one of the greatest statesmen who has ever come to this body.

The CHAIRMAN. The gentleman from Michigan [Mr. CONYERS] is recognized for 1½ minutes.

Mr. CONYERS. I thank the gentleman for yielding this time to me.

Mr. Chairman, this marks the sixth year that the Congressional Black Caucus has introduced a budget, and in light of the priorities manifested in the administration's initial budget proposal, it is clear that the fiscal year 1987 alternative is greatly needed.

The alternative is the most far-reaching reform proposal to be offered

for consideration by the House because it is built on the premise that President Reagan's budget policies must be reversed and not reinforced.

In developing this budget, the caucus has sought to preserve our national commitment to fair treatment for urban and rural America, the elderly, the economically disadvantaged, students, the disabled, and small businesspersons. The alternative boldly challenges existing fiscal policies which have created the enormous mismatch between huge increases in military spending, on the one hand, and major reductions in human resource programs on the other.

The quality of life budget for fiscal year 1987 proposes $1,011.91 billion in outlays and $868.10 billion in revenues. This will produce a deficit of $143.8 billion for fiscal year 1987, an amount only $6 billion more than that produced by the House Budget Committee proposal. However, over the next 3 years, through a combination of military spending cuts and revenue increases, the quality of life budget plan would reduce the deficit to $62.58 billion, which is more than $9 billion below the third year goal of Gramm-Rudman.

We have rejected the wasteful excess in military expenditures by eliminating funding for such destabilizing weapons systems as the MX, Trident II, Pershing II, and cruise missiles. In addition, the caucus budget proposes a reduction in the number of troops stationed in Europe and Asia, changes in procurement policies which will reduce military waste and abuse, and a lessening of the threat of nuclear war through the support of a nuclear freeze and other arms control initiatives.

With respect to domestic program areas, the quality of life budget represents the best hope for our country, our communities, and our people for a budget policy which requires sacrifices of all, not just some. The Reagan administration's systematic retreat from its obligation to ensure economic and social justice for all citizens makes the approval of the alternative an imperative if we are to improve the quality of life of those who are least able to provide for themselves.

This budget also proposes to increase the efficiency and equity of the current Tax Code by eliminating various loopholes and tax shelters. At the same time it ensures that those at or near the poverty line would no longer be subject to taxes. Our tax proposal will raise $24.1 billion in additional revenues in fiscal year 1987, $34.0 billion in fiscal year 1988, and $33.5 billion in fiscal year 1989.

The quality of life budget is the one budget which across the United States is perhaps the most popular budget of all. It would find favor with more Americans than the President's or the House Budget Committee's budgets if America's citizens had a chance to vote on it.

One of the greatest misconceptions about the Congressional Black Caucus' budgets is that they only serve the interests of Black America. This is not true. It's a budget for everybody, designed to maintain the integrity of our national defense, propose significant tax reform, and maintain an effective level of funding for domestic programs. This budget is a carefully crafted and fiscally sound plan and I urge all of my colleagues to support it.

Mr. TOWNS. Mr. Chairman, yesterday, the House adopted House Concurrent Resolution 310, a measure expressing the sense of Congress that the farm loan system should be restructured. Unfortunately, this measure is only an expression of sentiment and does not carry the force of law. There is no doubt that the Nation's farmers are in the midst of a crisis and that something more than platitudes and rhetoric must be done to help them.

Mr. Chairman, the "quality of life" budget speaks to the needs of small family farmers. First, this budget resolution maintains the Farmers Home Administration as the major lender for new and established small-and mid-sized farm operators. FmHA was created to serve farmers who were unable to obtain credit anywhere else. We believe that the current direct loan structure, in FmHA, should be maintained. Moving to a guaranteed loan structure would virtually wipe out the small family farmer who would be unable to obtain credit from commercial lenders.

Second, this budget targets Federal support for farmers to those at greatest financial risk. It limits target price income support to farms primarily dependent on farm income and with gross product sale of no more than $200,000. Further, we raise target price levels to more adequately reflect costs of production for small and mid-sized farms. Producers with high off-farm income or corporate income are excluded from eligibility for deficiency payments.

In addition to these general concerns, the resolution reflects a particular concern about the plight of black farmers who are losing their land 2.5 times faster than white farmers. For example, in 1920, there were 1 million black farmers in the United States. In 1982, that number was 33,000, a drop of 97 percent. In 1910, blacks owned 16 million acres of farmland. By 1980, that number had dropped well below 4 million acres. FmHA has done little or nothing to reverse these statistics. The farm ownership loans are disproportionately low for minority farmers. For example, in the State of North Carolina in fiscal year 1984, 323 loans were awarded, 302 went to whites, 20 to blacks, and 1 to an American Indian. In Mississippi, during the same time period, 250 loans were awarded, 236 went to whites and 14 went to blacks.

Certainly, if the farm ownership loans are not being given to black and other minority farmers, we can expect a continuing decline in the number of minority farmers for the remainder of this century. Our resolution promotes the expansion of the limited resource loan program to address the particular needs of low-equity farmers, which are largely minority and small acreage farmers. I believe that this kind of effort, as represented in our budget resolution, will go a long way toward preserving the American family farmer. I hope those of my colleagues who are concerned about this issue will support the quality of life budget resolution.

Mr. HAWKINS. Mr. Chairman, I rise today in support of the fiscal year 1987 Alternative Quality of Life Budget. The alternative budget was cosponsored by a coalition of Members of this body under the leadership of the Congressional Black Caucus. CBC Chairman MICKEY LELAND deserves a sincere "thank you" for bringing together a cross section of this body's membership in order to offer a comprehensive, sound, and sane approach to this country's economic and fiscal future. This quality of life alternative budget is evidence that fiscal austerity does not have to translate into faulty economic policy or budget targets that deprive our Nation of future balanced economic growth. Moreover, this alternative budget does not deprive this Nation of its ongoing commitment to use foresight by investing in its most fragile, but still its most critical asset—its people.

The quality of life budget sets priorities for our national economy and for the needs of our people. It recognizes that chief among the determinants of a just and prosperous democratic society is an educated citizenry who are able to be productive participants in our economy. This budget aims to lessen and hopefully at some point to discontinue economic waste and the human tragedy of continued poverty, illiteracy, and unemployment throughout this Nation.

Specifically, the alternative budget proposes $1,011.91 billion in outlays for 1987, with $868.10 billion in revenues for a deficit of $143.81 billion; which is $190 million below the Gramm-Rudman targets. Under the quality of life budget outlays, the Federal deficit would decline to $62.58 billion by 1989 which is more than $9 billion below the third year goal of the Balanced Budget and Emergency Deficit Control Act of 1985 (Gramm-Rudman).

The beauty of this alternative budget is that it reaches the deficit reduction targets of Gramm-Rudman, while at the same time maintaining a reasonable level of funding for domestic programs whose number of eligible recipients are constantly increasing, and in many instances, the need and demand for certain domestic assistance programs by our constituents has surpassed present funding levels. Granted this administration offers privatization of historically Federal Government responsibilities as the alternative to several domestic programs, but the hope and promise of privatization is quickly outstripped by reality.

The reality is that America's prosperity is overshadowed by the fact that 34 million Americans live at or below the poverty level. Moreover, estimates indicate approximately 26 million Americans are illiterate with 46 million classed as marginally illiterate. And still over 8 million Americans remain unemployed. Private sector efforts will not harness enough of an initiative to stop this wave of loss resources. Thus, the quality of life budget takes note of the real suffering in this Nation, and moves

with compassion to lessen such suffering by investing in sound and efficient domestic programs.

The fiscal year 1987 alternative budget restores funding for all education programs targeted for reduction and provides funding for educational development initiatives such as effective school programs. Outlays for fiscal year 1987 are $7.8 billion for elementary and secondary education and $8.63 billion for higher education programs.

The alternative budget is designed to revive and fully implement the spirit of the Full Employment Act of 1946 and the Full Employment and Balanced Growth Act of 1978. The alternative budget provides reasonable funding for those programs authorized under the Job Training Partnership Act and proposes $278 million for the Work Incentive Program targeted for elimination by the administration. Included in the programs covered by the alternative budget's outlay of $7.36 billion for employment and training programs are the Summer Youth Employment Program, the Jobs Corps Program, and the Dislocated Workers Program.

The alternative budget also proposes the enactment of an Omnibus Productivity and Trade Incentive Program. This legislation's primary aim would be to curtail the continued decline in America's industries and to lessen the Nation's trade deficit. The measure would permit States and regions to execute plans that permit declining industries to retool and retrain their work forces to secure jobs in expanding sectors of the economy.

This Nation must take steps now to avert the pattern of shrinking industries and technological shortcomings in order to compete in expanding international markets. We must assure a decent quality of life for all Americans by maintaining our Nation's competitive edge and expanding our work force.

This quality of life budget alternative clearly gives the members of this body a real opportunity to vote for a package which will put us on a course toward full employment, balanced economic growth, and reduced suffering across this great Nation.

Mr. DIXON. Mr. Chairman, the Congressional Black Caucus alternative quality of life budget represents a joint effort by Members of Congress who are seriously concerned about the direction of this Nation's domestic and international policies under the Reagan administration. What has emerged is a major fiscal initiative that realigns our national priorities to ensure a decent and sustainable quality of life for all citizens.

The alternative budget calls for restoring domestic spending programs or health, education, housing, and transportation, while simultaneously funding programs that fight poverty and hunger in developing countries. It includes full funding for the Small Business Administration, which was targeted for elimination under the Reagan plan.

Although we believe that military reductions are necessary to balance domestic spending, we do not compromise nor jeopardize national security. In the area of international affairs, the alternative budget is well below the President's proposals, but it is far superior in terms of shifting priorities from security assistance to basic human and development needs of our allies and the poorest countries in the world.

Between fiscal year 1981 and fiscal year 1986, the President's military and security assistance programs have grown disproportionate to development assistance. Our Nation cannot afford to continue to seek military solutions to global problems. The alternative budget attempts to slow the rapid growth of security and military assistance, while at the same time increasing development assistance programs.

Americans are sympathetic to ending hunger, disease, and poverty throughout the world and the alternative budget continues slight increases in development assistance programs, including a 1-percent increase in the Public Law 480 food and peace assistance and refugee assistance, and an 8-percent increase for the Peace Corps and refugee assistance. The baseline funding is retained for international organizations and foreign information and exchange activities.

The alternative budget continues funding levels for multilateral development banks of $1.4 billion, that includes $75 million for the special facility for Africa to address the critical economic crisis in Africa. It also provides $75 million for the African Development Fund and $6.5 million for the African Development Foundation.

The confidence of the American people in our foreign policy emphasis may have been partially restored by several recent events including the forced exile of two totalitarian leaders with a record of human rights abuses—Ferdinand Marcos of the Philippines and Jean Claude Duvalier of Haiti. We must continue to shift the emphasis of our foreign policy initiatives to promote human rights and development assistance.

The alternative budget offers the best hope of returning to a more reasoned foreign policy based on basic human needs, humanitarian and development assistance, and less on military buildups in developing countries. For those Members who are really concerned about providing an alternative strategy to the current military focus on American foreign policy and improving development assistance to fight world hunger and disease in developing countries, I urge Members of Congress to support the substitute to the budget resolution offered by Representative LELAND.

Mr. GARCIA. Mr. Chairman, as a cosponsor of the Congressional Black Caucus' alternative quality of life budget, I would like to extend my support, and congratulate the caucus for the excellent work that they have done. The results of their efforts truly have produced a budget that enhances the quality of life of all Americans. Unlike the administration budget, which was a so-called family budget aimed at higher income families, the Black Caucus has maintained workable levels of spending for some very necessary programs. One important example is that it restores spending for educational programs the administration sought to reduce. Our schools, and the education of many of our children have fallen behind the levels of quality education offered by other countries to their children. How can we ignore our children's education and expect to maintain our level of leadership in the world? These children are tomorrow's leaders, and we cannot send them forth unprepared. The budget continues to fund programs under the Job Training Partnership Act—this program has been a fundamental source of job training for people in New York and nationwide. In the area of housing the CBC budget provides sufficient funding for 12,000 new units of elderly/handicapped housing—a program that despite Presidential promises to the contrary were scheduled for termination in the administration budget.

I think my colleagues will agree with me when I say that this is a budget we can live with, and one to be proud of. I would like to congratulate my friend MICKEY LELAND and the Congressional Black Caucus for the leadership they have shown in the fight for a fair budget.

Mr. DENNY SMITH. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Texas [Mr. LELAND].

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. DENNY SMITH. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2, rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question, following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Four hundred eighteen Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Oregon [Mr. DENNY SMITH] for a recorded vote. Five minutes will be allowed for the vote.

Does the gentleman from Oregon [Mr. DENNY SMITH] insist upon his request?

Mr. DENNY SMITH. I demand a recorded vote, Mr. Chairman.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 61, noes 359, answered "present" 1, not voting 12, as follows:

ANSWERED "PRESENT"—1

Gray (PA)

NOT VOTING—12

Derrick	Grotberg	Lujan
Edgar	Heftel	MacKay
Foley	Hendon	O'Brien
Franklin	Hunter	Scheuer

□ 1315

The Clerk announced the following pair:

On this vote:

Mr. Scheuer for, with Mr. O'Brien against.

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. LATTA

Mr. LATTA. Mr. Chairman, I offer an amendment in the nature of a substitute.

The CHAIRMAN. The Clerk will designate the amendment in the nature of a substitute.

The text of the amendment in the nature of a substitute is as follows:

Amendment in the nature of a substitute offered by Mr. LATTA: Strike out all after the resolving clause and insert in lieu thereof the following:

That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1987 is established and the appropriate budgetary levels for fiscal years 1988 and 1989 are set forth.

(a) The following levels and amounts are set forth for purposes of determining, in accordance with section 301(i) of the Congressional Budget and Impoundment Control Act of 1974, as amended by the Balanced Budget and Emergency Deficit Control Act of 1985, whether the maximum deficit amount for a fiscal year has been exceeded:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $849,700,000,000.
Fiscal year 1988: $929,700,000,000.
Fiscal year 1989: $999,200,000,000.

(2) The appropriate levels of total budget are as follows:

Fiscal year 1987: $1,081,500,000,000.
Fiscal year 1988: $1,156,500,000,000.
Fiscal year 1989: $1,204,800,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $993,500,000,000.
Fiscal year 1988: $1,044,700,000,000.
Fiscal year 1989: $1,074,100,000,000.

(4) The amounts of the deficits are as follows:

Fiscal year 1987: $143,800,000,000.
Fiscal year 1988: $115,000,000,000.
Fiscal year 1989: $74,900,000,000.

(b) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $636,400,000,000.
Fiscal year 1988: $689,100,000,000.
Fiscal year 1989: $738,100,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1987: $5,700,000,000.
Fiscal year 1988: $8,700,000,000.
Fiscal year 1989: $7,900,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1987: $55,700,000,000.
Fiscal year 1988: $60,150,000,000.
Fiscal year 1989: $64,250,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1987: $859,100,000,000.
Fiscal year 1988: $902,600,000,000.
Fiscal year 1989: $926,800,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $789,600,000,000.
Fiscal year 1988: $827,700,000,000.
Fiscal year 1989: $842,500,000,000.

(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1987: $153,200,000,000.

Fiscal year 1989: $104,400,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1987: $2,319,600,000,000.
Fiscal year 1988: $2,516,900,000,000.
Fiscal year 1989: $2,685,100,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988, are as follows:

Fiscal year 1987:
(A) New direct loan obligations, $32,676,081,000.
(B) New primary loan guarantee commitments, $99,104,636,000.

Fiscal year 1988:
(A) New direct loan obligations, $30,574,032,000.
(B) New primary loan guarantee commitments, $90,174,950,000.

Fiscal year 1989:
(A) New direct loan obligations, $28,468,058,000.
(B) New primary loan guarantee commitments, $92,047,691,000.

(c) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations, and new primary loan guarantee commitments for fiscal years 1987 through 1989 for each major functional category are:

(1) National Defense (050):

Fiscal year 1987:
(A) New budget authority, $293,000,000,000.
(B) Outlays, $280,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:
(A) New budget authority, $303,500,000,000.
(B) Outlays, $287,600,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:
(A) New budget authority, $315,100,000,000.
(B) Outlays, $297,800,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

(2) International Affairs (150):

Fiscal year 1987:
(A) New budget authority, $17,200,000,000.
(B) Outlays, $14,100,000,000.
(C) New direct loan obligations, $7,200,215,000.
(D) New primary loan guarantee commitments, $12,213,177,000.

Fiscal year 1988:
(A) New budget authority, $17,900,000,000.
(B) Outlays, $14,200,000,000.
(C) New direct loan obligations, $7,413,000,000.
(D) New primary loan guarantee commitments, $12,717,771,000.

Fiscal year 1989:
(A) New budget authority, $21,600,000,000.
(B) Outlays, $13,700,000,000.
(C) New direct loan obligations, $7,668,591,000.
(D) New primary loan guarantee commitments, $13,233,992,000.

(3) General Science, Space, and Technology (250):

Fiscal year 1987:
(A) New budget authority, $8,900,000,000.
(B) Outlays, $8,800,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:
(A) New budget authority, $8,900,000,000.
(B) Outlays, $8,800,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:
(A) New budget authority, $8,900,000,000.
(B) Outlays, $8,800,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

(4) Energy (270):

Fiscal year 1987:
(A) New budget authority, $4,500,000,000.
(B) Outlays, $4,400,000,000.
(C) New direct loan obligations, $2,018,355,000.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:
(A) New budget authority, $4,600,000,000.
(B) Outlays, $4,200,000,000.
(C) New direct loan obligations, $2,001,095,000.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:
(A) New budget authority, $4,800,000,000.
(B) Outlays, $3,700,000,000.
(C) New direct loan obligations, $1,982,755,000.
(D) New primary loan guarantee commitments, $0.

(5) Natural Resources and Environment (300):

Fiscal year 1987:
(A) New budget authority, $12,000,000,000.
(B) Outlays, $12,400,000,000.
(C) New direct loan obligations, $69,992,000.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1988:
(A) New budget authority, $11,700,000,000.
(B) Outlays, $12,000,000,000.
(C) New direct loan obligations, $69,992,000.
(D) New primary loan guarantee commitments, $0.

Fiscal year 1989:
(A) New budget authority, $11,500,000,000.
(B) Outlays, $11,900,000,000.
(C) New direct loan obligations, $69,992,000.
(D) New primary loan guarantee commitments, $0.

(6) Agriculture (350):

Fiscal year 1987:
(A) New budget authority, $23,900,000,000.
(B) Outlays, $23,700,000,000.
(C) New direct loan obligations, $14,279,705,000.
(D) New primary loan guarantee commitments, $8,006,000,000.

Fiscal year 1988:
(A) New budget authority, $26,300,000,000.
(B) Outlays, $25,000,000,000.
(C) New direct loan obligations, $12,077,605,000.
(D) New primary loan guarantee commitments, $8,506,000,000.
Fiscal year 1989:
(A) New budget authority, $25,600,000,000.
(B) Outlays, $21,800,000,000.
(C) New direct loan obligations, $11,285,451,000.
(D) New primary loan guarantee commitments, $8,506,000,000.
(7) Commerce and Housing Credit (370):
Fiscal year 1987:
(A) New budget authority, $9,400,000,000.
(B) Outlays, $2,600,000,000.
(C) New direct loan obligations, $3,306,039,000.
(D) New primary loan guarantee commitments, $53,730,610,000.
Fiscal year 1988:
(A) New budget authority, $9,500,000,000.
(B) Outlays, $5,400,000,000.
(C) New direct loan obligations, $3,230,546,000.
(D) New primary loan guarantee commitments, $43,234,530,000.
Fiscal year 1989:
(A) New budget authority, $6,600,000,000.
(B) Outlays, $600,000,000.
(C) New direct loan obligations, $3,515,126,000.
(D) New primary loan guarantee commitments, $44,169,950,000.
(8) Transportation (400):
Fiscal year 1987:
(A) New budget authority, $27,300,000,000.
(B) Outlays, $27,100,000,000.
(C) New direct loan obligations, $502,138,000.
(D) New primary loan guarantee commitments, $70,000,000.
Fiscal year 1988:
(A) New budget authority, $27,800,000,000.
(B) Outlays, $26,200,000,000.
(C) New direct loan obligations, $401,166,000.
(D) New primary loan guarantee commitments, $70,000,000.
Fiscal year 1989:
(A) New budget authority, $28,300,000,000.
(B) Outlays, $26,000,000,000.
(C) New direct loan obligations, $201,237,000.
(D) New primary loan guarantee commitments, $70,000,000.
(9) Community and Regional Development (450):
Fiscal year 1987:
(A) New budget authority, $6,000,000,000.
(B) Outlays, $7,200,000,000.
(C) New direct loan obligations, $642,122,000.
(D) New primary loan guarantee commitments, $202,149,000.
Fiscal year 1988:
(A) New budget authority, $6,500,000,000.
(B) Outlays, $6,700,000,000.
(C) New direct loan obligations, $900,794,000.
(D) New primary loan guarantee commitments, $204,149,000.
Fiscal year 1989:
(A) New budget authority, $6,100,000,000.
(B) Outlays, $6,000,000,000.
(C) New direct loan obligations, $722,614,000.
(D) New primary loan guarantee commitments, $205,149,000.
(10) Education, Training, Employment, and Social Services (500):
Fiscal year 1987:
(A) New budget authority, $30,500,000,000.
(B) Outlays, $30,000,000,000.
(C) New direct loan obligations, $1,271,420,000.
(D) New primary loan guarantee commitments, $8,980,000,000.
Fiscal year 1988:
(A) New budget authority, $30,400,000,000.
(B) Outlays, $30,200,000,000.
(C) New direct loan obligations, $1,110,420,000.
(D) New primary loan guarantee commitments, $9,285,000,000.
Fiscal year 1989:
(A) New budget authority, $30,500,000,000.
(B) Outlays, $30,500,000,000.
(C) New direct loan obligations, $922,420,000.
(D) New primary loan guarantee commitments, $9,500,000,000.
(11) Health (550):
Fiscal year 1987:
(A) New budget authority, $37,900,000,000.
(B) Outlays, $38.000,000,000.
(C) New direct loan obligations, $21,650,000.
(D) New primary loan guarantee commitments, $275,000,000.
Fiscal year 1988:
(A) New budget authority, $39,800,000,000.
(B) Outlays, $40,000,000,000.
(C) New direct loan obligations, $22,900,000.
(D) New primary loan guarantee commitments, $275,000,000.
Fiscal year 1989:
(A) New budget authority, $42,000,000,000.
(B) Outlays, $41,900,000,000.
(C) New direct loan obligations, $29,900,000.
(D) New primary loan guarantee commitments, $275,000,000.
(12) Medicare (570):
Fiscal year 1987:
(A) New budget authority, $82,500,000,000.
(B) Outlays, $73,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $90,500,000,000.
(B) Outlays, $81,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $99,900,000,000.
(B) Outlays, $90,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(13) Income Security (600):
Fiscal year 1987:
(A) New budget authority, $159,600,000,000.
(B) Outlays, $121,500,000,000.
(C) New direct loan obligations, $1,796,527,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $166,500,000,000.
(B) Outlays, $127,900,000,000.
(C) New direct loan obligations, $1,811,569,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $169,100,000,000.
(B) Outlays, $133,000,000,000.
(C) New direct loan obligations, $689,196.000.
(D) New primary loan guarantee commitments, $0.
(14) Social Security (650):
Fiscal year 1987:
(A) New budget authority, $5,500,000,000.
(B) Outlays, $5,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $6,100,000,000.
(B) Outlays, $6,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $6,900,000,000.
(B) Outlays, $6,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(15) Veterans Benefits and Services (700):
Fiscal year 1987:
(A) New budget authority, $27,100,000,000.
(B) Outlays, $26,600,000,000.
(C) New direct loan obligations, $1,567,918,000.
(D) New primary loan guarantee commitments, $15,627,700,000.
Fiscal year 1988:
(A) New budget authority, $27,600,000,000.
(B) Outlays, $27,200,000,000.
(C) New direct loan obligations, $1,534,855,000.
(D) New primary loan guarantee commitments, $15,882,500,000.
Fiscal year 1989:
(A) New budget authority, $27,800,000,000.
(B) Outlays, $27,400,000,000.
(C) New direct loan obligations, $1,380,776,000.
(D) New primary loan guarantee commitments, $16,087,600,000.
(16) Administration of Justice (750):
Fiscal year 1987:
(A) New budget authority, $7,000,000,000.
(B) Outlays, $7,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $7,100,000,000.
(B) Outlays, $7,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $7,000,000,000.
(B) Outlays, $7,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(17) General Government (800):
Fiscal year 1987:
(A) New budget authority, $5,200,000,000.
(B) Outlays, $5,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $5,300,000,000.
(B) Outlays, $5,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $5,200,000,000.
(B) Outlays, $5,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(18) General Purpose Fiscal Assistance (850):
Fiscal year 1987:

(A) New budget authority, $1,800,000,000.
(B) Outlays, $2,600,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $1,900,000,000.
(B) Outlays, $1,900,000,000.
(C) New direct loan obligations, $0.
(D) New Primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $1,900,000,000.
(B) Outlays, $1,900,000,000.
(C) New direct loan obligations, $0.
(D) New Primary loan guarantee commitments, $0.
(19) Net Interest (900):
Fiscal year 1987:
(A) New budget authority, $144,000,000,000.
(B) Outlays, $144,000,000,000.
(C) New direct loan obligations, $0.
(D) New Primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $153,000,000,000.
(B) Outlays, $153,000,000,000.
(C) New direct loan obligations, $0.
(D) New Primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $151,000,000,000.
(B) Outlays, $151,000,000,000.
(C) New direct loan obligations, $0.
(D) New Primary loan guarantee commitments, $0.
(20) Allowances (920):
Fiscal year 1987:
(A) New budget authority, $700,000,000.
(B) Outlays, $800,000,000.
(C) New direct loan obligations, $0.
(D) New Primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $2,400,000,000.
(B) Outlays, $2,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $3,900,000,000.
(B) Outlays, $4,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(21) Undistributed Offsetting Receipts (950):
Fiscal year 1987:
(A) New budget authority, $−44,900,000,000.
(B) Outlays, $−44,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $−44,700,000,000.
(B) Outlays, $−44,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $−46,900,000,000.
(B) Outlays, $−46,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

RECONCILIATION

SEC. 2. (a) Not later than June 5, 1986, the committees named in subsections (c) through (l) of this section shall submit their recommendations to the House Budget Committee. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

"(b) The following rules shall apply in the House of Representatives with respect to any reconciliation bill reported or considered pursuant to this resolution:

(1) No provision shall be reported in the House in any reconciliation bill pursuant to this resolution or be in order as an amendment thereto in the House or Committee of the Whole, which is not related to achieving the purposes of the directives to House committees contained in this resolution.

(2) Nothing in this subsection shall be construed to prevent the consideration of any provision in a reconciliation bill, or any amendment thereto, which achieves savings greater than those directed of a committee and which conforms to paragraph (3) of this subsection, or to prevent the consideration of motions to strike made in order by the Committee on Rules to achieve the purposes of the directives.

(3) For the purposes of this subsection, a provision shall be considered related to achieving the purposes of directives contained in this resolution on the budget if it is estimated by the House Committee on the Budget, in consultation with the Congressional Budget Office, to effectuate or implement a reduction in budget authority or in new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act, or to raise revenues, or both, and, in the case of an amendment, if it is within (in whole or in part) the jurisdiction of any committee instructed in this resolution.

(4) The point or order established by this subsection shall not apply to Senate amendments or to conference reports.

HOUSE COMMITTEES

(c) The House Committee on Agriculture shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $−94,000,000 in budget authority and $−119,000,000 in outlays in fiscal year 1987, $−53,000,000 in budget authority and $−53,000,000 in outlays in fiscal year 1988, and $−49,000,000 in budget authority and $−49,000,000 in outlays in fiscal year 1989.

(d) The House Committee on Banking, Finance and Urban Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $−2,000,000,000 in budget authority and $−2,579,000,000 in outlays in fiscal year 1987, $−2,000,000,000 in budget authority and $−2,314,000,000 in outlays in fiscal year 1988, and $−2,000,000,000 in budget authority and $−2,000,000,000 in outlays in fiscal year 1989.

(e) The House Committee on Education and Labor shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $−289,000,000 in budget authority and $−266,000,000 in outlays in fiscal year 1987, $−484,000,000 in budget authority and $−439,000,000 in outlays in fiscal year 1988, and $−574,000,000 in budget authority and $−554,000,000 outlays in fiscal year 1989.

(f) The House Committee on Energy and Commerce shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $−1,719,000,000 in budget authority and $−2,421,000,000 in outlays in fiscal year 1987, $−321,000,000 in budget authority and $−1,651,000,000 in outlays in fiscal year 1988, and $−308,000,000 in budget authority and $−2,591,000,000 outlays in fiscal year 1989.

(g) The House Committee on Interior and Insular Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $−135,000,000 in budget authority and $−135,000,000 in outlays in fiscal year 1987, $−136,000,000 in budget authority and $−136,000,000 in outlays in fiscal year 1988, and $−137,000,000 in budget authority and $−137,000,000 in outlays in fiscal year 1989.

(h) The House Committee on the Judiciary shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $−26,000,000 in budget authority and $−17,000,000 in outlays in fiscal year 1987, $−26,000,000 in budget authority and $−25,000,000 in outlays in fiscal year 1988, and $−25,000,000 in budget authority and $−25,000,000 in outlays in fiscal year 1989.

(i) The House Committee on Merchant Marine and Fisheries shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and

outlays, or (3) any combination thereof, as follows: $-75,000,000 in budget authority and $-75,000,000 in outlays in fiscal year 1987, $-75,000,000 in budget authority and $-75,000,000 in outlays in fiscal year 1988, and $-75,000,000 in budget authority and $-75,000,000 in outlays in fiscal year 1989.

(j) The House Committee on Post Office and Civil Service shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $0 in budget authority and $-1,057,000,000 in outlays in fiscal year 1987, $0 in budget authority and $-1,711,000,000 in outlays in fiscal year 1988, and $0 in budget authority and $-2,906,000,000 in outlays in fiscal year 1989.

(k) The House Committee on Public Works and Transportation shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $-1,283,000,000 in budget authority and $-331,000,000 in outlays in fiscal year 1987, $-1,317,000,000 in budget authority and $-545,000,000 in outlays in fiscal year 1988, and $-1,351,000,000 in budget authority and $-636,000,000 in outlays in fiscal year 1989.

(l) The House Committee on Ways and Means shall report changes in law within the jurisdiction of that committee sufficient to reduce the budget deficit by $-2,579,000,000 in fiscal year 1987; to reduce the budget deficit by $-4,958,000,000 in fiscal year 1988; and to reduce the budget deficit by $-4,018,000,000 in fiscal year 1989.

FOREIGN AGRICULTURAL INVESTMENT REFORM

SEC. 3. It is the sense of the Congress that the use of foreign aid funds for financing the foreign production for export use of agricultural commodities already in surplus on world markets is a counter-productive use of American tax dollars as well as devastating to the American farmer who loses export markets from the unfairly subsidized competition.

COOPERATIVE EXTENSION SERVICE

SEC. 4. It is the sense of the Congress that Federal funds for the Cooperative Extension Service of the Department of Agriculture should be maintained at a level sufficient to carry out fully the vital services it is providing to rural America during a time of extreme stress. It is further assumed that this funding will be used especially to support and strengthen such core programs as 4-H Youth Development, Home Economics and Family Living, Natural Resources and Community Development, and services that provide agricultural financial analysis and farm management instruction.

STRATEGIC PETROLEUM RESERVE

SEC. 5. It is the sense of the Congress that the policy to fill the Strategic Petroleum Reserve to a capacity of 750 million barrels be reaffirmed. It is also recommended that the Federal Government purchase oil from domestic stripper suppliers to fill the Strategic Petroleum Reserve.

GENERAL REVENUE SHARING

SEC. 6. The spending levels contained in section 1 of this resolution would not preclude funding for an extension of general revenue sharing under the State and Local Assistance Act of 1972 through the end of fiscal year 1989 if an authorization for such funding is enacted into law.

DEBT COLLECTION

SEC. 7. It is the sense of the Congress that, despite recent emphasis, there is more that can be done to identify and accelerate the collection of debts owed to the United States Government. It is further the sense of the Congress that the administration should redouble its efforts to make debt collection its highest management priority and to formalize government-wide procedures to identify and collect debts.

The Office of Management and Budget shall submit to the Speaker of the House and to the President pro tempore of the Senate, for referral to the appropriate Committees of jurisdiction, by September 1, 1986, a report on the administration's debt collection efforts. The report shall address the following topics: (1) the latest estimate of the outstanding volume of debt owed to the United States Government, (2) the amount of debt collection that is assumed in the administration's fiscal year 1987 budget, (3) the formal procedures established within the Executive Branch to identify and collect debts, (4) additional administrative actions that could accelerate debt collections above the level already assumed, including the possibility of consolidated administration of debt management and collection, and (5) legislative proposals to further improve debt collection.

The House and Senate Budget Committees request that the appropriate Committees of the House and Senate carefully review this report, hold hearings and formulate in an expeditious fashion legislation to improve the collection of debt owed to the government.

COMMITTEE REVIEW OF THE PRESIDENT'S PRIVATE SECTOR SURVEY ON COST CONTROL

SEC. 8. It is the sense of the Congress that—

(1) each of its standing committees should review and study on a continuing basis those portions of the President's Private Sector Survey on Cost Control affecting subjects within its jurisdiction; and

(2) each report of any such committee on a bill or joint resolution of a public character should contain an identification of each recommendation of the President's Private Sector Survey on Cost Control related to such bill or resolution and the estimated dollar amount of program cost savings or revenue enhancement as a result of the implementation of each such recommendation.

RED RIVER WATERWAY

SEC. 9. It is the sense of the Congress that amounts within major functional category 300 (Natural Resources and Environment) be made available to continue construction of the Red River Waterway, Mississippi River to Shreveport, Louisiana project, as authorized in the Rivers and Harbors Act of 1968.

The CHAIRMAN. Pursuant to House Resolution 455, the amendment in the nature of a substitute is considered as having been read.

The gentleman from Ohio [Mr. LATTA] will be recognized for 1 hour, and a Member opposed thereto will be recognized for 1 hour.

The Chair recognizes the gentleman from Ohio [Mr. LATTA].

Mr. LATTA. Mr. Chairman, I yield myself 5½ minutes.

Mr. Chairman, the substitute we propose calls for revenues slightly lower than the administration requested and much lower than those called for in the Democrat budget, as a matter of fact, the Democrat budget calls for $54 billion in new taxes over the next 3 years.

We call for setting budget authority for the defense function at a level somewhat less than the other body approved, but substantially above the disastrously low level proposed by the Democrats. Our budget authority figure of $293 billion for defense would permit 2-percent growth beyond the fiscal year 1986 level following this spring's Gramm-Rudman sequestration. It would permit pay increases for military and civilian personnel of 3 percent this coming January 1.

During the past 5 years the Reagan administration reversed an alarming decline in defense and strengthened our military capabilities. It seems more than foolish to start dismantling our defense at a time when we need it most, to bargain from a position of strength with the Soviet Union on arms control and other issues of vital concern to the free world and to counter threats to world peace from Soviet satellites and terrorists.

We have budgeted improvements in a number of important nondefense programs. For example, we provide for improved State Department and embassy security to meet the terrorist threat. The FHA mortgage insurance levels would be further increased to accommodate the growth in housing sales. Law enforcement programs would be increased by $165 million. Additional customs inspectors would be hired to improve customs collections and better monitor the flow of imports. Funding of the Internal Revenue Service would be increased to provide better taxpayer service and improve collections. Nondefense personnel also would get the same 3-percent pay increase going to defense personnel January 1.

Civilian and military retirees of the Federal Government would get the same 2-percent cost-of-living adjustment in pensions that we are assuming for Social Security recipients in January.

In order to get to the $144 billion maximum deficit for fiscal year 1987 stipulated by Gramm-Rudman, we are freezing most nondefense discretionary spending, terminating some unnecessary programs, and cutting some programs below the freeze level.

We would cut the legislative branch appropriations 8 percent below the freeze level. This would demonstrate that Congress is willing to share in the sacrifices needed to achieve a balanced budget.

Our farmers need help and for this reason we provide more for agriculture than any other proposed budget.

In Medicare we would avoid increasing the out-of-pocket costs to beneficiaries. The deductible now stands at $492—a figure too high for many elderly Americans. We would freeze this deductible so that it would not go up to $579 as scheduled next year. The Democrat budget would increase the deductible to $540.

We would increase Head Start to postsequester levels. The Women's, Infants, and Children's Supplemental Food Program would not be subjected to the freeze.

Sufficient funding is allowed for continued construction and filling of the strategic petroleum reserve at currently authorized levels.

We assume the sale of Conrail, the sale of the college housing and loan portfolio, and the marketing of new nonrecourse loans. There would be some new user fees, to help recover the cost of government activities that only benefit certain groups.

The Economic Development Administration, urban development action grants, and community development block grants would be retained, but trimmed by 10 percent.

The Amtrak subsidy would be reduced by 20 percent, and transit operating subsidies by 15 percent.

The programs we would terminate have outlived their usefulness such as the Appalachian Regional Commission and the HoDAG rental housing development grants. The latter program is an expensive, untargeted housing construction program which has proved not cost effective when compared to other approaches to low-income housing. We also would terminate the Interstate Commerce Commission, which has had its workload cut in half by transportation deregulation, and transfer its remaining functions to other agencies. We would end impact aid to education, part B, to all but the most severly impacted districts. General revenue sharing's future would be left to the authorizing committee.

It is important to terminate those programs found to be unnecessary or beyond the capabilities of the Federal Government at this time. If we keep them alive at a reduced level, special interests may ultimately persuade the big congressional spenders to restore the higher levels. The net result is the public continues to be saddled with programs we do not need and cannot afford and nothing is accomplished in deficit reduction.

Mr. Chairman, this is a budget the majority should support. There are no tax increases. Money is provided for keeping the strength we have in national defense. We make improvements in other programs where they will do the most good. We weed out or reduce other programs where the spending is wasteful. And we are below the Gramn-Rudman target of $144 billion for fiscal year 1987.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from California.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

Mr. Chairman, I want to associate myself with the remarks of the gentleman from Ohio [Mr. LATTA], I commend him and his colleagues for bringing this budget before us, and I urge its support.

Mr. Chairman, I rise today in opposition to House Concurrent Resolution 337 and in support of the Republican alternative. Although the Republican alternative is not perfect, it is clearly a more realistic policy statement in light of recent budget history. I would like to focus on two specific areas in which there is significant disagreement.

First, I believe that it is necessary to sustain an appropriate level of American strength so that we can defend ourselves and meet this Nation's global commitments in an increasingly dangerous world. Although I wish we lived in a world where defense spending was unnecessary, the realities of the current situation such as the brutal Soviet invasions of Hungary, Czechoslovakia, and Afghanistan, international interventions by Castro and state-sponsored terrorism by Qadhafi and Khomeini point to a different conclusion. Arms control negotiations are more likely to succeed if we deal from a position of strength. In addition, the American people should understand that unlike most social programs which can also be performed by State and local governments, defense program is the primary responsibility of the Federal Government and cannot be performed by other entities.

Mr. Chairman, the U.S.S.R. applies 17 percent of its GNP and 50 percent of its budget to defense. However, defense spending in the United States amounts to only 6.4 percent of our GNP and 26 percent of the Federal budget, reducing defense spending at this time to the amount proposed in the Democratic budget would be irresponsible. It is interesting to note that President Kennedy's last budget had defense spending at 9 percent of GNP and 50 percent of the Federal budget. Frankly, I don't think the defense figures in the alternative are high enough. I hope they can be increased in conference.

Second, I find it unacceptable that the Democrat budget proposal would increase taxes by $54 billion over the next 3 years under the premise that it would be used in reducing the deficit and that no more social spending reductions are available. Who are they trying to fool. This has already been tried and what occurred was increased social spending and larger deficits. Moreover, Federal revenues are already projected to increase from $776 billion in fiscal year 1986 to $844 in fiscal year 1987 even without a tax increase due to strong economic growth. The electorate decided in the 1984 election that deficits should be tamed through spending cuts and not tax increase. Maybe some of my colleagues need to be reminded of that again this year. Mr. Chairman, I urge my colleagues to oppose the House Concurrent Resolution 337 and support the Republican alternative.

□ 1330

Mr. GRAY of Pennsylvania. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. LATTA. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. GRADISON].

Mr. GRADISON. Mr. Chairman, I am sure there will be an unreal quality about the debate on the Republican substitute. Those who favor the Democratic version know its weaknesses: that it is too high on taxes, that it is too low on defense. And they know their numbers won't hold up in conference with the Senate. Privately we are being told by Democrats about their own plan: "not to worry, more realistic figures will be agreed to later."

But, why wait? Why go on record in favor of numbers that cannot be defended on this floor to say nothing of back home? We can vote now for the right numbers. We can vote now for numbers likely to come out of conference. We can vote now for a truly bipartisan plan.

Let there be no mistake. The Budget Committee has not brought us a bipartisan budget. I suppose that's because they don't want one, although it may be because they don't know how it's done. It's not very difficult. It can be done as we've seen in the other body which approved a truly bipartisan plan by a 3-to-1 margin.

It's puzzling to this Republican Member to see Democrats in the House adopt a party-line approach to the budget rather than following the example of their Democratic counterparts in the other body. Here, of course, we have a blatantly partisan document developed with absolutely no input from 182 duly elected Members of the House who were left out only because they happen to be Republicans.

Our plan has already been well-described. It reaches the Gramm-Rudman deficit target for the next fiscal year without a tax increase while providing $293 billion in budget authority for defense, less than the other body and far more than the Democratic plan—a level adequate to fund 2-percent real growth in defense beyond the postsequestration level and to allow for a 3-percent military pay increase. This is done without a tax increase. The Committee bill—while appearing to raise revenues to cut the deficit—actually raises a pool

of money almost certain to be used to pay for higher spending.

Mr. Chairman, the substitute deserves the support of the House. I strongly urge an "aye" vote.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 5 minutes to the gentleman from North Carolina [Mr. HEFNER].

Mr. HEFNER. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I would just like to point out a few things here.

First of all, I guess the overriding difference is over the defense numbers. But if you look at the defense numbers over a period of 3 years out of a defense budget of over $800 billion, there is only a $17 billion difference in the substitute and the committee bill. I sit on the Defense Subcommittee and I know this is absolutely not going to devastate our defense effort around the world. About $1 billion the first year will come of my subcommittee, which is military construction which deals with the quality of life.

So what we have to do to meet these goals is we will have to set priorities from the Pentagon, which they have absolutely refused to do, and they talk about the wolf being at the door and setting no priorities and throwing out a bunch of strawmen.

Now on the substitute, Mr. LATTA pointed out what their budget does do. Some of the things the gentleman left out that the budget does the gentleman did not explain to us.

For instance, in international affairs, the substitute has $1 billion over the committee markup. And to get these moneys, we go to areas like conservation and weatherization for the poor, hoping that we will have a nice warm winter this year so we can have the money to put into the foreign aid account.

On filling the strategic reserve, the cut this. If it is a good buy at $35 a barrel, it seems to me it is a better buy at $15 a barrel to fill up to give us some assurances against another Middle East crisis.

We also go to recreation fees. Mr. LATTA said we had some user fees, and what have you. To get to our numbers and add this billion dollars to international affairs, we go to some areas like recreation user fees, so that you can pay to go to your parks like Yellowstone and down into the Smoky Mountains and places like that.

Mr. LATTA also said in his substitute that they had put in some extra money for Headstart. The substitute adds back the Gramm-Latta money which is $47 million, as compared to the committee's Headstart Program, which everybody agrees is a good program, we add $158 million. I assume some of these moneys are going to be used to get this extra billion for foreign aid.

Income security. On subsidized housing, we have a cut in half, $4.13 billion or 45 percent in funding for subsidized housing. We have not done any of this in the past few years, very little. We had $9.77 billion, which would provide for about 100,000 new units, which leaves us still very, very short.

It seems that our priorities are not in order on this substitute.

The committee has worked very, very hard to put together a package that we believe is responsible and a package that the American people will support.

If you want to talk about new revenues, let us talk about the revenues for a bit. You have some revenues in your package, just as we do in our package. We assume in your package that you have what the President calls revenues. It is not taxes, it is revenues, and you use it.

We have fenced the difference in the President's number and the Senate numbers and say you are not going to use this for defense, you are not going to use it for domestic programs. If it is used, if the President sees fit to sign whatever compromise comes about, if you see fit to use this, you will use it for debt reduction or you will not use it.

On the package that was passed by the other body, if you go to conference, and you talk about going to conference, with your bill, they cannot reconcile their bill with your bill unless they use all these numbers, because they use every dime of the revenue.

So that is a false assumption, and it is a strawman that you threw up to try to pass this budget.

We have revenues. We claim nothing more than what the other body has claimed. We used the President's numbers in a responsible manner. We have gotten below the $144 billion number without using any of the taxes, and we have a little bit of a hedge in case our numbers do not prove to be exact because of inflation or what have you. We even have a little hedge blow the $144 billion number.

This is a budget that is responsible. You can defend it whether you are a conservative, moderate or liberal. Nobody likes the entire package. Nobody likes all of any of the packages that have been offered. But this is a responsible package and it merits the respect and the support of the Members of the House. I hope that you would reject the substitute and vote for the committee package.

Mr. LATTA. Mr. Chairman, I yield 5 minutes to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of the Republican substitute.

Before I speak in favor of the Republican substitute, let me just inform my colleagues that I have a fact sheet in the rear addressing the claim that the Democratic budget is the result of a bipartisan effort. Perhaps there are some closet Republicans among the Democrats; otherwise the claim of bipartisanship is preposterous.

During our markup session a member of the other party called the budget resolution a "political document." Apparently politics dictates our actions instead of the good of the people. I sincerely regret this lack of bipartisanship but do believe we can achieve bipartisanship with our Republican alternative.

Since the Democrats on the committee would not talk to us, we decided to formulate an alternative knowing what we could expect from the Democrats: higher taxes and lower defense spending, the Republicans on the committee met with members of each authorizing committee and members of the appropriations committee, and we held several Republican conference meetings to discuss a possible alternative.

There were certain parameters within which we conducted our deliberations. First, an alternative may not be necessary if we could support a Senate plan or a House Budget Committee plan. It is clear that we can do neither. Second, our alternative would not, could not, please everyone. We were not drafting a document to please one faction of our party, or one House of Congress. We were drafting a responsible budget for our Nation. This budget is a responsible budget with real and accurate numbers, not gimmicks. If this House passes the Republican alternative, you can be sure that what you see is what you get. If you pass the Democratic Budget, some of your special programs are going to suffer cutbacks which you don't see anywhere in their document. I guess the philosophy of the Democratic Budget is what you don't know can't hurt you. Don't be fooled.

I will predict that, even if we do not pass the Republican alternative, the final budget resolution adopted after conference will look very much like the Republican alternative. It will look like our alternative because we are right on tax policy, because we are right on the defense numbers, and because we have been honest with the American people about programs that are necessary and programs that do not deserve to be continued.

What is the real difference between the Republican and Democratic Plans? Taxes. The Democratic budget contains a major tax increase and the Republican budget holds revenue increases to those requested by the

President. I believe the American people reject the notion that higher taxes are necessary to reduce the deficit. The Democratic budget calls for a $54 billion tax increase over 3 years. This would push the overall tax burden to 19.6 percent of the GNP. Do we want to return to the days of President Carter?

Don't think for a minute that these taxes will be used only for deficit reduction. Our colleagues on the Budget Committee demonstrated their commitment to this goal by accepting amendments to increase spending but rejecting every amendment offered to decrease spending. Wait until the authorizing committees see this pot of revenues.

The Speaker of the House said that he would not accept increased revenues unless he had bipartisan support. Mr. Speaker, the message is loud and clear: There is no bipartisan support for increased taxes. Furthermore, the President has repeatedly stated that he will veto any legislation calling for higher taxes.

The second difference is defense. The defense figure in the Democratic budget is simply unreasonable. They have proposed $285 billion in BA which is $2 billion less than the post sequester 1986 level of $287 billion. It is $6 billion less than current services. Combined with cuts in fiscal year 1986 this budget represents a 2-year decline of 12 percent. In addition to this being below a nominal freeze, the Democrats have erected a fence around $3 billion of this BA. This in essence is an impoundment of funds. I thought the other party was against the impoundment procedure.

The Democratic budget would mean a $4.7-billion cut in military personnel; $4.9 billion in O&M; $6 billion in procurement; $2 billion in R&D, testing and evaluation. The Democrats during committee markup said they did not intend to cut the personnel account. If this is true then the effects of the budget would be even sharper reductions in other accounts: $4.6 billion in O&M; $9.2 billion in procurement; $3.3 billion in R&D.

This budget document represents a 22-percent reduction in R&D funding from the President's request and a 12-percent reduction from the CBO baseline. What would happen if Congress accepts this drastic reduction in R&D funding? It would have a substantial negative impact on major weapons systems. The Midgetman missile, Trident II missile, the Stealth bomber, and SDI would all be subject to elimination or, at the least, drastic reductions.

Should the Defense Department decide to continue funding these systems we would force upon them the same inefficient development practices that we have all criticized. Stretchouts in weapons systems procurement would result in delayed deployment and also increased costs of production.

The Democratic plan for defense as written is not that much different from sequestration. I think we all agree further sequestrations are unacceptable for other programs and it should be unacceptable for the Defense budget. I know many of my Democratic colleagues do not support the defense numbers in their party's budget. My friends, there is an alternative which you can support.

Mr. Chairman, these are the major differences between the Democratic budget and the Republican alternative but there are some other differences as well. The Republican budget actually terminates some programs. Can you believe it? Some Members of Congress actually have the gall to terminate some programs. My friends, if we cannot cut a single program in the face of tremendous deficits, we don't deserve to be here. These terminations do not affect essential programs but rather trim the deadwood from the budget which various special interests are able to maintain. When I meet with groups, I tell them if they want more money from the Federal Government, the answer is "No." I suggest my colleagues try this approach. It is an honest assessment of our ability to provide greater services in times of tremendous deficits. Maybe girls learn to say "no" better than boys.

I urge my colleagues to support the Republican alternative, a budget which I sincerely believe Republicans and Democrats can support and achieve a true bipartisan budget.

□ 1340

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 4 minutes to the gentleman from New York [Mr. DOWNEY], a member of the committee.

Mr. DOWNEY of New York. Mr. Chairman, probably the most astonishing thing about the Latta substitute is what it says about defense. Imagine the Latta substitute 3 years ago or 4 years ago. The Republicans who are offering it today would have said that it drastically harms defense.

What the Republicans are saying as loudly and as clearly as possibly can be said is that the New Year's Day defense spending binge is over. But it is time for us to recognize that defense spending has to be brought into balance with domestic spending. The Republicans do that and I congratulate them for doing it.

The point that Mr. LATTA has made about the fact that if their substitute is not accepted that this will somehow deeply affect our defense posture bears closer scrutiny when we take a look at the numbers. The differences between what the House Budget Committee has produced and what Mr. LATTA has produced is remarkably small when it is viewed in a 3-year context. Indeed, the difference in outlays for fiscal year 1987 is $3.8 billion, 1.4 percent, and over 3 years it is $18 billion, and a difference in 3 years is less than 2 percent. It is pretty hard to assume that we are going to have to make the drastic cuts in personnel and in weaponry that Mr. LATTA talks about with a 2-percent difference in budgets.

The reality is quite clear. The House of Representatives is most reflective of American public opinion. And what the American people have been telling us about defense spending is that "We want a strong defense but we think we can have one, in fact we can have one, by spending a little bit less money and spending it more wisely."

What we attempted to do in the Budget Committee was very simple. The sinew of American defense strength is the soldier, the sailor, and the airman. We want to make sure that they get absolute increases in pay, that they are trained properly, and that they have the money to operate the equipment that we have given them over the last 3 years. We have done that in our budget.

What we are saying, however, in terms of procurement and in R&D and in investment accounts is that we have grown too quickly, we have grown too fast, and we have not gotten a dollar's worth of defense for a dollar's worth of spending.

What we do here is set a pause in defense spending for 2 years, last year and this year, next year potentially, so that we can lay the groundwork for slow and steady increases in defense spending in the out years. That is what makes sense. It is clear to me that if we are to provide for a strong national defense, you cannot have the wild gyrations that we have seen in the past. In the 1970's we saw periods of negative defense growth, and in the last year of the Carter administration and in the early years of the Reagan administration we went from 2 percent to 12 percent real increases in defense. We did not have the money to pay for it, and force-feeding the system has resulted in weapon systems that cost too much.

This is never an easy thing to say when one comes, as I do, from a defense-contracting area. But on Long Island, as in the rest of the country, we understand one thing, that a national defense is one that has a balance between spending for people and spending for arms. We have achieved that balance. We have even gone so far as to understand that the Gramm-Rudman dictates of 50-50 cuts should be mirrored in our budgeting here. We have done that. Indeed we have gone even a little further by providing defense a little richer mix than domestic spending.

The House budget provides for the national defense. It provides for a lower deficit. It deserves, richly so, the support of all of the Members here today because it achieves, at last, the balance that we ultimately will need.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 3 minutes to the gentleman from Oregon [Mr. DENNY SMITH].

Mr. DENNY SMITH. Mr. Chairman, I rise in strong support of the Republican alternative budget. I think it is a good budget. It is a consensus budget. It is a fair budget and it is a budget that deserves the support of my colleagues on both sides of the aisle.

This alternative budget represents a sound and reasonable fiscal plan. It represents a lot of hard work, a lot of compromise, and a lot of input from every Member on our side of the aisle.

What separates this budget from the budget passed by the Budget Committee?

First, if you look at our alternative, you will not find a tax slush fund in the Republican budget. There is no laundering of American tax dollars here. This alternative contains half the revenue increase of the Democratic committee budget.

If you vote for the substitute, you can go home tonight knowing you tried to limit the tax burden on working Americans for next year. If you vote for the committee budget, you ought to buy yourself a shovel so that when you do go home this weekend you can spend your time trying to shovel some of that tax money. If all 435 of us had shovels, we could not shovel that much money into the Treasury in 10 years.

On defense, the defense spending level in the alternative before us is $293 billion; $293 billion represents a freeze on defense spending at the current level.

For my colleagues on the Democratic side of the aisle who believe that $293 billion is too much to spend on defense, I invite them to enter into the RECORD today a list of the defense projects or military bases from their own districts that they would like to see cut or closed to bring us in under the $293 billion level.

For my colleagues on my side of the aisle who believe $293 billion is too little to spend on defense, I have but one message: Our party, like it or not, has got to wean itself away from the myth that you can equate a strong defense with a strong defense spending level.

Very simply, it is what we get in return for defense spending that gives us our security—$293 billion for defense spending in 1987 is a workable, reasonable level.

I urge my colleagues to support the alternative budget before us. It is responsible and it is fair.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 8 minutes to the gentleman from Kansas [Mr. SLATTERY], a member of the committee.

Mr. SLATTERY. Mr. Chairman, I rise to support the committee resolution, and to oppose the Latta substitute.

The committee proposal represents a major change in fiscal policy.

We are suggesting real, strong, effective action to deal with deficits.

It represents a renewed commitment to America's kids.

We are proposing a new children's initiative, designed to support our youth, and therefore our future.

It represents an important moment for the Democratic Party.

We are embracing a new fiscal realism, combining spending restraint with some wise investments.

Our deficit, in fiscal 1987, is almost $24 billion below the President's

Our deficit is significantly below the deficit in the Latta substitute.

And our deficit, in the coming 3 years, is almost $80 billion below the deficits recommended in the President's proposal.

So I say to my colleagues, if you remember anything, please remember this:

The committee proposal authorizes almost $50 billion less spending than the President's budget, over the next 3 years.

Certainly, I do not agree with every provision in the budget resolution. I doubt if anybody does.

But we live in a new fiscal world.

We live in a world of hard choices, a world of difficult decisions, a world that requires honest compromise.

In the past, I have criticized the President, because too often he has measured our commitment to national security by how much money we are willing to throw at the Pentagon.

In the past, I have criticized my own party as well.

Too often we measure our commitment to social justice by how much money we are willing to throw at domestic problems.

In the process, both parties have avoided the difficult choices.

But today, in the pending proposal, we have made some of those choices.

We have reported a budget that is credible, honest and fair.

I believe the committee resolution strikes the appropriate balance.

Our deficit is well below the Gramm-Rudman target.

Our revenues are modest, and reasonable.

We recognize the crisis in rural America, but we also recognize that agricultural spending, like all spending, must be brought under control.

And contrary to what some might suggest we do not cut defense spending in fact, we increase defense outlays by almost $7 billion from fiscal 1986.

I am confident that the conferees will agree to reasonable levels of defense spending.

Mr. Chairman, we have included in the committee proposal a new children's initiative.

This is a major difference between our proposal and the Latta substitute, which does not, and which in fact would cut many children's programs.

America's children represent our hope, our future, and our strength in the coming decades.

America's children did not cause the deficit.

But they suffer from budgetary neglect.

Today, as we debate: 13 million American children live in poverty; almost one-fourth of all American children are poor, which is a 25 percent increase since 1981; over half of the children of female-headed households are poor.

For these children, we provide additional support for Head Start, compensatory education, maternal and child health care, and Indian education.

I believe that cutting programs for children, which the Latta substitute will do—is the wrong thing to do.

I believe that increasing our commitment to children, which the committee proposal suggests, is the right thing to do, the smart thing to do, and the cost-effective thing to do.

For every $1 we invest in prenatal care, we save between $3 and $11 in lower costs for medical care after birth.

For every $1 we invest in WIC, we save perhaps three times as much from lower hospital costs.

For every $1 we invest in Head Start, we save many times that amount in lower education costs down the road.

And for every child who lives, every child who learns, every child who leads a better life, we have done something important, something special, something to be proud of.

Ultimately, a budget is not a collection of numbers, but a statement of values.

By providing support for children, we make an important statement, which will have an important impact on our Nation's future.

By restraining spending generally, we deal strongly with deficits.

By dealing with deficits, we strengthen our economy—more than the President, more than the Senate, and more than the Latta substitute.

Interest rates will continue down.

The value of the dollar will stabilize at lower levels.

Exports will rise.

The level of opportunity will increase.

And our economic prospects will brighten.

For these reasons, I urge my colleagues to support the committee pro-

posal, and to reject the Latta substitute.

□ 1355

Mr. LATTA. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. I thank the gentleman for yielding me this time.

Mr. Chairman, I want to, first of all, publicly thank both Mr. LATTA and also the chairman of the House Budget Committee, Mr. GRAY, for both recognizing a serious problem that exists in the Federal Government. What is really encouraging about it is that both parties now recognize that we have serious problems in management within the Federal Government in the specific area of debt collection. We are all trying to make people more responsive and responsible.

Let me tell the Members about some of the numbers, because I think they are frankly going to blow your mind. There is, right now, outstanding to the Federal Government $60 to $70 billion in delinquent debt owed to the Federal Government. That is growing at a rate of $50 million a day.

We spend our time talking about tax increases; we spent a lot of time talking about cuts. Yet, here we have an area where we have this debt growing at absolutely incredible proportions and virtually nothing is being done to clean it up. Virtually nothing is being done to manage these programs. In fact, the credit area of the Federal Government is the most rapidly growing area of Federal involvement.

At a time when we have approximately $1 trillion in outstanding obligations that could ultimately come due on the Federal Government, we certainly need to improve our management.

Let me tell you about some of the money that is owed to the Federal Government, because I think this will drive you right up the wall; it drives my constituents up the wall.

Twenty-seven million dollars owed from people who borrowed money under the Commercial Fishing Boat Program. Sixty-eight million dollars owed from people who were paid reenlistment bonuses to continue in the services who walked away from their responsibility. Thirty million dollars that the HHS gave to doctors for free education, and they were required to serve in rural areas. They got the $30 million and they flatout walked away from their obligations.

Three hundred and seventy-four million dollars due to the Maritime Administration out of the ship financing fund. Two hundred and nine million dollars in fines in two thick books that are at least, in total, about a foot thick in money owed by companies to the Federal Government in the Office of Surface Mining.

Let me give you some of the numbers. In the Department of HHS, 35 percent of all the receivables are currently delinquent to the Federal Government. Eighty-one percent of the receivables are currently delinquent in the Department of the Interior. Eighty-two percent are currently delinquent in the Department of Justice. It goes on and on and on.

With about $1 trillion outstanding both in obligations that are due and in loan guarantees, we certainly have to get this area under control, because if we do not, we simply have a ticking time bomb that is going to blow up in our face. From 1982 to 1986, when we passed the Debt Collection Act, which has been virtually ignored across the Federal Government, we have almost had a doubling of the amount of delinquent debt owed to the taxpayers. The taxpayers want this $60 to $70 billion collected.

In Mr. LATTA's budget and in Mr. GRAY's budget there is a recognition of the problem, and we are finally going to put people on the spot, and we finally are going to demand that we have proper management of the credit and loan programs that exist in the Federal Government.

I want to take this opportunity to thank them and hope that this is just an important first step in solving this overall problem.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 9 minutes to the gentleman from Illinois [Mr. RUSSO].

Mr. RUSSO. I thank the gentleman for yielding me this time.

Mr. Chairman, a mere 6 months ago, this Congress accepted the challenge of the Gramm-Rudman-Hollings Act and agreed to take serious steps toward cutting and eventually eliminating the deficit. Among Members of Congress from both Houses, a bipartisan consensus emerged in support of a fair and equitable approach.

Gramm-Rudman was presented to us all as the cure-all for the deficit crisis. The President and an overwhelming number of Republican Members of both bodies welcomed Gramm-Rudman with open arms. In theory, they put the deficit reduction before their pet programs.

Now that it is time to live up to their commitment, their promise to the American people, they run away. Although the President committed himself to this 50–50 split when he signed the Gramm-Rudman legislation, his budget which was submitted in January, violated the spirit as well as the letter of the law.

The deficit in the President's original budget did not meet the $144 billion target. Rather, CBO estimated that it was $15 billion over the Gramm-Rudman limits. Once again, the Department of Defense underestimated the true cost of many of its programs; this time by a mere $15 billion.

Furthermore, the President's budget cuts would have come 90 percent from domestic programs, while giving a $34 billion increase in defense. Clearly his priorities were out of line with the rest of America's and his budget was defeated by overwhelming margins, both here in the House and in the other body.

I think we should also examine the budget priorities of the other body. They ignored the mandate stated by Gramm-Rudman by approving a budget document which cuts 86 percent from the domestic side, while cutting only 14 percent from defense. This is the body that said we had the answer and the way of solving the deficit crisis in America. We had to pass Gramm-Rudman, which says 50–50, and they did 86–14.

Now we are considering the Latta substitute. This plan would invest billions more in military hardware and shadowy inflationary costs. In order to pay for these unnecessary increases, the Latta budget would cut programs that have suffered the most over the last 5 years. As compared to the committee plan, the Latta alternative will provide $5 billion less for domestic programs this year and $26 billion less over the next 3 years.

The cuts come from very essential programs such as low-income weatherization, which is vital to my area of the country, child nutrition, transit, Amtrak, and scores of other programs. Clearly, the President's, the other body's, and the Latta alternatives would balance the budget on the backs of middle Americans.

They also refuse to follow the mandate of Gramm-Rudman: That 50 percent of the reductions come from defense, and that 50 percent of the reductions come from domestic spending. The committee budget, on the other hand, reaches the Gramm-Rudman targets in a fair manner: a 50–50 split.

Although we in the House may have different spending priorities, we must all agree that defense spending and domestic spending are at least equal in importance to the national well-being. Each fund is vital to programs which are essential. Our national defense is important, but so are funding programs for our children. So are education programs, job training programs and all the others which provide important services to our people.

Thus, we should treat them equally. It is not easy or pleasant to cut to the $144 billion deficit level by sacrificing programs which benefit our districts, but it must be done and our budget achieves the goal in an equitable manner.

Another advantage of our budget is that we require accountability from the Defense Department for the first time.

We ensure that funds allocated to the defense of this Nation are not squirreled away somewhere in some "inflation" accounts. As we know, the GAO estimated that over the last 5 years, $44.5 billion of moneys appropriated by Congress consisted of overestimations by the Defense Department for inflation costs—$44.5 billion. And what happened to this money? GAO conducted an investigation and could not find out where all the money went. The Defense Department also could not even tell them. So when I see my good friend from Ohio [Mr. KASICH] talk about all the moneys that are owed to the Government, and both the Latta substitute and the committee budget recognize that, I do not understand why the budget of the gentleman from Ohio [Mr. LATTA] does not recognize the fact that all this money that was given to the Defense Department for inflation was not utilized, and we cannot even find out where it went. I think that we have to deal with that, and our budget deals with it. The Latta substitute does not.

It seems to me that there are always two standards in the Congress: One standard for the Defense Department, and one standard for the rest of the programs. I do not think it is fair. Do we really think that our Nation is stronger, safer and more secure by providing a $44.5 billion inflationary windfall for Defense contractors?

The budget passed in the other body recognized this fact and admitted that over $7 billion in fiscal year 1986 alone was unaccounted for. The House Budget Committee incorporated my amendment, which requires the same level of accountability that we require in all other programs. My amendment calls on the Pentagon to give the Congress an accounting of the missing $7 billion in fiscal year 1986, as well as mandate similar accountings for the next 3 years. Finally, my amendment prohibits the use of a special 30-percent multiplier for inflation which is only unique to the Defense Department. They do not use the GNP deflator; they do not use the CPI. They use a special "Defense Department multiplier"—30-percent increase over and above what inflation is. What other department, what other program in Congress, is treated that way? We should not allow it to happen. The House Budget Committee deals with that; the Latta substitute totally ignores it. Again, a double standard. We attack social programs and let the Defense Department spend on and on. If no other Federal agency is allowed to hide funds, then we should force the Pentagon to be forthcoming and honest in its accounting. This budget starts that important process by requiring an accounting for this current fiscal year.

Our colleague, the gentleman from Virginia [Mr. SISISKY], just found out that on 12 minor weapons systems, there is a $250 million overestimation this year and over a 3-year period, it is a billion dollars.

Let me just describe one of the small weapons systems, a 9mm pistol for which the Army pays $207. However, the Air Force, for the same weapon, pays $353. Now what happens? It is not that the Air Force is going to pay the $353. What happens is, they will pay the $207, and then they will take that difference and put it away and reprogram and spend it however they want.

We need accountability in the Congress, we need that to happen, and that is why this budget is an important part, and we have to make sure that this particular amendment stays in conference.

One of the principal strengths of the committee budget is that it takes into account the realities of today's world, but it also responds to the challenges that the world may present tomorrow. With this in mind, there is no more important investment in our future than our children—they deserve health care, good nutrition, and the best education that we can provide. This budget addresses these priorities by creating a children's initiative which tries to provide a good start in life for underprivileged children.

An additional one-half billion dollars over last year's levels is provided for immunizations, child nutrition, and health programs. Over and above this initiative, the House Budget Committee provides $1½ billion for existing high-priority education and training programs. The House Budget Committee provides $500 million more than the other body did for education, training, and social service programs, $3.25 billion more than the Latta substitute, and $6.8 billion over the President's request. This makes a very strong statement about our priorities. I think that the fact that we are willing to invest in our youth, in our potential, is a basic reason why each Member should support the Budget Committee's approach.

I feel that each child is entitled to a fair opportunity at all life has to offer. If children are denied adequate health and nutritional care, chronic health problems may limit their future potential. If our children don't have access to a solid educational background, they will be denied the opportunity to enlarge their minds, to expand their horizons. They will be denied the opportunity to become productive adults and our society will be the real loser. We will have wasted our country's potential by not developing our most valuable resource—the youth of America.

The House should support this budget because it's reasonable, it's balanced, and it's fair. Our plan incorporates the basic Gramm-Rudman mandate, which is the mandate of the American people. The budget is cut, the deficit is reduced, and no one sector is asked to bear more than its fair share of the burden. We all share the pain of cutting programs which have improved our lives, but we will all share the benefits which will result in the form of a brighter economic future. Finally, I feel our budget matches the priorities of the American people. We prefer to invest America's resources accordingly: Our budget provides for a strong national defense, and insists that the Pentagon account for waste and misappropriation of dollars. We put our children first, where they should be. We provide for a strong educational system which will help develop the minds and potential of America's youth. We are committed to a healthy society and support this belief by providing for adequate health care and health research. We provide adequate funding to programs which are essential to America. I believe in these priorities, as I am sure you do, and I hope that you will join me in supporting the budget reported by the House Budget Committee.

I thank the gentleman for yielding time to me.

Mr. LATTA. Mr. Chairman, I yield 3 minutes to the gentleman from Texas [Mr. BOULTER].

Mr. BOULTER. Mr. Chairman, I rise in strong support of the Republican consensus budget offered by our ranking member of the Committee on the Budget, the gentleman from Ohio [Mr. LATTA].

Mr. Chairman, this is a very responsible budget, and I would be much more impressed with the argument presented by the gentleman from Illinois if I heard the Democratic chairman of the House Committee on Armed Services making that same argument. If he does, I will be much more impressed. I am talking about what the gentleman said concerning the unobligated balances in the Department of Defense.

The gentleman surely knows that many other departments have unobligated balances totaling about a trillion dollars throughout our Government, and that Housing and Urban Development itself has unobligated balances of even more than Defense.

Our budget, Mr. Chairman, does not give the President everything he asked for. It does not fund defense at near the level that the Senate did, but it does provide a realistic 2-percent growth, and I think that that is responsible and right.

Then, to my colleagues who represent rural districts, let me say in truthfulness and in fact that our Republican consensus budget provides more funds for agricultural interests than the Democrat budget. It includes a

$200 million agriculture credit initiative, as compared with $150 million found in the Democrat budget. Plus our budget contains another $100 million in additional ag funding for high-priority programs that are not found in the Democrat budget.

Let me just say that farmers and ranchers and ag producers of all kinds are on their knees. Their problems are traceable to bad Government policies in the past. I cannot imagine anyone, especially who represents a rural district, not wanting to vote for the Republican consensus budget.

Finally, the thing that makes me also very proud of our budget is that what you see with the Republican consensus budget is what you get. It does not contain blue smoke and mirrors, it does not purport to fence in money for deficit reduction that will eventually be used to restore spending levels, it does not try to fool the American people, it does not need to try to fool the American people. It is what the people have been asking for. It is not a continuation of the failed tax-and-spend philosophies that have devastated our economy in the past. It realistically looks at our national financial picture. It makes the kinds of reductions that allow us to meet the Gramm-Rudman target. It does so in a realistic way, paying special attention to programs deserving of special attention like defense and agriculture.

It is a budget born of hard work and hard decisions with tough decision-making, which is what I think the American people sent us here to do.

Mr. ANTHONY. Mr. Chairman, will the gentleman yield?

Mr. BOULTER. I am happy to yield to the gentleman from Arkansas.

Mr. ANTHONY. Mr. Chairman, I happen to represent a rural agricultural area, and I can safely tell you that I am going to vigorously vote against your resolution. My farmers are going broke because of Republican policies.

Mr. BOULTER. If the gentleman votes against our resolution, it will not be because of the way we fund the ag function, because it fully funds it at $100 million more than his.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BOULTER] has expired.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Chairman, I rise in opposition to the Latta amendment, for the following reasons: His amendment would cut student aid; it would cut school aid; it would cut farm aid, but it will increase foreign aid by $1 billion.

I think America should come first, and I think it comes first in the prioritizing of our dollars that are committed toward the operation of our government within our States and the world.

In addition to that, I cannot state that the gentleman from Ohio [Mr. LATTA] has not done a fine job. If you look at the President's budget and if you look at Mr. LATTA's budget, I commend him for bringing in a budget that may be within reason negotiable with the fine budget brought forward by the gentleman from Pennsylvania [Mr. GRAY], who now deserves a pat on the back after much maligning.

I would hope that both sides now get together. I am not satisfied with UDAG, revenue sharing, community development block grant money, with my unemployment. But while none of us are going to be totally satisfied, we cannot be with the situation our country faces with the deficits and some of the other problems.

While I will not perhaps be satisfied, and all Members will not be, we can work together now within a reasonable parameter reflecting the Republican issue from Mr. LATTA, and the Democrat issue brought forward by our fine chairman.

□ 1415

Mr. LATTA. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. WYLIE].

Mr. WYLIE. Mr. Chairman, I thank my friend, the gentleman from Ohio, for yielding to me at this time.

I rise in support of the Latta substitute as the fiscal year 1987 budget resolution. I believe it represents a balanced approach toward meeting necessary deficit reduction goals.

In particular I applaud the efforts of Mr. LATTA and other members of the Budget Committee as they relate to housing and community development. These programs fall under the jurisdiction of the Banking Committee.

Earlier this year, the minority members of the Banking Committee met and adopted with but three dissenting votes recommendations for programs under our jurisdiction which were then forwarded to the Budget Committee. The figures in the Latta substitute follows those recommendations, I am pleased to say.

For assisted housing the Latta substitute has $5.2 billion as opposed to $9.7 billion in House Concurrent Resolution 337. I believe that our total is sufficient if these funds are distributed through more costly effective programs, such as modernization of existing structures rather than building new ones. HUD tells us there are 35,000 new public housing units in the pipeline now. It is a total we think will provide a good housing program, meet the needs for housing, and meets the constraints of budget limitations.

In Community Development, the Latta substitute provides $2.9 billion for CDBG and $284 million for UDAG. The Latta substitute also eliminates funding for HODAG and anticipates reductions or elimination of several other small programs, along the lines of the Wylie-Bartlett substitute to H.R. 1.

The bottom line is the Latta substitute will provide as much housing and community development programs for $10.8 billion as House Concurrent Resolution 337 would for $17.5 billion.

I would like to correct a serious piece of misinformation put out by someone I think from the majority staff of the Budget Committee with reference to our budget. They attribute the Latta amendment as "eliminating available flood insurance by cutting $21 million in budget authority and $88 million in the National Flood Insurance Program."

Mr. Chairman, as the ranking member on the Banking Committee, we have authorizing jurisdiction over flood insurance. For there to be any savings attributable to flood insurance, it would have to be done through appropriated funds, and flood insurance is not an appropriated account.

The statement in the handout is not accurate. The gentlewoman from Illinois mentioned other similar misinformation.

I believe the Latta substitute is a well-rounded piece of legislation that is fiscally responsible.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 4 minutes to the gentleman from Georgia [Mr. JENKINS].

Mr. JENKINS. Mr. Chairman, I want to concentrate on two or three issues that I think are important in comparing the two budgets.

Let me say in the very beginning that I think the gentleman from Ohio [Mr. LATTA] did a reasonably good job in coming up with a substitute. It is very close, as a matter of fact, to the committee measure that we are debating. Now, I do not really understand the debate between the two, except maybe a small difference in priorities.

Now, I want to talk about foreign aid and I do not want to demagog the issue. I understand the President's need for foreign aid. I understand his problems in the world, but when you say that you do not increase foreign aid in the Latta proposal by $1 billion, you are simply in error. Foreign aid in the Republican substitute is increased by $1 billion over the Democratic bill.

Now, it is true that in that entire function you reduce the embassy security that the President asks for by about $500 million. You take it out of security and say, "Well, we'll take care of that later."

All of us know that we will ultimately provide the funds for embassy security, so you have simply increased economic and military foreign aid by $1 billion and you have cut the security

of our embassies by $500 million and taken a little out of the Export-Import Bank to make your figures work.

Well, I tell you as one Member of this House, foreign aid must take its reductions along with domestic programs. They must take their reductions along with education for our children, along with Appalachia, which you eliminate entirely.

Even the Republican Senate saved the entire Appalachia program. They did not cut it one dime. You eliminated its $100 million funding entirely and gave it to foreign aid. I do not think that is right.

You talk about rural development. You talk about rural programs. You have reduced funding for wastewater treatment through rural America. Development funds that need to be channeled into rural America to give them an opportunity for industrial growth, you have reduced it, you have destroyed it, and that thinking is in the wrong direction. Your priorities are absolutely wrong.

For you Members on the Republican side from oil States, you have been telling me that you have problems. You are telling me that stripper wells are going to be shut in, that we will never open them back up. Well, the House Budget Committee believed you. You know what we did? We said now is the time to give some help to Texas, Louisiana, and Oklahoma. We will buy that stripper well oil for the strategic petroleum reserve, or SPRO. We will add $300 million to do that. It is good for our national security. You take it away in the Republican substitute, so if you are from Texas, Louisiana, and Oklahoma, when you vote for the Latta substitute you are taking away the money from SPRO for stripper well oil. Do so if you wish. I do not think that it is good common sense to do that.

If you are from any of the 13 States of Appalachia, from North Carolina, Pennsylvania, New York, and all the rest, you now have a measley $100 million for the entire program. This substitute eliminates it entirely.

When you vote for the Latta substitute, I want you to go back home and say, "I thought that foreign aid was so important that I wanted to do away with Appalachia." I want you to say that in your districts. I want to hear you say it. I would love to hear you say it.

I say to my friends that this is a good resolution. We have worked hard. It deserves bipartisan support. I would hope that Members from both sides of the aisle will think about the differences in these two bills. I would hope that we would get a lot of Republican votes.

Above all, I would hope you would think about it before you vote. If you do, I am convinced that you will vote against the Latta substitute and for the committee resolution.

Mr. LATTA. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Chairman, most Americans consider a budget resolution to be the law of the land. It isn't, of course.

In this House a budget resolution is, first, a political platform, and, second, a wish list, or a letter to Santa Claus. The budget resolution is a dream, often based on erroneous or obsolete assumptions, shot full of now-you-see-it-now-you-don't numbers.

The House Budget Committee's proposal is as close to the House Democratic platform as the House Democratic caucus could make it. Although a partisan budget is unfortunate, I see no reason to be embarrassed about it. A bipartisan budget would be better, but that is not in the nature of this body's majority group.

It does seem to have been built in a partisan manner in one day. That seems to be a remarkable achievement, until it is examined carefully. Then the flaws become apparent. Inflation estimates for revenue purposes are over 4 percent. For COLA's, the inflation estimate is only 2 percent. That is having one's cake, and eating it, too.

Revenue sharing, it seems, is either in or out of this budget. Actually it is both in and out. That's not a bad phrase to describe the whole budget.

The one day wonder is, in short, infected by the same diseases which have plagued its predecessors. It is based on questionable assumptions, spends too much, and raises taxes too much.

It is important to know what the budget resolution is, and is not. The resolution does not change the law. The letter to Santa Claus has no effect until a reconciliation bill is passed. Reconciliation, like winning, is not everything, it's the only thing.

It has already been said here that the Democrat budget and the Republican substitute are relatively close, both for fiscal year 1987 and for the 3-year period. That stretches my definition of "close" a bit. I see major differences.

The Democrat budget has $13 billion in new taxes. The Republican budget has $6 billion. That alone is enough of a difference to command my attention and my vote.

The defense figure in the Democrat budget comes closer to my ideal than the Republican version does. I prefer a freeze, not only for domestic programs but for military programs as well.

Remember, however, reconciliation is the keystone of the budget. The Democrats reconcile $22 billion in savings while the Republicans reconcile $30 billion. In the most important test of all, the Republican substitute finishes $8 billion ahead.

I don't think the Democrat budget is all bad. It's a little expensive, a little fuzzy, but like the glass of water, it is half full compared to past years' budget. Compared to the need, it is half empty. Still this year's Democrat budget is much better than the empty glasses they have been bringing in here since 1975.

I think the Democrats ought to be encouraged to do even better in the future. One way to teach them is by example. The House should pass the Republican substitute. I believe the Democrat budget next year would be substantially improved if we did.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. PANETTA], a former member of the committee.

Mr. PANETTA. Mr. Chairman, first of all, I want to commend the chairman and the members of the Budget Committee for the work that they have done on this budget resolution. It is never easy. It never will be easy. There are certain things that all Members hope that budget resolutions can be, that will never be. They can never be 100-percent accurate or 100-percent certain or 100-percent perfect. You have to depend on assumptions to determine where you can go as far as the numbers are concerned.

You will always have problems of enforcement, whether it is user fees or whether it is asset sales or tax increases or defense outlays. It can never be perfect in terms of balancing everybody's priorities.

But the test of a budget resolution is not what it can never be, but what it can be.

There are three basic guidelines to judge a budget resolution. The first and the most important issue in a budget resolution is what does it do about the deficit? That is the name of the game in a budget resolution, for two reasons, because it is right and it has to be done to reduce the massive deficits that are facing this country, but also because it is important this year and in the next 5 years to avoid the trigger that has been built into the Gramm-Rudman law. Whether it is constitutional or not, the fact is that the trigger and the deficit target we have to hit to avoid that trigger remains the same.

The lowest deficit number has the best chance of avoiding the Gramm-Rudman trigger. The committee budget resolution has a deficit of $137 billion. The Latta substitute has a deficit of $144 billion. That is a difference of $7 billion. Now, $7 billion could determine whether or not the trigger on Gramm-Rudman is pulled.

The deficit projections by both OMB and CBO indicate a deficit next year

of somewhere in the vicinity of $174 billion.

There are now economists who are looking at the state of the economy and assume that the deficit could be as high as $180 billion to $190 billion.

Obviously I and others in the House would prefer a lower deficit number, but the fact is that you have here a cushion against the Gramm-Rudman trigger and it is essential to protect that.

Second, is the resolution balanced and fair in terms of its priorities? What is fair? Again we need to look at the formula established under Gramm-Rudman that was passed by a majority of the Congress. It was signed into law and it remains the law in terms of how we judge the issues that come before us.

Gramm-Rudman requires that in any deficit reduction you take 50 percent from defense and 50 percent from domestic spending. Why? Because defense over the last 5 years has increased $150 billion, almost 80 percent.

At the same time that was happening, we cut domestic spending by $300 billion. So the point of Gramm-Rudman is this: If you want to deal with budget issues, everybody, defense and domestic, has to play on the same field.

□ 1430

The committee resolution does that: $8 billion off of defense; $8 billion off of domestic spending. The Latta substitute takes $4 billion off of defense and $12 billion off of the domestic area—75 percent of the total deficit reduction is from the domestic side.

That says it all. what we are doing is again taking from health care, from education, from child nutrition, from AFDC, from housing, in order to pay for increase on the defense side.

The last point is: Is it enforceable? We know there are going to be compromises. We know there are going to be changes in the conference held with the other body. The committee resolution gives us the best chance of coming back with a compromise that will be enforceable on both the Senate and the House side.

The Latta substitute gives those issues up. It gives up on defense, it gives up on the domestic area, and it gives up on revenues. The committee resolution, in my mind, meets, those tests. It reduces the deficit, it is balanced and fair, and it is enforceable.

For those reasons, the committee resolution ought to be supported and the Latta substitute rejected.

Mr. LATTA. Mr. Chairman, I yield 3½ minutes to the gentlewoman from Connecticut [Mrs. JOHNSON].

Mrs. JOHNSON. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of the Republican alternative and oppose the Democrat budget. I am pleased that I have the opportunity to follow my colleague, the gentleman from California [Mr. PANETTA], because indeed, I believe he has asked the critical question, but in considering it, I come to exactly the opposite conclusion.

What are the prime tests by which a budget can be judged? In my mind, they are twofold: First, what priorities does the budget set; and second, will it work? I think by both of those measures, the Republican budget is far superior to that offered by the House Budget Committee.

First of all, as to priorities, the Republican budget, as has been pointed out, relies on minimal tax increases and does not solve a whopping $13 billion of our $38 billion problem with tax increases—which I might remind my colleagues are unlikely to pass in time to balance the 1987 budget.

Second, by anyone's measure, if we are trying to save $38 billion, we have to look at what we actually cut. The Democrats' budget cuts $22 billion, the Republicans' cut $30 billion through carefully thought-out initiatives. This year particularly, we should strive to meet Gramm-Rudman's tax cuts without tax increases because we have identified spending cuts that we have agreed to in the past but not yet actually accepted. This and the generally strong economy make this a year to solve our problems with discipline and thoughtful action.

But I want to get to what I consider the heart of this matter. Will it work? Will the committee's budget work? We all voted for Gramm-Rudman. This year life is going to change for us. In August, somebody outside our process is going to look not at our rhetoric here today but at our actions tomorrow. What will we actually have accomplished by August on this important project of deficit reduction that is so important to the American public and to the future of our Nation?

When that snapshot is taken in August, it will not be judged by what we have said; it will be graded on the basis of what we did. So I ask you: Can the budget of the committee be actually implemented so that in August our appropriation actions will have brought us in compliance, with Gramm-Rudman? I don't believe the House budget can be so implemented. Take, for example the foreign aid function. In this function, the House Budget Committee's budget says cut foreign aid accounts 10 percent, then cut $650 million from unspecified accounts in the same function, then cut an additional 2.7 percent in discretionary accounts, and then add back for diplomatic security? What does that mean? Where is the policy here? What judgments are being made about America's foreign policy interests and obligations? This is not a budget. It's double talk that could end up endangering our closest allies.

If you look, second, at the general science budget, you will see another serious problem with this budget. The committee claims savings for things that the Congressional Budget Office has already specifically said will not accumulate savings.

So from the point of accuracy, of specific proposals, of being an instrument and guide for achieving the goal of deficit reduction in America, and avoiding the mindless formula budget of Gramm-Rudman, only the Republican budget document will do what America needs, do it honestly, do it fairly, leave us with protection for our seniors on the matter of Medicare copayments, provide needed support for our farmers, a responsible defense, budget that will serve our interests, and in general serve America in the years ahead. I commend the ranking member of the Budget Committee, Mr. LATTA, on his outstanding work and urge my colleagues to support the Republican budget.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 3 minutes to the distinguished chairman of the Committee on Ways and Means, the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. I thank the gentleman for yielding this time to me.

Mr. Chairman, the Budget Committee has done a good job of fashioning a budget resolution for fiscal 1987 and I commend Chairman GRAY. It meets the Gramm-Rudman deficit targets. It limits reductions in domestic programs and protects safety net, low-income programs. It provides for a reasonable level of defense budget authority.

This budget calls for revenue increases similar to those proposed in the budget passed in the other body, which is the correct policy.

However, I have steadfastly maintained that Democrats should not raise taxes without the support of a majority of House Republicans and the White House. When the Committee on Ways and Means reports a bill to raise revenues, it must be a bipartisan bill, not a bill supported only by Democrats. The President must realize that he will not get his way on defense and military foreign aid without participating in a balanced approach which includes revenues.

The resolution before you requires the Committee on Ways and Means to achieve deficit reduction of $11.3 billion over the next 3 years. There is an additional $26.4 billion of revenues in the Budget Committee resolution that are unreconciled. I would have preferred a vote on these revenue increases in order to test the level of bipartisan support for increasing revenues. Let me say most emphatically that it is my intention and expectation

that the Committee on Ways and Means will not raise revenues beyond those required in the reconciliation instruction, unless a majority of Republicans support such an effort. This is the position of the leadership and Chairman GRAY, as well as my position.

I urge your support for the budget resolution. I believe it offers us the best chance of achieving the correct policy, in a politically acceptable manner. I hope that the Budget Committees in conference can work out an agreement that is acceptable to both parties and one which the President will support.

Mr. LATTA. Mr. Chairman, I yield 3 minutes to the gentlewoman from Maine [Ms. SNOWE].

Ms. SNOWE. I thank the gentleman for yielding this time to me.

Mr. Chairman, if anyone is feeling a certain sense of deja vu, there is good reason. This House is matching step for step the path we traveled on the budget resolution last year, and it is a path that led us straight to Gramm-Rudman. If we do not adopt the Republican consensus budget, we will be right on the path this year to sequestration.

Let me first tell my colleagues why the Republican budget is a superior one. It is not a 72-hour special. It reflects 5 months of hard work, tough decisions and compromises on the part of many of my colleagues.

This budget provides us with real reductions that translate into genuine reductions in the deficit. The revenues it raises are specific as well as realistic. It does not rely significantly on tax increases to get to the $144 billion. And most importantly, this budget provides the proper balance between defense and domestic programs.

We, as Republicans, have met our responsibilities under Gramm-Rudman by presenting to this House today a sound CBO-verified budget. The budget brought forth by the majority on the House Committee on the Budget, however, is every bit the progeny of last year's similarly flawed Democratic budget. Adoption of Gramm-Rudman is the direct result of this kind of fiscal irresponsibility. Once again, their budget has not been verified by the Congressional Budget Office, but if I were introducing it, I would not want CBO to look at it, either.

It is riddled with inconsistencies and peppered with numbers of dubious parentage. First and foremost, we all know it gets an $8 billion bonanza by changing the CBO baseline deficit from $182 billion to $174 billion. I can only wonder whatever happened to the majority's insistence that we should start using the CBO's baseline and to have CBO establish that baseline.

Second, they get a discretionary freeze and they achieve greater savings in their discretionary freeze than we do, and yet they start at a lower baseline.

For example, in function 450, our freeze saves $20 million in outlays; their freeze savings $100 million in outlays.

□ 1440

Another example, in fuction 300. We save $252 million in outlay savings; they save $450 million in outlay savings.

So while a reasonable person would expect that a discretionary freeze would achieve indentical savings in identical categories, the Democratic budget confounds that expectation.

In addition, they provide for $8 billion in unspecified revenues. We all know that the budget presented by the Democratic majority in the House Committee on the Budget has no specific underpinnings. We also know that the budget document does not require us to make line-by-line changes, but the authorizing committees have a right to know where they are getting their dollars.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I include in the RECORD at this point a letter from Dr. Rudolph Penner of the Congressional Budget Office.

CONGRESSIONAL BUDGET OFFICE,
Washington, DC., May 13, 1986.

Hon. WILLIAM H. GRAY, III,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: At your request, the Congressional Budget Office has reviewed H. Con. Res. 337, the First Concurrent Resolution on the Budget for Fiscal Year 1987, as reported by the House Committee on the Budget. Using CBO's February economic and technical assumptions, we estimate that the resolution is consistent with the deficit target for fiscal year 1987 established in the Balanced Budget and Emergency Deficit Control Act of 1985.

With best wishes,
Sincerely,

RUDOLPH G. PENNER,
Director.

Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Chairman, I rise in strong support of the committee's budget resolution.

This resolution deserves the support of every Member of this House, for several important reasons. This budget makes a serious and immediate downpayment to reduce the deficits that constitute a major threat to the long-term fiscal security of this Nation.

Unlike past budgets, however, our Budget Committee has written a proposal which equitably reduces Federal spending. Our cuts are divided almost exactly 50–50 between defense and domestic spending, as directed by the deficit reduction law. In the past, our budgets imposed enormous domestic cuts, awarded huge increases in spending to the Pentagon—but paid for them by increasing the deficit. We are all indebted to former OMB Director David Stockman for his cogent analysis of how this deceitful strategy was practiced by the White House and OMB over the last several years.

We should support this budget for another reason, too. For after years of mindless retreat, the Congress must refuse to continue to ratify additional cutbacks in successful programs that provide essential health, nutrition, and education services to the people we represent, including children, who are the poorest of all Americans.

As the chairman of the Select Committee on Children, Youth, and Families, which I am honored to chair, I am especially pleased that the House is going to pass a budget which recommits this Government to intelligent and humane domestic policies that invest in the future instead of stealing from it to pay for the Pentagon and the deficit.

POVERTY, ILLNESS AFFECTING CHILDREN

We are all paying—and we will continue to pay—an enormous price for our habit of stealing from the future:

Three million newly impoverished children since 1979, the greatest 5-year increase in three decades;

Over half of the black preschoolers are inadequately immunized against childhood disease;

Postneonatal mortality and low birthweight rates are rising, in a country with the most sophisticated medical technology and best trained practitioners in history.

And what was the response of the administration? They proposed cutting children's programs $5 billion below the inadequate services we currently provide.

Those cuts would be in addition to the nearly $3 billion cut from children's discretionary programs in the last 6 years.

The staff of the House Select Committee on Children, Youth, and Families has prepared a summary of the real cuts in basic support services for children since 1980, which I am submitting for the RECORD at the end of my remarks today. This analysis demonstrates that each year, our most vulnerable children are protected by a bipartisan Congress from the President's budget.

Mr. Chairman, there is something very wrong when the leaders of this Nation look down from their positions of power and privilege and tell the poorest, the sickest, the most vulnerable and powerless among us that they must sacrifice more.

There is something very wrong, Mr. Speaker, when year after year, the

greatest burden for reducing the deficit must fall on those who have given up the most and who have the least.

There is something terribly wrong when the defenseless must sacrifice food, education, and housing so that the Defense Department can spend $800 million of our tax money every day—and far more if the administration gets its way.

This year, we are going to reach different conclusions because of Gramm-Rudman—which I didn't support, but which is the law—because of the size of the deficits, and because of the failure of the administration to propose serious and equitable ways to reduce the deficit.

This year this Congress and the American people are going to have to do something that I have been calling for since I first proposed the pay-as-you-go budget back in 1981: We are going to have to make tough choices.

And I believe that when this Congress, like the Budget Committee, makes those tough decisions, we will not abandon our children, our families, and our poor.

One of the important reasons for that change is that these programs make good economic sense, as well as good social policy. All the studies, including those by this administration, prove it.

SOUTHERN GOVERNORS' INITIATIVE

Let me quote from a recent address by the distinguished Governor of the State of South Carolina, Richard W. Riley, who has been an outstanding leader in promoting cost-effective health policies in his State and throughout the South:

FROM REMARKS OF GOV. RICHARD W. RILEY (SC) BEFORE NATIONAL GOVERNORS' ASSOCIATION HUMAN RESOURCES COMMITTEE, FEBRUARY 24, 1986

In Virginia, women who received comprehensive prenatal care had a low birth weight rate of 73.7 per 1000 live births, in contrast to 262.5 for those without prenatal care—a three-fold difference.

In Kentucky, the perinatal death rate for women with prenatal care was 15 per 1000, compared to 77 per 1000 for those without prenatal care.

In Missouri, babies born to white women who had prenatal care had a prematurity rate of 50 percent lower than those born to white mothers who had no prenatal care.

The cost effectiveness is clear.

The American Academy of Pediatrics reported in 1984 that cost effectiveness estimates range from two to ten dollars saved for every dollar spent on prenatal care.

Oregon officials found that cost of treating five high risk babies would pay for providing prenatal care to 149 women.

The Virginia State Perinatal Services Advisory Council found that by providing better prenatal care, the state could save $49.8 million in state expenditures for long term care for the mentally retarded per year.

The California Department of Health Services estimates that $6-7 million in neonatal intensive care expenses for 3700 low birth weight babies could have been saved if their mothers had had prenatal care. This care would have cost only $2.8 million, less than half of what the immediate intensive care costs were. If one were to include the long term care costs, the savings would be even higher.

Michigan state officials found that over six dollars could be saved on every dollar spent by the state to provide prenatal care to 14,000 uninsured women. Without prenatal care 6000 of the babies born to these women would need NICU care. With prenatal care, at least 1500 of these babies would not need neonatal intensive care services, saving over $30 million.

Colorado Department of Health officials, considering the savings prenatal care could bring by prevention of prematurity, estimate that nine dollars would be saved for each dollar spent for prenatal care. If long term costs were included, the savings could be as much as eleven dollars for each one dollar spent on prenatal care.

In order to provide all poor women whose incomes are below the federal poverty level with access to prenatal care services, we need to amend the Medicaid law so that states may target preventive services to improve birth outcomes. The Medicaid program is currently paying a high cost for illnesses and disabilities. A new direction is needed.

This year, our budget includes a "children's initiative" to target additional funds to proven programs that save money, and save lives at the same time.

Let use be very clear: Many programs for children and families are still going to be cut in this budget. Under this budget, we will cut an additional $43 billion from the domestic budget over the next 3 years. More than half that amount will come from nondefense discretionary programs; another $18 billion will come from entitlements, many of which serve poor, elderly, handicapped, and undernourished people.

But we are going to make a modest effort, because to continue to ignore the growing human need in this country—in order to feed the Pentagon—is unconscionable, as well as bad economics.

THE CHILDREN'S INITIATIVE

In function 400, we add about $25 million for Indian child welfare service above current levels, a tiny effort to address the chronic problems faced by native American children.

In function 500, we support several of the key education programs, because education has lost about 22 percent of its budget since the Reagan administration came to office. So we restore some support to the programs for the handicapped, to disadvantaged children, and to Indian children.

We provide an additional $100 million for Head Start, a program the administration loves to compliment but forgets to fund. Head Start is one of those highly successful programs that reaches only a fraction of the eligible population, even though we know that children who participate will perform better in later schooling.

We provide a very modest increase in title IV-B, child services, which is the preventive service program which helps prevent unnecessary and excessively long placements in foster care and other types of costly maintenance programs.

And we meet the funding target for graduate student loans which is contained in H.R. 3200, which we have approved.

In function 550, we provide $25 million for an expanded Childhood Immunization Program, and $75 million for the maternal and child health block grant. And we adopt the unanimous recommendation of the Southern Governors' Association to expand Medicaid eligibility to families which are below the poverty line. If there is any serious question whether we need this expanded medical coverage, let us recall that one-third of our Nation's poor children either have no medical insurance or are covered for only a portion of the years.

Medicaid, which provides health care to the poorest children, reached only 49 percent of the poor—compared to 65 percent in 1969. In my own State of California, surely one of the wealthiest States, access to prenatal care for low-income women is also sorely inadequate because reimbursement rates are insufficient to keep most private practitioners in the program.

We provide an increase of about $70 million for the WIC—the Women, Infants, and Children Supplemental Feeding Program—which today reaches fewer than half the high-risk people who need it. And many States—Florida, Kansas, Washington, Arizona, Idaho, Alaska, Utah, Arkansas, Hawaii, and my own State of California—serve 30 percent or less.

Now this is a very modest and responsible plan. We are investing in successful programs, and we are investing in the future of these families and these children. For we know that if we fail to respond today, they will revisit us for a generation and more to come, costing more each step of the way in remedial, unemployment, health care, and law enforcement.

As the man in the television commercial used to say, "You can pay me now, or pay me later."

To those in this House who say we cannot afford these minor increases, I challenge you to tell us your alternative for avoiding the poverty, the sickness, the illiteracy, the joblessness, the crime, the dispair, and the social unrest which we know are the inevitable results of Government's indifference: "Growth in the economy," as promised by Mr. Stockman and Professor Laffer? The evidence shows that, despite a booming recovery, millions of Americans, especially children, are being left behind, and will stay behind

for their entire lifetimes if we leave their well-being to the luck of the marketplace.

CHILDREN NOT A PARTISAN ISSUE

Let us not make this into a Democrat versus Republican, big spender versus deficit cutter, liberal versus conservative issue. Our research on the select committee shows we can overlook those traditional efforts to polarize issues and come together behind fiscally sound policies that help kids.

That is the select committee's message in our "Opportunities for Success" report, which was endorsed by committee members of both parties. That is the message of the Southern Governors, Democrat and Republican, who endorsed the health initiative we have incorporated in our budget.

Let's stop the inflamed and inflated rhetoric around this budget. The American people recognize bombast when they hear it. They know tough choices have to be made.

The American people aren't expecting miracles from this Congress, but they are expecting the truth, some compassion and decency, and the courage to say "no" to an insatiable, $800-million-a-day military machine.

They don't believe that the Pentagon is going to starve to death on the $285 billion this budget will give it next year, and they are right.

And they know that we cannot continue to demand more and more sacrifice from those who have less and less—our schools, our children, our poor, our troubled teenagers, our single-parent families, our elderly, and our sick.

So I call upon Members of both parties to support the committee's budget as a responsible, if painful, effort to move this country back to fiscal health. It is a budget which shows compassion, realism, and is honest with the American people about what we must spend and what we must do to fulfill our promise to every American and to restore this country to greatness.

REPORT OF THE STAFF OF THE SELECT COMMITTEE ON CHILDREN, YOUTH AND FAMILIES

A 1986 CONSTANT DOLLAR ANALYSIS OF FUNDING FOR PROGRAMS WHICH ASSIST CHILDREN: HIGHLIGHTS OF THE REAGAN RECORD

1980–1986: Real Cuts in Basic Support Services for Children

Total spending on major discretionary program assisting children declined by over $2.9 billion or nearly 15 percent over the last six years.

Social Services

Hardest hit among programs for children were those funded through the Social Service Block Grant (SSBG). Over the past six years, the SSBG was cut by over $1.2 billion. Funding in FY 86 was one-third less than in FY 80.

Funding for child abuse prevention and treatment suffered a 19 percent decline between 1980 and 1986.

Education

Compensatory Education Programs for Disadvantaged Children (Chapter I) lost over $870 million since 1980.

In addition to Chapter I cuts, vocational education was cut by $250 million, bilingual education by nearly $100 million, and Indian Education by $40 million. Overall spending for major education programs declined by over $1.25 billion, a 22 percent reduction.

Health

Spending on major health care programs (apart from Medicaid) declined by over $800 million or 32 percent.

Despite a national problem of teenage pregnancy and rising numbers of single parent families, funding for family planning services was cut by nearly one-third between FY 80 and FY 86.

Spending on programs under the Preventive Health Block Grant in FY 86 was less than one-third the amount budgeted in FY 80. Programs under the Alcohol, Drug Abuse, and Mental Health Block Grant were cut by nearly 50 percent over the last six years.

Child Nutrition

Child nutrition programs were cut by over $400 million or by nearly 10 percent since 1980. The school lunch program alone was slashed by nearly 50 percent.

Entitlement Programs

Since 1980, nearly two million children have fallen into poverty, a 16 percent increase. Yet funding for AFDC, the primary income support entitlement program for children in poor families, declined by nearly $300 million.

Food Stamp benefits rose by only $60 million between 1980 and 1986, an increase of less than 1 percent.

THE PRESIDENT'S FY 1987 BUDGET PROPOSES STILL MORE DEVASTATING CUTS

Funding for all programs assisting children, including entitlement and discretionary programs, would be reduced by over $4 billion in FY 1987. The amount budgeted would be $5 billion below the amount needed to maintain current service levels.

Discretionary programs alone would suffer over $1 billion in cuts, bringing the total to over $4 billion through FY 1987, a 20 percent decline since the beginning of the decade.

Social Services

FY 1987 funding for the Head Start program, proven effective in preventing early school failure among low income children, would be $22 million below the amount needed to maintain current enrollment levels.

Education

Combined with earlier cuts, overall spending on major education programs would be nearly 30% lower in FY 1987 than in FY 1980.

Funding for vocational education would be slashed by over 50% in FY 1987. Total funding for the program would be two-thirds below the FY 1980 level.

Child Nutrition

The President would further reduce spending on child nutrition by $625 million, bringing the total amount cut from the program to over $1 billion through FY 1987. The school lunch program would be targeted for a $500 million cut, reducing spending from FY 1986 levels by 95%, and effectively eliminating the program for thousands of moderate *and* low income children.

Entitlement Programs

The Reagan budget would cut FY 1987 funding for AFDC by over 1.5 billion, the single largest proposed cut in children's programs.

Funding for health care services under Medicaid would be cut by over $700 million in FY 1987. The amount would be 1.2 billion below the amount projected by CBO needed to maintain current service levels.

FY 1987 cuts in funding for child nutrition programs combined with a cut of over three quarters of a billion dollars in Food Stamps would reduce spending for the two primary nutrition programs serving children by $1.4 billion.

Mr. LATTA. Mr. Chairman, I yield 3 minutes to the gentleman from Minnesota [Mr. WEBER].

Mr. WEBER. Mr. Chairman, let me begin by saying that I have noted the chairman's frequent references to their bipartisan budget in the last couple days, and when I cast the lone Republican vote in committee for that budget, I had no idea that the chairman would lavish such attention on my meager efforts. I just want to thank him for all that attention.

I did support the committee's budget in committee and I did so because the chairman and the committee's majority, I felt, dealt most fairly with me throughout the process and because their budget is not all that bad in my view.

I was particularly grateful for the work they did on the agricultural section of the budget.

I may be one of the few people that come down here today and do not say that one budget is all bad and the other is all good. I tend to think that our institution is responding to Gramm-Rudman pretty well, and when we are done today, we are going to basically be proud of the work that we have done. But we did not have a Republican alternative in committee. We do have one today, and I rise today in support of that Republican alternative. I believe on balance it is superior to the committee's work. I believe that it is a budget that reflects broad consultation in the Republican conference, a budget that reflects Republican priorities. It cuts spending a little more than the Democrats do, it raises taxes a little less than the Democrats do, and it meets the challenge of Gramm-Rudman and avoids the automatic cuts of sequestration.

Sequestration is a compelling incentive for fiscal responsibility, but it would be a disastrous way to reduce the deficit. Thirty percent of the budget, including important farm programs, military readiness and law enforcement activities would all be salvaged by a deep sequestration. That is why what we are doing today is so critical. We must remove the need for that sequestration.

Our Republican budget reflects a responsiveness to the agricultural problem that we feel so serious in my part

of the country and others. Our budget provides actually a little bit more for agriculture than the other body did or than the House Committee on the Budget did about $100 million.

Let me mention just a couple of areas that it supports and strengthens as reasons for support for the Latta alternative. We provide $600 million over the next 3 years to fund a farm credit initiative. With that money, we'll be able to work together with State governments and local lenders on an interest buydown. Our program can reduce interest rates to farmers by a substantial amount, as much as 5 percent, which would be a real kick for the agricultural economy. We should be able to couple that with provisions that will help farmers restructure their debt and bring stability back to agricultural credit.

There are few programs as valued in rural America today as the cooperative extension service. In the midst of extreme stress, the extension service is providing critical support. One of its programs, 4-H, is helping develop the next generation of rural leaders. Other programs provide farmers with financial analysis and the latest developments in farm management. Our Republican budget fully funds these services.

The Republican budget has addressed the priorities of our country. It deserves the support of the membership.

Mr. GRAY of Pennsylvania. Mr. Chairman, I would like to inquire as to how much time is remaining.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. GRAY] has 19 minutes remaining, and the gentleman from Ohio [Mr. LATTA] has 24 minutes remaining.

Mr. LATTA. Mr. Chairman, I yield 3 minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. Mr. Chairman, I rise today in support of the Republican substitute for the 1987 budget as the only reasonable plan available to meet the mandatory Gramm-Rudman deficit targets. However, I do have reservations about the defense numbers in this substitute. I would have preferred to see them frozen. Secondly, I am concerned about the health and Medicare section, as well. But, overall, I believe that the Republican substitute should be supported to fulfill our responsibilities under Gramm-Rudman.

One obvious benefit of Gramm-Rudman is that it has awakened the House to the need to examine defense spending more closely and to recognize that there are competing priorities. We all agree on the need for a strong defense. But throwing money at the Pentagon does not make us secure. Money wasted on extravagant coffee makers or unnecessary weapons systems does not buy us strength. Money wasted by the Defense Department does not pay one soldier and does not buy us one more missile, one more submarine or one more fighter jet. This budget number is an improvement but a freeze would have been better. The Democrats' slashes would undermine legitimate defense needs. At the same time, we are sticking our heads in the sand regarding Medicare and the needs of our elderly. I am constrained to warn my colleagues that we have a day of reckoning approaching with respect to Medicare. We must not deny our senior citizens; we must not fashion budgets which say to the Pentagon, "You have a blank check, whether you can think of ways to spend it or not," and which say to the elderly, "We can not adequately provide for your health care even though you desperately need our help."

I want to reiterate the point that some of my colleagues made yesterday, and I know that this is a very technical point, but one which may mean the difference between fact and fiction in deficit reduction. The Republican substitute is the only plan whose numbers, whose policy changes, have been verified by the nonpartisan and independent Congressional Budget Office. We have specific plans to reach our deficit reduction numbers.

The Budget Committee resolution, on the other hand, has never been verified. How can they assure us that they can meet the deficit reduction numbers they put forward when no independent authority has verified them? Certainly, no one can guarantee any economic forecasts, but the Republican substitute offers the best wisdom and accuracy that our most respected budget and economic experts retained by this Congress can offer.

Despite my strong support for this Republican budget substitute, I still have intense concern over the total health and Medicare spending. We should not compromise the quality of care or the access to care for our senior citizens. Their lives, their work, their families, have helped build this country and make it stronger. We owe them more than we can give at this point.

I do not like the numbers on Medicare in the Republican substitute and I want to give fair warning to my colleagues that I will fight, within these approved budget levels, to assure beneficiaries that we will not renege on the quality of health care, the necessary delivery of health care, nor availability of health care to those who need it in this country. In conscience, I can do no less.

I am greatly encouraged, however, by the fact that the Republican substitute, and only the Republican substitute, maintains the current $492 deductible for Medicare part A. The Democrats, despite their rhetoric, would allow this deductible to rise to $540 next year, about, a 10-percent increase during a time when inflation is not nearly so high.

Mr. Chairman, I have similar doubts about the defense numbers and would like to discuss my concerns here for just a moment. The Defense budget, I believe, is central to our discussion today. Our responsibility is twofold: First, to ensure that the defenses of this Nation are strong enough to prevent aggression and keep the peace * * * second, to ensure that the American people's hard-earned tax dollars are spent wisely—that the military has an incentive to be more efficient, and that the deficits, which endanger our Nation, can be reduced.

Through the first part of the decade, Pentagon spending rose from $144 billion to over $286 billion per year. That's a jump of 100 percent over 5 years. With those same figures adjusted for inflation, the increase is still over 50 percent. I supported that growth—it was a necessary response to the state of neglect that our Armed Forces were subjected to in the 1970's. There were shortages of skilled manpower, spare parts, fuel and ammunition. Further, in the face of a Soviet buildup, we needed to improve our strategic nuclear deterrent.

However, with all of our increased spending, we have improved our readiness and enhanced our nuclear deterrence, but the improvement is far out of line with our increased spending. The uncontrolled growth of defense entitlement is the major reason for this lackluster improvement. Since I was elected to Congress in 1980, I have warned against the ticking time bomb of defense entitlements. The explosion in defense expenditures for which the bills will come due throughout the coming decade need to be checked. The biggest bills for weapons approved since 1981 will not fall due until the second half of the decade and beyond. Giving budget authority is like planting a seed—the real growth comes later. This growth is illustrated by the numbers we are debating today—the Latta substitute would reduce defense spending authority by over $7 billion from the CBO baseline, but defense outlays would only be cut by $4 billion.

True, we took an important first step toward controlling defense spending by approving Gramm-Rudman last December. The March 1 round of Gramm-Rudman cuts kept $13 billion in spending authority out of the Pentagon's hands. And yet, despite these cuts, the Pentagon last month reported to Congress that it had $2 billion that it could not spend.

With this in mind, the 1-percent growth for defense included in the Latta substitute today is, I believe, pushing the upper limits for defense

spending. However, we must keep in mind that this is only the starting point in the debate on defense spending—the process will continue through deliberations in the months ahead on the defense authorization and appropriations bills.

Other Members have stood in this well over the past 2 days and declared that 1-percent growth is the minimum level acceptable if we are to maintain our personnel levels and combat readiness. The Pentagon has repeatedly told us that it is these vital programs that will be cut if we give defense anything less than the $320 billion that the President's budget has called for. But my colleagues, let us not be played for fools. The defense budget must be held to the same accountability and management standards we are requiring from other departments.

If we need to cut unnecessary weapons programs in order to preserve our current force levels and readiness, then let us cut those programs. Last year, the House Armed Services Committee found 23 unnecessary weapons programs and wrote them out of the Defense authorization legislation. And yet, these programs are still with us today because they were preserved in the final conference report.

The bottom line is we are not getting a dollar's worth of defense for a dollar spent. The reasons are twofold. The Pentagon has not established firm spending priorities based on long-range defense strategy and we are saddled with an inefficient and outmoded defense management system.

My colleagues, the realities of our fiscal situation put the Pentagon budget at a crossroads. We can capitalize on the momentum generated by the President's Blue Ribbon Commission report and undertake a new conservative approach to defense spending, or we can continue "business as usual" at the Pentagon which will ultimately lead to an unbearable-tax increase, unacceptably high deficits, or both.

Reservations notwithstanding we can all agree that there is room to cut Government spending and a need to get our spending priorities straight. Budget deficits in the range of $200 billion will seriously hurt our economy, endanger our national defense and undermine our ability to provide even the most basic Government services. Just as clearly, the budget process that has driven us to a $2 trillion national debt has not worked effectively. We can no longer put our children's future in danger by continuing to borrow and spend without regard for the consequences.

For these reasons, Mr. Chairman, I urge my colleagues to support this substitute as the only responsible way to meet the Gramm-Rudman targets and avoid the harsh across-the-board cuts. We cannot push reality off any longer.

□ 1450

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. FAZIO], a member of the committee.

Mr. FAZIO. Mr. Chairman, without wanting to be critical of any of my colleagues on either side of the aisle, I think what we are having today is by anybody's definition a rather desultory debate.

Perhaps we are going through the motions, we budgeteers here, because in fact when you think of the total construction of the Federal budget, a trillion dollars, and the fact that we have about $450 billion in tax expenditures, and billions more in off-budget financing, arguing about $7.5 billion is really not a fundamental debate about the future course of the Federal budget.

Obviously, this is an important debate on priorities but in fact, most of us are aware of the fact that the CR, not the BR, is really where it's at. There are very few real bullets being fired in this budget resolution, as Mr. FRENZEL said earlier, and I think it is very important that we focus on the fact that essentially we are arguing around the margins because we can no longer ignore the question of deficits.

I think the members of the Committee on Appropriations on both sides of the aisle, who are very reluctant to support any of these resolutions today are very close to the essence of our dilemma. They realize that we are really not meeting very many, if any, of our needs in this country to the extent that we understand them and define them. We are not doing enough for children or homeless people. We are not doing enough for infrastructure, and there are many who think we have reversed the thrust of our defense buildup with too great an alacrity.

So we are really not arguing about where we need to be taking this country except in the context that we can no longer ignore the burgeoning deficits; and everybody's budget alternative today faces that. It is Gramm-Rudman, but it far more than that. It is a trade deficit we can no longer ignore; the loss of jobs to overseas; the failure to have the kind of savings and investment we need for the future of our country.

So I think no matter whose budget resolution passes and no matter what we reach in agreement with the Senate, we have at least come to some common ground: we can no longer ignore the deficits.

Mr. LATTA. Mr. Chairman, I yield 4 minutes to the gentleman from Iowa [Mr. TAUKE].

Mr. TAUKE. Mr. Chairman, we are now down to the point, ladies and gentlemen, where we have two budgets before us; one is the Republican consensus budget, the other is the House Budget Committee-Democrat alternative.

I believe very strongly that the Republican package is the superior package, primarily because in the Republican package the policies match the numbers; in the Democratic package, there are no policies to match the numbers.

Over the past several years, the Democratic packages presented in the House of Representatives simply have not stood the test of time. For example, last year, the Committee on the Budget brought us a package that allegedly saved $55 billion. By the time CBO ran the figures, it was down to $35 billion. Now we are spending in excess of $19 billion above that figure, so the budget that we adopted last year has yielded about a quarter of what the Democrats told us it would yield.

This year's budget package, in my judgment, will do essentially the same, and that is the primary reason why it ought to be rejected. The reason it does the same is that the policies that are articulated by the Democrats are not matched by their numbers.

Look to the bottom line. The Democrats suggest that their outlays will increase $7 billion over current spending. All of that $7 billion is used up in the amount of increased spending that we will have for defense. So they have no additional money for all other programs, but yet they increase spending for Social Security by $10 billion.

Because of current law, increases for Medicare will go up $5 billion. Increases in interest will go up $5 billion. That is $20 billion of increases in just those programs, with no additional money.

So where are the cuts that allow us to pay for those increases? Well, ladies and gentlemen, the cuts are not articulated in the Democrats' budget documents.

There are two conclusions we can reach: We can conclude either that the House Budget Committee's numbers are phoney, or otherwise you can conclude that the House Budget Committee has refused to tell us what policies they are changing in order to find these cuts that they say their budget provides.

I think we can get an example of this by looking at the Medicare function in the budget. First of all, of course, the Republicans ensure that beneficiaries will not have to pay any more in the Medicare deductible. The Democrats allow the Medicare deductible to increase from $492 to $540, a 10-percent increase.

So how do Republicans do that? Well, we specify, in detail, exactly what changes will be made in the Med-

icare Program in order to ensure that the dollars are there to fund health care benefits for the elderly.

What do the Democrats do? They say, for example, they will come up with $450 million in provider reforms, but not one provider reform is articulated by the Democrats.

Mr. JENKINS. Will the gentleman yield?

Mr. TAUKE. I yield to the gentleman.

Mr. JENKINS. Of course what the Republicans do in Medicare, while it is true that they try to keep it down in 1987, what really is being done is to go up twice as much in 1988. So the Republicans increase it in 1988 and simply defer for a year—somewhat smoke and mirrors.

Mr. TAUKE. I thank the gentleman for his comment. I would note that the Republicans, in this year's budget package, reconcile our Medicare savings; we specify what they will be, and we protect the beneficiaries in the next year.

I might also note that the gentleman earlier talked about how we were not reducing foreign aid when we cut it $3 billion below last year; and I noted the gentleman, then, last week, had voted for a $250 million package for Ireland, and refused to trim that.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LATTA. Mr. Chairman, I yield the gentleman 1 additional minute.

Mr. TAUKE. I guess the point is this, ladies and gentlemen, that somewhere along the line, the Democrats' rhetoric has to match the budget figures. Somewhere along the line, the policies have to match the numbers; and so far the Democrats, year in and year out have failed to do that.

Once again they bring us a package that fails to do that. They do not come in with real numbers; they do not reconcile; consequently they do not get the savings and all the other wonderful benfits that they hope to claim.

So although there has been some suggestion that the budgets are similar, and a lot of lavish praise heaped on the members of the Committee on the Budget, I have to say to you that the Budget Committee has failed us in the past; it has failed us again. This budget is not a good budget; the one coming from the Committee on the Budget should not be adopted; if you want a real budget with real savings that will meet the Gramm-Rudman targets and solve our problems, we have to go with the only package before us that matches numbers and policies, and that is the Republican budget.

Mr. GRAY of Pennsylvania. May I inquire of the Chair the amount of time remaining on both sides?

The CHAIRMAN. The gentleman from Pennsylvania [Mr. GRAY] has 17 minutes remaining and the gentleman from Ohio [Mr. LATTA] has 16 minutes remaining.

Mr. LATTA. Mr. Chairman, I yield 4 minutes to the gentleman from Pennsylvania [Mr. MCDADE].

□ 1500

Mr. McDADE. I thank my good friend from Ohio for yielding this time to me, and I want to compliment him and the gentleman from Pennsylvania for the long and hard work they have both extended in bringing to us these budget resolutions.

I am unable to support the numbers allocated to the defense function in the chairman's budget. I am therefore unable to support their budget numbers. I thought I would spend a few minutes telling my colleagues what I conclude about the committee's defense allocations.

Mr. Chairman, the resolution produced by the Budget Committee has the appearance of freezing the defense budget at last year's level. But it will not. If we are held to the outlay numbers contained in that resolution—and we must remember Gramm-Rudman deals in outlays only—we will be faced with painful choices, all of which will seriously impair our military posture.

For the defense function, the committee resolution proposes $285 billion in budget authority and $276 billion in outlays. That outlay figure enabled the committee to come in under the Gramm-Rudman deficit ceiling, and so, it is fair to ask what sort of defense bill would result from holding to the $276 figure for outlays.

As a member of the Appropriations Committee, we have tried to answer that question. We asked the Congressional Budget Office to determine, based on past congressional priorities in defense, what we would have to do to meet the outlay target of $276 billion in the committee resolution.

As determined by CBO, to meet that outlay target, we would have to write a bill providing $270 billion in new budget authority. This is $15 billion less than the figure advertised in the Budget Committee resolution. It is $16 billion below what the Congress provided last year, after Gramm-Rudman. This number would put us at near the level in defense we were at 3 years ago.

How would we reach that number?

If we were to act in a manner consistent with congressional action over the past 4 years, we would try to protect the personnel accounts as well as operations and maintenance, the readiness accounts.

But that means we have to look for a lot of money from the procurement and research areas.

In procurement, we would have to reduce the President's budget by $22 billion, almost one-quarter of the request. How do we achieve that?

Let me give you a feel for the magnitude of a reduction of that size. We could totally eliminate funds for the five largest items in the procurement budget: the F-16 fighter, the F-18 fighter, the Aegis-class destroyers, the *Los Angeles*-class attack submarines, and the F-15 fighter. We zero all of these. How much of a reduction will we see? Would that get us $22 billion?

No, it only gets us a bit over halfway there, $13 billion. In order to get to $22 billion, we would have to zero the top 10 programs.

What about research and development? We would have to cut that almost $9 billion, one-fifth of the budget. And again, where do we find that kind of money? We could zero the Midgetman; the new Navy attack sub, the SSN-21; the C-17 transport; and yes, even zero the request for SDI. Would that do the trick? No, we'd still have a billion and a half dollars to go.

Now, those are the magnitude of the cuts we'd have to make, if we marked the defense bill reflecting past congressional priorities. But, the Budget Committee has a resolution which says we can come up with $276 billion in outlays while providing $285 billion in budget authority. The committee doesn't say how we can do that.

It is theoretically possible. We can reach these targets by hitting hard those accounts which spend out rapidly—personnel, and readiness.

Let me describe the only way we can hit both the BA and outlay targets in the committee's budget resolution. We would have to take out about $9 billion out of the military personnel accounts. This translates into letting go 200,000 soldiers, 9 percent of our active force; 200,000—a number larger than 10 of our Army divisions, or equivalent to the entire U.S. Marine Corps.

What about readiness, operations and maintenance funding? That would have to be cut by 15 percent, $13 billion. And over night, we would find ourselves back to where we were in the 1970's—ships tied up at dockside for lack of spare parts and fuel, airplanes grounded in hangars.

To do what the Budget Committee directs, we would have to dismantle the two biggest achievements of the defense buildup—the quality of our force, and its readiness for times of crisis.

Mr. Chairman, there will be no easy choices, no quick-fix for us to deal with defense if the Budget Committee resolution numbers hold. Both the Armed Services Committee and we on Appropriations will have to cut deep and hard. This is no idle suggestion, it is a statement of fact.

Vote as you will, but know that if the committee resolution passes, we will have to make measures that will take years to recoup. Once our soldiers are let go, they and their experience are gone. When we stop training or

maintaining equipment, we begin a cycle that cannot be corrected overnight.

Weigh the consequences of this vote, and realize that the Budget Committee's numbers for defense do not accurately reflect either fiscal reality, or the reality of a troubled world in which our military forces operate.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. SCHUMER], a member of the committee.

Mr. SCHUMER. Mr. Chairman, I rise in support of the committee budget and in opposition to the Latta amendment.

First, I would like to add my accolades to those of so many others, to our chairman, BILL GRAY, who has worked very, very hard, very, very diligently and very, very skillfully, I think, to produce a document that sort of bull's-eyes just where the American people are.

Budgets really measure a party, an institution such as this House and the body politic better than any other kind of measure. The American people have certain needs as well as certain demands that they place upon us.

This budget, weighing all those considerations, comes out right on target as to where they are. It is a balanced and responsible approach to Federal spending.

Mr. Chairman, I have been surprised that we have not heard more people on the other side of the aisle telling us, praising us, or for putting deficit reduction as our greatest priority. This is a new day for the Democratic Party. It is a new day for many people from my part of the Democratic Party when we say balancing that budget, keeping spending in line is more important than just about any other budgetary consideration. That is what the American people think, that is what this budget talks to.

Yet we do it in a fair and balanced way. Defense has taken its cut. It is a significant cut. But I would remind my colleagues that in the latest polls only 14 percent of the American people are for an absolute increase in the defense budget. This is an absolute increase in the defense budget, so if anything, it leans on the side of a tougher and more full defense than at least the polls reveal.

Mr. LATTA. Mr. Chairman, I yield 1 minute to the gentleman from Michigan [Mr. HENRY].

Mr. HENRY. Mr. Chairman, as we debate the two major budget alternatives, I would simply like to address my remarks to the implications of the proposal offered by the chairman of the Budget Committee on the General Science, Space, and Technology Function, function 250. A close examination of the budget authority and outlays proposed elicit serious concerns over the proposal's impact on the activities within that function.

As budget functions go, function 250 is relatively simple. There are four subfunctions: General science and basic research; space flight; space science, applications, and technology; and supporting space activities.

Function 250 funding goes to two major agencies, the National Science Foundation [NSF] and the National Aeronautics and Space Administration [NASA]. A relatively small amount goes to the Department of Energy general science programs.

In this quite simple function there are few opportunities to reduce Federal spending. Any budgetary reductions must be done with great care, and even then there is not much room. To illustrate this fact, I simply refer my colleagues to the floor debate last July 25 by my friend and colleague the chairman of the Science and Technology Committee, when I offered a freeze amendment to the NASA and NSF appropriations. There was, in fact, a great deal of opposition to a simple 2-percent reduction in the four NASA appropriations accounts. Members pointed out very carefully and at great length the implications of even a small reduction.

I point this out only to put into perspective what the chairman of the Budget Committee proposes to do in this function. And that is to reduce budget authority $700 million below and outlays $520 million below, an already very tight baseline. Beyond the freeze level, this means a $300-million cut in budget authority and a $270-million cut in outlays. These are essentially 8-percent cuts in budget authority, and 6-percent cuts in outlays.

In contrast, the Republican alternative, having run all its proposed reductions past the independent Congressional Budget Office, found that this level of cuts are both disingenuous and severely crippling to the important national goals carried out in this function. As such, the Republican alternative proposes a simple discretionary freeze.

Supporters of NASA should be especially concerned over how the majority proposes to reach these very low numbers. First, the majority increases certain non-NASA accounts. In funding for NSF, the majority proposes to increase budget authority $150 million, and outlays $100 million, above what they otherwise would be.

In funding basic research, increases are also suggested, with a total of $50 million in new budget authority.

These new initiatives are entirely meritorious, and I commend the chairman for his courage in supporting this new spending. But mathematics tells me that what you add to NSF, to DOE, to basic science, you must take away from the rest of the function. On this function you can't hide and say the authorizing committee will find some cuts. On top of that you are freezing at post-Gramm-Rudman levels. That leaves you with cutting NASA programs in this function $500 million in budget authority and $400 million in outlays below a freeze.

This might be all right if the Congress could find some savings in NASA programs under this function. Maybe it could save some money by not flying the shuttle. In fact, this is what the chairman of the Budget Committee proposes to do. But according to CBO and to sworn testimony by NASA officials before the authorizing committees of the House and Senate—there are no savings from reducing shuttle flights. We know, we tried it, CBO says it can't be done.

Whatever savings may result are soaked up by additional costs in the aftermath of the explosion of the Shuttle *Challenger.* Estimating conservatively, the CBO states, and I quote from a CBO working paper entitled "Budget Effects of the Challenger Accident" that the accident "will raise total spending for the National Aeronautics and Space Administration [NASA] in fiscal years 1986 and 1987, even if a new orbiter is not procured." It will raise total spending.

The point is, Mr. Chairman, that when one looks carefully at this function, the inevitable conclusion is that the committee's budget devastates NASA programs. It hits space flight. It hits space science. It hits space supporting activities. No part of NASA is exempt in this budget; function 400 also cuts NASA aeronautics in half.

Mr. Chairman, the majority budget simply does not add up. It doesn't add up for NASA. It doesn't add up in function 250. It doesn't add up in other areas. It doesn't reach the Gramm-Rudman target, no matter what its phony numbers say. You simply can't get there from here with this budget. It ought to be opposed.

Mr. LATTA. Mr. Chairman, I yield 1 minute to the gentleman from Connecticut [Mr. ROWLAND].

Mr. ROWLAND of Connecticut. I thank the gentleman for yielding this time to me.

Mr. Chairman, first I would like to congratulate the ranking member on the Budget Committee along with the House 92 Committee, which worked so hard on this issue, especially my friend NANCY JOHNSON from Connecticut, who spearheaded the compromise from the House 92 Committee.

Mr. Chairman, I was one of the 24 Republicans last year who joined with the Democrats in supporting that Democratic proposal. I would also point out that many of the previous speakers were part of those 24 Republicans.

However, this year I cannot and I believe many of my colleagues cannot support this Democratic proposal.

The Republican alternative is a moderate compromise. It should appeal to everyone. It does not devastate our national security, it does not devastate the domestic programs that we hold so true to our hearts, and it does not have the new and increased taxes that the Democratic proposal has.

Mr. Chairman, I think we are going to have a tall order trying to explain to our constituents or justifying to our constituents why we want to increase taxes, new and increased taxes by up to $54 billion over the next 3 years.

Mr. Chairman, we need a new, fair, reasonable approach. I have heard it said many times over the past month that tax increases should be looked at as a last resort.

I would contend that today is not a last resort. Therefore, I would urge support for the Republican proposal.

Mr. LATTA. Mr. Chairman, I yield 1 minute to the gentlewoman from Kansas [Mrs. MEYERS]

Mrs. MEYERS of Kansas. Mr. Chairman, I rise in support of the Republican budget alternative as the most responsible, balanced proposal before us. The Republican budget alternative meets the deficit targets in each of the next 3 years, and I believe, its components reflect the views of a majority of the American people, whose interests we are representing here today.

First of all, this budget begins with the honest premise that Americans do not want their taxes raised. The Republican budget calls for an increase in revenue slightly below the President's request. In contrast, the committee proposal imposes $54 billion in tax increases on working Americans over the next 3 years. The Democrats' use of a fenced "deficit reduction fund" does not change that fact. Past budgets have also pledged to apply tax increases to deficit reduction and have failed to do so. I don't believe it is fair to make this claim before proving clearly that we have the discipline to cut the growth in Federal spending.

A second reason to support the Republican proposal is that it presents a reasonable alternative on defense spending. My constituents have told me over the past 2 to 3 years that they are willing to fund a strong defense program, if we can avoid waste of defense dollars. The Republican alternative presents a defense plan allowing 2 percent real growth in budget authority beyond the post-sequestration level, so that we can maintain the strong program we now have while requiring reform and cost-cutting measures in a responsible manner.

A third reason to vote for the Latta substitute, is its plan for nondefense spending. The budget provides a freeze at post-sequester budget authority levels for most programs. Low-income and Social Security programs are protected, and COLA's are provided. The plan represents the consensus views and best judgments of our Members of what can be achieved this year. In contrast, the committee alternative leaves unstated many of the reductions its totals would force on various programs, and implies cuts which would be much deeper than the freeze or 2.5-percent cuts stated in the budget because of their new spending initiatives crowding out current programs.

The Republican budget alternative does not promise large spending increases. Although each of us who support it might want to change components of it, I believe it treats programs fairly. The reductions it recommends are achievable, and given our Gramm-Rudman requirements, we must ensure that outcome. I know that many of my Democratic colleagues are uncomfortable with the defense levels and tax increases in the committee budget. I would urge them to vote for what is truly the "consensus" budget before us today—the Latta substitute.

Mr. LATTA. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. I thank the gentleman for yielding.

Mr. Chairman and Members, I want to focus for just a second on the education area because this has been most troubling to me. The fact is, when you look at the two alternatives in front of us, there is a great deal of difference. Each of them makes about $600 to $700 million in general cuts to start out from the baseline. The problem is, the way the Democrats calculate the numbers, their freeze only saves $300 million when in fact CBO says a freeze should save $1.1 billion if it is going to be an honest freeze. So they are obviously wrong in that area.

They really conclude in three areas by saying they are going to have a child initiative of $250 million, an educational initiative of $450 million, a trade initiative of $50 million, increasing and giving us the difference in spending of about $600 million in the two programs. You and I both know nobody is going to vote for tax increases. That is not going to happen.

But I would suggest anyone before they vote for these budgets, take a look at what their budget does exactly in the nonprotected education areas: it cuts chapter 2 $15 million, cuts vocational education $20 million, cuts adult education $2.5 million, cuts library $2.5 million, and cuts training services $42 million. We do not know whether or not the Pell grant is protected. If it is not, it is in big, big trouble under their budget proposal.

Mr. LATTA. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. BOEHLERT].

Mr. BOEHLERT. Mr. Chairman, I rise in support of the Republican alternative.

Mr. Chairman, I rise in strong support of the budget substitute offered by the gentleman from Ohio [Mr. LATTA] and I want to say in the strongest terms possible that this is a budget that my colleagues from both sides of the aisle can support. It is balanced, it is honest, and it meets the goals we all share.

The Republican budget is honest—our assumptions are realistic and our savings have been documented by CBO. It provides the certainty that Federal spending will be brought under control in 1987. There are no empty promises to the American people in this budget—it is both fiscally and socially responsible.

The Republican budget is a balanced approach to national priorities. We have preserved at their current level many of the most important domestic programs, things like education, health, income security, general science, agriculture—in fact, if you will actually look at our figures, we provide for an increase in Head Start, Social Security, and priority health programs. Through carefully crafted cutbacks in some areas, we are actually able to be more generous in other areas than our friends on the other side of the aisle.

Perhaps most important, the Republican budget provides an adquate spending level for our national defense. We have not provided a blank check for the Defense Department at the expense of so many important domestic programs—but neither have we made drastic cutbacks that will hamper needed defense efforts. We even provide for a 3-percent pay raise for the valiant women and men who defend our country.

Finally, we have achieved a budget that meets the Gramm-Rudman targets. In short, the Latta substitute achieves what some Members may have thought was impossible—we offer a deep reduction in the budget deficit, we protect needed programs and treat all spending fairly, we provide for an adequate national defense, and we avoid burdening the working people of America who make it all possible.

I strongly encourage my colleagues on both sides of the aisle to look closely at the Republican budget alternative. Let's put partisanship aside and agree on a budget that makes sense for all Americans.

Mr. LATTA. Mr. Chairman, I yield such time as he may consume to the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Chairman, I rise in support of the Republican substitute, the Latta substitute.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield 10 minutes to the

gentleman from Texas [Mr. LEATH], a member of the committee.

□ 1515

Mr. LEATH of Texas. Mr. Chairman, as I have for several years now, I listened to most of the debate we have had the last 2 days on the fiscal year 1987 budget, and there is one thing that comes through loud and clear—enormous frustration. No matter who the speaker is or what the rhetoric is, frustration is the salt of this debate.

Whether it be my friend, GEORGE MILLER, talking about child nutrition or my friend, BILL WHITEHURST talking about defense, frustration is the common thread.

Late last night, as I often do, I sat in my recliner-back chair in the den and pondered our dilemma, and wished that some way, somehow, I could have the ability and the wisdom to come here today and say something to make things right, but I'm afraid the Lord really didn't give me such a revelation.

So I must do as we all do, and attempt to work within the human frailties we all face at this time, and somehow deal with that same frustration as best we can. In spite of that frustration—we have a great Nation to govern.

As I sat there, my thoughts rambling and searching for the answers, I remembered 1979 when I first came to Congress.

As part of our orientation, the Speaker had a dinner for us in the rotunda of the Capitol, and after dinner he opened the Chamber of this great House, and allowed us and our wives to come into the Chamber for a while.

I won't ever forget that moment as long as I live. I had just finished a campaign that lasted 18 months, I had just spent over $600,000, and I was bloodied from a primary and general election that had made me walk through the fire. You all know what I mean, because we have all been there.

Yet as I stood here in this Chamber, I knew once again why it had been worth all that misery. I stood here that night, and I wept—the awesome sense of history—the awesome responsibility suddenly was here, and it was real. The race was over—the prize was a piece of America's future. Now, it was time to place the politics behind—it was time to govern.

I have, my friends, as you do, an enormous respect for this institution.

Though we seldom realize it, we are very special people. In the 210-year history of our great Republic, with all the hundreds of millions of people who have lived, less than 10,000 have had the privilege that you and I have—to serve, to do something, to affect history. we bang upon each other a lot, but the truth is we are special people; 525,000 of our friends and neighbors have entrusted their future to us.

I may be totally naive, but I truly believe that to the man and to the woman, we all want to do that, to accept that responsibility. But, my friends, we have one very serious problem. Unfortunately, when we walk though these doors, into this beautiful Chamber, we are not required to check the politics at the door.

Politics follows us and permeates debate and sours the well.

We're like a group of folks playing dominoes, and we don't have a full deck. We are constrained because we cannot deal with the whole. The problem is clear, but we can only nibble at it.

We have a trillion dollar budget, but we can't deal with a trillion dollars in taxes. Then on the spending side, we have a trillion dollar budget, but we can't deal with cuts in the basic entitlements—proof. A $300 billion domino left the deck—we could call that, I guess, the old double 6. Then, there is defense—we can't cut that, it must be raised—poof! Another $280 billion off the table—the old double 5 gone.

Then there is the old double 4—interest on the national debt—poof. Another $143 billion that we can't control. What about the $23 billion agriculture budget—well, everybody knows how bad the farm economy is—can't cut that. We shouldn't cut the $26 billion in veterans benefits. That is, after all, the very basic entitlement.

Where are we? Well, we just eliminated $772 billion of that trillion dollar budget, and we haven't even talked about law enforcement, or science, or programs for the poorest of the poor, or education, or many other programs that simply cannot or will not be reduced.

The bottom line is that we don't have much to work with that is politically achievable and that is, after all, the key phrase: "politically achievable." We are long on rhetoric, but short on courage.

Obviously, this budget is not the solution I would give. I would cut defense, freeze entitlements, cut domestic programs, and then raise taxes—how many votes would I get—maybe the 56 we received last year—surely no more. After all, this is an election year.

Most of the solutions we hear today are no better—they simply will not achieve a consensus. That is the box the committee and the institution are in.

David Stockman is indeed right—politics has been triumphant. Unfortunately, today, it still is.

Ladies and gentlemen, until such time as we decide to govern instead of posture for the campaign committee—until such time as the President decides to become an honest broker in the process instead of merely a critic—until such time as we accept our responsibility to govern—this is the very best we can do.

Within all of those constraints, I am proud of this budget. It is by far the most responsible document I have seen come out of that committee in my 8 years here, and I intend to vote for the resolution, and I urge you all to do the same.

The day we all decide to come to the table, including the President, and make up our minds to truly and realistically solve this problem. I am ready to get on with it. I am ready to turn off the computer generated political demagoguery. I am ready to accept the risk of reponsibility, and I truly believe that most of my colleagues are, too.

In the meantime, this is the best that we can do. Make no mistake about it, the alternative of having no budget, the alternative of sequestration by a mindless, heartless formula is disastrous.

Mr. Chairman, I would urge my colleagues today to accept this budget for what it is. It is not a budget full of phony numbers. That makes me sick. It is a budget that has been slaved over and worked and delved over and reached the consensus between all the great elements of this society, liberals, conservatives, moderates, hawks, doves, whatever you want to call us.

But the truth of the matter is we cannot merely stand here day after day and accuse each other of this, that and the other. We have to govern the country, and we can only do that when we can reach consensus.

We should have all of the dominoes on the table, ladies and gentlemen, but they are not. And until they are, I commend my chairman, Mr. GRAY, and I commend the members of this committee for doing the best that we could with what we had to work with.

Mr. GRADISON. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New York [Mr. KEMP].

Mr. KEMP. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise to make some comments about this debate over the budget. I serve on the Budget Committee and I enjoy serving with the gentleman from Pennsylvania [Mr. GRAY], and also my colleague, the gentleman from Ohio [Mr. LATTA].

There are many different opinions on what we should do. I heard my colleague and friend, the gentleman from Texas [Mr. LEATH] talking about the courage to cut defense and freeze Social Security and cut the safety net. Well, no budget before us reflects the policy prescription; nor do I believe the American people would commend courage in the services of such misdirected goals.

I want to say that I am equally conservative fiscally speaking and sit on the Republican side of the aisle, but I think we are making a mistake in cutting defense and letting deficits drive public policy instead of the other way around. I think it would be a mistake to freeze Social Security, and I think it would be a mistake to cut the social safety net for the poor and besides we don't need to.

The deficit is not the only issue in America. Interest rates are an issue. Tax rates are an issue. Unemployment rates are an issue. And our national security requirements are an issue. By and large, despite the deficit, interest rates are coming down, energy prices are coming down, unemployment rates are coming down and they need to come down further. But the more we do to establish good economic policy, the more we can do to get that deficit down and get the budget into equilibrium. You cannot bring the budget to balance as long as you have factories operating at 80 percent of capacity and you have 8.5 million Americans unemployed and large numbers of minority people unemployed.

We ought to be talking about a policy of full employment, not just the policy of cutting defense, freezing Social Security or cutting the safety net for the poor.

□ 1525

Mr. KEMP. Mr. Chairman, I want to take the remainder of my time to remind my colleagues about national defense. President Reagan, on February 26 of this year, issued an appeal for our help on a bipartisan basis, to help secure necessary resources for defending this Nation and its vital security interests. He said in that speech: "Each generation of Americans has to live with the challenge that history delivers. We can't cope with these challenges by evasion."

The defense figures for this budget are too low. I must say that I am disappointed that our own budget is too low on this side of the aisle. With all due respect to the honest and decent and hard-working men and women in both parties and on both sides of this aisle, I think it is making a mistake to suggest that defense should be held accountable to the deficit that we face in this very difficult world.

Last year we enacted a budget resolution that called for a 1-year freeze in defense spending, followed by a 3 percent annual growth. Subsequent congressional action has resulted in a fiscal year 1986 budget for defense 6 percent below last year's level in real terms and the first absolute decline in defense spending in 15 years.

Now the agreed 3 percent increase for this year is under assault. Under the House Budget Committee resolution, defense spending would be cut more than 5 percent below the fiscal year 1986 level. Some have speculated that this may be explained as a rather transparent political ploy to box the administration into proposing a tax increase. It would be a sad commentary if our vital national security requirements were subordinated to partisan political gambits.

Still others explain low defense figures as an unfortunate but necessary consequence of the need to address the deficit. Yes; the deficit is a concern, to be sure; but it is not the only focus of national policy. If we allow fiscal concerns alone to drive national defense, we risk losing the momentum of our historic turn around in the military balance and forfeiting our foreign policy goals.

We are far from having compensated for the deterioration in our defenses that resulted from consistent underfunding during the 1970's. If we become sanguine, while the Soviet threat continues to grow, we can yet lose the modest advances we have achieved over the last 5 years.

Contrary to liberal myth, the deficit isn't caused by defense spending. Between fiscal years 1980 and 1985, total Federal spending increased by $335 billion. Only about one third of that amount ($119 billion) was for defense.

More importantly, our recent military buildup has occurred during the period of greatest economic expansion in the postwar era. Yet as a result of last year's defense budget reductions, we have taken a step backward toward the previous pattern of costly neglect. How will future generations judge us, if we falter in meeting our essential defense requirements during a time of unparalleled prosperity?

There is no question that America can afford to defend itself. Nor is there any question that the American people expect Congress to fulfill our responsibility to provide for the common defense. The only question is what level of resources is necessary to accomplish this job.

In this context, what are the implications of a decision to reduce defense spending? It would be reasonable to assume that one had reached the conclusion that last year's level of spending is more than adequate to meet this year's threat. That America's defense requirements had declined. That we have, in 5 short years, reached a point of equilibrium where we have compensated for the past decade, when the Soviets spent $450 billion more in weapons investment alone than the United States. That the threat has attenuated, rather than grown.

None of these predicates is true.

None of us is ignorant about the unprecedented growth in the Soviet threat throughout the decade of the 1970's, while U.S. defense spending declined by 20 percent in real terms. By what magic can it be that now all this has been erased in a short 5 years?

Some 17 percent of the Soviet GNP is devoted to defense. The magnitude of their effort occasioned Brezhnev to declare in 1973, "A decisive shift in the correlation of forces will be such that by 1985 we will be able to exert our will whenever we need to." They have fallen short of that mark, but have given no sign of abandoning Brezhnev's goal. Today, we have lost our former military advantage. Soviet armaments production continues to exceed ours in virtually every category of weapons. Despite the President's strategic modernization effort, comparisons of strategic capability continue to favor the Soviet Union. And the threat continues to grow.

If we abort our defense buildup, we would be saying not only that we accept a continued Soviet advantage, but that we will knowingly allow that disparity to deepen. Are we prepared to take these risks with our security today, knowing that the risks for future generations will be even greater?

In the President's words, "We've come so far together these last 5 years—let's not falter now." I urge you to support a budget resolution that provides the vital defenses resources our Nation's security demands.

Mr. GRADISON. Mr. Chairman, I yield the balance of the time remaining for our side to the gentleman from Illinois [Mr. MICHEL], the Republican leader.

Mr. MICHEL. Mr. Chairman, we began this year under some very extraordinary restraints because of the passage of Gramm-Rudman-Hollings. The President submitted his budget also under those very same restraints. We know, if we go back to January and February, after the submission of that budget, how it was kicked around for probably no other reasons than political reasons, a road show ensued, and all the rest.

This would or should have been a year when we really worked together in a bipartisan manner. I have to assume that both parties' objective is eventually to avoid sequestration of any kind.

There were no easy choices to make this year, but I certainly would have been amenable to sharing the pain with the majority, in the interest of getting closer together than we are today in our respective alternatives. It is quite obvious that the Democratic strategy was to beat the hell out of the defense program in order to placate all of the social welfare pleaders. And I will be frank to say that I really feel what the majority has done on the defense figure is irresponsible. To my discerning Democratic friends who also know in their hearts that it is a bad figure, you are being told not to worry about it because it will be taken care of in conference. Well, ask Members on both sides of the aisle who serve on that Armed Services Committee how they can ever report out a responsible bill under the 301(b) restraints of the committee's bill.

Today the President sent me a 3½ page "Dear Bob" letter which I include at this time for the RECORD. The President said:

THE WHITE HOUSE,
Washington, May 15, 1986.

Hon. Robert H. Michel
Minority Leader, U.S. House of Representatives, Washington, DC.

DEAR BOB: I am writing to express my deep concern regarding large reductions in our defense program recommended by the House Budget Committee. The Committee

has proposed that my request for defense budget authority in 1987 be reduced by $35 billion, from $320B to $285B.

The Committee-proposed level amounts to nearly a six percent real decline from FY86 levels. The FY86 level for defense was itself a six percent decline from the FY85 budget. Thus, the Committee's proposal amounts to almost a twelve percent real decline from the FY85 defense budget.

Bob, a twelve percent real decline in defense spending is hardly the "leveling-off" depicted by some. The Committee recommendations, if approved, would cripple the combat readiness of our conventional forces and take unacceptable risks with our national security at time when the immense Soviet military build-up continues uninterrupted. This radical anti-defense budget would tear down much of what we have built, together, these past five years, and return us to that era of the 1970's when the national defense was neglected, and our country paid worldwide and dearly for that neglect. Has the Congress so soon forgotten the consequences of short-changing national defense? I cannot believe the American people—given the facts—would approve of what the House Budget Committee would have us do. Its recommendations, taken together, represent nothing less than a breach of faith with our common duty to protect this nation.

While the impact of a $35 billion reduction in FY87 would be severe, this Administration would seek to protect, to the extent possible, those programs and capabilities most vital to our national defense. These include the strategic modernization program, which also includes the Strategic Defense Initiative and improvements in command-and-control; our military personnel and the current force structure; and sensitive classified programs. Even so, there is no possibility that the large improvements in military personnel and readiness that have been achieved to date could be sustained in the face of a $35 billion reduction recommended by the House Budget Committee. It would be very difficult to support the increases in size of U.S. forces already approved by the Congress; and program terminations and cancellation of proposed new starts would be unavoidable.

We would have to cut an entire Division from the Army, an Aircraft Carrier Battle Group, and tactical fighter wings from both the Air Force and the Navy. Termination of critical mobility programs such as the C-17 airlifter would further postpone the capability we need to deploy forces rapidly over long distances. Other critical programs would be terminated as well. These would include programs like a new field artillery support vehicle, the Army helicopter improvement program, a new 120mm mortar and ammunition, the AV-8B and A6E/F attack aircraft, the F-15, the JSTARS new surveillance aircraft, the TR-1 reconnaissance aircraft, and a number of other needed programs.

We would have to stretch-out or shelve research and development for over 50 programs. In addition, stretch-outs in the procurement of over 25 weapon systems would result not only in later than planned deployment but also in rising costs because of production inefficiencies. Programs like the M-1 tank, the Bradley fighting vehicle, F-16 and F-18 fighters, the EA-6B electronic warfare aircraft, the SSN-688 and SSN-21 class attack submarines, the CG-47 AEGIS cruisers, and many military construction programs would be affected. As you can see, planned and required force expansion across the spectrum of military capabilitly would have to be cut back.

Munitions cutbacks would reduce our ability to sustain forces in combat. We would see direct impact on programs like the GBU-15 bomb, Maverick, Harm, Tomahawk, Sparrow and Patriot missiles, light weight multipurpose ammunition, and ammunition mobilization facilities. Reductions in spare parts, support equipment, and communications equipment would lead to lower operational readiness. Depot maintenance capability would be reduced. Ship repair backlogs would increase. Operations accounts already severely cut in 1986 would not increase sufficiently to support forces and equipment; or satisfy essential readiness and training needs. In short, the impact on our defense capability would be pervasive and severe across the board.

In the final analysis, it is Congress that will determine specific funding levels for the programs I have discussed. While the priorities I have outlined are clear, it is impossible for me to predict the results of authorization and appropriation action. If such cuts are sustained, however, an action clearly damaging to our national security, I will make every effort to see them carried out in the manner I have outlined.

The accomplishments of the past five years are now in jeopardy because of the defense reductions being considered in Congress. Congress approved and set in motion our program for rebuilding America's military strength. It would be wasteful and irresponsible to cut short this program by denying the funding necessary to carry it out. We did not spend the last five years making our military more competitive and America secure again, only to undo it all in our second term. We must not return to the short-sighted and discredited policies of the past which destroyed the confidence of our military personnel, undermined our military capabilities, and jeopardized America's security. The threat has not changed; this only increases the risk.

The decisions we make about our defense budget today determine the strength with which we can underwrite our security for years to come. The threat we anticipate, unfortunately, continues to grow. The House Budget Committee's proposed level for defense spending would increase the risk to each one of us by reversing the progress we have made and causing the gap between our national security requirements and our military capabilities to widen once again.

I know you and your colleagues will appreciate the profound importance of these issues to our defense and foreign policy as you consider the implications of the Budget Committee's recommendation.

Sincerely,

RONALD REAGAN.

Now, what have we done in our Republican substitute? We take a very responsible approach to the problem. The defense figure is not what it ought to be; but far better, in my judgment, that figure of $293 billion budget authority, with $280 billion outlays in the Republican substitute, than that which is carried in the Democratic bill today.

It reduces the deficit by $39 billion in the fiscal year 1987, by $160 billion between the fiscal years 1987 and 1989, and it does all this without raising taxes, gutting national defense or slashing social welfare programs. The restraints on domestic spending are accomplished through a nondefense discretionary freeze at fiscal year 1986 budget authority levels and through targeted spending programs.

We have eliminated some programs, more so than what our Senate brethren have done. We have major domestic spending reforms, including 10 percent cuts in EDA, UDAG, CDBG, CSBG, and termination of general revenue sharing; sale of Government assets—Conrail and college housing loans; user fees; minor reforms in guaranteed student loans, Medicare and Federal employee health benefits; reducing Government travel expenses; the "Market Plan" sale of new loans; minor restraints in transportation; minor restraints in subsidized housing and child nutrition. So we have bit the bullet over on this side in making some very difficult cuts in some of those programs that are not all that easy to reduce. But, in aggregate, with what we fell is a much more reasonable figure on defense, we are still within those guidelines established by Gramm-Rudman at $144 billion.

So I would urge my colleagues on both sides of the aisle to support the substitute here today. I am going to support it, and very enthusiasticlly so. I know that as far as a consensus to get on either side of the aisle, let alone between the two sides, on a budget resolution, no one gets his way. Working together, I submit, we have got a good substitute and it ought to be supported.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas [Mr. COLEMAN].

Mr. COLEMAN of Texas. Mr. Chairman, I regretfully rise in opposition to House Concurrent Resolution 337, the Fiscal Year 1987 House Budget Resolution.

I commend the members of the House Budget Committee for the work that they have done to produce a budget, which on its face, is a good budget. In the areas of law enforcement, health care, job training and education, and income security of our elderly they have done well. In these areas, the goals of the American people are met, and I can support those goals.

The proposed budget meets the deficit targets required by the Gramm-Rudman-Hollings Act and keeps us on a path toward a balanced budget. In fact, the deficit contained in this budget resolution is below that of the Senate, and the administration.

However, this bill contains three provisions which I find unacceptable: Increased taxes, customs user fees, and inadequate defense spending levels.

The President proposed a tax increase of $6 billion in fiscal year 1987

and the Senate proposed the same $6 billion increase plus a tax increase of $4.7 billion over the President's request to spend on defense.

This bill would increase taxes by the same $6 billion requested by the President plus a tax increase of $4.7 billion above that requested by the President to apply to reducing the deficit for fiscal year 1987. I oppose any tax increase to meet the Gramm-Rudman deficit targets at this time. This bill is $6.95 billion below the Gramm-Rudman deficit target for fiscal year 1987. I would have preferred a separate vote on the need for a tax increase, but unfortunately, this House passed a rule not allowing such a separate vote. Because the Speaker has informed the Committee on Ways and Means not to report a tax bill unless requested by the President, there is certainly no reason to include the extra $4.7 billion in taxes in the budget resolution, and I disagree with the President, the Senate, and the House on the need for the $6 billion in user fees and revenue enhancements.

It sends the wrong signal to the American people that we cannot cut spending and reduce the deficit without more taxes. I think we can and therefore I cannot support this budget proposal in its present form.

I have never voted for a tax increase since I came to Congress, and I have stated repeatedly that I never will unless it is specifically requested by the President and justified to the people of west Texas.

The budget before us today also contains a provision to impose $300 million in additional annual customs user fees for processing imports entering this country. I would remind the House that $200 million in annual customs user fees were imposed by last year's budget resolution. These so-called fees are nothing more than a regressive tax on the American people, including those along the Southwest border who already suffer from the volatility of the Mexican economy.

Finally, Mr. Chairman, I am concerned about the defense spending levels contained in this budget proposal. While I agree that defense spending must be constrained along with nondefense spending to reduce the deficit, the levels of budget authority and budget outlays for defense contained in this budget might result in reducing the readiness of our Armed Forces.

The budget before us today provides for $285 billion in Defense budget authority and $276.2 billion in budget outlays. Unfortunately, because of the relationship between budget authority and budget outlays, the ratio of funding in this budget will provide the bulk of savings from the personnel and operations and maintenance accounts.

I have consistently supported adequate funding for personnel and for operations and maintenance. Without the personnel and operations and maintenance accounts fully funded, we will have nothing but a hollow deterrent.

The level of defense funding contained in this budget is $15 billion below the current service baseline for budget authority and $7.8 billion below the current services baseline for budget outlays, although $6.7 billion above the fiscal year 1986 outlay level. In order to bring the budget authority and budget outlay levels in line with the committee resolution, more cuts will have to be made in personnel and operations and maintenance accounts because of the way in which funds are expended in those two accounts. Outlays in personnel and operations and maintenance are made almost completely in the same year they are appropriated, whereas for other defense accounts, such as research and development, procurement, and military construction, outlays occur over a multiyear period. Therefore, in order to achieve the outlay level allowed for defense, the bulk of reductions will have to come from personnel and operation and maintenance. I do not think this is a wise defense posture to take at this time.

Over the past 5 years, this Congress has provided for a real increase in defense spending of approximately 6 percent annually. However, in the age of Gramm-Rudman-Hollings, we must constrain all spending while still attempting to achieve our goals and priorities. The investment in qualified military personnel and adequate operations and maintenance must remain a priority. Under the formula contained in this budget proposal, this priority will not be met.

Unfortunately, Mr. Chairman, the Latta substitute budget is sadly deficient in a number of areas as well. This Republican substitute would impose even more user fees than the committee budget, and it contains $1 billion more in foreign aid than the Democratic one. It freezes funding for the strategic petroleum reserve, which could exacerbate even further the downturn in the Texas oil economy. It would eliminate Federal impact aid, which compensates local school districts for the cost of children who live on Federal and military districts and thus do not pay the property taxes that fund our schools. Furthermore, the Latta substitute would cut Medicare by $750 million, $400 million more than the Budget Committee. The Latta substitute cuts health programs and child nutrition below current services levels, and it does not adequately fund Federal mass transit assistance which will ultimately force those costs back on the local taxpayers. And in this age of rampant terrorism, Mr. Chairman, the Republican budget would cut funds for Embassy security by an incredible $500 million.

Mr. Chairman, we can have a good budget if we address the areas I mentioned above. If we allow for separate debate on the issue of a tax increase, I believe we will find that we do not need new taxes to reduce the deficit. By removing the new taxes contained in House Concurrent Resolution 337, we will still be under the fiscal year 1987 budget deficit target. We should reconsider the customs user fees by assuming the negative economic impact they will have on the border areas of the Nation. And finally, we should reconsider the formula in which defense spending targets are set, because I believe they will result in inadequate defense spending levels.

A vote against this particular budget should not be continued as support for the automatic spending cuts under Gramm-Rudman. As a member of the House Appropriations Committee, even should this budget pass. I intend to make sure that we establish priorities in each appropriations bill and meet the Gramm-Rudman targets without across-the-board cuts.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY of Illinois. Mr. Chairman, I rise in support of the committee's budget and in opposition to the Latta substitute. Mr. Chairman, at a time when we have farmers going into bankruptcy by the thousands, unemployed coal miners, a 20-percent unemployment rate in most of the counties I represent in Illinois, and with our great education systems, this is a time when we must oppose the administration's request for more foreign assistance and more defense spending and put our very scarce dollars into American programs. Putting it simply, Mr. Chairman, America should come first.

The Latta substitute would cut education and other vital domestic programs and provide a billion dollars more for foreign assistance this year and increasing amounts in fiscal year 1988 and 1989. I would like to congratulate Chairman GRAY and all the Democrats on the House Budget Committee and the one Republican, Mr. WEBER of Minnesota, who voted for the pending budget. This budget keeps existing programs primarily at last year's level which means we will be able to save soil conservation funds, home extension service, our education budget, our Job Corps Center budget, flood control, food stamps, child nutrition, senior citizen programs, housing, public works, highways and other important domestic programs while still maintaining an adequate defense budget. The defense budget, Mr. Chairman, in this bill, after cuts, is still almost 300 percent greater than the defense budget when I retired from this body 11 years ago. The defense budget at that time was under $100 billion.

Therefore, I don't believe any prudent thinking person could say we are cutting defense to a dangerously low level. This is an all

American budget, because the best defense we can have in this country is a strong and vibrant American economy. The best part is our budget cuts below the numbers required in the Gramm-Rudman Balanced Budget Act.

I encourage a vote against the Republican substitute and a "Yes" vote for the Democratic committee budget.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield such time as he may consume to the gentleman from Wisconsin [Mr. MOODY].

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas [Mr. BRYANT].

Mr. BRYANT. Mr. Chairman, the budget resolution we are considering today has a lot to recommend it. As many of my colleagues have said, it is, in large measure, a good budget. It fulfills the pledge we took to the American people when we voted for the Gramm-Rudman Deficit Reduction Act, reducing the 1987 deficit to $137 billion, or $7 billion less than Gramm-Rudman required of us. This is better than the Senate has done by $7 billion, and better than the President has recommended by $23 billion.

The budget resolution we are considering today puts a stop to the uncontrolled spiraling of Pentagon costs that have eroded public support for our legitimate defense needs and encouraged the biggest ripoff of American taxpayers by defense contractors in our history.

I wish I could give my wholehearted and unreserved support to this budget. But I am concerned that it leaves room for a congressional pay raise at the same time it is asking most programs to make do with less.

I am going to vote for this budget, because it makes most of the right kinds of decisions necessary to start bringing our Government back on a pay-as-you-go basis. We absolutely must set spending ceilings under the limits of Gramm-Rudman. But I am going to oppose any legislation which seeks to put into effect any congressional pay raise while we are making major cuts in other programs.

Mr. BEDELL. Mr. Chairman, I rise in support of House Concurrent Resolution 337, the fiscal year 1987 budget resolution. I am particularly pleased that Democratic Members of the House of Representatives have united to propose and approve a budget for next year that promptly fulfills our responsibilities in the Federal budget process.

This resolution, which received unanimous support from Democratic members of the House Budget Committee, decisively rejects President Reagan's warped budget priorities. The resolution is a fiscally responsible budget that produces deficits below those proposed by the President and Senate and below the Gramm-Rudman deficit reduction target. It provides for a strong defense, limits tax increases, protects agriculture and rural programs and spreads the pain of deficit reduction evenly. It does not avoid hard choices with soft numbers.

Unlike the budgets proposed by the President and passed by the Senate, the resolution seeks a balance. Earlier this year, the President began the budget process by submitting a proposal to Congress that would have increased defense spending by $34 billion during 1987 while cutting agriculture programs by $6.4 billion and eliminating over 40 domestic programs.

Senate Republican leaders pronounced the President's budget "dead on arrival." The nonpartisan Congressional Budget Office took a close look at the President's calculations and reported that he had underestimated next year's probable defense outlays by $14 billion, therefore his budget would actually miss the Gramm-Rudman deficit reduction target. In March, the House of Representatives voted 312–12 to reject the President's plan.

Frustrated by the President's refusal to negotiate on defense spending and other issues, the Senate recently passed its own version of a budget that is better but still skewed. The Senate budget (S. Con. Res. 120) would increase defense spending authority by $13 billion over this year's level, increase taxes by $10.7 billion—slightly more than the President proposed—and achieve most of its spending cuts in domestic programs.

The Democratic budget alternative is the most balanced budget of the three. It would increase taxes by $10.7 billion over the next year—the exact same amount as the Senate budget. These new revenues would come from better tax enforcement, increased taxes on producers of toxic chemicals, and other minor adjustments. Unlike the Senate resolution, the House resolution provides that the additional revenues beyond those proposed by the President, $4.7 billion, would be placed in a separate Treasury account to be available only for deficit reduction. In fact, these additional revenues would lower the resolution's budget deficit next year to $137 billion, well below the maximum deficit of $144 billion allowed by Gramm-Rudman.

Time after time, Iowans have told me that they are willing to take their share of budget cuts if everyone else will, too. This budget embodies that principle. Measured from the Congressional Budget Office's budget baseline for next year—which represents CBO's estimate of the amounts needed to keep pace with inflation and population increases—the House Budget Committee's resolution would distribute spending cuts evenly between domestic and defense programs. This 50–50 split is the same as the Gramm-Rudman budget law's formula for automatic deficit reductions. In contrast, the Senate budget, measured from the same baseline, makes 92 percent of its spending cuts on the domestic side.

The biggest difference between the three proposed budgets is their levels of military spending. This year, defense spending authority will total $286 billion. For next year, President Reagan proposed increased defense spending of $34 billion for a total of $320 billion—an increase of 8 percent over inflation. The Senate proposed an increase of $15 billion for a total of $301 billion. The House committee resolution would spend a total of $285 billion next year, slightly less new defense spending authority than this year.

However, even under the House committee's lower number for defense spending authority, actual outlays for defense will continue to rise next year from $269 billion to $276 billion. This is because the Department of Defense has amassed a huge backlog of spending authority appropriated during the last 5 years. In fact, the nonpartisan General Accounting Office reports that the Defense Department may have accumulated a windfall of up to $40 billion in extra funds since 1982 because of overestimates for inflation. For this reason, I voted for the Leland amendment that would have lowered new defense spending authority next year by $32 billion for a total of $254 billion. I am pleased to note that the House committee budget provides that $3 billion of next year's defense funds would be withheld until the Defense submits a report accounting for funds provided this year that exceeded the amount needed to cover inflation.

This budget will be attacked by the President and others. Because it does not give him every penny of defense spending increase he seeks, he will claim that this budget recklessly endangers our national security. This is false. Earlier this year, the Central Intelligence Agency and the Defense Intelligence Agency testified to the Joint Economic Committee in Congress that according to their best estimates, U.S. defense spending had far outpaced Soviet spending increases during the last 10 years. According to the best U.S. intelligence available, between 1975 and 1985, total U.S. military spending increased by an average of 3.5 percent per year. During the same period, Soviet military spending poked along at a 2-percent rate of increase per year. Since 1981, U.S. military spending has increased by a whopping 7.2 percent—more than three times as fast as overall Soviet military spending.

In fact, besides having the strongest fighting force in the world, America's greatest strengths are its people and its economy. In an era of global economic competition and rapid technological change, true concern for American national security interests requires that we invest in education, social stability and economic opportunity here at home.

The President proposed $23 billion in domestic program cuts. He would cut agriculture income support programs by 20 percent. The President would eliminate the Small Business Administration, several housing programs for the elderly, the Legal Services Corporation, rural water and sewer grants, a new GI education program and others. He proposed cutting education aid by 15 percent, Federal student aid by 25 percent, and vocational education funding by 50 percent. He proposed large cuts in rural housing, crop insurance, conservation, extension services, and nutrition programs.

The House committee budget recognizes the need to invest in America's domestic economy and its people. It would hold agriculture spending programs at current levels. Although the budget would cut many domestic discretionary programs by 2.5 percent below this year's funding level, it would make deeper cuts in certain programs and protect certain low-income programs. It would provide full cost-of-living adjustments for all indexed programs.

Most important of all, this budget resolution represents fulfillment of the House of Representative's budget responsibilities. Coming soon after the Senate passed its budget resolution, it signals that Congress is meeting its obligations. Because it would actually reduce

the deficit below the Gramm-Rudman level, this budget resolution allows a $7 billion cushion in case economic assumptions are not borne out by events.

Late last year, the President signed into law the Gramm-Rudman legislation passed by Congress. Even Gramm-Rudman's strongest supporters said that their intention was that Congress and the President should work together on the budget in order to avoid automatic sequestrations under Gramm-Rudman. The budget resolution we have passed is a fair one. The President should work with us to achieve a House-Senate compromise budget that reflects the same balanced priorities.

I call on the President to abandon his insistence on continued rapid growth in the defense budget and deep cuts in people programs. By insisting on a borrow-and-spend policy to finance his doubling of the defense budget during the last 5 years, the President has doubled the national debt in the last 5 years, from $1 trillion to $2 trillion. As former budget director David Stockman said recently of this administration's record, "We have conducted the greatest free lunch fiscal policy of modern times." It is time to recognize that those policies were wrong, and to work together on policies that are balanced and workable.

Mr. LIGHTFOOT. Mr. Chairman, I am encouraged by the quality of debate I've witnessed today as we've debated our first budget resolution under the constraints of Gramm-Rudman.

It's been a difficult time for all of us as we strive to meet the deficit reduction targets we have set for ourselves. A number of my colleagues have commented today that not one of the budget alternatives presented is entirely acceptable, and I couldn't agree more.

Of utmost importance in considering the various alternatives, is that they all, roughly, meet the budgetary guidelines set by Gramm-Rudman. This is commendable, and eliminates deficit reduction needs as a solitary argument against any of these packages.

While each package does present some worthwhile provisions, today we must select the one that best meets our needs. I am pleased with some aspects of the Democratic budget, such as the $450 million new emergency farm credit package.

Unfortunately, what the Democratic package adds in new spending it takes away from existing programs. Resulting in overall reductions in farm program spending. Furthermore, the Democratic package assumes $54 billion in tax increases, which I believe are premature, if necessary at all. The Democratic package, worst of all, adds new programs and spending at, or all times, when we need to cut spending.

Although the Republican alternative provides more in farm program funding than the Democratic budget proposal, the Republican proposal, is far from perfect. Both packages eliminate the entire honey program within USDA, assume higher user fees for mandatory food inspection, and assume cut backs in some necessary USDA personnel—all at one of the worst times in history for the American farmer.

Another problem I have with both budgets is that neither removes the transportation trust funds from the unified budget. These proposals would continue the biased accounting practices of the past that are intended to make the Federal deficit look smaller than it actually is. The transportation trust fund revenues by law are dedicated to fund badly needed improvements in our highways, airways, waterways, and transit systems and can't be used for any other purpose. Nonetheless, both proposals would keep these trust funds under the artificial spending limitations in the unified budget.

With respect to income security programs, revenue sharing, and community development programs which are important for Iowa, the Republican and Democratic versions differ little. Both packages preserve 2 percent cost-of-living adjustments for social, Federal, and military retirement recipients.

Unfortunately, to be responsible, we must have a budget which meets the required spending reductions. The Republican package is the best package, of the available alternatives, for Iowans. For this reason, I lend the package my qualified support.

Mr. GALLO. Mr. Chairman, when this Congress approved the Gramm-Rudman Balanced Budget and Deficit Reduction Act last December, I believed that this House would work together to meet this challenge and respond to the mandate of the American public to reduce the Federal deficit.

Unfortunately, this has not been the case and I am gravely disappointed.

Instead, the chairman of the Budget Committee and the Democrats in this House developed a budget plan in closed caucuses and the Republican Members of this House were not given any opportunities to participate in setting this Nation's priorities.

The House Budget Committee's proposal, considered on this floor today, in no way reflects a bipartisan effort or the priorities of Members on both sides of the aisle.

The Democrats set forth in their budget resolution, their response to our deficit crisis. It is this—increased spending and increased taxes.

For these reasons, I rise in opposition to the budget proposed by Representative GRAY and in favor of the Latta substitute.

While the Latta substitute meets the mandated deficit target by trimming both domestic and defense spending and limiting new revenues, the Gray budget maintains runaway spending, drastically reduces defense, and increases taxes.

Rather than setting priorities and reviewing all Federal programs for cost savings, the Budget Committee's resolution avoids the issues, avoids the hard choices. Instead, they propose to close the budget gap by raising taxes and severely cutting back on funding for our national defense.

Whatever course this House takes on this budget today, it is most important that we commit ourselves to reversing this course of destructive partisanship and begin to work together to reduce this deficit, make fair budgetary decisions and avoid the automatic cuts that threaten us in the very near future.

Mr. BRUCE. Mr. Chairman, I rise in support of House Concurrent Resolution 337, the budget resolution for fiscal year 1987. The resolution as reported by the House Budget Committee is a sound and fiscally responsible budget and deserves our serious consideration and strong support.

The budget we consider today, provides deficit savings of $37.5 billion for 1987 and $164 billion over 3 years; it lowers the deficit further than required by Gramm-Rudman and moves us closer and sooner to balancing the budget than either the administration's budget or the resolution passed by the Senate. The House budget also takes a balanced approach to spending reductions. Following the principles of Gramm-Rudman, it proposes that cuts be distributed evenly between defense and domestic programs. This is a striking contrast to the Administration's budget where 90 percent of the cuts came from domestic programs and the Senate budget which took 80 percent of the reductions from the domestic side of the ledger.

The budget ensures a strong national defense by providing $285 billion in defense spending for 1987. Actual spending for this year will rise by $6 billion to accommodate commitments made in previous years. While maintaining a strong defense, the budget also reflects appropriate restraint to counter against continued waste in defense contracting.

On the domestic side of the budget, the resolution makes a number of recommendations which deserve special note. By passing this budget, we maintain our commitment to the elderly. The 65,000 senior citizens in my district will receive their Social Security cost-of-living adjustment, and health care benefits under Medicare and Medicaid will be preserved. The budget also ensures that programs which serve the 20,000 veterans in my district will not be cut.

For farmers, the budget maintains commodity programs at levels set in the 1985 farm bill and puts forth a new initiative to provide credit assistance to distressed farmers. Given the pain that many farmers have already experienced, this is not the time to drastically reduce the programs which are so important to our Nation's farming community. And finally, this budget establishes a priority for investing in this country's real future—our children—by increasing important education programs that provide remedial help for children, assistance for the handicapped, and student financial assistance for our college-bound young.

While we have established priorities in this budget, we have also made hard choices to reach the deficit reductions necessary to a healthy economy. Overall, this budget makes real cuts of $8 billion worth of spending on the domestic side of the budget. For most programs, this will mean that they will be cut by 2½ percent; some will be cut back even further. However, I believe that many are willing to share in the pain of deficit reduction as long as it is spread evenly—and that is precisely what this budget does.

Mr. Chairman, I believe that no one wants to experience Gramm-Rudman automatic cuts again this year. This budget takes us one step closer to ensuring that it will not happen. Adoption of this resolution makes significant reductions in the deficit, establishes important priorities and maintains a strong national security. I urge my colleagues to join me in successfully passing this budget today.

Mr. FORD of Michigan. Mr. Chairman, I rise in support of House Concurrent Resolution 337, the first concurrent resolution on the budget for fiscal year 1987. I want to commend my colleagues on the Budget Committee for reporting to the full House a budget plan that meets, and even surpasses, the Gramm-Rudman deficit-reduction target.

House Concurrent Resolution 337 would cut the fiscal year 1987 deficit to $137 billion—$7 billion under the Gramm-Rudman deficit-reduction target. I opposed Gramm-Rudman because of the sequestration procedure. I recognize, however, that it is imperative that the Congress act to adopt a budget and take further action to cut the deficit to avoid a second round of Gramm-Rudman cuts. The $7 billion buffer in the committee's budget plan is sufficient to ensure that a second round of sequestration will not occur. The President's budget, on the other hand, would not reach the Gramm-Rudman target. The Congressional Budget Office estimates that the President's February budget request, which garnered only twelve votes on the House floor two months ago, woud exceed the Gramm-Rudman target by over $16 billion.

Not only does House Concurrent Resolution 337 meet the Gramm-Rudman target, but it does so in a fair and equitable manner. Unlike the President's budget request, which recommended that over 90 percent of total spending cuts come from the domestic portion of the budget, the Committee's resolution would split cuts 50–50 between domestic and military spending. House Concurrent Resolution 337 is also a substantial improvement over the budget passed by the other body that would extract 84 percent of the spending cuts from domestic programs. Under the House Budget Committee plan, the same amount of spending savings would come from the domestic side as from the Pentagon. This 50–50 agreement is the same proportional mechanism as that contained in Gramm-Rudman.

House Concurrent Resolution 337 would allow for a modest increase in outlays for Pentagon spending of approximately $7 billion over the current level. At the same time, this resolution would reduce Pentagon budget authority by $1.8 billion compared to the fiscal year 1986 level. This is in stark contrast to the President's proposed military increase of 12 percent over the current level. The $285 billion for defense—nearly double the FY80 level of $144 billion—is adequate to protect our Nation and national interests.

I was pleased that the Budget Committee rejected the drastic cutbacks and program eliminations sought by the President. At the same time, House Concurrent Resolution 337 cuts domestic spending by $7.65 billion in FY87 and $41 billion over 3 years.

These cuts, however, are made carefully and selectively. This is in contrast to the meataxe approach of both Gramm-Rudman and the President's budget request. Under House Concurrent Resolution 337, most domestic programs will be cut by 2.5 percent from the current level while other programs will be increased and still others cut further.

Under this budget resolution, Urban Development Action Grants (UDAG), the Economic Development Administration [EDA], and the Appalachian Regional Commission, all of which were slated for elimination by the President's budget request, would be cut by 10 percent. Funding for certain low-income programs would increase at the rate of inflation.

I appreciate very much the significant attention given to education funding by the House Budget Committee. My colleagues are to be congratulated for identifying, as one of their highest priorities, education programs serving students at the elementary, secondary, and postsecondary levels, as well as for recognizing other priorities among the Nation's social services programs such as child care, summer jobs for youth, vocational rehabilitation, and older Americans programs, to name only a few.

The people of this country responded with joy when the Senate's budget resolution exceeded the President's fiscal year 1987 recommendations by $6.3 billion for education, training, employment, and social services programs in function 500, while still meeting the deficit reduction targets required by Gramm-Rudman. But the Nation was given an even greater benefit when the committee budget resolution for function 500 exceeded both the President's budget by $6.8 billion and the budget of the other body by $500 million.

The protections given to programs in education, specifically those aiding the economically disadvantaged and the handicapped, and for social services and training, including teacher training initiatives, illustrates the wisdom of the Budget Committee in recognizing the need to invest in our Nation's human capital. These actions signaled a doubting Nation that there is a deep awareness in Congress of the importance of an educated and healthy citizenry, and that a Federal role in these types of beneficial people programs is not only appropriate, but will continue to grow over time.

H. Con. Res. 337 is also fair to our senior citizens. This budget plan assumes that Social Security recipients will receive a full cost-of-living adjustment [COLA]. Equally important, this budget will not cut the COLA for Federal civilian and military retirees. As my colleagues well know, these retirees were denied a COLA this year by Gramm-Rudman and would not receive a COLA next year if sequestration were to take effect. In addition, it also assumes that the Congress will waive a provision of existing law that eliminates the Social Security COLA when inflation falls below 3 percent.

The committee's resolution also rejects the drastic cuts in Medicare sought by the administration. The resolution includes Medicare cuts of $1.75 billion over 3 years, but assumes that these cuts will be made without any reduction in benefits or increases in out-of-pocket payments for beneficiaries. House Concurrent Resolution 337 also assumes that $1 billion will be used to limit the skyrocketing Medicare hospital deductible.

The committee's plan recognizes that, while spending for important domestic programs is cut or frozen, our Nation cannot afford to send additional money overseas. As a result, this budget cuts foreign aid by 10 percent rather than increasing this portion of the budget.

In major areas under the jurisdiction of the Committee on Post Office and Civil Service, the budget resolution assumes a 3-percent pay raise for civilian employees in January 1987. It also includes a full cost-of-living adjustment [COLA] for Federal retirees in January 1987. Based on cost-of-living projections, that adjustment is expected to be 2 percent.

The resolution presumes savings of $700 million as a result of enactment of a new Civil Service Supplemental Retirement Program, the final details of which were worked out within the last few days. I am pleased that the budget resolution provides for a pay raise for civilian employees and a COLA for retirees. Given the sacrifice that Federal employees and retirees have been forced to make over the last 5 years (when they lost $25 billion in pay and benefits) I would have liked to see a somewhat larger pay raise. There is no question in my mind that the harsh treatment of Federal employees over the last few years has seriously damaged the morale and complicated the recruitment of the very best candidates. Nevertheless I am happy with today's action and hope it is a signal that we have quit beating up Federal workers and retirees.

In the postal area, I am pleased that the committee has soundly rejected the administration's proposal that all authorizations for nonprofit rate subsidies be eliminated. Adoption of the administration's proposal would have resulted in immediate postal rate increases of up to 75 percent for organizations such as the Salvation Army, the Crippled Childrens' Society, the Paralyzed Veterans of America—not to mention schools, churches, libraries, and tiny rural newspapers all across America.

I wish that the Budget Committee had recommended full funding of the rate subsidy program, but we have come a long way from the starting point of zero funding that the administration handed us in January.

This budget plan also contains $10.7 billion in revenue increases—the same amount as that included in the Senate-passed budget and only $4.7 billion more than the $6 billion requested by the President. Further, this additional revenue beyond the President's request will be used only for deficit reduction, not for increased spending.

Mr. Chairman, I urge my colleagues to join me in supporting the committee's budget resolution.

Mr. GREEN. Mr. Chairman, I rise in opposition to the Budget Resolution passed by the House Budget Committee (H. Con. Res. 337). The proposal is so fraught with loopholes, fudged economic assumptions, and unrealistic policy decisions that it will surely force the Federal Government to reach our deficit targets through the imposition of across-the-board cuts mandated by the Gramm-Rudman-Hollings balanced budget law. The Budget Committee has abdicated its responsibilities by approving a proposal whose actual deficit will probably come nowhere near the $144 billion target mandated by the Gramm-Rudman law.

Although I shall continue to work with my colleagues to hold the line on defense spending and ensure that programs such as AIDS research and maternal health are protected from budget cuts, I cannot, in good conscience, vote for this budget proposal. Its eco-

nomic assumptions are spurious at best, and it will not accomplish its purpose.

For example, the budget assumes a 2-percent level of inflation to provide a 2-percent cost-of-living adjustment [COLA] for all Federal retirees and Social Security recipients. It is probably the case that inflation will not rise above 2 percent for 1986, and it is laudable that the Budget Committee wants to give our senior citizens and other retirees a 2-percent cost-of-living adjustment. At the same time, however, the committee also assumes that tax revenues will increase due to a 3.4-percent rate of inflation. Mr. Chairman, you can't have it both ways. The committee should assume either a 2-percent rate of inflation throughout the entire budget document, or 3.4 percent rate. Instead, by assuming two different rates of inflation, the committee either overestimates revenues or underestimates expenses, or a combination of both.

In addition, the Budget Committee proposal has readjusted the budget estimates provided for the Congress by the impartial Congressional Budget Office (CBO). CBO has estimated that the Federal Government will run a deficit of about $182 billion in fiscal year 1987 under current economic conditions and assumptions. However, the Budget Committee has arbitrarily assumed that the deficit will be approximately $8 billion less than the CBO estimate. No other budget proposal, either in the Senate or in the House, assumes any budget deficit other than that estimated by CBO. Why does the House Budget Committee—simply to avoid $8 billion of hard choices?

Just as important, the Budget Committee's estimates have not been run through CBO's computers for confirmation. I cannot help but remember the debate last year over the Budget Committee's proposal which promised to reduce our deficit by about $55 billion. However, its estimates were never confirmed by CBO, and it ended up saving only $35 billion. I have few doubts that today's proposal is a repeat of last year's.

What these fudged figures and creative accounting add up to is a budget whose deficit target will not be met by a longshot. The Budget Committee has played around with the figures in order to appear as though the proposal will meet the deficit target imposed on us by Gramm-Rudman. When push comes to shove, however, the combination of the inflation cheating, baseline fudging, and unrealistic assumptions will doom this budget to failure. If any Member of Congress wants the Gramm-Rudman ax to fall in October, he should vote for this budget.

From a more parochial viewpoint, the Budget Committee's proposal would have a seriously detrimental effect on both mass transit in New York and on our elderly citizens. The Budget Committee cuts both operating assistance and capital assistance for mass transit by 10 percent across-the-board, I, as well as the MTA, have actively lobbied to keep any mass transit budget cuts confined to operating assistance funds, because the MTA—and other large mass transit systems—depend more heavily upon the Federal Government for capital assistance than for operating assistance. For the senior citizens in my congressional district, Mr. Chairman, I should note that the Budget Committee proposal would raise the Medicare part A deductible to about $540 per year. Interestingly, the Republican budget alternative would have cut mass transit operating assistance without touching capital assistance, as requested by the MTA, and would have frozen the Medicare part A deductible.

As I have said publicly on more than one occasion, I cannot vote for any budget resolution which increases defense spending in any way, shape, or form. That is one reason why I could not support the "consensus" Republican budget, which proposed to increase defense spending by the rate of inflation. However, assuming an artificially low rate of outlays in the defense budget would force cuts in our operations and maintenance, while preserving funding for long-term weapons systems such as the MX missile.

One further note, Mr. Chairman. Some would accuse those of us who have opposed all four budget proposals presented here today as obstructing the budget process and forcing the Federal Government to implement the destructive Gramm-Rudman cuts. However, I should note that our budget process takes place throughout the entire year, and there will be further opportunities to cut our budget deficit down to the Gramm-Rudman deficit target. I shall work with my colleagues on the Appropriations Committee throughout the year to lower Federal spending in a responsible and equitable manner. In addition, should we find ourselves above the Gramm-Rudman target after the CBO and the Administration's Office of Management and Budget review the budget in August, we still have a month to get our spending in line with the Gramm-Rudman.

I shall vote against the Budget Committee's resolution today, Mr. Chairman, but I do so in the hope that the Appropriations Committee and the Congress as a whole will stop playing the dangerous game of "budget chicken" which has occurred during the past few months. We need a real budget—one which will get our fiscal year 1987 deficit down to $144 billion to avoid Gramm-Rudman. It is clear that the House Budget Committee resolution does not meet this responsibility.

Mr. JONES of North Carolina. Mr. Chairman, today I rise in great concern for the continued existence of a service which is vital to this great Nation. In the event that budget resolution that we are debating today survives its legislative journey, the U.S. Coast Guard, as we know it, will cease to exist. The funding levels proposed are $144 million less than the President's request, $197 million less than the unanimously passed House authorization, and $386 million less than the Senate budget proposal.

Last year I came before this great body to warn of the grave consequences of a $230 million cut being ventured in the Senate's Coast Guard appropriation bill. We heard of the fatal impact that cut would have had. The closing of many, many Coast Guard stations, the mothballing of vessels, and the grounding of aircraft. Fortunately, with broad support from House Members, the Senate concurred in conference with the levels appropriated by the House.

I cannot even fathom the reductions which will be necessary in the event that the assumptions pertaining to the Coast Guard, as found in the House budget resolution, prevail. We must not allow this service to be gutted while simultaneously expecting it to: Step up its war on drugs, halt the migration of illegal immigrants onto our shores, and police the Fourth of July flotilla in New York Harbor.

Even more amazing, at the same time this resolution proposes to slash Coast Guard spending by $282 million from last year's funding, it proposes to exact new user fees totaling $150 million a year. How realistic is it to expect the authorizing committee to approve controversial user fees at the same time funding is savaged by this resolution?

I know there's not much to be done about this program today, but I must put the Members of the House on notice that this grave mistake must be corrected in the House-Senate conference on the budget resolution. We must, I repeat must, fend off these proposed cuts or they shall serve as the death knell for the U.S. Coast Guard.

Mr. TRAFICANT. Mr. Chairman, today, Members of this body will be voting on the budget for fiscal year 1987. The only budget presented that features a fair consensus budget is the proposal reported by the House Budget Committee. As so many have done, I, too, commend Chairman BILL GRAY for his leadership and diligent work in producing a budget that reaches and exceeds the Gramm-Rudman deficit targets while at the same time preserving the integrity of such important programs as education, job training, and health services.

The important aspect of this budget is its delicate balance between fiscal restraint in domestic and defense spending so as to meet—and in this case go beyond—the targets established under Gramm-Rudman. Clearly, Congress was able to dodge a dangerous, program-gutting bullet by avoiding the sequestration of funds for these important Government programs.

To say that I fully support the committee budget proposal in total is incorrect. I would prefer the Black Caucus budget. While I strongly favor the treatment of children, veterans, and retirees in this budget, I am dismayed and disappointed in the cuts to general revenue sharing for our cities who use these funds to provide such basic services as police and fire protection; the 10-percent reduction in community and regional development programs like urban development action grants and EDA moneys that help areas like mine who have not achieved the economic prosperity as promised; and the 25-percent cut in the small business disaster loans that will prevent family businesses from rebuilding after a natural catastrophe like the tornado disaster that hit my district last year. Hopefully we can address this issue in near future.

No, this budget is far from ideal. But what it will do is set the necessary blueprint for spending in 1987 and hopefully, do so through a unique consensus in the House. I urge my colleagues to support the budget resolution as reported by the House Budget Committee.

Mr. MANTON. Mr. Chairman, I rise in strong support of the fiscal year 1987 budget resolution as reported by the House Budget Committee. I want to commend the chairman of

the Budget Committee, the gentleman from Pennsylvania, for crafting a fair and responsible budget resolution.

Mr. Chairman, this budget is a sharp contrast to the budget submitted by President Reagan. The House defeated the President's budget by an overwhemling margin. Democrats and Republicans alike defeated the President's proposal and with good reason—90 percent of President Reagan's proposed spending reductions would have come out of domestic programs. Forty domestic programs would have been terminated, including housing for the elderly and handicapped, rental housing development and rehabilitation grants, urban development action grants, community service block grants, and mass transit assistance. In all, the President's budget would have slashed domestic programs by $28 billion to pay for a whopping 8-percent increase in defense spending. The President's budget would have continued to fatten up an already bloated and wasteful Pentagon at the expense of desperately needed domestic programs. Finally, although the President signed the Gramm-Rudman Balanced Budget Act, his fiscal year 1987 budget would have exceeded the Gramm-Rudman deficit target by more than $15 billion.

Mr. Chairman, the House Budget Committee plan reduces the deficit in a more balanced and equitable manner than the Reagan proposal, and meets the fiscal year 1987 Gramm-Rudman deficit target with room to spare. Under the House budget, half of the spending reductions come from defense, and half come from domestic programs. This balanced approach is reason enough to vote for the House Budget Committee Plan. However, there are three more important reasons.

First, important domestic programs are protected by the House budget. I am concerned that some domestic programs will be slightly reduced below last year's spending levels. However, in order to make certain that these vital programs are not terminated or forced to absorb debilitating cuts, some spending reductions are necessary and justified.

The House budget gives high priority to programs that serve the needs of the Nation's elderly and low-income people. Social Security beneficiaries and Federal retirees will receive their full cost-of-living adjustment under the House budget. Funding would be increased to offset the effects of inflation for programs targeted to the poor including, assisted housing, emergency food and shelter programs, child nutrition, and supplemental security income for the elderly poor. The House budget also provides much needed spending increases for programs designed to educate our children, retain our unemployed workers, and fight illegal drug trafficking.

Second, the House budget would require the Pentagon make its fair contribution to reducing the deficit. Under the House Budget Committee plan, budget authority for defense would be slightly below last year's level, although actual outlays for defense would still continue to increase.

Mr. Chairman, I strongly disagree with those who claim the House budget cuts too much from the defense budget. Since 1981, President Reagan has increased defense spending by more than 45 percent. Billions of dollars have been wasted on extravagant needless weapons systems, and the cost overruns and unscrupulous practices of some defense contractors. The House budget only begins to trim the thick layer of fat the Pentagon has accumulated under the Reagan administration. This budget provides for a strong national defense. However, It is the responsibility of the administration to make certain these funds are spent in a cost-effective manner.

Finally, Mr. Chairman, the House budget accepts the Senate initiative to increase revenues by almost $5 billion more than the $6 billion requested by the President. However, the Senate would use the extra revenue to boost defense spending while the House budget would wisely use the revenue to further reduce the Federal deficit. This is the correct approach, and I believe we could make an even greater dent in the deficit by imposing a tough minimum corporate tax. It is a national disgrace that many profitable multimillion dollar corporations pay little or no Federal income taxes.

Mr. Chairman, the House budget plan sets us on a path toward a balanced budget without inflicting unnecessary pain on vital domestic programs that protect the poor and elderly, create jobs, and promote economic growth and development. I want to commend the chairman of the Budget Committee for reporting to the House this responsible, compassionate, commonsense alternative to the President's harsh, mean-spirited budget proposal.

Mr. Chairman, I believe this budget accurately reflects the priorities and goals of the American people. I urge my colleagues to support the budget reported by the House Budget Committee.

Mr. DINGELL. Mr. Chairman, I rise in support of House Concurrent Resolution 337, the concurrent resolution on the budget. I want to commend the distinguished chairman of the House Budget Committee, Mr. GRAY, for once again assembling a budget package that is both sensible given the Nation's staggering Reagan deficits and yet sensitive to the needs of the American people.

The Budget Committee has produced a responsible and balanced package of domestic and military spending cuts, coupled with modest revenue increases. This package will hopefully enable us to avoid the drastic and irresponsible cuts that may be visited upon us next fall if we do not meet the Gramm-Rudman deficit reduction target.

Some of my colleagues, Mr. Chairman, may be concerned that this resolution cuts too much from defense. That is certainly what the administration has said. And yes, the Nation wants an adequate and strong defense—but we also want affordable defense.

Real growth in defense is desirable, but real growth is possible under this budget resolution if the Pentagon has the will to eliminate the waste, fraud, and abuse that now prevails there.

Secretary Weinberger undoubtedly is out there today crying wolf and, as my good friend Mr. GRAY said in today's Washington Post, warning us that even as we speak the Russians are sailing up the Potomac. But have we seen in the last year any effort whatsoever on the part of the Defense Establishment to curtail the abuses with which we are all too familiar?

No! In fact, the evidence points in the other direction. Only last month, General Dynamics was slurping once again at the Pentagon's trough—this time with more contracts than any other defense contractor in history, just 2 short months after a suspension for misbilling.

I know that it is difficult for many of my colleagues to vote for cuts in defense spending. But by voting for the budget before us today, you will be casting a vote for responsible defense spending.

If the rest of the Federal Government must trim the fat in these difficult days, it is high time that our most obese agency went on a diet. I urge a vote for the resolution.

Mr. MONTGOMERY. Mr. Chairman, in February, the Committee on Veterans' Affairs recommended a current services budget for veterans' programs. I believe the resolution reported by the Budget Committee comes close to what the Committee on Veterans' Affairs proposed for the next fiscal year.

I would like to commend the chairman, Mr. GRAY, and the ranking minority member, Mr. LATTA, for the fair treatment which veterans have received from the Budget Committee. We've had to come up with our share of savings during the past several years, but veterans have done reasonably well overall. In recognition of the leadership displayed by the gentleman from Pennsylvania and the gentleman from Ohio, the Disabled American Veterans honored the chairman and the ranking minority member for their strong support of veterans' programs.

This budget is fair for veterans. It does not authorize any new programs. It requires the Veterans' Administration to continue to examine cost-effective ways to deliver health care to eligible veterans. It continues a very restrained approach to renovating and replacing aging VA hospitals. I do not know if we can continue to ignore some of the most pressing construction needs which exist today, but for this year, as well as fiscal year 1987, the VA will have to make do with what is in this resolution.

This budget is approximately $350 million higher than the administration's request in budget authority for 1987, and $250 million higher in outlays. It will permit the VA to provide hospital care to all of the veterans to whom the VA must provide inpatient care. The VA is not authorized to deny treatment to service-connected and low-income veterans, and by providing a sufficient level of budget authority for this purpose, the Congress is rejecting the administration's plan to deny care to "low priority" veterans.

This resolution also provides for a full cost-of-living adjustment for veterans drawing compensation and pension. If any Federal beneficiary is going to get a COLA, veterans certainly deserve one.

I would like to make one final comment. I have discussed the definition of what constitutes a current services budget for the VA medical program in some correspondence with the chairman of the committee. I hope the committee will continue to make adjustments in the funding provided for the medical program in recognition of the shortfall which is

created by the CBO baseline for this account. I know the chairman will keep this in mind when he is in conference with the other body.

Again, I thank the distinguished chairman and all members of the committee for their work in behalf of our Nation's veterans.

Mr. CRAIG. Mr. Chairman, I rise today to express my concerns over two provisions that are included in House Concurrent Resolution 337 and in the Republican alternatives that will be offered later today. I want to address proposals calling for the termination of the honey price-support program, and discuss the status of the General Revenue Sharing Program.

First of all, I see no justification for the termination of the honey price-support program. This issue was addressed during last year's debate on the 1985 Food Security Act, in which a vote was taken specifically on this issue. Obviously, based on its own merits, the honey program had majority support.

As many of you know, I am not a strong advocate of government supported programs, but I fail to understand why the honey program was singled out among all the commodity price-support programs for termination, especially after the issue was fairly debated just months ago.

If the bottom line of this decision was deficit reduction, then it would have been only logical to propose termination of all price-support programs. I would still argue that the budget is not the proper forum for this debate. If opponents of the honey price-support program are determined to let honey producers go it alone, then they should bring a bill to the floor that does that, and only that.

As it would appear that one form of a budget will pass this body today, I would ask my colleagues who will ultimately sit on the budget conference committee, to reject his provision and allow the honey program to continue as it was passed in the 1985 farm bill.

Second, I will be supporting one of the Republican alternatives to House Concurrent Resolution 337 today, despite the fact that neither would reauthorize the General Revenue Sharing Program. Recently, the House Government Operations Committee, on which I serve, passed a bill, H.R. 1400, to reauthorize General Revenue Sharing for 3 years at the fiscal year 1986 level. I supported this bill because it is the only proper course to pursue in phasing out this program.

Last year, Congress voted to phase-out the General Revenue Sharing Program in 1-year, leaving little time for local entities to adjust their budgets. In my home State of Idaho, which is 65 percent owned by the Federal Government, almost all the cities are very small and have consequently become dependent on programs like revenue sharing. This unreasonable 1-year termination would seriously jeopardize the citizens' safety and basic services in these cities.

I would ask my colleagues that, although the Republican alternatives do not reauthorize revenue sharing at a freeze level, they join me in supporting H.R. 1400 when it comes to the House floor.

Mr. WEISS. Mr. Chairman, I want to take this occasion to express my support of House Concurrent Resolution 337, the congressional budget resolution for fiscal year 1987.

This budget year is strikingly similar to recent budget year's under President Reagan. As in past years, the President proposed a budget that seriously endangers the future or our Nation by ignoring the pressing needs of the American people. The Senate then produced a budget resolution that improves on the President's misguided plan, but is still unacceptably flawed. This, it has once again been left up to the House of Representatives to bring some moderation and fairness to the Federal budget.

However, there is one crucial difference this year. Not only are the American people threatened by the President's budget and the Senate's budget, they also face the ongoing threat of mandatory budget cuts under the newly passed Gramm-Rudman balanced budget law. This law has already imposed significant hardships across America by mandating $12 billion in budget cuts in March. If the Gramm-Rudman law is upheld by the Supreme Court, and if Congress fails to enact a budget that meets the Gramm-Rudman deficit targets, we will face massive budget cuts of $50 billion or more this fall.

It is in the face of these serious threats to our Nation's well-being that the House Budget Committee has prepared a budget resolution that, while not perfect, improves significantly upon all the major alternatives. It is far better for our Nation than the President's budget. It is far better for our Nation than the Senate's budget. And it is far better for our Nation than large and indiscriminate budget cuts under the Gramm-Rudman law.

Let us look at the facts. The President's budget would increase defense spending by $27 billion next year, a 12-percent increase. Domestic spending would be reduced by $18 billion, and more than 40 programs would be eliminated entirely.

The Senate budget also contains grossly distorted priorities. A full 84 percent of the spending cuts in the Senate resolution are aimed at domestic spending programs.

The House budget, on the other hand, calls for an equal amount of reductions in defense programs and domestic programs. This is the first time we have been able to achieve some parity in deficit reductions between defense and nondefense programs, and it is an important step forward in the fight to create a Federal budget that preserves the quality of life for American citizens.

While the House budget calls for reductions of 2.5 percent in most domestic programs, the budget provides significantly more funding for vital human needs programs than either the President's budget or the Senate budget. The budget provides level funding for job training programs and includes $500 million for a new program of worker education and retraining. The Compensatory Education Program and Head Start would each receive an increase above inflation in the coming year.

The budget also provides a higher level of funding for guaranteed student loans than any of the alternatives. And it would allow other financial aid programs, such as Pell Grants, to maintain their current level of services.

This budget refuses to compromise on the needs of the elderly. Despite the President's request for $53 million in Medicare cuts over the next 5 years, the House budget does not make any cuts in Medicare benefits or increase the costs to Medicare beneficiaries.

The benefits of our Nation's retirees, including Social Security recipients and Federal civilian and military retirees, would be fully protected under the House plan. The budget assumes that all of these programs will receive a full cost-of-living adjustment.

Further, the House budget would give Federal workers, who have been asked to bear a disproportionate share of recent deficit reduction efforts, a much-needed and well-deserved 3 percent pay increase in each of the next 3 years.

One aspect of this budget which I strongly support is the inclusion on $346 million for research and other activities to battle against AIDS. Over 20,500 cases of AIDS have been reported to the Centers for Disease Control to date, and it is expected that 30,000 or more will be reported before the end of the year. Over 11,000 Americans have already died of AIDS. Because the resources necessary to fight this disease do not exist at other levels of Government or in the private sector, it is imperative that the Federal Government take the lead in responding to AIDS funding requirements.

The President's budget would actually have cut funds from the currently appropriated level of $244 million, down to $213 million. I am ardently opposed to any cutbacks in AIDS funding, and I am greatly pleased that the House has rejected this ill-conceived proposal.

It is equally important that the Budget Committee has included specific language providing for the consideration, at a later time, of H.R. 1400, legislation I have authored to continue the Federal General Revenue Sharing [GRS] Program.

GRS efficiently serves the people in 39,000 communities across the country, providing assistance for vital services such as police, fire, education, and health services. Because the current authorization for GRS will expire on September 30, 1986, legislation has been approved by the Committee on Government Operations to extend the program for an additional 3 years at the current level of funding, $4.56 billion per year.

In allowing for consideration of an extension of general revenue sharing later this year, the committee went well beyond what has been achieved in the Senate. The Senate budget resolution will only permit a continuation of GRS if new dedicated revenues are provided to cover the costs of the program. I am hopeful that the conference report on the budget will directly provide for a continuation of GRS.

Finally, the House has not permitted any further erosion of the basic programs of assistance to our Nation's poor. The House budget contains a small rise in the Medicaid Program over the next 3 years. And programs such as the women, infants, and children [WIC] supplemental nutrition program, food stamps, child nutrition, SSI, subsidized housing, low-income energy assistance, and emergency food and shelter programs will be funded at or above the level needed to compensate for inflation.

This House budget is also notable because it begins the process of raising sufficient revenue to support the activities of the Federal

Government. This budget will raise additional revenues of $10.7 billion next year and $45.8 billion over the next 3 years, the same amount as contained in the Senate budget resolution. New revenues in excess of the amount of the President's request are to be placed into a special trust fund for the specific purpose of reducing the Federal deficit.

The result of these changes is a House budget resolution that treats deficit reduction with more fairness than in the past and manages to reduce the deficit by a larger amount than any of the competing plans. The President's budget failed entirely to meet the Gramm-Rudman deficit target, and would have resulted in a fiscal year 1987 budget deficit of $160 billion. The Senate budget manages to reach the Gramm-Rudman target of $144 billion, but the House budget cuts the deficit by $7 billion more than the Gramm-Rudman target.

However, there are elements of this budget which I do not support. In particular, I am concerned bythe decision of the Budget Committee to cut operating assistance and capital grants for mass transit by 10 percent. These funds are absolutely vital for the operation of New York City's subway system. In addition, I am opposed to the deep cuts that are called for in community and regional development programs, including urban development action grants and rental housing assistance programs.

But perhaps the chief flaw of this budget resolution is that it does not go far enough in challenging the false promises and empty policies of the current administration. The budget continues to target many vital human needs programs that have already been victimized by large cuts in recent years. It does not go far enough toward ensuring that corporate and individual tax dodgers, who have found comfort in the Reagan tax policy, will pay their share of tax. And it fails to acknowledge that a small cut in military spending will not compensate for years of compulsive overspending on dangerous and wasteful weaponry.

One substitute to this budget resolution, offered by Mr. LELAND, would have reversed, not just slowed, our current policies. I voted for this quality of life budget because I am convinced that it would provide American citizens with real opportunity and real equity, having received the specific assurance from the sponsor that levels of aid for Israel and Egypt would not be cut beneath the levels called for by the House Foreign Affairs Committee, on which I serve.

In the years to come, we must work diligently to reverse the misguided policies of this administration, which is bent on destroying the progressive achievements of the last 50 years. We must act to restore funding for vital human needs programs. We must act to create an equitable Tax Code. And we must act to promote peace and national security by reducing excessive military expenditures.

We owe it to the American people to demand these changes from now until the day that they are accomplished. Because it is only by fundamentally reordering our priorities that we will be able to ensure a prosperous and peaceful future for our Nation.

I urge my colleagues to support this budget. But I urge them to bear in mind that we have many miles to travel before we return our Nation to its proper course.

Mr. PORTER. Mr. Chairman, I have looked long and hard at the Budget Committee's budget and the alternative offered by the Republicans, and I have come to the disappointing conclusion that I cannot support either of these proposals. Both budgets have some meritorious aspects but neither will, in my opinion, achieve what they intend.

Those of us who voted for Gramm-Rudman, with some reservations, did so because we hoped that it would motivate Congress to budget responsibly. Last year's budget agreement purported to reduce the deficit to about $170 billion. At the time of its adoption in August, months late, I called that budget a joke and a sham. And indeed, the projected fiscal year 1986 deficit is now some $40 billion higher than that resolution projected.

Some of us hoped that Gramm-Rudman reforms in the budget process would result in a budget agreement earlier in the year giving Congress more time to carry out the mandated changes in policy. I introduced a budget—the "Benchmark Budget"—on March 5 which proposed a comprehensive freeze on outlays because I hoped to encourage some serious consideration of the tough choices necessary to hit the Gramm-Rudman target.

When we missed the new deadline for this year's budget conference agreement—a deadline which passed 1 month ago today—some of us were concerned. The chairman of the Budget Committee told us that the deadline was not important, that the content of the document was what mattered. Some of us urged the committee to get on with its business. We argued that the spending and revenue decisions would not get any easier with the passage of time and that this body should not wait for the other body to act first.

In reality, however, the spending and revenue decisions did get easier. Late at night, near the end of debate, the other body selectively lowered its inflation estimate for COLA's without measuring the probable impact of lower inflation on revenues. By waiting, by allowing the other body to go first, we allowed them to set the economic assumptions. The other body fudged the numbers and, gutlessly, we went along with them.

Will the assumed savings in these budgets be achieved? Certainly some will, but some may never come through. The 2-percent COLA is assumed, not reconciled. If some Members of Congress opt to play politics with this issue, the savings assumed will never be reached.

Will Conrail be sold in fiscal year 1987 for almost $2 billion? It may be, and I certainly hope it will be. But the leader of the committee of jurisdiction, Mr. DINGELL, has recently indicated his opposition to the administration's sale proposal—and I agree with the gentlemen that the administration is backing the wrong buyer. Hopefully we can agree to sell Conrail in fiscal year 1987, but failure to do so will have an obvious and substantial budgetary impact.

Conrail is a good example to dwell on momentarily. Both of these budgets employ extensive use of asset sales to offset domestic spending and hold down total outlays. College housing loan portfolios, rural housing portfolios, SBA disaster loans, the gas centrifuge plant in Ohio and Conrail are all assumed to provide substantial receipts to offset current spending. The sale of assets and portfolios is a relatively new idea and, I think, a good one. It is, however, dangerous budget policy to assume large revenues from such sales which may not occur at all, which may experience some implementation problems, or which may not produce the assumed level of revenues.

Indeed, we see in the various budgets different savings numbers applied to these proposals. The Democratic budget assumes that rural housing loan sales, currently slated to bring in some $280 million in fiscal year 1987, will in fact bring in almost four times that amount. We see similar variance in assumptions about the recoupment of oil overcharge funds—anywhere from $900 million in the other body's budget to $2 billion in the House Democratic budget.

These various anticipated receipts are used to offset domestic spending in the committee budget. With these receipts, the committee increases education spending—a worthwhile initiative in and of itself, but an inappropriate proposal in light of our fiscal problems—and makes some minor and some unspecified reductions in domestic spending which leave substantially untouched several programs which should be terminated. Needless to say, if the receipts from asset sales do not match the budget assumptions, net outlays will exceed the resolution targets.

A more important concern with asset sales, however, is that they do very little to reduce the structural deficit. After the assets—whether loan portfolios or railroads or oil fields—are sold they cannot be sold again. Receipts from asset sales decline in the out years and, in many cases, the loss of interest payments or other revenues generated by these assets produces a net rise in outlays in fiscal year 1989 and beyond.

This does not mean that selling these assets is a bad idea. It simply means that the committee—by using the revenues from these sales to offset new spending proposals and avoid the termination of unnecessary programs—is laying the groundwork for tomorrow's budget deficit headaches. When the receipts from the sales are gone, and the country has adjusted to the new spending levels made possible by these receipts, the structural deficit will remain as ominous as ever, or more so.

Lastly, there is the issue of new revenues. The Republican alternative has a handful of them while the committee budget has taken the full amount proposed by the other body. It is to the committee's credit that they have not used all of these new revenues to justify new spending on defense, preferring to produce a resolution deficit which, at least on paper, is below the Gramm-Rudman target.

The committee claims, however, that it is not proposing more revenues than were advocated by the President for the purpose of meeting Gramm-Rudman and that additional revenues proposed will be held in a special account to insure that they will be used for deficit reduction, not spending. If the President objects, these extra revenues will not be necessary.

This claim of "no revenues beyond those proposed by the President" must be put to rest now. In his original budget, the President proposed $6.3 billion in new, specific revenues for fiscal year 1987. The President's proposals included revenues from the recoupment of oil overcharges, a permanent extension of the temporary 16 cents per pack cigarette excise tax, reform of the Civil Service Retirement Program, and several user fee initiatives.

In its budget, the committee included many of these proposals and counted them, not as new revenues but as offsets to spending proposals. The biggest revenue raiser—the cigarette tax—was permanently doubled in March with passage of the Consolidated Omnibus Budget Reconciliation Act of 1985 [COBRA] and was counted in the committee estimate of baseline revenues.

The committee budget, therefore, does not meet Gramm-Rudman without new taxes in excess of those proposed by the President, but requires "unspecified" revenues above and beyond those offered by the President in order to offset spending in other areas. The argument can certainly be made that new revenues are needed to close the deficit gap, but the committee is not being very forthright about how much in the way of new revenues—whether user fees, higher retirement contributions, excise taxes or "unspecified" increases—are included in their budget. Furthermore, by counting many receipts against outlays under certain functions, and calling this "domestic savings," the committee attempts to obscure the fact that its budget really doesn't cut as much from the domestic side as it does from defense—there are no user fees or asset sales used to offset the hard freeze on defense budget authority.

The Republican alternative, for its part, has the same tendency to rely on user fees and asset sales. However, the GOP budget includes solid spending reduction proposals for the domestic side. Unfortunately, it also includes a substantial $10 billion increase in defense spending. There is, quite simply, no reason why defense spending should be given a substantial increase, with billions from inflation overestimates still in the pipeline.

At the outset I said I was disappointed to realize that I could support neither budget alternative offered today. Both have some merit—the committee budget for its willingness to restrain defense growth, the Republican alternative for its substantiated domestic reductions and commitment to hold the line against increased taxation of working Americans. Perhaps these better elements will emerge from a conference with the other body. I certainly hope so, Mr. Chairman.

Mr. GRAY of Pennsylvania. Mr. Chairman, I yield myself such time as I may consume.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. GRAY], the chairman of the Budget Committee, is recognized for 5 minutes.

Mr. GRAY of Pennsylvania. Mr. Chairman, we have had a lengthy debate. We have been working on the process of deficit reduction since the first day that the Congress opened this year, and I want to take a moment and thank the members of the committee, both Democrats and Republicans, because I truly believe that all of us want to reduce the deficits.

I also want to thank the staffs, the majority staff and the minority staff, for their contributions.

And then I want to say to the American public that the debate here is not about whether we should reduce the deficits. The debate here is about what are the choices you make in achieving that reduction.

I think that there are three important questions.

First, which one has the best balance?

The Republican substitute takes 70 percent of its reduction out of the domestic side. And that is good. That is better than the President, who took over 90 percent. That is better than the Senate that took over 80 percent. But it still cuts low-income weatherization, it freezes SPRO, at a time when we should be concerned about the energy area. It also cuts $750 million from health care and $880 million from child nutrition. It is good, but it is not as good as the House Budget Committee. That is 50-50—50 percent of the reductions from domestic, 50 percent from the Pentagon.

Second, which budget will provide for us to reach the target and prevent sequestration under Gramm-Rudman, the target of 144?

Well, the House Budget Committee, even without using additional revenues beyond the President, reaches a target of 141.6, $2.4 billion below Gramm-Rudman.

Yet the Republican substitute is 143.8, a $200 million cushion. However, it does not reach the targets in the out years, 1988 and 1989.

So if you want to have a cushion—because some of the speakers are right: sometimes we do make a mistake in judging the economic growth, sometimes we do make a mistake in terms of where the economy is going. And under that budget, if you vote "yes" on it, you are setting yourself up for potential sequestration, whereas under our budget you have got a cushion. So if there is a mistake in economic assumptions, we protect America's national defense from gutting through Gramm-Rudman and the domestic side.

Then, finally, the last point is: Which budget provides the strongest deficit reduction?

Well, I think it is clear. Theirs is at 143.8; ours is 137.05, when we add the deficit reduction trust fund.

Let me answer, quickly, two charges. "There those Democrats go again, taxing and spending."

Well, I think those people who are saying that have been looking at the Senate's budget, because they raised $13 billion in new revenues and they spend it all on the Pentagon.

We say any new revenues about the President should go to deficit reduction, no spending, domestic or Pentagon, and only with the President's help. That is an entirely different approach and, therefore, it is the strongest deficit reduction.

There is one other charge, and that is that somehow we are irresponsible and irrational on defense.

Democrats want a strong defense. Many of them have voted that way. But let me tell you what the difference is. The difference between our budget and their budget is 2 percent on defense over 3 years. They are going to do $856 billion of new defense spending. We are going to do $848 billion.

Now, certainly no one in America in their right mind thinks that because of a $17 billion difference the Russians are coming up the Potomac. No.

And the difference in 1987 between their substitute and ours is only $3.8 billion.

Surely those criticisms are not fair and not accurate.

But we do have a choice to make. And I hope, when the bells have rung and we close the door today, that there will have been a choice made. I urge a "no" vote, because the Latta substitute is not balanced, it does not provide for a margin of error against sequestration. We have the strongest deficit reduction. They do not.

I urge a "no" vote on theirs and a "yes" vote on the committee's.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Ohio [Mr. LATTA].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. LATTA. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 145, noes 280, not voting 8, as follows:

[Roll No. 127]

Scheuer

□ 1550

The Clerk announced the following pair:

On this vote:

Mr. Goodling for, with Mr. Scheuer against.

Messrs. RANGEL, BILIRAKIS, and DIOGUARDI changed their votes from "aye" to "no."

Mr. MADIGAN changed his vote from "no" to "aye."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

Mr. GRAY of Pennsylvania. Mr. Chairman, I move that the Committee do now rise and report the concurrent resolution back to the House with the recommendation that the concurrent resolution be agreed to.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. FOLEY] having assumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the concurrent resolution (H. Con. Res. 337) setting forth the congressional budget for the U.S. Government for the fiscal years 1987, 1988, and 1989, had directed him to report the concurrent resolution back to the House with the recommendation that the concurrent resolution be agreed to.

The SPEAKER pro tempore. Under statute, the previous question is ordered.

The question is on the concurrent resolution.

The question was taken; and the speaker pro tempore announced that the ayes appeared to have it.

Mr. GRAY of Pennsylvania. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 245, nays 179, not voting 9, as follows:

NOT VOTING—9

Biaggi	Grotberg	Lujan
Franklin	Heftel	Scheuer
Goodling	Hendon	Swift

□ 1615

The Clerk announced the following pair:

On this vote:

Mr. Scheuer for, with Mr. Goodling against.

Mr. LEACH of Iowa changed his vote from "yea" to "nay."

So the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

Mr. GRAY of Pennsylvania. Mr. Speaker, pursuant to House Resolution 455, I call up from the Speaker's table the Senate concurrent resolution (S. Con. Res. 120) setting forth the congressional budget for the U.S. Government for the fiscal years 1987, 1988, and 1989, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate concurrent resolution.

MOTION OFFERED BY MR. GRAY OF PENNSYLVANIA

Mr. GRAY of Pennsylvania. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GRAY of Pennsylvania moves to strike all after the resolving clause of Senate Concurrent Resolution 120 and to insert in lieu thereof the provisions contained in House Concurrent Resolution 337 as passed by the House.

The motion was agreed to.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

A similar House concurrent resolution (H. Con. Res. 337) was laid on the table.

GENERAL LEAVE

Mr. GRAY of Pennsylvania. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material in the RECORD, on House Concurrent Resolution 337, the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mrs. Emery, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On April 22, 1986:

H.J. Res. 582. Joint resolution to designate April 20, 1986, as "Education Day U.S.A."

On April 24, 1986:

H.J. Res. 599. Joint resolution commemorating the 25th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny; and

H.R. 4551. An act to extend for 3 months the emergency acquisition and net worth guarantee provisions of the Garn-St Germain Depository Institutions Act of 1982.

On May 2, 1986:

H.J. Res. 220. Joint resolution to reaffirm Congress' recognition of the vital role played by members of the National Guard and Reserve in the national defense, and for other purposes; and

H.R. 4602. An act to authorize the Federal Housing Administration and the Government National Mortgage Association to enter into additional commitments to insure loans and guarantee mortgage-backed securities during fiscal year 1986, and for other purposes.

May 7, 1986:

H.J. Res. 544. Joint resolution to designate May 7, 1986, as "National Barrier Awareness Day."

May 8, 1986:

H.J. Res. 569. Joint resolution to designate May 8, 1986, as "Naval Aviation Day."

May 12, 1986:

H.R. 1116. An act to implement certain recommendations made pursuant to Public Law 98-360.

May 14, 1986:

H.R. 4022. An act to release restrictions on certain property located in Calcasieu Parish, LA, and for other purposes.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will note that Mrs. Sara Currence Emery is the first woman to be designated by the current or any other President of the United States to deliver a message in writing to the House of Representatives.

WELCOME TO SARA CURRENCE EMERY

(Mr. STAGGERS asked and was given permission to address the House for 1 minute.)

Mr. STAGGERS. Mr. Speaker, I want to mark this historic moment as the first woman did deliver a message to the House.

Sara Emery is from Marlinton, WV, the same county which produced another lady who had a message sent to the world, Pearl Buck, from Hillsboro.

This may not be home to Sara, but I want to welcome Sara to the House.

PROVIDING FOR CONSIDERATION OF H.R. 4800, OMNIBUS TRADE BILL OF 1986

Mr. BEILENSON, from the Committee on Rules, reported the following privileged resolution (H. Res. 456, Rept. No. 99-604), which was referred to the House Calendar and ordered to be printed:

H. RES. 456

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4800) to enhance the competitiveness of American industry; and for other purposes, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed three and one-half hours, with one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, with 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, with 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs, with 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, with 30 minutes to be equally di-

vided and controlled by the chairman and ranking minority member of the Committee on Agriculture, and with 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be considered as having been read for amendment under the five-minute rule. The amendments set forth in section 2 of this resolution shall be considered to have been adopted in the House and in the Committee of the Whole. No other amendments to the bill shall be in order except the following amendments printed in the Congressional Record of May 15, 1986, by, and if offered by, the designated Members or their designees, said amendments shall be considered only in the following order and shall be considered as having been read, said amendments shall not be subject to amendment or to a demand for division of the question in the House or in the Committee of the Whole, and each of said amendments shall be debatable for not to exceed 30 minutes, or one hour in the case of amendments (8) and (12), to be equally divided and controlled by the proponent of the amendment and a Member opposed hereto:

(1) the amendment by Representative Crane of Illinois to subtitle A of title I;

(2) the two amendments by Representative Frenzel of Minnesota to subtitles A and B of title I;

(3) the amendment by Representative AuCoin of Oregon to title I;

(4) the amendment by Representative Dingell of Michigan to title II;

(5) the amendment by Representative Coleman of Texas to title III;

(6) the amendment by Representative Roth of Wisconsin to title III;

(7) the two amendments by Representative Bonker of Washington to title IV;

(8) the amendment by Representative Wylie of Ohio to title IV;

(9) the amendment by Representative Evans of Illinois to title V;

(10) the amendment by Representative Jeffords of Vermont to title V;

(11) the amendment by Representative Broyhill of North Carolina to title VII; and

(12) the amendment by Representative Michel of Illinois, and all points of order against said amendment, except under clause 7 of rule XVI, are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit, which may not contain instructions.

SEC. 2. Amendments considered as adopted:

Page 317, line 4, insert "not to exceed an amount" after "sum".

Page 317, line 6, strike out "5315" and insert in lieu thereof "5313".

Page 384, lines 18 and 19, strike out "while knowing, or recklessly disregarding a substantial risk, that" and insert "while knowing or recklessly disregarding that".

Page 389, strike out line 23 and all that follows through line 2 on page 392 and insert the following:

"(2) a person meets the 'knowing' standard for purposes of subsection (a)(3) if—

"(A) that person is aware of substantially certain, or

"(B) that person is aware of a high probability, which he or she consciously disregards in order to avoid awareness or substantial certainty, and does not have an actual belief to the contrary,

that a third party will offer, pay, promise, or give anything of value to a foreign official, foreign political party or official thereof, or candidate for political office for purposes prohibited by subsection (a)(3);

"(3) a person meets the 'recklessly disregarding standard of subsection (a)(3) if that person is aware of a substantial risk that a third party will offer, pay, promise, or give anything of value to a foreign official, foreign political party or official thereof, or candidate for political office for purposes prohibited by subsection (a)(3), but disregards that risk; and

"(4) the term 'substantial risk' means a risk that is of such a nature and degree that to disregard it constitutes a substantial deviation from the standard of care that a reasonable person would exercise in such a situation.".

(b) VIOLATIONS.—Section 32(c) of the Securities Exchange Act of 1934 (15 U.S.C. 78ff) is amended to read as follows:

"(c)(1)(A) Any issuer that—

"(i) violates section 30A(a)(1) or (2); or

"(ii) violates section 30A(a)(3) and meets the 'knowing' standards of that section (as defined by section 30A(f)(2)),

shall be fined not more than $2,000,000.

"(B) Any issuer that violates section 30A(a) shall be subject to a civil penalty of not more than $10,000 imposed in an action brought by the Commission.

"(2)(A) Any officer or director of an issuer, or stockholder acting on behalf of such issuer, who—

"(i) willfully violates section 30A(a)(1) or (2); or

"(ii) willfully violates section 30A(a)(3) and meets the 'knowing' standard of that section,

shall be fined not more than $100,000, or imprisoned not more than 5 years, or both.

"(B) Any employer or agent of an issuer who is a United States citizen, national, or resident or is otherwise subject to the jurisdiction of the United States (other than an officer, director, or stockholder acting on behalf of such issuer), and who—

"(i) willfully violates section 30A(a)(1) or (2); or

"(ii) willfully violates section 30A(a)(3) and meets the 'knowing' standard of that section,

shall be fined not more than $100,000, or imprisoned not more than 5 years, or both.

"(C) Any officer, director, employee, or agent of an issuer, or stockholder acting on behalf of such issuer, who violates section 30A(a) shall be subject to a civil penalty of not more than $10,000 imposed in an action brought by the Commission.

"(3) Whenever a fine is imposed under paragraph (2) upon any officer, director, employee, agent, or stockholder of an issuer, such fine may not be paid, directly or indirectly, by such issuer.".

Page 394, lines 1 and 2, strike out "while knowing, or recklessly disregarding a substantial risk, that" and insert "while knowing or recklessly disregarding that".

Page 399, strike out line 4 and all that follows through line 19 on page 400, and insert the following:

"(f) VIOLATIONS.—(1)(A) Any domestic concern that—

"(i) violates subsection (a)(1) or (2); or

"(ii) violates subsection (a)(3) and meets the 'knowing' standards of that subsection (as defined by subsection (h)(4)),

shall be fined not more than $2,000,000.

"(B) Any domestic concern that violates subsection (a) shall be subject to a civil penalty of not more than $10,000 imposed in an action brought by the Commission.

"(2)(A) Any officer or director of a domestic concern, or stockholder acting on behalf of such domestic concern, who—

"(i) willfully violates subsection (a)(1) or (2); or

"(ii) willfully violates subsection (a)(3) and meets the 'knowing' standard of that subsection,

shall be fined not more than $100,000, or imprisoned not more than 5 years, or both.

"(B) Any employee or agent of a domestic concern who is a United States citizen, national, or resident or is otherwise subject to the jurisdiction of the United States (other than an officer, director, or stockholder acting on behalf of such domestic concern), and who—

"(i) willfully violates subsection (a)(1) or (2)"; or

"(ii) willfully violates subsection (a)(3) and meets the 'knowing' standard of that section,

shall be fined not more than $100,000, or imprisoned not more than 5 years, or both.

"(C) Any officer, director, employee, or agent of a domestic concern, or stockholder acting on behalf of such domestic concern, who violates subsection (a) shall be subject to a civil penalty of not more than $10,000 imposed in an action brought by the Commission.

"(3) Whenever a fine is imposed under paragraph (2) upon any officer, director, employee, agent, or stockholder of a domestic concern, such fine may not be paid, directly or indirectly, by such domestic concern.".

Page 402, strike out line 15 and all that follows through line 22 on page 402 and insert the following:

"(4) a person meets the 'knowing' standard for purposes of subsection (a)(3) if—

"(A) that person is aware or substantially certain, or

"(B) that person is aware of a high probability, which he or she consciously disregards in order to avoid awareness or substantial certainty, and does not have an actual belief to the contrary,

that a third party will offer, pay, promise, or give anything of value to a foreign official, foreign political party or official thereof, or candidate for political office for purposes prohibited by subsection (a)(3);

"(5) a person meets the 'recklessly disregarding' standard of subsection (a)(3) if that person is aware of a substantial risk that a third party will offer, pay, promise, or give anything of value to a foreign official, foreign political party or official thereof, or candidate for political office for purposes prohibited by subsection (a)(3), but disregards that risk; and

"(6) the term 'substantial risk' means a risk that is of such a nature and degree that to disregard it constitutes a substantial deviation from the standard of care that a reasonable person would exercise in such a situation.".

Page 396, line 17, strike out "FOR COMPLIANCE" and insert in lieu thereof "BY THE ATTORNEY GENERAL".

Page 387, beginning on line 11, and page 396, beginning on line 23, strike out "representatives of the business community and other interested" and insert in lieu thereof "all interested".

Page 387, line 13, and page 396, line 25, strike out "and in public hearings" and insert in lieu thereof "procedures".

Page 387, beginning on line 21, and page 397, beginning on line 8, strike out "the Attorney General determines constitute compliance" and insert in lieu thereof "for purposes of the Department's present enforcement policy, the Attorney General determines would be in conformance".

Page 387, strike out line 24 and all that follows through line 3 on page 388, and insert in lieu thereof the following:

"(2) general precautionary procedures which issuers may use on a voluntary basis to conform their conduct to the Department's present enforcement policy regarding the preceding provisions of this section.

Page 397, strike out lines 11 through 15 and insert in lieu thereof the following:

"(2) general precautionary procedures which domestic concerns may use on a voluntary basis to conform their conduct to the Department's present enforcement policy regarding the preceding provisions of this section.

Page 388, strike out lines 9 through 15, and insert in lieu thereof the following:

"(e)(1) The Attorney General, after consultation with appropriate departments and agencies of the United States and after obtaining the views of all interested persons through public notice and comment procedures, shall establish a procedure to provide responses to specific inquiries by issuers concerning conformance of their conduct with the Department's present enforcement policy regarding the preceding provisions of this section. The Attorney General shall, within 30 days after receiving such a request, made in accordance with that procedure, issue an opinion in response to that request. The opinion of the Attorney General shall state whether or not certain specified prospective conduct would, for purposes of the Department's present enforcement policy, violate the preceding provisions of this section. Additional requests for opinions may be filed with the Attorney General regarding other specified prospective conduct that is beyond the scope of conduct specified in previous requests. In any action brought under the applicable provisions of this Act, there shall be a rebuttable presumption that conduct, which is specified in a request by an issuer and for which the Attorney General has issued an opinion that such conduct is in conformity with the Department's present enforcement policy, is in compliance with the preceding provisions of this section. Such a presumption of compliance may be rebutted by a preponderance of the evidence. In considering the presumption of compliance for purposes of this subparagraph, a court shall weigh all relevant factors, including but not limited to whether the information submitted to the Attorney General was accurate and complete and whether it was within the scope of the conduct specified in any request received by the Attorney General. The Attorney General shall establish the procedure required by this paragraph in accordance with the provisions of subchapter II of chapter 5 of title 5, United States Code, and that procedure shall be subject to the provisions of chapter 7 of that title.

Page 397, strike out line 21 and all that follows through line 3 on page 398, and insert in lieu thereof the following:

"(e) OPINIONS OF THE ATTORNEY GENERAL.—(1) The Attorney General, after consultation with appropriate departments and agencies of the United States and after obtaining the views of all interested persons through public notice and comment procedures, shall establish a procedure to provide responses to specific inquiries by domestic concerns concerning conformance of their conduct with the Department's present enforcement policy regarding the preceding provisions of this section. The Attorney General shall, within 30 days after receiving such a request, made in accordance with that procedure, issue an opinion in response to that request. The opinion of the Attorney General shall state whether or not certain specified prospective conduct would, for purposes of the Department's present enforcement policy, violate the preceding provisions of this section. The Attorney General shall establish the procedure required by this paragraph in accordance with the provision of subchapter II of chapter 5 of title 5, United States Code, and that procedure shall be subject to the provisions of chapter 7 of that title.

Page 388, line 19, and page 398, line 7, strike out "for a statement" and insert in lieu thereof "under the procedure established".

Page 388, beginning on line 20, and page 398, beginning on line 8, strike out "concerning compliance with the preceding provisions of this section".

Page 388, line 22, and page 398, line 10, after "Code," insert "and shall not be made publicly available,".

Page 388, line 23, and page 398, line 11, strike out "Department of Justice" and insert in lieu thereof "Attorney General".

Page 388, beginning on line 25, and page 398, beginning on line 13, strike out the sentence beginning with "The Attorney General".

Page 389, strike out lines 6 through 15, and insert in lieu thereof the following:

"(3) Any issuer who has made a request to the Attorney General under paragraph (1) may withdraw such request prior to the time the Attorney General issues an opinion in response to such request. Any request so withdrawn shall have no force or effect.

"(4) The Attorney General shall, to the maximum extent practicable, provide timely guidance concerning the Department's present enforcement policy with respect to the preceding provisions of this section to potential exporters and small businesses that are unable to obtain specialized counsel on issues pertaining to such provisions. Such guidance shall be limited to responses to requests under paragraph (1) concerning conformity of specified prospective conduct with the Department's present enforcement policy regarding the preceding provisions of this section and general explanations of compliance responsibilities and of potential liabilities under the preceding provisions of this section.

Page 398, strike out line 19 and all that follows through line 3 on page 399, and insert in lieu thereof the following:

"(3) Any domestic concern who has made a request to the Attorney General under paragraph (1) may withdraw such request prior to the time the Attorney General issues an opinion in response to such request. Any request so withdrawn shall have no force or effect.

"(4) The Attorney General shall, to the maximum extent practicable, provide timely guidance concerning the Department's present enforcement policy with respect to the preceding provisions of this section to potential exporters and small businesses that are unable to obtain specialized counsel on issues pertaining to such provisions. Such guidance shall be limited to responses to requests under paragraph (1) concerning conformity of specified prospective conduct with the Department's present enforcement policy regarding the preceding provisions of this section and general explanations of compliance responsibilities and of potential liabilities under the preceding provisions of this section.

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 456 and ask for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read the resolution.

□ 1625

The SPEAKER pro tempore. The question is, Will the House now consider House Resolution 456?

The question was taken; and—two-thirds having voted in favor thereof—the House agreed to consider House Resolution 456.

The SPEAKER pro tempore. The gentleman from California [Mr. BEILENSON] is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, I ask unanimous consent that Representative MICHEL or his designee be permitted to offer to H.R. 4800, as his amendment made in order under the rule, the text of H.R. 4830 which he has introduced today, rather than printing his amendment in the CONGRESSIONAL RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BEILENSON. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT] for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution before us will permit the House to proceed expeditiously to the consideration of a very important piece of legislation, the Trade and International Economic Policy Reform Act of 1986.

The rule waives all points of order against consideration of the bill, pro-

viding for 3½ hours of general debate. One hour of the debate time is to be controlled by the chairman and ranking minority member of the Committee on Ways and Means. The remaining time is allotted to five other committees, Foreign Affairs; Banking, Finance and Urban Affairs; Education and Labor; Agriculture; and Energy and Commerce, each of which will control 30 minutes of the debate time.

The rule provides that three amendments which are printed in section 2 of the rule shall be considered to have been adopted upon adoption of the rule. The first and second amendments replace language now in the bill amending the Foreign Corrupt Practices Act with language reflecting agreements reached between the Foreign Affairs, Judiciary, and Energy and Commerce Committees.

The first amendment concerns the binding nature of advisory opinions issued by the Department of Justice.

The second amendment clarifies the knowing standard for criminal liability.

And the third amendment corrects two drafting errors in title IV, the Banking Committee title. It corrects a technical violation of the Budget Act and an erroneous citation.

The rule also provides that 14 additional amendments are to be in order, if offered for consideration by the 12 Members specifically named in the rule or their designees, and if printed in today's CONGRESSIONAL RECORD.

Each of the amendments is to be debated for no more than 30 minutes, except for the amendment to be offered by Mr. WYLIE and the amendment to be offered by Mr. MICHEL. Those two amendments may be debated for 1 hour each.

The amendment which the distinguished minority leader, Mr. MICHEL, may offer to the bill will be the last amendment to be considered.

The rule waives all points of order against that amendment, except for clause 7 of rule XVI, the rule prohibiting nongermane amendments.

The minority leader's amendment will consist of a comprehensive substitute that will give Members an opportunity to consider and vote on an alternative approach to that which is embodied in H.R. 4800.

Finally, the rule makes in order one motion to recommit which may not include instructions. The Committee on Rules is recommending the prohibition on the right to include instructions because we anticipate that all issues of controversy which may be settled through amendments will be discussed during the amendment process in the Committee of the Whole. As I have already mentioned, that process will likely include consideration of a comprehensive substitute which may be offered by the distinguished minority leader, the gentleman from Illinois [Mr. MICHEL].

Mr. Speaker, the rule recommended today by the Committee on Rules is appropriate for the consideration of a large and complex trade bill which has been considered by 6 different committees. The rule limits the length of the process, while still allowing the consideration of amendments addressing specific, deeply held concerns. The rule thereby ensures that a full debate will take place on the bill by allowing Members who have specific recommendations for its improvement the opportunity to offer changes to the bill.

Some of the amendments which are made in order represent an opportunity to resolve disagreements between the various committees having jurisdiction over the bill; some of the amendments reflect opposing approaches to the solution of specific problems addressed by the bill itself.

Mr. Speaker, H.R. 4800 is a historic measure designed to enhance the competitiveness of American industry. It is regarded by the leadership of this House, as well as by many Members on both sides of the aisle, as an enormously important measure whose passage is crucial to our Nation's well-being. The competitive position of the United States has deteriorated rapidly and our economy has been jolted by record-breaking trade deficits in each of the last 4 years. During that time, the United States has accumulated a total merchandise trade deficit approaching $400 billion.

For the first time since World War I, we are a net debtor nation. If current trends continue, our net external debt will exceed $500 billion by 1990. Our declining trade position threatens to undermine the Nation's industrial and agricultural base and to reduce our standard of living. This trade bill would help restore American competitiveness.

H.R. 4800 forces the administration to take a tough stand against foreign trade practices that deny fair opportunities for U.S. firms and workers and mandates action against countries that have displayed a pattern of excessive bilateral trade surpluses with the United States. It would enhance our exporting capacities, reform the Foreign Corrupt Practices Act, and improve education and training for American workers.

Mr. Speaker, H.R. 4800 is, indeed, a timely and significant measure. The rule before Members provides for full, fair, and orderly debate of the major issues, and I urge adoption of the rule.

GENERAL LEAVE

Mr. LOTT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Resolution 456.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 456, which has already been described by the gentleman from California [Mr. BEILENSON] is designed for the consideration of H.R. 4800. It is certainly a complicated bill, and it is a complicated rule, but I want to emphasize at the beginning that I think it is a fair rule and it is probably the only logical way that the rule can be handled when you take into consideration the fact that we have several different legislative committees that are involved with pieces of the bill and that there are a number of legitimate amendments that have been requested by Members on this side of the aisle and the other side of the aisle. And they will have their opportunity.

So I must say that our leadership, the gentleman from Illinois [Mr. MICHEL] and the gentleman from Texas [Mr. WRIGHT] have worked very closely on this rule to make sure that it does give every Member the proper opportunity to vote against certain sections or to have an alternative.

So the result was that we have a modified open rule providing for 3½ hours of general debate—1 hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, and the remaining time to be equally divided between the six other committees having jurisdiction over this legislation.

Mr. Speaker, the rule waives section 303(a)(2) of the Congressional Budget Act against consideration of the bill. Section 303(a)(2) prohibits consideration of any measure which provides an increase or decrease in revenues to become effective during a fiscal year until the concurrent resolution on the budget for such fiscal year has been adopted. Title I of H.R. 4800 would decrease revenues by approximately $70 million, first effective in fiscal year 1987. Since the concurrent resolution on the budget has not yet been agreed to, this provision would be subject to a point of order.

The rule makes in order 14 amendments, 7 amendments offered by Republicans and 7 offered by Democrats, which are not subject to amendment. One of the 14 amendments is the Michel amendment which is to be considered only after the disposition of all other amendments. The rule waives all points of order against the Michel amendment H.R. 4830, except for failure to comply with clause 7 of rule XVI, the germaneness rule.

Finally, Mr. Speaker, the rule provides for one motion to recommit which may not contain instructions. I

do want to indicate for the RECORD, as I did in the Rules Committee, that I strongly object to the provision in this rule which prohibits instructions in the motion to recommit. This is a mistake. The motion to recommit dates back to our first Congress in 1789, and, under the precedents, priority recognition is given to the minority. This is one of our most important rights on the minority side and one of the few things which the Rules Committee cannot set aside in a rule. House rule XI, clause 4(b) states that the Rules Committee may not report, and I quote, "any rule or order which would prevent the motion to recommit from being made as provider in clause 4 of Rule XXVI." To the extent that the majority attempts to restrict our right to offer a motion to recommit, as it does in this resolution, it is violating the spirit of that rule.

The right to offer instructions in a motion to recommit is traditionally reserved to the minority so that it may have a final vote on a proposition on which it feels strongly. In the future, the majority should not make a practice of restricting this important minority right.

This bill is the result of the work of several subcommittees and full committees, and it addresses a number of competing trade interests and viewpoints.

Mr. Speaker, I believe in open, fair, and competitive trade, and this trade bill is a measure that is intended to help alleviate an extremely unfair trading situation. It is not protectionist legislation, but is designed to try to get foreign countries to open up their doors just as we have so freely opened up ours.

For years we have had a free and open market, but we can no longer tolerate the unfair trading practices of our partners short of destroying our own industries. We must now concentrate on fair trade which is in the best interest for American industries and workers.

Mr. Speaker, it is with some reluctance I urge adoption of this less than open rule. Adoption of this rule will permit us to proceed to consider this vital legislation and a step to deal with our trading partners' unfair trade practices. Such an action is long overdue. I urge adoption of this rule.

□ 1635

Mr. Speaker, I yield 5 minutes to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. Mr. Speaker, although generally debate on a rule is not a place where a good deal ought to be said about the substance, I think I will take time, if I might, to talk a little bit about the bill because we are going to intervene this debate with a weekend and 2 or 3 days of time to think about the importance of the subject and the debate on the substance, which will occur in the week ahead of us.

I am particularly concerned about two amendments that are in the bill. One is known as the Gephardt amendment; the other is known as the Pease amendment.

I am including two editorials at the conclusion of my remarks. I think that both editorials ought to be read by each and every Member before they decide on their votes next week.

Let me spend just a minute on the Gephardt amendment and on the Pease amendment. The total agricultural exports for 1985 from our country to the regions whose trade with the United States would most likely be affected by the Gephardt legislation are Japan, $5.4 billion; Taiwan, $1.2 billion; and Europe, $6.5 billion. West Germany is named as currently eligible for arbitrary import reductions that would occur under the Gephardt amendment, but any such action would precipitate against United States exports by the entire European Economic Community because they all have to act under their rules legally as a block.

The net disaster for agriculture if this trade bill would pass containing the Gephardt amendment would be to cost us at least a net of $13 billion worth of our ag trade, from the countries that are preliminarily estimated to be affected by the gentleman from Missouri's amendment.

The supplies; those commodities are available elsewhere in the world, and the real problem we have got with Spain and Portugal, now coming into the European Common Market Community, is that the admission of those two countries clearly has taken with it the willingness by the ECC to utilize their retaliation capability to accommodate the enlargement of the European Common Market.

So what will happen, of course, is the same thing that happened to the United States when the textile discussion occurred several years ago. When we tried to protect $50 million worth of our textile business, China canceled $500 million in wheat sales. I cannot believe that that would be a fair trade compromise of any equality: $50 million for $500 million.

The lesson is a very current one; one that we should take to heart, and is one reason why I will support the Crane amendment which is designed and in order to strike not only the Gephardt amendment which I wish to brand as a strichnine capsule, a poison pill, for any Member and/or any Member's constituency engaged in production agriculture.

The Pease amendment would internationally recognize labor rights and essentially affects section 301. This puts politics and foreign policy right back in the way of trade policy. Carter did it with his grain embargo. This bill will do it against our best prospects for agricultural exports. The sad thing about the combination of the Gephardt amendment and the Pease amendment is, that it ignores the greatest damage on the theory that a little bit of retaliation will teach the rest of our trading partners to somehow be fair toward our country.

The markets for ag products and for many other products from industry in this country are no longer with the developed countries. Our markets, our foreign trade markets for expansion are with the LDC's, the lesser developed countries.

This bill will allow the developing countries with whom we now trade to essentially target the LDC's and become their market, and essentially what will happen, I say to my colleagues, is that if it is not retaliation in direct dollars, it will simply be a decision on the part of our competitors not to buy from America. They just will not give us any orders. That will be the retaliation; a very silent kind of retaliation.

Indeed, if you are interested in foreign policy, you cannot want to harm the potential for the development of trade with our lesser developed partners. It certainly will be a devastating blow to those countries we are trying to help.

So for those reasons, next week I will be trying to do my best to support the Crane amendment, and I think that will make it a much better bill.

Mr. Speaker, I am including for the RECORD the Washington Post editorial of May 14, 1986, and the Wall Street Journal editorial of May 15, 1986:

[From the Washington Post, May 14, 1986]

A SHIN-KICKER BILL

The trade bill now moving rapidly through the House is an anthology of all the congressional grievances and irritations accumulated through five years of Mr. Reagan's presidency. With a few notable exceptions, Mr. Reagan has not been very sympathetic to the kind of pain that a surge of imports inflicts on a specific industry, or the towns that depend on it. An open market will best serve the country and its economic growth, the president says. That's correct, but not very comforting to congressmen from troubled districts—or their constituents. This bill, now reported by the Ways and Means Committee, is the House Democrats' counterattack.

It would make litigation easier for Americans fighting imports. That would lead to lower imports, and consequently lower exports, and consequently fewer jobs for Americans. For example, the most objectionable section of the bill says that countries selling too much to this country, and buying too little, will have to bring their trade surpluses down by 10 percent a year for the next four years. That is aimed, of course, at Japan, Taiwan and West Germany. The size of their surpluses is largely the result of American mistakes that sent the dollar's exchange rate sailing too high for the past several years. The proper remedy is the decline of the exchange rate that has al-

ready taken place. But a lot of people in Congress don't trust economics and, instead, want to rely on litigation.

The bill gets into the troubling subject of the status of foreign workers. The author of this provision, Rep. Don Pease of Ohio, cites the imported clothing made by child labor in Asia. He also speaks of imports from countries that prohibit labor unions and require little or nothing in the way of standards for wages, hours and safety. Those are important concerns, and he is surely right when he says that trade has to benefit producers, as well as consumers and trading companies. But he would try to ensure it by allowing American companies to cite denials of workers' rights when fighting imports. That will do more to reduce imports here than to improve working conditions abroad. A more promising approach, as the administration urges, is to negotiate international standards in the next round of trade talks—although, to give Mr. Pease a point, that argument would carry more weight if the administration were pressing workers' rights more actively in its trade policy.

Frustration rarely produces good legislation. This bill is a shin-kicker, intended to attract attention. In that, it is succeeding very effectively. But among American industries, it will hurt the most competitive and help only the least competitive.

[From the Wall Street Journal, May 15, 1986]

TRADE BILL TERPSICHORE

That outrageously protectionist trade bill House Democrats have concocted is described by the Washington Post as a "shin-kicker," intended to make President Reagan pay heed to companies and labor unions protesting about competition from foreign goods.

Rep. Bill Frenzel (R., Minn.) comes closer to the mark in saying that the House leadership "prefers an issue to a law."

In short, this bill, now scheduled for floor debate in the House next week, is an exercise in political grandstanding. With it, House Democrats want to show they are willing to get tough with foreigners who so deviously scheme to sell Americans Sonys and Audis. No president with any regard for the health of the international economy could sign it. But a veto, the progenitors believe, will cost Republicans votes in November.

We would urge them not to be quite so certain. Congressmen spend their time preoccupied with parochial concerns, failing to discern that Americans are becoming more internationalist in their economic thinking. Americans need only look around to see that they derive some very large benefits from internationalized innovation and competition. Moreover, the trade bill's authors have so overplayed their hands that knowledgeable people doubt their seriousness. It's not nice to play games with legislation.

It's not nice partly because it demeans lawmaking, but partly as well because it carries certain dangers. There is always a possibility that events will conspire to allow a bad bill to actually become law.

Something of that sort happened in 1970-71. A Democratic Congress set a political trap for Richard Nixon not unlike the one now being laid for Ronald Reagan. Congress gave Mr. Nixon something he did not want, the discretionary power to control prices and wages, burying it in a veto-resistant defense production bill.

The Democrats then piously proclaimed that Mr. Nixon had all the authority he needed to "control inflation," then 5.5 percent. Republicans were furious over being set up to be blamed for inflation. They called it "devious Democratic demagoguery."

Almost a year to the day after Mr. Nixon accepted those unwanted powers, the collapse of the Bretton Woods international monetary system prompted him to use them. He applied "temporary" controls. They disrupted U.S. production, helping precipitate, among other things, the first oil "crisis." Underlying inflationary pressures rose and eventually exploded, real incomes fell and the nation's economic policy debate degenerated into confusion and acrimony.

The trade bill is cut from the same cloth. One of its more mindless provisions would require 10 percent annual reductions in the U.S. trade deficits with Japan, Taiwan and West Germany. To accomplish that pointless feat would necessitate market interference of the most ham-handed type, disrupting capital flows as well as trade. It would also be a gross violation of international trade rules hard on the heels of Mr. Reagan's success in Tokyo in engendering a new round of trade-liberalization talks.

Stil another section would attempt to legislate "workers' rights" in countries shipping goods to the U.S. Every U.S. trading partner will see the hypocrisy. The intent isn't to protect workers abroad but to keep the goods they make out of the U.S. market.

The bill would make it mandatory for the president to retaliate by a date certain against any nation deemed guilty of an "unfair" practice. This, too, is ham-handed. An arbitrary deadline could simply cut off talks on some issue at a crucial point, quite possibly losing some U.S. exporter a sale. To argue that Congress can legislate in advance the outcome of negotiations betrays, among other unattractive qualities, a streak of arrogance.

As we say, these and other exercises in economic demolition in the bill have led us and a good many other people to conclude that the Democratic leadership is not serious. Maybe things look different from inside the Beltway, but from, our perspective it's hard to see how playing fast and loose with public policy can be regarded as good politics.

Mr. BEILENSON. Mr. Speaker, the gentleman from California thanks the gentleman from Mississippi for his remarks in support of the rule that is currently before the Members, acknowledges the gentleman's remarks with respect to the motion to recommit, and assures the gentleman that the majority members on the Committee on Rules understand the gentleman's concern, and we are hopeful that the situation will not arise again in the future.

Mr. Speaker, for purposes of debate only, I yield 10 minutes to the gentleman from Texas [Mr. WRIGHT] the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, this bill and the effort that has gone into it represent a truly historic undertaking. Quite probably this bill, H.R. 4800, is the most comprehensive trade legislation undertaken by the House in the last 45 or 50 years; since the Reciprocal Trade Agreements Act was created by the leadership of Franklin Roosevelt and Cordell Hull, then Secretary of State.

Our trade deficit in these last 4 or 5 years has ballooned to nearly 5 times what it was 5 years ago. We cannot permit it to continue in that direction. The growth of the trade deficit, now standing at some $150 billion this year, has brought with it an erosion of our American industrial base; it has created unemployment, throwing Americans out of work as it transported their jobs overseas; it has given a problem to American agriculture which for a very long while had led the way in creating a trade balance for us. It has made us, for the first time in 72 years, a net debtor nation.

In 1982, the United States was the world's largest creditor nation. We had the largest surplus in world credits of any nation on Earth. At this moment, today, we are the world's largest debtor nation with $100 billion in net debt; and if this trend is not reversed by affirmative direct action and creative approaches toward greater competitiveness, then in a very short while and by the end of this decade according to most experts, the United States not only will be the world's greatest debtor nation, and the greatest in the history of the world, but we will suffer a credit deficit of some $500 billion among other nations, on top of the enormous deficit that we suffer in our own national debt.

□ 1645

And so it is time that we do something constructive about it.

Mr. Speaker, I want to compliment the leadership on all of the committees that have participated. This has been truly a team effort. This bill has been more than a year in the process of creation. I want to extend my congratulations to the gentleman from Washington, DON BONKER, the gentleman from Florida, Mr. GIBBONS, for the efforts that they have put forth to try to help craft a sensitive idea of legislation.

Let me express my regards and congratulations to the members of the House Committee on Ways and Means, the House Committee on Energy and Commerce, the House Committee on Education and Labor, the House Committee on Foreign Affairs, the House Committee on Banking, Finance and Urban Affairs, because each of those committees as well as the Committee on Agriculture has contributed significantly to this result.

I want to thank members of the staff as well as members of the committees, themselves, for the creative and imaginative and cooperative way in which they have submerged their sometimes serious and sometimes petty differences and have harmonized jurisdictions in such a way as to bring this bill with these separate

titles. In that connection, Mr. Speaker, I am inserting in the RECORD two letters from the Speaker, one to the chairman of the Committee on Ways and Means and one to the Committee on Energy and Commerce with respect to the question of jurisdiction in this matter.

The letters referred to are as follows:

THE SPEAKER'S ROOMS,
U.S. HOUSE OF REPRESENTATIVES,
Washington, DC, May 7, 1986.

Hon. JOHN DINGELL,
Chairman, Committee on Energy and Commerce, Rayburn House Office Building, Washington, DC.

DEAR MR. CHAIRMAN: In an attempt to clarify the jurisdictional questions raised at this morning's meeting, I have sent the attached letter to Chairman Rostenkowski, outlining my perception of the jurisdiction of the Committees on Energy and Commerce and Ways and Means over the bill H.R. 7450.

The main point of that letter is that today's sequential referral to your Committee which was drafted in the broad terms you requested does not change the jurisdiction of the two Committees involved.

As Jim Wright expressed in this morning's meeting the mutual cooperation of both Committees is essential in putting together the trade package. My letter indicates that your Committee has and may continue to propose legislation in this subject area.

With every good wish,

Sincerely,

THOMAS P. O'NEILL, Jr.,
The Speaker.

THE SPEAKER'S ROOMS,
U.S. HOUSE OF REPRESENTATIVES,
Washington, DC, May 7, 1986.

Hon. DAN ROSTENKOWSKI, *Chairman, Committee on Ways and Means, U.S. House of Representatives, Washington, DC.*

DEAR MR. CHAIRMAN: Due to the concern which has been expressed relative to the nature and extent of the jurisdiction of the Committee on Energy and Commerce over H.R. 4750, to reform the trade laws, a bill which the Committee on Ways and Means reported to the House on May 6, 1986, I am sending you this letter in order to clarify the purpose and scope of the referral in question.

As you know, I referred H.R. 4750 sequentially to the Committee on Energy and Commerce for the consideration of such portions of title I of the bill as fall within that committee's jurisdiction pursuant to clause 1(h) of Rule X (the clause containing the jurisdiction of that committee). While I, and my predecessor Speaker Albert, have in appropriate instances made a more specific sequential referral designating sections and topics within the jurisdiction of a secondary committee, such as where a portion of the bill can be clearly and discretely defined, the language of the referral in question contains the more usual format for sequential referrals. I do not intend in making this referral to alter the existing jurisdictional precedents and requirements as to trade legislation.

The form of the referral does not indicate that the Committee on Energy and Commerce shares plenary jurisdiction over title I of the bill, under the rules and precedents of the House. I have frequently advised committees of sequential jurisdiction, in consultation with the Parliamentarian, as to the limits of their jurisdictional authority over specific bills and committee amendments. Therefore, I am taking this opportunity to elaborate upon the extent of the bill over which the Committee on Energy and Commerce may properly exercise jurisdiction based on the rules of the House and previous referrals and enactments.

H.R. 4750 modifies, in chapters 1 and 2 of title I, the application of trade remedies under section 301 of the Trade Act of 1974, as amended by the Trade and Tariff Act of 1984. Among those remedies is the authority of the President under subsecton 301(b) of the Trade Act to impose Fees or restrictions on the services of foreign countries, and the authority of the President under subsecton 301(c) of the Trade Act, as amended by the 1984 Act, to restrict or deny service sector access authorizations. The 1984 service-related amendments were developed with the active participation of the Committee on Energy and Commerce, which reported H.R. 2848, the Service Industries Commerce Development Act of 1983; that bill was sequentially referred to the Committee on Ways and Means and became part of the conference agreement on the omnibus Trade and Tariff Act of 1984, on which members of the Energy and Commerce Committee were appointed as conferees. The involvement of that Committee in reporting service-related amendments to the Trade Act, and its jurisdiction over interstate commerce and other specific types of domestic regulation, give that Committee a clear and legitimate claim over Trade Act amendments which directly affect the service sanctions as those sanctions are defined in the Trade Act. It was primarily for that reason that I referred H.R. 4750 to the Committee on Energy and Commerce. A joint referral of the bill would not have been appropriate since the vast majority of other provisions of the bill were solely within your committee's jurisdiction. While there are some other incidental portions of title I of your bill which relate to issues which the Committee on Energy and Commerce has addressed in separate, jointly referred legislation, my review of title I of H.R. 4750, with the assistance of the Parliamentarian, does not indicate any substantial jurisdiction by that Committee over any provisions, other than the service-related provisions referred to above, in title I of your bill.

I am aware that the Committee on Energy and Commerce has reported its own version of legislation designed to protect and assist American industry, as well as a major bill on regulation of the foreign communications industry within our borders (sequentially referred to, and reported by, the Committee on Ways and Means). The telecommunications provision which you have reported (chapter 2 of title I of H.R. 4750) addresses competition in that industry from a Trade Act perspective, however, in a way exclusively in your jurisdiction, subject to my comments regarding the jurisdiction of the Committee on Energy and Commerce over service sanctions under section 301 of the Trade Act.

As the House of Representatives moves to develop and enact major trade legislation within the jurisidiction and expertise of so many of its major committees, I am certain that through our mutual efforts, and cooperation, it will be possible to fashion the best possible legislation while airing and resolving all competing views through fair and complete consideration on the floor of the House. To that end I pledge my full support.

Sincerely,

THOMAS P. O'NEILL, Jr.,
Speaker.

Mr. WRIGHT. What does the bill do? It does a great many things which we can discuss in the general debate. I will not attempt to be comprehensive in this brief period with you.

It does these things, however: it gives the President new tools and techniques for opening up overseas markets. The bill seeks a more open trading system through new trade negotiations. It improves our ability to respond to unfair trading practices of other countries. By protecting the intellectual property rights of American individuals and companies, this bill will improve American competitiveness. That is the key word. It sharpens and hones up the capacity of the United States to compete on world markets to the end that "made in the U.S.A." once again may be a badge of quality and value throughout the world.

By addressing the injurious export targetting, natural resource subsidies, diversionary dumping and other forms of exclusionary practices by which other countries in some cases have participated in direct and indisputable exclusion of American goods from their markets, this bill permits America to compete and to cooperate with our trading partners on a level playing field.

The bill creates an adjustment assistance trust fund to enable American firms to adapt to foreign competition, and American workers displaced from their jobs by the flood of imports from other countries are given valuable aids in being able to get job retraining to the skills that are currently needed in the marketplace.

Perhaps most importantly in the long run, this bill lays down a firm foundation by way of enhanced education and training that will enable the American worker to compete, in the newly needed, sophisticated skills, with any worker anywhere on Earth.

This bill demonstrates that the United States at a time when we are celebrating the 100th anniversary of the Statue of Liberty, on the very threshold of the bicentennial of the Constitution, is not prepared to settle for the deindustrialization of the United States. We are not prepared to agree to the drift in the direction in which we increasingly sell raw products to other countries, who then process and refine them into finished products and sell those finished products on American markets, displacing American workers, eroding the American industrial base and deindustrializing our country. That is not our destiny. We have a better destiny than that. This bill will help us achieve it.

I want to thank and congratulate Members on the Republican side, the minority side, for their cooperation in helping to bring this rule and this bill to us. Most of the provisions contained in this large bill are bipartisan, are nonpartisan in their fundamental character.

There are provisions which are and will be controversial. Those will be fully discussed under the rule. There is no need at this particular time for us to get into those subjects.

Suffice it to say that the thrust and purpose of the bill is not to exclude imports so much as it is to promote exports, to give the United States the tools that we need to make America competitive on world markets again. And to that end I ask and urge the active and enthusiastic support of all of the Members of the House to the end that we can make an historic contribution to a freer and more reciprocal and fairer world trading system.

I yield back the balance of my time.

Mr. LOTT. Mr Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. I thank the gentleman for yielding.

I think in this whole debate one has to put the trade imbalances into some proper perspective. We had Under Secretary of Commerce Bruce Smart before the committee during the hearings in anticipation of a markup on this bill. He indicated and it was subsequently confirmed by Ambassador Clayton Yeutter that, if the whole world practiced totally free trade right now, it would have at best a 20-percent impact on our trade imbalance of $150 billion, and it could be as slight as 10 percent.

So I think anyone should dismiss the notion, if he is entertaining it, that a trade package trying to promote freer world trade is the real solution to our problem. Frankly, in many regards we are still failing to live up to the standards of productivity of such industrial countries as West Germany and Japan.

In addition to that, we have to recognize that another component of competitiveness is tax policy.

The tax bill that we reported out of the House by every econometric study does violence to capital formation. Frankly, the Senate product that I have seen reported in the papers is a modest improvement, but it, too, does violence to capital formation, another important ingredient in trying to restore a competitive edge for us.

Then in addition to that there is Government policy. If we really wanted to do something about trade imbalances, why have we not for years been selling Alaskan oil to Japan? And why do we insist upon FDA regulations meeting U.S. standards for any pharmaceutical products that are shipped into foreign markets? That has had the practical effect of causing our pharmaceutical plants here to open up plants outside the borders of the United States.

My real criticism of the action of the Committee on Rules was a failure to make in order an amendment I had sought to introduce. That amendment dealt with negotiating authority to try and reach some multilateral agreements with regard to opening up markets more freely than they are today. The committee bill provides for only a 2½-year timeframe to achieve this objective, with a possible 2-year extension. My amendment would have provided for 8 years with a possible 2-year extension. I think anyone who is at all conversant with these kinds of negotiations will acknowledge the fact that 2½ years is utterly impossible, even 4½ years improbable. So for all practical purposes, the committee bill simply pays lipservice to the idea of serious negotiations with our major trading partners.

In addition, my amendment would have eliminated the exclusions in the committee bill on taking up the subject of a wide variety of products in any such kind of trade negotiations.

Finally, the committee bill insists that such negotiations cannot go forward until after an international monetary conference is held. And that, too, suggests, as I indicated, that the committee position and the bill itself is sheer tokenism on the subject of multilateral trade negotiations, and I deeply lament the fact that the Committee on Rules did not see fit to make such an amendment in order so we could have done something in a substantive way to improve the committee's actions on the trade bill.

I have never voted for rules that were in any way restrictive or waived points of order. For that reason, I do not intend to support this rule. However, I can certainly understand the concerns of our distinguished Trade Subcommittee chairman, Mr. GIBBONS, because he very eloquently stated before the Rules Committee what happened when the Congress of the United States in 1930 attempted to write a trade bill on the floor. So, while I will not support his rule, I understand why he pleaded for restrictions.

I yield back the balance of my time.

Mr. BEILENSON. Mr. Speaker, for the purpose of debate only, I yield 2 minutes to the gentleman from New York [Mr. LUNDINE].

Mr. LUNDINE. Mr. Speaker, I rise in support of this rule to make in order House consideration of H.R. 4800, the Trade and International Economic Policy Reform Act of 1986.

H.R. 4800 is an historic and critical bill. The huge $150 billion U.S. trade deficit is unsustainable. Our future economic prosperity depends on whether or not we can fashion an effective trade strategy for our future. Trade ultimately and always means jobs for Americans. We have already lost millions of jobs because of our ineffective trade policies. This bill will help create high quality jobs for our future through expanded world trade.

I commend the Rules Committee for the fine job they did in fashioning this rule. H.R. 4800 involves provisions drawn by six House committees. Arriving at consensus given this many players was a difficult task. They deserve our gratitude.

This is a fair rule. On a bill this size which deals with a subject as important as this, it is impossible to have a totally open rule. The Rules Committee has appropriately considered the merits of proposed amendments and made those in order which will ensure a full debate of this issue.

I urge the support of this rule.

Mr. LOTT. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. BEILENSON, Mr. Speaker, for purposes of debate only. I yield 4 minutes to the gentlemen from Washington [Mr. BONKER].

Mr. BONKER. Mr. Speaker, I shall be brief. The majority leader and others have noted what is obvious now, that H.R. 4800 is an extraordinary effort to address one of the most important issues of our times, when we attempt to deal with the related problems of the trade deficit, the external debt and America's competitiveness.

Mr. Speaker, I, too, would like to commend first of all the Speaker for having the foresight to set up a trade task force so that we could take a closer look at this important issue. Second, by bringing together all of the committee chairmen and the subcommittee chairmen with jurisdiction over this issue so that we could develop a process and a timeframe that would enable us to take action on a comprehensive trade bill. I would like to commend the committee chairmen for meeting the deadlines imposed by the Speaker.

When one considers the enormity of this trade bill, one can only appreciate the effort it required and the leadership necessary to bring all of these various trade bills to fruition.

□ 1700

And then I would like to commend the majority leader for attempting successfully to work out many of the jurisdictional problems that necessarily accompany a bill like this; and then finally the Rules Committee, which had to deal with the potential of all kinds of amendments coming forth protecting certain industries or changing provisions or adding new ones in something like a trade bill.

The overriding concern was to avoid a repeat of Smoot-Hawley. Chairman SAM GIBBONS made an eloquent plea before the Rules Committee to avoid that kind of repeat action so that we would not end up with a trade bill that was generic in form, turning out to be a central issue bill that would attract all kinds of protectionist action.

Indeed, the entire process is to be commended because we have attempted to deal with all aspects of our trade and international monetary problems, and yet we have not crossed the line into protectionism. We did not allow votes that would open up that problem.

Mr. Speaker, this legislation's main goal is to restore America's competitiveness. I believe it will do so in a way that is positive and consistent with international trade law. It relies not on import restrictions, but on opening markets and promoting exports.

H.R. 4800 is an extraordinary effort overhaul and update our trade laws and to provide an alternative to the failed policies and the trade deficits that threaten our domestic economy.

H.R. 4800 is a responsible trade bill that is worthy of our support.

Mr. BEILENSON. Mr. Speakgr, for purposes of debate only, I yield 5 minutes to the gentleman from Ohio [Mr. PEASE].

Mr. PEASE. Mr. Speaker, I rise also to commend the Rules Committee for making possible an excellent rule which will give us a chance to fully debate this issue next week in an expeditious manner.

I also would like to take this opportunity to comment on one section of the bill for which I am responsible, since other Members here on the floor today have made reference to it.

Mr. Speaker, to hear some people talk it is none of our business whether imports flooding into this country are made by workers whose most basic rights are repressed, but I submit, Mr. Speaker, you might get a different answer from the thousands of 10-, 11-, 12-, and 13-year-old girls who are sold into factory work by one of our trading partners in Southeast Asia, sold as factory workers by impoverished rural parents for $20 to $100 per year.

They typically work 15 hours a day, 7 days a week. They sleep in factory storerooms. They are fed only rice and vegetables.

In the name of humanity, we Americans ought to be concerned about these young children forced into factory work. American textile and garment company owners ought to be concerned, too. Trying to keep factory doors open in the Carolinas, in Alabama, and in Georgia, how are they to compete with products made by children forced into indentured servitude?

American workers, too, should be concerned about these children, because efficient U.S. factories close down and multinational corporations take advantage of exploited child labor in foreign sweatshops where, according to an article in the National Catholic Reporter:

> There is no ventilation. The sound of the machines is deafening, and the air is filled with lint which makes breathing difficult in stifling heat.

These are 10-, 11-, 12-, and 13-year-old children.

The worker rights section of the trade bill due on the House floor next week tries to deal with the repression and exploitation of workers who make the products which some countries ship into the American market.

Mr. Speaker, this is an important point. The amendment that I have sponsored does so in a way which is fully consistent with existing current American law. Under current American law, section 301 of the Trade Act of 1974, American companies can go before the U.S. Trade Representative and allege an unfair trade practice via foreign competitor, under a section dealing with unreasonable trade acts. And these are acts which we as Americans unilaterally by ourselves define as unreasonable. It does not require a determination by GATT or any other international body that they are unreasonable.

Already in the law, the current law, there are three types of unreasonable actions mentioned. One is denial of market access, another is the opportunity to establish a business in a foreign country, and another is the denial of intellectual property rights.

We in the worker rights section merely are adding a fourth clause to the three that already exist in current law. The new trade bill in no way seeks to impose American labor standards on foreign countries. It does not do that in any way. It cannot be construed as a minimum wage for the world approach. It simply requires trading nations to respect basic worker rights to which they are committed under international law and to which our country has committed itself in our own laws for 50 years or more.

Mr. Speaker, I look forward to the opportunity to discuss this section and the entire bill at greater length next week. I think this could be the most important piece of trade legislation which we have considered in decades.

Mr. BEILENSON. Mr. Speaker, I yield myself such times as I may consume.

Mr. Speaker, in concluding this debate on the rule, the Committee on Rules notes we appreciate, as did the gentleman from Texas, the work of the six committees involved, the work of the chairmen and ranking members of those committees, and expecially the efforts of the gentleman from Texas himself for successfully shepherding through the committees and then binding together successfully this complex mass of legislation. We acknowledge also the help of the distinguished gentleman from Illinois, the minority leader, Mr. MICHEL, for bringing this bill to the floor in an orderly and a timely fashion.

Mr. CRANE. Mr. Speaker, as we consider major trade legislation next week, we should be presuaded by facts not partisan rhetoric. The administration should continue to press for fair and equitable treatment for U.S. products in international markets and fairly traded imports at home. Unlike the claims made by some of my colleagues, this administration has indeed taken decisive action to ensure free and fair trade and to reject protectionism.

The facts as outlined below demonstrate that existing law provides adequate tools for the protection of U.S. trade interests and the President is using these tools effectively. What we do not need is protectionist legislation in the guise of trade reform. We do not need legislation that will threaten U.S. exports—especially agriculture and high-tech interests—reduce employment at home, raise prices for consumers and users, and hurt the national economic interest.

TRADE POLICY ACTIONS

As a part of the President's trade policy announced September 23, 1985, the Administration has:

Taken the unprecedented step of self-initiating section 301 unfair trade cases on:

Brazilian informatics market and investment restrictions (September 13, 1985,);

Korean fire and life insurance market restrictions (September 13, 1985);

Japanese market restrictions on tobacco products (September 13, 1985);

Korean lack of protection for intellectual property rights (October 16, 1985).

Ordered retaliatory action against Brazil on informatics and investment restrictions (May 15, 1986).

Self-initiated for the first time a section 305 investigation to gather information on the potential trade barrier posed to U.S. meat exports by the proposed EC Third Country Meat Directive (Mar. 31, 1986).

Initiated the first case ever brought under Section 307, initiating an investigation of Taiwan's automotive export performance requirements (Mar. 31, 1986).

Achieved a negotiated resolution on the issue of Japan's market restrictions on leather and leather footwear (December 20, 1985). Japan agreed to compensation through reduced tariffs worth $236 million in increased market access and the U.S. will impose prohibitive tariffs on $24 million of Japanese leather exports to the U.S.

Announced a GATT Subsidies Code case against European Community wheat export subsidies (October 16, 1985).

Secured market-opening concessions from Taiwan on tobacco, wine, and beer in response to the threat of a 301 case (Oct. 16, 1985).

The Administration has formed the President's Strike Force on Trade, chaired by Commerce Secretary Baldrige, to identify specific trade barriers which may require further action. To date, the Strike Force has:

Recommended to the Economic Policy Council in November 1985 that the U.S. Government initiate an antidumping investigation on 256K DRAM (Dynamic Random Access Memory) and above semiconductors from Japan. The USG self-initiated the

antidumping investigation December 6, 1985. This is the first time ever that the Department has self-initiated an unfair trade investigation outside an established program such as the Steel Trigger Price Mechanism. The International Trade Commission found preliminary injury (5-0) on January 22, 1986. The Department of Commerce announced preliminary dumping margins on March 13. A final dumping determination is expected by May 30.

Recommended to the Economic Policy Council in January 1986 that the United States Government undertake informal consultations with Airbus governments (France, Federal Republic of Germany, United Kingdom) to contain or eliminate unfair trade practices on current and future Airbus programs. The first round of discussions took place March 20-21 in Geneva. As the issue remains open, a second round of discussions will take place in June.

Recommended to the Economic Policy Council that a comprehensive strategy for dealing with unfair intellectual property rights practices be undertaken. This strategy, announced April 7, 1986, includes: a legislative initiative; intensified bilateral pressure through consultations, possible denial of GSP benefits, and possible 301 cases; heightened multilateral efforts; and an Administration policy statement on intellectual property rights.

The working group level of the Strike Force is considering many issues, some of which are being developed further. These issues will be forwarded to the Strike Force over the next few weeks.

The Administration has moved to resolve four disputes with the European Community:

We have reached agreement with the EC under the President's steel program which provides for voluntary restraints on most European steel exports to the United States through September 1989. To remedy the problem of diversion by EC exporters from licensed products to semi-finished steel, as of January 1, 1986, the U.S. imposed quotas on imports of EC semi-finished steel.

In December 1985, we negotiated resolution of the EC canned fruit case, obtaining an EC commitment to reduce its production subsidy by 25 percent by July 1986 and eliminate it entirely by July 1987.

Following the failure of the U.S. and EC to reach a solution on the citrus problem by the agreed October 31 deadline, on November 1 the U.S. imposed duties of 40 percent ad valorem on EC-origin pasta products not containing egg and 25 percent ad valorem on EC pasta containing egg. We have, however, continued to discuss this case with the EC and would prefer a negotiated solution which would enable us to put this case behind us.

On March 31, 1986, responded to new EC restrictions on U.S. grain and oilseeds exports to Spain and Portugal as a part of the terms under which those countries joined the EC in January 1986. The U.S. will impose quotas on oilseeds and increased tariffs on grains to produce a comparable loss of trade to the EC. With respect to the variable levy imposed in Spain, the U.S. will withdraw tariff "bindings" (GATT agreements not to raise tariffs above a certain level) and increase those tariffs if the EC does not provide adequate compensation by July 1.

On the bilateral/multilateral front, the Administration has:

Welcomed Canada's initiative for a possible bilateral free trade arrangement and have begun discussions on Canadian softwood lumber imports.

Secured agreement of our GATT trading partners to establish a preparatory committee for a new round of multilateral trade negogiations. We expect the round to be launched at a meeting of trade ministers scheduled for September 1986.

Undertook Market-Oriented Sector-Specific (MOSS) discussions with the Japanese in four areas: telecommunications, medical equipment and pharmaceuticals, electronics, and forest products. Major problems related to implementation of Japan's new telecommunications laws as well as the radio wave law have been resolved. In the medical equipment and pharmaceuticals area, agreement has been reached in most of the contentious areas including acceptance of foreign clinical test data, faster approval procedures and transparency in the insurance reimbursement system. Key achievements in the electronics sector are chip protection legislation, software copyrights and computer parts duty elimination. In addition, an agreement has been reached on wood product tariff cuts as well as on a significant reduction in paper duties.

Initiated Market-Access Fact-Finding (MAFF) talks on telecommunications trade barriers in Europe. The first market access discussions were initiated with Germany last December. The discussions allowed us to gain useful information on procurement practices, standards and regulations governing enhanced services. We will now assess the detailed, technical information which was provided and evaluate the "openness" of the German telecommunications market to U.S. suppliers. We held similar talks with the Italian Government and expect to begin consultations with other European countries in the near future.

Signed an agreement with Japan on the elimination of tariffs on computer equipment and parts and with Canada on the elimination of tariffs on computer parts and semiconductors.

The Administration is continuing vigorous enforcement of AD/CVD laws. We have 47 investigations ongoing and there has been over a 200 percent increase in AD/CVD cases processed from 1980 (50) to 1985 (133).

Most significant AD/CVD cases since September 1985.

Completed cases with affirmative findings of dumping or government subsidization:

Japan/celluar mobile telephones on October 24, 1985;

Brazil/fuel ethanol on January 21, 1986 (n.b. the International Trade Commission found "no injury" so case was terminated);

Saudia Arabia/carbon steel wire rod on January 27, 1986;

Canada/groundfish on March 14, 1986;

Japan/256K semiconductors on June 2, 1986.

Pending cases of dumping or government subsidization:

Japan/64K semiconductors due April 23, 1986;

Japan/EPROM semiconductors due May 27, 1986.

The Administration has also moved forcefully to deal with unfairly subsidized competition in our export markets:

Countered foreign subsidized agricultural exports by concluding sales under the Export Enhancement Program valued at over $465 million.

Countered foreign subsidized export financing. Pending Congressional acceptance of the President's War Chest proposal, the Export-Import Bank has offered grants to help American companies win sales worth about $328 million in eleven pending overseas contracts. By aggressively using mixed credits, we hope to persuade our trading competitors, particularly France, Italy and Belgium, to support negotiations to eliminate predatory financing practices. In March 1986, to counter a Brazilian bid using non-competitive financing in the U.S. market, Eximbank took the unprecedented step of extending concessionary financing to a U.S. company for a sale in the U.S.

Mr. LOTT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BEILENSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

NATIONAL INTERSTATE HIGHWAY DAY

Mr. HOWARD. Mr. Speaker, I ask unanimous consent for the immediate consideration of the joint resolution (H.J. Res. 636) designating June 26, 1986, as "National Interstate Highway Day."

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 636

Whereas the 42,500-mile National System of Interstate and Defense Highways is the world's largest transportation and public works project and connects the various regions of the Nation;

Whereas June 1986 is the 30th anniversary of the enactment of the Federal-Aid Highway Act of 1956 under which construction of the Interstate System commenced and which established the Highway Trust Fund; and

Whereas the design and construction of the Interstate System has provided substantial employment and economic growth for all segments of our society: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That June 26, 1986, is designated as "National Interstate Highway Day". The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate ceremonies and activities to recognize the 30th anniversary of the establishment of the National System of Interstate and Defense Highways and the Highway Trust Fund.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

□ 1710

BALTIC FREEDOM DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 271) designating "Baltic Freedom Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object but I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I rise in support of Senate Joint Resolution 271, designating June 13, 1986, as Baltic Freedom Day.

Baltic Freedom Day is our annual reminder that the Baltic States of Latvia, Lithuania, and Estonia have been forcibly incorporated into the Soviet Union, and are not free. As "captive nations" in the truest sense of the word, they are subject to domination by Russians within the Soviet Union's political structure.

The people of the United States stand shoulder-to-shoulder with the people of the Baltic States. We sincerely respect the efforts of Americans of Baltic descent to bring the plight of their loved ones to the attention of the American people.

Our concern for the fate of the people of the Baltic States will not diminish as time passes. Each year brings one event or another which concentrates our attention on new aspects of Soviet rule which is so detrimental to the welfare of the Baltic people.

This year, the tragic events at the Chernobyl nuclear plant, resulting in the spread of atomic waste over the Baltic States—without any warning to the population—serve to illustrate the problems faced by those under Soviet rule.

As we celebrate Baltic Freedom Day, we look forward to the day when the Baltic people will indeed be free.

Mr. CARNEY. Mr. Speaker, it is with great pleasure that I ask my colleagues to support House Joint Resolution 500, Baltic Freedom Day.

Mr. Speaker, this measure serves as an important reminder to the American people. It asks that we join with the President in commemorating June 14 as Baltic Freedom Day, and in the course of this observance to remember the desire of the people of Estonia, Latvia, and Lithuania for freedom.

The Baltic people have suffered under Soviet rule for 46 years. The United States Government has throughout the years refused to recognize the illegal Soviet occupation of the Baltic States. We in the United States have condemned the acts of brutality by the Soviets against the Baltic people, including the mass deportations in June 1941. The anniversary of the deportations coincide with our yearly observance of Baltic Freedom Day. It is only appropriate that on the anniversary of that black day, we reaffirm our support for the Baltic people, and protest the continued Soviet occupation of these nations.

Mr. Speaker, I urge my colleagues to join with the more than 230 cosponsors of House Joint Resolution 500, and support Baltic Freedom Day.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 271

Whereas the people of the Baltic Republics of Lithuania, Latvia, and Estonia have cherished the principles of religious and political freedom and independence;

Whereas the Baltic Republics have existed as independent, soverign nations belonging to and fully recognized by the League of Nations;

Whereas the Union of Soviet Socialist Republics (U.S.S.R.) in collusion with Nazi-Germany signed the Molotov-Ribbentrop Pact which allowed the U.S.S.R. in 1940 to illegally seize and occupy the Baltic States and by force incorporated them against their national will and contrary to their desire for independence and sovereignty into the U.S.S.R.;

Whereas due to Soviet and Nazi tyranny, by the end of World War II, the Baltic nations had lost 20 per centum of their total population;

Whereas the people of the Baltic Republics have individual and separate cultures, national traditions, and languages distinctively foreign to those of Russia;

Whereas the U.S.S.R. since 1940 has systematically implemented its Baltic genocide by deporting native Baltic peoples from their homelands to forced labor and concentration camps in Siberia and elsewhere, and by relocating masses of Russians to the Baltic Republics, thus threatening the Baltic cultures with extinction through russification;

Whereas the U.S.S.R. has imposed upon the captive people of the Baltic Republics an oppressive political system which has destroyed every vestige of democracy, civil liberties, and religious freedom;

Whereas the people of Lithuania, Latvia, and Estonia find themselves today subjugated by the U.S.S.R., locked into a union they deplore, denied basic human rights, and persecuted for daring to protest;

Whereas the U.S.S.R. refuses to abide by the Helsinki accords which the U.S.S.R. voluntarily signed;

Whereas the United States as a member of the United Nations has repeatedly voted with a majority of that international body to uphold the right of other countries of the world to determine their fates and be free of foreign domination;

Whereas the U.S.S.R. has steadfastly refused to return to the people of the Baltic States of Lithuania, Latvia, and Estonia the right to exist as independent republics separate and apart from the U.S.S.R. or permit a return of personal, political, and religious freedoms; and

Whereas 1986 marks the forty-sixth anniversary of the United States continued policy of nonrecognition of the illegal forcible occupation of Lithuania, Latvia, and Estonia by the U.S.S.R.: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(1) the Congress recognizes the continuing desire and the right of the people of Lithuania, Latvia, and Estonia for freedom and independence from the domination of the U.S.S.R.;

(2) the Congress deplores the refusal of the U.S.S.R. to recognize the sovereignty of the Baltic Republics and to yield to their rightful demands for independence from foreign domination and oppression;

(3) the Congress reaffirms the indictment against the U.S.S.R. of the Copenhagen Manifesto signed by the Baltic Tribunal on July 26, 1985, by Doctor Theodor Veiter, Reverend Michael Bourdeaux, Sir James Fawcett, Per Ahlmark, and Jean Marie Daillet;

(4) the fourteenth day of June 1986, the anniversary of the mass deportation of Baltic peoples from their homelands in 1941, be designated "Baltic Freedom Day" as a symbol of the solidarity of the American people with the aspirations of the enslaved Baltic people; and

(5) the President of the United States be authorized and requested to issue a proclamation for the observance of Baltic Freedom Day with appropriate ceremonies and activities and to submit the issue of the Baltic Republics to the United Nations so that the issue of Baltic self-determination will be brought to the attention of the United Nations General Assembly.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a moton to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, I have asked for this time for the purpose of ascertaining the schedule for next week.

Mr. Speaker, I yield to the gentleman from California [Mr. COELHO].

Mr. COELHO. I thank the gentleman for yielding, and I will be happy to discuss the schedule with the gentleman from Pennsylvania.

Mr. Speaker, on Monday the House will consider six suspensions, which are as follows:

H.R. 4775—eliminate ceiling on VA home loan guaranty programs;

H.R. 4718, Computer Fraud and Abuse Act of 1986;

H.R. 4588, Administrative Conference authorizations;

H.R. 2971, Susquehanna River Basin compact;

H.R. 4434, Federated Women's Clubs charter; and

H.R. 4529, Mint authorization bill.

Any recorded votes on the Suspension Calendar on Monday will be postponed until Wednesday.

On Tuesday the House will meet at noon and will consider H.R. 4800, the omnibus trade bill of 1986, general debate only.

On Wednesday the House will meet at 11 a.m., and it is expected that the House will continue in session until about 7 p.m.

On Thursday the House will complete consideration of the Omnibus trade bill.

I will later ask for unanimous consent that there be a special District day on Thursday for consideration of H.R. 4479, increasing Federal payment to District of Columbia to $444.5 million, the level in the President's budget.

The last item of business on Thursday will be H.R. 1, Housing Act of 1985. We hope to complete consideration.

Mr. WALKER. I thank the gentleman.

I have just a couple of questions. It is not expected that we will have any votes on Tuesday; is that right?

Mr. COELHO. That is right. We have two primaries, as the gentleman knows, in his own State of Pennsylvania, and also the State of Oregon. So in order to help the Members out, we will not have any votes on Tuesday. All votes will be postponed until Wednesday.

Mr. WALKER. That will be any recorded votes on suspensions considered on Monday.

From the looks of the schedule, we could, if we go back to the Housing Act of 1985, go over until Friday. Is it expected that we will have a Friday session?

Mr. COELHO. We do not expect to have a Friday session at this point. We expect to conclude our business on Thursday. We hope to complete H.R. 1, but we will have to see how we do on the trade bill next week.

Mr. WALKER. So it is expected that at the close of business Thursday we will break for the Memorial Day recess.

Is it my understanding that the House will then be adjourned until noon on June 3, for the Memorial Day district work period?

Mr. COELHO. Yes. We will be on district work period until Tuesday, June 3, at noon.

Mr. WALKER. Are votes expected on Tuesday, June 3?

Mr. COELHO. That is a primary day, also, as the gentleman knows. So we will have business on Tuesday, June 3, but any votes will be postponed until Wednesday.

Mr. WALKER. So Members can expect votes beginning on Wednesday, June 4?

Mr. COELHO. Wednesday, June 4, right.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Is my understanding correct that we will be out of here on the 22d, on Thursday, and break for the Memorial Day recess?

Mr. COELHO. If the gentleman will yield, we will break for the district work period until the 3d of June.

Mr. YOUNG of Alaska. And did the gentleman mention about what time that would be on Thursday? Is there any concept at this time?

Mr. COELHO. Is the gentleman talking about Thursday, the 22d?

Mr. YOUNG of Alaska. Yes.

Mr. COELHO. We hope to complete consideration of the trade bill, H.R. 4479 and H.R. 1. We would hope to get out at a decent hour, but we will have to wait to see how we do with the trade bill before we can make that decision.

Mr. YOUNG of Alaska. I thank the gentleman.

Mr. WALKER. Just one more point for clarification: We could, of course, end up with votes if Members call for procedural votes on Tuesday, for instance, a vote on the Journal or something like that?

Mr. COELHO. Of course, as the gentleman knows, there is no way to prevent that. So there could be votes. But we hope not.

Mr. WALKER. I understand.

I thank the gentleman.

ADJOURNMENT TO MONDAY, MAY 19, 1986

Mr. COELHO. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

HOUR OF MEETING ON WEDNESDAY NEXT

Mr. COELHO. Mr. Speaker, I ask unanimous consent that when the House adjourns on Tuesday next, it adjourn to meet at 11 a.m. on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was on objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. COELHO. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

SPECIAL DISTRICT DAY

Mr. COELHO. Mr. Speaker, I ask unanimous consent that Thursday next be a special District Day.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

HANDS ACROSS AMERICA DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 246) to designate May 25, 1986, as "Hands Across America Day," for the purpose of helping people to help themselves, the commending United Support of Artists for Africa and all participants for their efforts toward combating domestic hunger with a 4,000-mile human chain from coast to coast, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I rise in strong support of Senate Joint Resolution 246, legislation to designate May 25, 1986, as "Hands Across America Day" for the purpose of helping people to help themselves and commending United Support of Artists for Africa for their efforts toward combating domestic hunger with a nationwide

coast-to-coast human chain linkup, 4,000 miles long.

As a member of the Select Committee on Hunger, I have heard testimony from States and local health and welfare officials attesting to the growing numbers of American families whose daily diets are nutritionally deficient. Millions of needy Americans, are under current law, unserved by the Food Stamp Program: Participants in the Food Stamp Program total 19.8 million, however, right now 33.7 million Americans are living in poverty. Hunger in the United States is not new, nor is it diminishing. Health indicators such as infant mortality and low-birth weight are on the rise in rural America. Growth stunting among urban, poor children due to inadequate nutrition is also present today. The postneonatal death rate is on the upswing nationally for the first time in 20 years, and it is largely attributed to inadequate prenatal nutrition and care.

Contrary to the opinion of many, hunger in our country does exist and if we do not take steps to generate resources to ensure that low-income families are provided with the means for adequate nutrition, then hunger will persist in America. "Hands Across America" is one excellent way to accomplish this.

Food is a basic human need. Access to adequate food should remain a right for every American. It is important, therefore, that the Congress assist the United Support of Artists for Africa. Accordingly I urge my colleagues to support Senate Joint Resolution 246 and to take part in this important humanitarian project, "Hands Across America."

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from New York.

Mr. GARCIA. Mr. Speaker, I would like to join in the remarks of my colleague, the gentleman from New York [Mr. GILMAN]. There is no question in my mind that there is a serious problem in America today. In spite of the affluence of so many, there are so many who just do not have. I believe when we have reached a point where people are looking in garbage pails and other places where people discard food, that we see Americans like no other time in the history of our time. I commend those people who have organized this project, "Hands Across America," because I believe that while it is our business and responsibility to help those nations and those continents that need help, there is no doubt that in America today there is a serious problem. I am delighted that this will highlight the problems that we face right here domestically.

I thank my colleagues for yielding.

Mr. LELAND. Mr. Speaker, in just a few short days, the American public will be joining together in a spirit of solidarity for the specific reason of combatting hunger and homelessness in the United States. On May 25, 1986, nearly 10 million people will link up coast-to-coast to demonstrate this commitment.

Mr. Speaker, while hunger and homelessness exist in this prosperous land of ours, there is disagreement as to the number of people affected. Yet, it is a grave problem by any standards and the subject of numerous studies. We know this to be so by the proliferation of soup kitchens, temporary shelters, and food pantries; the consistently higher number of long-term unemployed; and, the reduction of Federal moneys for food assistance programs. The quibbling over numbers expressed by our colleagues in both Chambers of the Congress cannot mask the fact that over 33 million people are living below the poverty line; 1 out of every 4 children under the age of 6 live in poverty; and, over 8 million people are unemployed.

We should be compelled to provide the basic human right of an adequate diet to our less fortunate neighbors; to begin placing the issue of hunger as a higher priority by the U.S. Government. Actions, not rhetoric, are needed. Senate Joint Resolution 246 commemorating May 25, 1986, as Hands Across America Day, gives recognition to the organizers and the participants of an event that seeks to act on the problems facing our Nation. While this resolution is not as forceful as I believe it should be, it is the responsibility of our Government to recognize our common problems, and to act together with the American people to alleviate the burdens they create.

Let us not become passive on May 26, the day after this unprecedented show of compassion. Let us instead renew our commitment to improving the quality of life of all Americans. We all share the responsibility of meeting the basic human needs that include food and shelter.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 246

Whereas thousands of recruits were rejected during World War II because of physical and mental problems associated with malnutrition;

Whereas our Government committed itself to ending this national problem by successfully devising programs to eliminate malnutrition in America;

Whereas our people became the best-fed, healthiest people in the world;

Whereas a Physicians Task Force on Hunger recently estimated that at least twenty million American citizens now suffer from hunger, and that hunger is increasing rather than declining;

Whereas physicians around the Nation are reporting an increase in nutrition-related health problems among the elderly and children, including diseases which are usually limited to third world countries;

Whereas homelessness is an ever-increasing national problem and more than half the homeless population in the United States is comprised of children and women;

Whereas it has been estimated that there are only enough shelters to house one hundred and eleven thousand men, women, and children on a given night, and there are as many as three million people in need of shelter;

Whereas the General Accounting Office reports that the principal causes of homelessness in America are: unemployment, a lack of resources for deinstitutionalized mental patients, increases in personal crises, cuts in public assistance programs, reduced availability of low-income housing, and alcohol and drug abuse;

Whereas participation by all citizens who are intersted in helping to address this enormous problem should be encouraged;

Whereas a private fund-raising effort by United Support of Artists for Africa entitled "Hands Across America" is planned for May 25, 1986;

Whereas millions of participants in this effort who will joint hands across this country on that day should be commended for asking all Americans to rededicate themselves to fulfilling the most basic needs of our people in this land of compassion and abundance, by expending every effort to eradicate hunger and homelessness in our Nation; Now, therefore, be it,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That May 25, 1986, is designated as "Hands Across America Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

YOUTH SUICIDE PREVENTION MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 266) to authorize and request the President to designate the month of June 1986 as "Youth Suicide Prevention Month," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Speaker, I urge my colleagues to adopt House Joint Resolution 549, designating the month of June 1986 as

"Youth Suicide Prevention Month." As a cosponsor of this measure, which was introduced by my colleague, the gentleman from New York [Mr. DIOGUARDI], I feel it is vitally important that we in Congress recognize the important role that mental health, counseling, and simple acts of friendship can serve in preventing suicide among out young persons.

The growing incidence of suicide among our youth is a troubling matter for parents, teachers, and legislators alike. In the past 5 years, suicide has become the second leading cause of death, following accidents, for young persons ages 15 to 24. Although the suicide rate for the population at large has remained essentially steady for many decades, for young people it has increased 25 percent between 1960 and 1983.

Experts tell us that most suicide is preventable. A nationwide effort to educate and publicize the critical nature of this tragic, current epidemic is a vital first step in stemming the tide of hopelessness that has overcome so many of our young people. Education efforts geared toward helping teenagers understand and accept normal reactions to pain and loss, peer counseling groups, referral services, as well as improved education initiatives for parents and teachers, can make a significant difference in suicide prevention efforts.

In that regard, I urge my colleagues to take this opportunity to review legislation recently introduced by Congressmen LANTOS and ACKERMAN. This legislation, H.R. 4650, the Youth Suicide Prevention Act, creates a special $10 million grants program within the Department of Education to assist school districts and private nonprofit organizations in establishing suicide prevention programs. This measure is pending in the Committee on Education and Labor, where, as a cosponsor, I am hopeful action can be taken prior to Youth Suicide Prevention Month in June.

Accordingly, I urge my colleagues to join together in supporting this legislation and joining in appropriate programs and activities observing June 1986 as Youth Suicide Prevention Month.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from New York.

Mr. GARCIA. Mr. Speaker, I would like to once again commend my colleague, the gentleman from New York [Mr. GILMAN] for his hard work on this project.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 266

Whereas the youth of society represent the hope for the future;

Whereas the rate of youth suicide has increased more than threefold in the last two decades;

Whereas over five thousand young Americans took their lives last year, many more attempted suicide, and countless families were affected;

Whereas youth suicide is a phenomenon which must be addressed by a concerned society; and

Whereas youth suicide is a national problem which can only be solved through the combined efforts of individuals, families, communities, organizations, and government to educate society: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of June 1986 is designated as "Youth Suicide Prevention Month" and the President is authorized and requested to issue a proclamation calling upon the Governors of the several States, the chief officials of local governments, and the people of the United States to observe such month with appropriate programs and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JUST SAY NO TO DRUGS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 337) designating May 18–24, 1986, as "Just Say No to Drugs Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. HUTTO. Mr. Speaker, I would like to express my sincere thanks to my distinguished colleagues, Mr. FORD, Mr. HANSEN, and Mr. GARCIA, for allowing the House to join with the Senate in passing Senate Joint Resolution 337, commemorating the week of May 18 through May 24, 1986, as "Just Say No to Drugs Week." Senate Joint Resolution 337 is identical to House Joint Resolution 629, which I introduced on May 7. I am very pleased to note that over the past week 164 of my colleagues have joined me in this worthwhile endeavor by cosponsoring House Joint Resolution 629.

This resolution underscores the efforts of the Just Say No Clubs that are working to prepare elementary and junior high school students to stand against future pressures of experimenting with and using drugs. I think we all realize how difficult growing up is for today's children. They may appear to act and dress in a grownup manner much more quickly than their parents. Inside, however, they are still children and the overwhelming desire for acceptance by their peers is important. The Just Say No Clubs that are being organized will help to provide them with the support that they so desperately need to fight the temptation to use drugs.

This effort is being made with good reason as the most recent figures on drug use among today's youth reveal a tremendous problem. Five percent of high school seniors smoke marijuana on a daily basis and 6 percent use cocaine. We cannot let drugs destroy the lives of our teenagers any longer.

The Just Say No Program will send out a message of hope to America's youth. On May 22, thousands of young people, their teachers, and parents across the Nation will participate in "Just Say No Walks." These walks will be a courageous declaration that students can just say "No" to drugs. These children need to know that the leaders of America are standing behind them in their belief that drugs don't have to be a part of growing up. I firmly believe our young people deserve every possible chance to reach their potential and attain their goals so that they will become responsible citizens. Although it has been said many times, we must not allow ourselves to forget that today's youth are tomorrow's leaders.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 337

Whereas America's youth are our Nation's most precious resource;

Whereas young people are contributing to drug abuse prevention by starting "Just Say No" clubs and saying "no" to drugs;

Whereas children across America will participate in a Walk Against Drugs on May 22; and

Whereas America's youth should be recognized and encouraged for their efforts in the fight against drug abuse: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That in recognition of this Nation's young people to publicly fight drug abuse by just saying "no" to drugs and thereby contributing to the end of drug abuse in America, the President is directed to issue a proclamation designating the week of May 18, 1986, through May 24, 1986, as "Just Say No to Drugs Week", and calling on the people of the United States to observe this week with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to

revise and extend their remarks on Senate Joint Resolution 271, Senate Joint Resolution 246, Senate Joint Resolution 266, and Senate Joint Resolution 337, the Senate joint resolution just considered and passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

REPORT ON DESIRABILITY OF ESTABLISHING AN INTERNATIONAL SPACE YEAR IN 1992—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. Doc. No. 99-221)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Science and Technology and ordered to be printed:

(For message, see proceedings of the Senate of today, Thursday, May 15, 1986.)

□ 1725

A UNIFIED NATIONAL PROGRAM FOR FLOODPLAIN MANAGEMENT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs:

(For message, see proceedings of the Senate of today, May 15, 1986.)

ANNUAL REPORT OF THE FEDERAL COUNCIL ON THE AGING—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor.

(For message, see proceedings of the Senate of today, Thursday, May 15, 1986.)

GENERAL LEAVE

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include therein extraneous material, on the subject of the special order today by the gentleman from California [Mr. LANTOS].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

GORBACHEV WAS WRONG

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GEKAS] is recognized for 5 minutes.

Mr. GEKAS. Mr. Speaker, Gorbachev was wrong when, in his televised statement, he said that the U.S. Government did not know anything about Three Mile Island for a significant period of time after that incident happened.

Gorbachev was wrong when he implied that the Congress of the United States did not know anything about the Three Mile Island incident after it had happened.

Gorbachev was wrong when he stated that notification was not given to the world at large about the events at Three Mile Island for a significant period after the incident occurred.

He was dead wrong in these assertions as the televised message he gave to the Soviet people was made known itself to the world. I, myself, was at Three Mile Island on the date of that incident within hours after the first news came out about the mishap. I greeted Members of Congress, four Members of the Senate and Members of the House, Congressman HERTEL and Congressman GOODLING who came in shortly thereafter and were briefed and conducted a press conference as to the events at Three Mile Island.

Moreover, on the same date, on March 29, March 28, 1979, the President of the United States was informed about 9 a.m., within hours after the incident occurred, and President Carter himself as a direct response of that communication, came to Three Mile Island and toured the facility and was given a full briefing on those events on the following Sunday.

You see a stark contrast between what had happened at Three Mile Island and the recent nuclear disaster in the Ukraine in the Soviet Union. Moreover, the international press corps, in all its elements, swarmed into Middletown, PA, and into Harrisburg at the time of the Three Mile Island incident, again, within hours after the incident had occurred, and the news was flashed, the shock that was heard around the world right from the very first moment that it became known that the mishap had occurred.

Again, a contrast between what is asserted by Gorbachev and what actually happened at Three Mile Island. What a contrast, Mr. Speaker, when the nuclear disaster happened in the Soviet Union it remained for a cloud that hovered over Scandinavia days later to give the world first notice that a disaster of major proportions had occurred.

Gorbachev was dead wrong, first of all, in allowing his nation not to give immediate and concise information as to what was occurring. Gorbachev was wrong the other day when he intimated that the U.S. Government or the American people or the mechanisms that were at work in the nuclear industry at that time failed to do their duty at the time of the Three Mile Island incident with respect to notification to the world.

Again we see a contrast, Mr. Speaker, between what can happen and what does happen in an open society where people can know of something immediately, and in the instance of Three Mile Island, to give people choices right away as to how to act for their families; whether to leave town; whether to evacuate; whether to stay on, and what had happened in the Soviet Union when many people, if it feared, were consigned to their death because they never knew, and still do not know in some quarters, what actually happened on the date of that incident and what followed.

Mr. Speaker, Gorbachev was wrong.

□ 1735

MY ADVICE TO THE PRIVILEGED ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, yesterday the headlines reported that two prominent administration officials had accused the Government of Mexico of corruption, insinuating in a most insinuative, in fact, if not a direct, way that the President of Mexico, Mr. de la Madrid, or his relatives, were involved in corrupt practices and also in the illegal drug trade.

Two individuals making the charges were, one, Elliott Abrams, who happens to be the Under Secretary of State for Latin American Affairs. The other was one von Raab, of the Customs Bureau.

Now I think that the harm that has been perpetrated by these two spokesmen without any kind of a clearance, but with the approval of the President or the Cabinet members directly superior to these individuals, indicating that the impact on the diplomatic front particularly, and specifically in Mexico, has been so adverse to the best interests of this country that some kind of an apology should be forthcoming forthwith.

In the first place, it does not surprise me. Elliott Abrams came into the service of the United States and the State Department not with any particular background of experience, but was one of those political hirelings

that then Ambassador to the United Nations Kirkpatrick brought in her very steadfast and absolute inexorable pursuit of dismissing all of the career diplomats in our U.N. staff in New York, and hiring hacks that had no experience, but who met her ideological litmus test. Elliott Abrams was hired because he happened be to the son-in-law of Norman Podhoretz, the editor of "Commentary," which was the one that brought the attention of the administration to one Ambassador Kirkpatrick.

So, we have the irresponsible remarks of a man who has absolutely no serious background for diplomacy, much less in this particular area now as the Deputy Assistant Secretary for Latin American Affairs.

Second, the record will show that if any administration in Mexico, if any President in recent history, has been considered above question an honest administrator, it is President de la Madrid. But on top of that, it is a very, very insidious intervention in the purely domestic and internal affairs of the sovereign neighbor to the south of our border. It has aroused such resentment that any responsible official from the President on down who has the authority should offer an apology forthwith.

Also, it is hypocritical. If there is any corruption in Mexico, it can be more than matched in our country. The kind of drug traffic which is experienced in our country by way of international traffic and particularly with Mexico would not be possible, were it not for the joinder of the political, the official governmental, all the way from local to State to national officials, and organized crime.

I have pointed this out since 1970. There is no question about it. It was this kind of activity that led to the first murder of a member of the Federal judiciary, Judge John Wood. Finally, after 3 years, the Justice Department was able to bring at least some culprits to justice, but never have gotten to those behind the scenes that are still in power, that are still reaping billions of dollars from this illicit trade.

Our corruption in the United States is what gives rise to the demand for the drugs to begin with. Second, Mexico above all, has been the most steadfast—under pressure from us, of course, but also on our insistence—in stamping out the raising of the poppy fields and the like, and attempting to do what they can to stem the tide of this illicit drug trade.

LEGISLATION TO REMEDY PROBLEMS CAUSED BY JOINT AND SEVERAL LIABILITY IN ANTITRUST CASES

The SPEAKER pro tempore (Mr. CARPER). Under a previous order of the House, the gentleman from Texas [Mr. BROOKS] is recognized for 5 minutes.

Mr. BROOKS. Mr. Speaker, I am introducing today a bill that provides a long-awaited consensus solution for remedying the problems caused by joint and several liability in antitrust cases. This legislation has gained the support of the business community, the administration, and the bar. It is a much needed remedy for inequities which occur in antitrust cases through joint and several liability combined with mandatory treble damages—a problem of continuing concern to the business community and the Congress.

Under current antitrust damage law, each defendant in an antitrust action, regardless of size, degree of culpability, or market share, can be held liable for an entire industry's treble damages. Consequently, tremendous pressure exists on defendants to settle out of court than risk litigation. This pressure builds as fellow defendants settle early, often for small sums, leaving the reamining defendants subject to greater and greater liability. At this point, innocent, or less culpable, companies may pay substantial sums rather than defend themselves and risk liability for an entire industry's treble damages.

The bill that I am introducing today would modify current law so as to require the courts to reduce the claim of an antitrust plaintiff who has released a person from liability by the greater of the consideration paid for the release or the damages allocable to the person being released from liability.

Additionally, the legislative provides that, in horizontal pricefixing and similar cases, if a person whose undercharges or overcharges would have been included in the calculation of damages has not been joined as a defendant, the court shall conclusively presume that such a person has been released from liability and reduce the plaintiff's claim by a proportionate amount. The bill expressly preserves the doctrine or joint and several liability, but vitiates its unintended and unfair results. Further the legislation covers all antitrust actions where these problems may arise.

This legislation would solve the serious problems inherent in the existing system of antitrust damage law. First, the bill helps prevent plaintiffs from threatening the least culpable, or even innocent companies with industry-wide treble liability. Whipsaw settlement tactics would be impossible, because a plaintiff would no longer be able to force the remaining defendants to shoulder the share of treble damages attributable to settling defendants.

Additionally, since the bill requires all allegedly culpable parties in a horizonal pricefixing or similar case to be joined in the lawsuit if their overcharges or undercharges are to be included in the plaintiff's damage claims, a plaintiff's ability to selectively sue some coconspirators in order to engage in coercive whipsaw settlement tactics is eliminated.

The legislation expressly preserves the doctrine of joint and several liability in all antitrust cases and, to the extent that such liability helps to deter anticompetitive behavior or is otherwise throught to be desirable, these benefits are retained.

A true consensus solution to the problems that have plagued the business community and with which congress has grappled for more than a decade has finally been found. I urge my colleagues to join with me in a bipartisan effort to achieve this important and long-awaited reform of antitrust law.

HONORING NATAN (ANATOLY) SHCHARANSKY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. LANTOS] is recognized for 5 minutes.

Mr. LANTOS. Mr. Speaker, I am pleased to sponsor today's special order honoring one of the most courageous, moral, and inspirational individuals in the world today. I am especially pleased that my cochairman of the Congressional Human Rights Caucus, Congressman JOHN PORTER, and Congressmen BEN GILMAN and STENY HOYER joined me in calling for this opportunity to pay tribute to Natan Shcharansky.

This week many of us had the opportunity to meet Mr. Shcharansky in a special event in the Capitol Rotunda. His presence in the Rotunda spoke volumes for the need to continue our efforts on behalf of all Soviet citizens who yearn to practice their religion freely or emigrate. Even as Mr. Shcharansky thanked Congress for the efforts we have done as a collective body to secure his release from the Gulag, many of us felt that we should be thanking him instead.

We should thank Shcharansky for giving us an example of how conviction eventually triumphs over corruption. We should thank him for his tireless work on behalf of human rights, work which cost him 9 years of his life spent in prison. Not least, we should thank his tremendous wife, Avital, for preserving through the years of darkness, making numerous trips here and throughout the world to bring her husband's case to the attention of the world.

The Rotunda event was truly a joyous event of this Congress. On one level it was a pleasure to simply see the man on whose behalf we have worked for many years. Over the years, dozens of Dear Colleague letters and hundreds of individual letters were sent to the Soviet leadership on Shcharansky's behalf. His eventual release is proof that these efforts, as well as all the numerous efforts organized by Avital and such dedicated organizations such as the Union of Councils for Soviet Jews and the National Conference for Soviet Jewry, can pay off.

On a different level, Shcharansky brings an important message to us all. Shcharansky teaches us that human rights are indivisible. That is the lesson of Natan Shcharansky as Shcharansky told us in the Rotunda, however, we cannot rest simply because one individual has been released; on the contrary, we have to continue and renew our efforts on behalf of persecuted individuals in the Soviet Union, Latin America, Africa, and Asia.

I am proud to join with my colleagues today in praising the great work that Natan Shcharansky has done, and also to look forward to the coming years when Natan will be on the vanguard for human rights throughout the world.

71-059 O-87-23 (Pt. 8)

Mr. COUGHLIN. Mr. Speaker, sometimes a strange and fortunate coincidence will occur in Congress that makes our undertakings here all the more interesting.

Today is such a day for me.

Sometime last month I arranged to speak out once again on the continuing plight of Soviet Jewry as part of the 1986 Congressional Call to Conscience Vigil on behalf of Soviet Jewry. Through the office of our colleague and this year's vigil chairman, TOM KINDNESS, it was agreed that today would be the date I would make my remarks.

As we all know, Mr. Speaker, today also happens to be the day that we welcome Anatoly Shcharansky to our Nation's Capital.

The significance of this coincidence should not be overlooked, for indeed the relationship between these events is direct and clear.

Anatoly Shcharansky is out of the Soviet gulag today for two important reasons. First, he is free because he is a man of great conviction, courage, and faith, who knew that he would one day rejoin his wife Avital in Israel. Second, he is free because his many friends, throughout this country and others, kept up a long and vocal fight on his behalf. Even when things looked bad, his supporters—foremost among them Avital—pursued his release at every opportunity.

Today we can see the results. Anatoly is at last in our midst physically as well as spiritually. His presence here is proof that justice, dignity, and liberty can triumph over tyranny and oppression when freedom-loving people speak with one united voice.

Today, we need to speak out again with one voice. Tomorrow, and the day after, too. Indeed, we must speak out everyday until all Soviet Jews have the right to emigrate freely.

Fortunately, we have a new voice joining our chorus. It is a voice of experience and indomitable spirit. It is, of course, the voice of Anatoly.

I am informed that later this week in the Soviet Union another Soviet Jew, one who has both very little and very much in common with Anatoly Shcharansky, will be appearing before a Soviet kangaroo court on a false charge of drug-trafficking. The absurd charge is the product of a plot by the KGB to imprison Alexei Magarik of Tblisi, whose real "crime" is wanting to study and teach about his Jewish heritage. There would seem to be little doubt about the short-term outcome of this trial.

What matters, though, is the long-term result. As in Anatoly's case, we must join together to protest this travesty of justice, as well as the myriad of others that have victimized the Soviet Union's many Prisoners of Conscience. We must speak out as one on behalf of the literally hundreds of thousands of Soviet Jews who wish to live in their true homeland, Israel.

Mr. Speaker, from January of this year through the end of April, only 282 Soviet Jews have been allowed to exit the U.S.S.R.—even fewer than the paltry number of emigrants permitted to leave last year, when one averages for the year. This is unacceptable.

It is clear now that the Soviets released Anatoly because they hoped the West would be satisfied and diverted from the issue at hand—freedom for all Soviet Jews. We must indicate in no uncertain terms that we are not satisfied with the freedom of one man alone, even if he is one as great and inspiring as Anatoly Shcharansky. We must tell the Soviets that Alexei Magarik and hundreds of others who wish to leave will never be forgotten.

Mr. Speaker, I am honored to be able to join Anatoly Shcharansky in the continuing effort to free Soviet Jewry. With his wisdom and energy, I am confident this fight for freedom will be won.

Mr. BROOMFIELD. Mr. Speaker, we in Congress have been very privileged to welcome and honor Anatoly (Natan) Shcharansky and his wife, Avital, to Washington and to the Congress. He is a hero in every sense of the word.

Until recently, Natan was the symbol of Soviet repression. Now, he is the symbol of hope for the countless others who languish in Soviet prisons. Throughout his darkest moments, he was never alone. All of us were with him. There was always hope. There still is hope.

The forces of darkness tried to silence him, but failed. Now, we salute him in this historic place far from the prison camps in the Soviet Union.

Through his sufferings, he has become the great champion of human rights and a symbol of courage throughout the world.

I recently visited the Soviet Union and discussed the question of human rights abuses in that country with Mr. Gorbachev, and met with many of those whose rights are being denied. I got a glimpse of their plight, and it left me grateful for the rights we often take for granted.

Mr. Speaker, it is an honor to welcome Natan and Avital. Side-by-side, they have fought on behalf of all those Jews in the Soviet Union who are denied basic freedoms. They have also fought for all of us.

I know that Natan and his wife will continue the human rights struggle for those he left behind. Those suffering souls are the victims of a cruel tyranny that defies the imagination of many of us in the free world. We did not forget Natan. We will not forget those still in the Soviet Union.

I am delighted to have this opportunity to publicly pay tribute to this brave couple. We are glad and honored to have them with us.

Mr. PEPPER. Mr. Speaker, it is with great honor that I join my colleagues in this special order organized by the gentleman from California [Mr. LANTOS] and the gentleman from Illinois [Mr. PORTER] to celebrate the courage and commitment by Anatoly "Natan" Shcharansky to the preservation of human rights in the Soviet Union.

Early this year, we watched with joy and relief as Natan stepped across Kleinicke Bridge to the freedom which had been his dream during the long years of harassment, interrogation, isolation, and imprisonment.

He had been convicted of treason, espionage, and agitation against the Soviet Union. His so-called crime was to speak out for human rights and the rights of tens of thousands of Jews who wished to emigrate from the Soviet Union.

Just a few days ago, here in the Capitol Rotunda, he greeted us as his "accomplices in crime", and challenged us to continue together our "criminal" activities in pursuit of justice and individual liberty. I am honored to stand in his company.

Natan Shcharansky understands suffering. And he knows that he is not the last in his country who will suffer. We are so very fortunate that his captors have not been able to break his spirit or silence his words.

We will work together with him to keep the light shining on those left behind—on Andrey Sakharov, and Yuriz Orlov, and Josef Begun, and Ida Nudel, and on the thousands of others who are still struggling for their beliefs and their freedom.

We will work together to hold those in Moscow accountable to their pledge of respect for religious belief and individual freedoms as embodied in the Helsinki agreement.

And we will work together to further human rights and Jewish emigration by continuing to press our interest in matters and by insisting that real progress is essential to our agenda for improved relations and for peace.

The release of Natan Shcharansky is a hopeful sign. Today, we salute him, and welcome this opportunity to tell him how grateful we are for what he has done to ensure that human rights and individual freedom will not be undermined. His faith, his ability to lead, his wit, his courage to stand up against his oppressors for his principles, and his love of freedom stand as a beacon to those who will follow.

Again, I thank my colleagues for arranging this special order so that we might express our feelings and reaffirm our commitment to the course of human rights in the world.

Mr. GILMAN. Mr. Speaker, I am pleased to join my colleagues of the Congressional Human Rights Caucus, the gentleman from California [Mr. LANTOS], the gentleman from Illinois [Mr. PORTER], and the distinguished cochairman of the Helsinki Committee, the gentleman from Maryland [Mr. HOYER] in providing this opportunity to recognize Anatoly Shcharansky for his courageous dedication to human rights and his ongoing commitment to all those denied basic human freedom.

Throughout his 9 years of imprisonment on false charges of being a U.S. agent, Anatoly Shcharansky displayed courage and an unyielding iron will. His struggle began as a founding member of the Moscow Helsinki monitoring group, and as an outspoken proponent of the rights of Soviet Jews. Anatoly Shcharansky and his devoted wife Avital, who waged an indefatigable campaign on behalf of Anatoly and others like him, have brought the pursuit of freedom, and the issue of human rights to the forefront of world attention.

During his 9 years of unjust imprisonment, Congress often adopted legislation in support of Anatoly Shcharansky. We have p;raised his devotion for his fellow man, and call upon the President to join us in our fight for his release. I am proud that the House has approved a bill that I sponsored with over 230 of my colleagues, awarding Anatoly and his devoted wife, Avital Shcharansky Congressional Gold Medals. These medals are in recognition of their dedication to human rights.

Anatoly's address earlier this week in the Rotunda of our Captiol takes on added meaning. Throughout the world our Capitol is

viewed as a symbol of everlasting freedom. Two of our most cherished liberties are the freedom of speech and the freedom of religion, both routinely denied in the Soviet Union. These rights are guaranteed to us by our Constitution, but we so often take them for granted. As Thomas Jefferson once said, "My God! How little do my countrymen know what precious blessings they are in possession of, and which no other people on Earth enjoy!"

Anatoly Shcharansky knows just how very precious freedom truly is, and speaks for the many millions of men and woman who are not free to speak themselves.

While we were gratified by Anatoly's presence in our midst, and mindful of his joyous reunion with Avital, who is now expecting their first child, we cannot forget the millions who are still denied their own freedom. In the Soviet Union, despite the threat of Government reprisals and bureaucratic obstacles, over 400,000 Jews have applied to emigrate. Avital and Anatoly Shcharansksy are an inspiration and a symbol of hope to all throughout this world who love freedom. We want to assure them that my colleagues and I intend to continue unabated our fight for human justice behind the Iron Curtain.

Mr. STOKES. Mr. Speaker, it is indeed a great honor to participate in this special order in honor of Anatoly and Avital Shcharansky in recognition of their past, present, and continuing work on behalf of human rights around the world. While I join with my colleagues in the U.S. Congress in celebrating the triumph of the Shcharanskys over the oppressive regime of the Soviet Union in their denial of basic human rights to Soviet Jews, I cannot help but think of the thousands of refuseniks who remain captive in the Soviet Union. Not only are many Soviet Jews denied the right to emigate to Israel or any other free nation, they are also harassed and persecuted in their own homes.

Mr. Speaker, I gained firsthand knowledge of the suffering of Soviet Jews during my trip, taken with several congressional colleagues, to the Soviet Union in July 1985. During this trip, taken under the auspices of the National Conference on Soviet Jewry, we had the opportunity to meet with many refuseniks and their families. Many of the persons with whom we met have names that have become legends in the human rights struggle in which the dissidents and refuseniks are involved.

In some cases, we met with wives of those who are imprisoned in the Soviet Union. We learned of arrests under bizarre and unusual circumstances, in the middle of the night, of imprisonment for charges such as hooliganism and parasitism, of planted evidence, of 12-hour searches of homes, and of a prisoner, now 90-percent blind as a result of being stabbed in his eyes in his jail cell, which authorities say was self-inflicted.

We learned of people who have now been refused the right of emigration and repatriation for as long as 12, 14, even 16 years. They are painfully aware that the number of Jews being permitted to emigrate has been steadily declining since 1982.

Those with whom we visited are part of approximately 350,000 Soviet Jews who desire to emigrate. Ten thousand of these are refuseniks, those who have applied and who have been refused. Many of the refuseniks with whom we met were learned individuals with extensive degrees and educational backgrounds who, after applying for exit visas now find themselves either doing menial work or altogether unemployed.

Mr. Speaker, while we celebrate the freedom of Anatoly Shcharansky today, it is of the utmost importance that we do not forget those refuseniks who remain trapped in the Soviet Union. We must continue to apply pressure to President Gorbachev and other Soviet authorities to allow these people the fundamental right of emigration. We must publicize the plight of the refuseniks and other Soviet Jews who suffer oppression, live in fear, and are the victims of anti-Semitism every day of their lives.

Mr. Speaker, despite the great suffering he endured, Anatoly Shcharansky retained his dignity, compassion, and commitment to human rights. He and the Soviet Jews who remain in the Soviet Union deserve nothing less than the support, good will, and dedicated effort of people of all nationalities throughout the world in their struggle for freedom and human dignity. We, the Members of the U.S. Congress have the facilities to provide such support. Our collective conscience should compel us to dedicate and commit ourselves to giving that support.

Mr. RUSSO. Mr. Speaker, I am honored to pay tribute to the work of Natan (Anatoly) Shcharansky. The cause of human rights throughout the world has been advanced by this brave man and his courageous wife Avital. As an individual prisoner of conscience, Natan has suffered personally to advance the freedom of many. To endure confinement and continue his unyielding struggle, including a 109-day hunger strike, is an incredible act of courage.

It was my privilege to meet with Mr. Shcharansky's mother and brother when I visited the Soviet Union last spring. This trip, and this visit in particular, were a personal reaffirmation to me of the plight of Soviet Jews and of the lengths to which totalitarian regimes go to silence dissension or trample the free human spirit. It is an appalling truth to face. My admiration is limitless for those who, with unwavering commitment and great personal sacrifice and risk, continue to fight. It is a humbling experience for those of us so easily blessed with freedom.

There are people, such as those in the Soviet Government, who cannot fathom the importance of human rights and freedom. They are quite peripheral to their philosophy and their politics and so it is with only grudging acknowledgement of the importance we assign to them that they will come to even discuss human rights. They still lack the perception that human rights are the core of our belief system, and are fundamental to freedom-loving people throughout the world. It becomes, then, the work of relentless advocates to keep pressing, petitioning, speaking out, lest the Soviets think the world is no longer concerned. Absent the concern and the eyes of the world upon them, the Soviets have no compunction when it comes to treatment of dissidents.

Natan Shcharansky drew the world's attention into the dark recesses of repression. His struggle came to symbolize for all to see what punishment can come to a man of dignity and compassion with a commitment to freedom. Because this voice would not be silenced, because over and over we knew what was happening, the Soviets could not hope that their Iron Curtain would hide the view, that the outside world would forget.

We learned what goes on behind that curtain because of the indomitable human spirit of Natan Shcharansky and his family. They would not be still. We all, each and every citizen of the world, owe a debt of gratitude to Natan Shcharansky and to the other brave citizens of this world who refuse to submit to injustice and who, in acting in accord with their beliefs, serve the cause of freedom for all.

Mr. OWENS. Mr. Speaker, it is a pleasure to be able to welcome Anatoly Shcharansky to the United States. Both he and his wife are to be commended for their long and difficult struggle. Each bore a different burden. Mr. Shcharansky was faced with the rigors of imprisonment in the Soviet Union while Mrs. Shcharansky took on the task of keeping his plight before the world.

The trials of the Shcharanskys began because of Anatoly Shcharansky's role as a founding member of the Moscow Helsinki Monitoring Group. Marked as a dissenter to the policies and actions of his government, he was imprisoned for 9 years. Although no government is included to appreciate those who dissent, we can only be grateful that we live in a nation which has come to accept dissent even if it fails to appreciate it at the time that it is occurring.

I fully support the authorization of the presentation of gold medals to the Shcharanskys. However, we must all recognize that any material object cannot convey our complete sense of appreciation to those who have suffered for the cause of human rights for all people. The Shcharanskys' ordeal was not undergone to gain any personal benefit but to support all those who stand in vulnerable positions where they can be denied basic human rights by their government.

Perhaps the most remarkable aspect of Anatoly Shcharansky's imprisionment has been his ability to cope with it through his own courage, determination, and humor. Although one can endure an ordeal with grim determination, Mr. Shcharansky's ability to survive with wit and humor intact is a tribute to his inner strength and his commitment to the cause of human rights for all those who suffer under the burden of oppression.

Mr. LOWERY of California. Mr. Speaker, we stand in awe of Anatoly and Avital Shcharansky, for it is hard to understand 12 years of commitment. Commitment not only to human rights and the plight of Soviet jewry, but to each other. Who was the stronger in this trial, Anatoly enduring imprisonment and pain, or Avital in her guest without hope?

But their hope and endurance were rewarded. Yesterday Anatoly came to the halls of Congress as a free man. Free to change his name to the Hebrew, Natan. Free to speak his heart and to renew his commitment. For upon

his shoulders and upon ours, rests the responsibility for those remaining refuseniks.

When he arrived in Israel, February 11, Shcharansky said,

On this happiest of days of our lives, I am not going to forget those who I left in the camps, in the prisons, who are still in exile or who still continue their struggle for their right to emigrate, for their human rights.

In my district in San Diego there is a family who has waited nine years for the release of Naum Kogan and his family from the Soviet Union.

Naum's sister, Anessa Weintraub, their parents, her husband and two children were able to emigrate to the United States in 1976. Naum, his wife Zhanna and their 12-year-old twins Yevgeny and Elena, requested visas in 1977, but were denied.

Naum, 39, was a basketball star for Odessa University in the Ukraine. He went to work at the Academy of Sciences in Moscow doing research in microelectronics for satellites. His wife Zhanna was an engineer with the Institute of Communications.

Labeled refuseniks for applying for visas in 1977, both lost their jobs and have been surviving through Zhanna's sewing and small electronics jobs Naum has been able to do. But at the moment Naum is suffering from kidney disease and is very near kidney failure. He needs an operation that he cannot get in the Soviet Union.

Once again we wait. Family members grieve and worry and there appears to be little acknowledgement from the Soviets that Naum is suffering. But these are the same people who when asked about the meltdown at the Chernobyl plant told us, "everything is normal."

Sixty-seven of my colleagues have signed a letter to General Secretary Mikhail S. Gorbachev, asking permission for the Kogan's to emigrate.

Another San Diego family, the Wolfsons, have been waiting for 6 years for the Roytsteyn family to be allowed to emigrate from Russia. Eleanora Wolfson's 79-year-old mother, Elena, her brother, Gary and his wife Ludmila, have been seeking freedom to leave Leningrad since 1980.

Seventy-four of my colleagues signed a letter to Gorbachev on their behalf. And I have signed more than 50 letters in the past year for my colleagues who wrote on behalf of families across this Nation who endure the pain of separation. Sometimes we feel we are tilting at windmills, and it is for this reason that the release of Shcharansky is so important.

Let us take heart from the example of the Shcharansky's. That in deep despair we can find hope for families like the Kogan's. That faced with Soviet intransigence, we find people who continue their quest over many years. The work starts now in the conscience of all of us and the Shcharansky's have given us a model—for that we are very grateful.

Mr. ERDREICH. Mr. Speaker, today, we in the U.S. Congress took a few moments from our legislative agenda to honor a man in the Capitol Rotunda who is a living example that right can ultimately conquer wrong, that infinite strength of convictions and unflagging and enduring faith can make seemingly unattainable dreams a reality.

Anatoly Shcharansky represents the triumph of the human spirit in the face of immeasurable adversity. The story of Anatoly and his wife, Avital, is one that deserves to be told over and over again, not just to pay homage to two truly modern-day heroes who risked everything on behalf of human rights and the need to speak out for religious freedom, but also, to give hope and renewed faith to the thousands who continue to struggle and live under oppressive states that deny them life's basic freedom of religious pursuit.

After all, Anatoly and Avital sought no more from life than to exercise in the Soviet Union a cherished freedom that we here in this country exercise every day: the freedom to gather, recognize, and practice our religious beliefs. Because he dared to speak out against the tyrannies of the police state that denied this God-given right to him and thousands and thousands of other Soviet Jews, he was sentenced to a 13-year imprisonment designed to break not only his spirit, but also, the family that shared his dream.

But this undeserved punishment did not break his spirit, nor tear apart his family. In fact, it only served to strengthen his resolve, as well as that of his wife, mother and brother, to work with a strong alliance of nations that respects the rights of the individual to secure the freedom of the refuseniks in the Soviet Union who shared a dream unfulfilled.

Today's ceremony in the Capitol in honor of Anatoly Shcharansky is proof of the profound and powerful impact that world opinion can command. But while his is a victory in which we all can share, it is also one that continues to elude the grasp of thousands of other whose desire for freedom is just as great. There are today over 300,000 Soviet Jews who have expressed a desire to emigrate and who are unable to do so because of Soviet governmental refusal to adhere to international treaty obligations.

It is my hope that today's national recognition of this courageous man signals our renewed efforts to redouble our commitment to help those who ask only to exercise their basic human rights, to practice their religion, to emigrate and be reunited with their families. Perhaps in the not too distant future, we will gather again in the Rotunda of this great symbol of freedom, not to honor one or two people who endured and triumphed despite the Soviets' refusal to acknowledge basic human freedoms, but to celebrate the fulfillment of the dream of freedom for all refuseniks through the establishment of a true East-West accord that recognizes the inextricable link between international peace and human dignity.

Mr. FISH. I am honored to contribute these words today in recognition of Natan (Anatoly) Shcharansky and the work he has done and continues to do on behalf of Soviet Jews and on behalf of human rights worldwide. This is his first trip out of Israel since he arrived there after serving 8 years in prison, and it is thus altogether fitting that we take this opportunity to recognize Anatoly and his devoted spouse Avital, and to reaffirm our own dedication to the plight of Soviet Jews.

Mr. Shcharansky is a leader in the Soviet Jewish emigration movement, and is a founding member of the Moscow Helsinki Monitoring Group. As such he became a internationally acknowledged symbol for human rights and of the need to speak out for religious freedom and freedom of emigration.

I first met Shcharansky in 1975 in the Soviet Union. I had traveled to Russia with several colleagues of a special study subcommittee of the House Committee on the Judiciary to review Soviet emigration policy and procedures, and to personally convey to Soviet authorities the deep concern of the U.S. Congress and the American people regarding obstacles to Jewish emigration. On May 27 we met at the house of Professor Alexander Lerner with 10 Soviet Jews whose applications for exit had been refused. Anatoly organized the visit and interpreted for us. On May 28 we had the great good fortune to spend time with Andrei Sakharov and his wife Yelena at their home. Again Anatoly arranged the visit and acted as interpreter. We also visited refuseniks in Leningrad, and met with Soviet emigration officials and our counterparts in the Supreme Soviet in each of the cities. On each occasion we condemned their policies. Anatoly spoke freely of his commitment to freedom of religion and human rights. A subsequent report entitled "Emigration of Soviet Jews" was issued by the special study subcommittee. Ironically, our visit was on the eve of deliberations of the final act of Helsinki, during the period of heightened détente. Thus the Soviets did not interfere with our activities. Although our meetings were supposedly clandestine, Anatoly was our constant companion. He publicly bade us farewell at our hotel and kissed us goodby. He paid a price for his visible association with Members of Congress.

As the world knows well, Anatoly Shcharansky was soon to be sentenced to 13 years in prison for the alleged crime of requesting that his human rights and those of others be observed. Among his final words on conclusion of the trial were the following:

During the preliminary interrogations, those conducting the investigation warned me that in view of the position taken by me during the investigation, the one which I have maintained during the course of this trial, I will be likely to be given the death sentence or, as a minimum, 15 years of confinement. I was told that if I agreed to collaborate with the KGB in order to destroy the Jewish emigration movement, than I will be given a short sentence, quick release and even the possibility of joining my wife * * * I am happy that I have lived honestly, in peace with my conscience, and have never betrayed my soul, even when I was threatended with death. I am happy that I have helped people. I am proud to have known and to have worked with such honorable, brave people as Sakharov, Orlov, Ginsburg, they who are continuing the finest traditions of the Russian intellectuals. I am happy that I can be a witness to the redemption of the Jews of the U.S.S.R. These absurd accusations against me and against the whole Jewish emigration movement will not hinder the liberation of my people.

These are moving and heroic words from one man facing callous totalitarian oppression and on the brink of prison.

Throughout his 9 years of suffering in Soviet prison, Shcharansky retained his dignity, compassion, and commitment to human rights. He is truly a modern hero.

So too is Avital Shcharansky, whose relentless advocacy on behalf of her husband and other Soviet Jews, including countless meetings with Western leaders, demonstrations and petitions, symbolizes the indomitable will of a loving and devoted spouse. I understand she is not accompanying Anatoly during his tour of the United States, due to her first pregnancy. Their creation of new life symbolizes the undying determination of a people sorely oppressed.

It warmed my heart and rejuvenated my faith in the human spirit to greet Anatoly Shcharansky today, 11 years after I last saw him and 8 years after his imprisonment. Shcharansky's release demonstrates that public and private initiatives can achieve results. In honoring Anatoly Shcharansky, however, we recognize not only one man, but all those who still suffer in the Soviet Union. Our support has been strong, and it must remain strong. Despite the fact that at least 400,000 other Soviet Jews seek to emigrate to Israel, the Soviet Government has severely restricted Jewish emigration. Oppression of Soviet Jewish activists, arrests, searches, and threats continue unabated.

The success of the Soviet Jewry movement has always depended on four interdependent factors: First, the courage and determination of Soviet Jews themselves to assert their identity and to seek the right to leave; second, the existence of the State of Israel as the home of the Jewish people and the support Israel has given to the advocacy effort; third the strength of Western public opinion, generated by people of conscience who have spoken out, demonstrated, visited Jews in the U.S.S.R. and prayed for their redemption; and fourth, the role of Western governments, particularly the United States, in pressing the Soviet Jewry issue, both publicly and privately.

Anatoly and Avital Shcharansky epitomize the courage and determination of Soviet Jews. Our support of Israel remains strong. Western public opinion continues to apply pressure on the Soviet Government. Let us reaffirm today our Government's commitment to the plight of Soviet Jews, so that we may have the opportunity to recognize and honor many more champions of human rights from the Soviet Union, as we so honor Anatoly and Avital Shcharansky today.

Mr. SEIBERLING. Mr. Speaker, I am pleased to join in this special order in tribute to the heroic efforts on behalf of human rights by Anatoly and Avital Shcharansky.

For 9 long years, Anatoly Shcharansky was a prisoner in Soviet labor camps, for the crime of attempting to emigrate from the Soviet Union. He suffered terribly from physiological and psychological abuse during that imprisonment. Yet he refused to give up hope that he would one day be free and reunited with his wife, Avital. For that tremendous strength of will and for the courage they both displayed in the face of terrible odds, Anatoly and Avital Shcharansky became living symbols of the human rights movement throughout the world, and particularly to Soviet Jews who sought, and who still seek, to emigrate to Israel.

The free world rejoiced last February when the Soviet government at last agreed to release Mr. Shcharansky. We in Congress were deeply moved to see him emerge from his years in captivity with his courage and will intact, and to join at last his beloved Avital, whose own courage and dedication are indisputable.

Today we pause to honor Avital and Anatoly—or Natan—Shcharansky, as he has now chosen to be called. Yet I think they would approve if we also used this opportunity to rededicate ourselves to the pursuit of human rights for all people, all over the world.

Mr. PORTER. Mr. Speaker, I am proud to join my colleagues in this special order today, as we welcome Anatoly Shcharansky to the United States. His arrival is a historic event and it gives us the opportunity to unite our voices with Shcharansky, who long ago became a cornerstone in the human rights movement.

The reunion of Anatoly and Avital Shcharansky in February was a victory for the human spirit and a triumph for freedom. His walk to freedom over the Glienicke Bridge was clearly the high point in a year that has been marked by both joys and frustrations for Soviet Jews wishing to emigrate.

The November summit between President Reagan and Soviet leader Gorbachev and the release of other prominent refuseniks such as Yakov Gorodetsky and Dr. Mark Nashpitz, raised our hopes that things might get better. But, since Shcharansky's release, whatever faint hopes may have faded.

The signs that the Soviets are sending to us are not encouraging. In March, only 53 Jews were allowed to emigrate, which is the smallest number since last August. Last year only 1,140 Soviet Jews emigrated compared to the peak year of 1979 when over 51,000 Jews left the Soviet Union. Brutal arrests continue for no other reason that these Russian citizens have expressed a desire to emigrate.

Anatoly Shcharansky, upon his release announced he will continue to fight for the hundreds of Soviet Jews who remain in the Soviet Union waiting for their freedom. Shcharansky and his wife, Avital, are modern day heroes and represent the cause to freedom and human rights.

We should be inspired by the battle that Avital Shcharansky waged on behalf of her husband. I witnessed Avital's strength and dedication to the cause of human rights when I stood with her on the steps of the Capitol on a cold, January day last year to participate in the congressional prayer and fast vigil. I was not only impressed with her courage, but was touched and inspired by her sincerity.

Anatoly and Avital Shcharansky have taught us a lesson that individual commitment and undying efforts can lead to the freedom of one man. We must follow the leadership of the Shcharanskys and join with them as they fight for the freedom of thousands.

Now that Anatoly is free, we can focus on Benjamin Bogolomy, who has been waiting to emigrate for 20 years, for Ida Nudel, who has been waiting for 15 years, for Josef Begun, who is now serving his third prison sentence for teaching Hebrew, and for Zachar Zunshine who was imprisoned for simply expressing his desire to emigrate to Israel.

Mr. Speaker, Anatoly and Avital Shcharansky's courage and dedication to the cause of human rights is without equal. Their strength and determination should be a lesson to all of us who must continue to work on behalf of Soviet Jewry. Being able to see Anatoly and Avital Shcharansky together after their years of separation is truly a victory for freedom.

Mr. Shcharansky, we welcome you to the United States and, like you, we in the Congress will not forget the hundreds of thousands of people still yearning to be free. We join you in one strong united voice speaking for those who are unable to speak for themselves.

Our voice will not be silenced until all who want to emigrate are freed and all who want to practice their religion are allowed to worship freely.

Mr. DORNAN of California. Mr. Speaker, I rise to express my support for a hero among us today, an individual whose case transcends the partisan politics of this body precisely because he is the embodiment of an internationally acknowledged symbol for human rights and religious freedom—Mr. Natan (Anatoly) Shcharansky.

Today in the Capitol rotunda, Mr. Shcharansky pointed out that this country, the beacon of freedom throughout the world, cannot settle for "cosmetic compromises" with the Soviet Union. More specifically, Mr. Shcharansky was saying that we must hold the Soviets to the very letter of the Helsinki agreements which the U.S.S.R. so brazenly ignores. Mr. Speaker, I would like to underscore the importance of holding the Soviet Union accountable to the guarantee of religious freedoms. I ask my colleagues, how can we continue to enter into and abide by international treaties of any kind when the Soviets have no intention or feel no moral obligation to fulfill. Treaties like the Helsinki accords are meaningless without compliance or verification.

Natan has made it very clear that the real struggle to secure freedom for Soviet Jews is just beginning. It is now obvious that the collective outrage of the international community did exert considerable pressure on the leaders of the U.S.S.R., and must be used today to win the release of the majority who remain.

In preparation for his export to the West, Mr. Shcharansky's Soviet captors increased his caloric intake precisely because they were concerned about their methods of physical, mental and emotional deprivation would trigger a backlash of world opinion. These actions show us that to a certain extent the effort of freedom loving peoples throughout the world can have an impact on the Soviets systematic and insidious persecution syndrome. Although it often appears that the efforts to secure the release of only one man are unimportant, the release of Natan Shcharansky has shown us otherwise. As Anthony Lewis wrote in the New York Times in June 1983: "Moving the Soviet Leadership on an individual human rights case often seems a hopeless business. But if you meet Avital Shcharansky * * * you will know there is no alternative to trying."

Mr. Speaker, we must bring the weight of the international community to bear on the Soviet Union to cease this senseless persecution and abuse of basic human rights. Natan Shcharansky was released only as a result of the effective, sustained and coordinated pres-

sure from all angles. These undying efforts are the sustenance of the refusnik movement. International solidarity feeds the courage and determination of the Soviet Jews themselves to fearlessly assert their identity and to seek the right to leave the U.S.S.R.

The question remains though whether or not the release of Natan Shcharansky represents a fundamental policy shift regarding the Soviet attitude toward Jewish emigration. I maintain Mr. Speaker, that the Soviet Union long ago recognized the value of symbolic gestures in the human rights sphere. The release of Mr. Shcharansky is clearly another cosmetic attempt by the Communists to improve its international image in the West. I say this because of the fact that the situation remains largely unchanged for tens of thousands of Jews in the Soviet Union.

In 1985 less than 100 Jews per month were issued exit visas, representing a drop of more than 95 percent from a high in 1979.

Paralleling this decline has been a sharp increase in officially sanctioned anti-Semitic campaigns by organizations such the Anti-Zionist Committee of Soviet Citizens.

Other forms of the discrimination continue such as loss of jobs, restrictions on Jewish university enrollment, and blatant arrests of Jewish activists. This cannot be allowed to continue.

Natan's memorable arrival in Israel is a tribute ot the unbreakable spirit of a man whose commitment to his faith and heritage is unshakable. Natan Shcharansky is sheds the light of truth on a society steeped in the darkness of deception. God Bless you Natan.

Mr. LEVINE of California. Mr. Speaker, the release this past February of Anatoly Shcharansky after a decade in the Soviet gulag represented one of those rare moments when the hearts of men and women everywhere sang in unison.

Both Jew and non-Jew alike were moved by the liberation of a man whose indomitable spirit could not be crushed by a regime which used all forms of physical and psychological abuse in order to sap his will and shatter his dream of one day emigrating to Israel. For the last 10 years, all those concerned with the plight of Soviet Jewry and with human rights have marveled at the ability of this remarkable individual to withstand the harassment, exile, and torture of the Soviet system with a sense of dignity and a sense of humor. Many of us have often wondered how he was able to do this.

Yesterday, Mr. Speaker, Members of Congress were able to ask Anatoly Shcharansky this question face to face. Frankly, it was one of the most memorable experiences of my life. To be able to sit with Anatoly and talk about life in the Soviet camps and how he was able to survive with his spirit unbroken, to talk with him about his fellow refuseniks, to talk with him about Soviet treatment of dissidents, and about the most effective way for concerned citizens everywhere to continue the fight for Soviet Jewry, was quite simply unforgettable. I never thought I would have this opportunity.

Here was the man who symbolized the plight of Soviet Jewry and was himself its symbol and conscience. Here was the man who helped found the Helsinki Watch Monitoring Group in Moscow and was an eloquent spokesman not only for the religious and cultural rights of Soviet Jews but for all those in the Soviet Union whose fundamental human rights were being denied. Here was the man who dared defy the Soviet authorities merely by speaking out for these oppressed peoples and was imprisoned on trumped-up espionage charges as a result. Here was the man who waged hunger strikes as a form of protest against his Soviet captors when his life literally hung in the balance, and when many of us did not know if he was alive or dead.

Here was the man whose wife, Avital, fought a courageous and tenacious fight for his freedom for 9 long years so that he would not be forgotten by those in the West, and so that the Soviets would know that we would not forget him. Clearly, without Avital's efforts, the prospects for Anatoly's release and ultimately for his survival would have been significantly reduced. And here was the man who quite literally galvanized a movement in this country and in this Congress on behalf of Soviet Jewry so that his release is seen as a milestone, certainly, but is also seen as the continuation, and not the end, of the struggle to have Slepak, Nudel, Edelshtein, Meiman, and so many others released.

Mr. Speaker, the joint leadership of the House and Senate yesterday welcomed Anatoly Shcharansky in a ceremony in the great rotunda of the U.S. Capitol. There could have been no more fitting place to honor him. The Capitol is America's citadel of freedom and democracy; Anatoly Shcharansky has for a decade demonstrated his commitment to these principles in conditions under which few could endure.

Today Congress is presenting him and his wife, Avital, with Congressional Gold Medals of Honor. The purpose of these medals is to recognize outstanding qualities and achievements. Mr. Speaker, there is no doubt that Anatoly and Avital are especially deserving of these medals. The Shcharanskys have strengthened and deepened the commitment to human rights and human dignity around the world, and have demonstrated a cougage in those convictions that are an inspiration to us all. I am proud to serve in a body which recognizes their tremendous achievements, and their contributions to a cause so dear to the heart of all Americans.

Finally, Mr. Speaker, I just want to cite a remark Anatoly made yesterday at a meeting of the House Foreign Affairs Committee. When asked whether Mr. Gorbachev was a "new" kind of Soviet leader who would allow increased Jewish emigration, Anatoly replied, "I was told that I had to put a tie on to meet leaders of Congress, that I needed to change my image. But just because I changed my image does not mean that I changed my beliefs." Not only is that response indicative of his remarkable sense of humor, but it tells us that we should not expect significant improvements in the plight of the 400,000 Soviet Jews still seeking to emigrate. That is why, as Anatoly reminded us, we must keep the pressure on, both public and private pressure. If Anatoly Shcharansky can stand up to the Soviet system for a decade under the threat of death in order to sustain his sense of freedom and Jewish identity, we certainly can muster the courage to continue the fight in every fashion possible. It is our duty, and it is our obligation.

Mr. DOWNEY of New York. Mr. Speaker, I rise today with my colleagues to salute Anatoly and Avital Shcharansky, two remarkable human beings whose struggle for freedom represents the basic tenets on which this country was founded.

For 13 years, we have stood in the well of the House of Representatives telling and retelling the story of Anatoly Shcharansky that was told to us from information that his loving wife and mother gleaned from Russia. We protested his imprisonment and prayed that efforts by the Soviets to break his resolve to speak out for Russian Jews seeking to leave Russia would not work, admired his courage and fortitude to maintain hunger strikes and cried when we learned of his release earlier this year.

But as Anatoly and Avital can tell us much more poignantly, the joy we experience today is marred by the hundreds of thousands of Soviet Jews whose desire to emigrate and follow the beliefs of their forefathers is blocked by the Russian Government. We are all well aware that the emigration figures for Soviet Jews are at a dismal low and that other heroes such as Andrei Sakharov, Ida Nudel, and Josef Begun are still caught in the Soviet web. There is much that needs to be done to impress upon the Russians that we will not forget those Jews who want to emigrate. We must not let them think that we have forgotten them as the Soviet Government would have them believe. Anatoly Shcharansky's release and presence in the West has strengthened our resolve and efforts and will be cause for the Soviet regime to tremble.

Mr. BARNES. Mr. Speaker, there are few moments of such historic import as this time in which we welcome (Natan) Anatoly Shcharansky.

And it is a rare occasion when we can honor, in person, such a dedicated and courageous individual, a man who understands so well—better than most of us—the value of liberty and the great costs that come when one must fight, and be willing to give years of one's life, to gain it.

As a leader in the Soviet Jewish emigration movement and a founding member of the Moscow Helsinki monitoring group, Natan Shcharansky became, together with still-exiled Nobel Laureate Andrei Sakharov and imprisoned South African antiapartheid leader Nelson Mandela, among the best-known prisoners of conscience in the world. And as a tireless advocate for his freedom, his wife Avital has come to symbolize the kind of persistence that leads to success.

Shcharansky never let his Soviet oppressors win. When they arrested him and made him stand trial on false charges of espionage, Shcharansky never let go of his cause or stopped his fight. When he was denied the right to an attorney of his choice, he insisted on defending himself. When, while in prison, they denied him the right to see his relatives, he went on a 110-day hunger strike to protest these violations by the prison administration. When they did their best to break him, to humiliate him, he never gave up.

On February 11, 1986, millions of us watched television coverage of Anatoly Shcharansky's walk to freedom. In that almost unbelievable moment, a dream came true.

But Shcharansky reminds us that his personal victory is only one against 400,000 who are still struggling. He calls on the free world to intensify its pressure on the Soviet Union to abide by the terms of the Helsinki agreement.

About 400,000 Soviet Jews still seek to emigrate to the Soviet Union. The over 2 million Jews living in the Soviet Union continue to face, as Martin Luther King, Jr. once said, "a kind of spiritual and cultural genocide". Hebrew teachers and cultural activists continue to be the targets of Soviet Government harassment and brutality.

I am very grateful that Anatoly Shcharansky continues his quest for human rights on this side of the Iron Curtain. All of us who have spent many years working for the cause of Soviet Jewry look to his leadership and his fine example to help us move to future successes for Soviet Jewry.

Anatoly Shcharansky has taught us a lesson about perserverance, about the power of faith, and the strength of commitment. He has shown us the extraordinary capacity of the human spirit to survive under the most oppressive conditions.

During his trial, Anatoly Shcharansky turned his back on the judges in his trial, and faced his brother Leonid. He delivered a moving and courageous statement. He said, in part:

I understand that to defend oneself in a semiclosed trial such as this is a hopeless case from the very beginning. * * * Five years ago, I submitted my application for exit to Israel. Now I'm further than ever from my dream. It would seem to be cause for regret. But it is absolutely otherwise. I am happy. I am happy that I lived honestly, in peace with my conscience. I never compromised my soul, even under the threat of death.

It is a great day in America when we can be honored by the visit of a man of such great moral courage. I join every American in welcoming Anatoly Shcharansky to the United States. And I join all freedom-loving people of the world in celebrating his newfound liberty.

Mr. GEPHARDT. Mr. Speaker, Mr. Shcharansky's ordeals—the official harassment, his 9 years of incarceration, the 3½ month hunger strike, and the solitary confinement—would have broken the spirit of many. Yet he and his wife, Avital, persevered. And earlier this year he won his freedom.

It is a great pleasure to join my colleagues in welcoming Anatoly and Avital Shcharansky to Washington and in recognizing their dedication to the request for freedom.

Their story gives hope to all of us. And it should give us pride as well because his struggle is a reminder of the value of our freedoms.

In welcoming Mr. Shcharansky, we remember the 2 million Soviet Jews whose religion is under constant assault by the state, and who are liable to job loss and abuse if they ask for permission to emigrate. We remember the 400,000 who have already asked to leave. We remember the 14,000 refuseniks whose lives are controlled by the state and who live as internal refugees. We remain concerned by the incarceration and abuse that the refuseniks must endure.

With permitted emigration down to 1 or 2 percent of the levels that prevailed just 7 years ago, these remain sobering numbers. Yet if we can rededicate ourselves to their freedom, we may collectively overcome the odds. Mr. Shcharansky has already shown us it can be done.

Mr. KOLBE. Mr. Speaker, it is an honor to have the opportunity today to welcome Natan Shcharansky to the United States. The strength that Natan and Avital showed through their years of separation and suffering is certainly inspiring to us all. So, I feel privileged to be able to share some of my thoughts about the Shcharanskys, their ability to endure and overcome a virtually hopeless situation, and their willingness to continue the struggle for the thousands of others who remain under harsh, Soviet rule.

I would first like to take a moment to speak about freedom because this is the vision of every Soviet refusenik. The freedom to be able to practice his/her religion openly, without fear of persecution.

Freedom is a word that we use often in the United States and we as a people know that we have more liberty than any other nation on Earth. We are the heirs of more than two centuries of democracy and general prosperity, and we are the product of at least two decades of real commitment to equality of all races and creeds.

We have the privilege of being able to practice religion, to express our opinions publicly, to select our leaders through a free election process. We can begin with a dream and pursue that dream freely, from integration of our public schools to the development of a specific technology.

Yet living in a free society does not automatically make us experts on freedom. I wonder if we don't sometimes abuse this term. Freedom is a good marketing term—we see it as ambiguous enough and positive enough to describe just about everything. For example, according to advertisements, Americans can now sleep comfortably at night knowing we have the freedom to choose between three, maybe four, different major brands of cola. Also, our media exercises its sometimes unique version of freedom of the press, which may not get us the minute-by-minute details on the liberation of Grenada, but at least we can have words of wisdom transmitted live from a terrorist while our President joins allies in condemning state terrorism. Here in Washington, we can join the ranks in freedom marches, express our views at freedom rallies, and socialize at freedom galas.

I don't use these examples to denigrate freedom as we know it in the United States. I would only suggest that today we should ask ourselves if we appreciate the liberties and rights that we have, and if we can really understand what the brave Shcharanskys have endured. Can we imagine, for example, spontaneous incarceration, hours of relentless interrogation, prison labor, and long periods of solitary confinement? Can we visualize entering our homes and finding many of our possessions destroyed and/or confiscated by our benevolent government? Could we endure persecution of our families, having them suffer simply because we feel we have been inspired by a higher authority? And could we, after finally being liberated from persecution and solitude, could we once again pick up the gauntlet and vow that others like us will join us in freedom?

These are questions which we may feel compelled to answer in the affirmative. And perhaps some of us, such as former prisoners of war, can do so in good conscience.

Today, as we greet Natan and Avital Shcharansky, we should, if for a brief moment, make a genuine effort to assume their life struggles, to reflect on their hardships, and to rejoice in their victories so far.

Mr. Speaker, as a Member of this body I extend my warmest welcome to Natan and Avital Shcharansky. I express my admiration for their commitment to freedom and my gratitude for their willingness to join world leaders struggling for the freedom to practice religion and the freedom to express ideas openly. I also thank them for reminding us of our freedoms, for inspiring us at least to be grateful for such a rare and valuable gift, if not to work to see that our country and our country's allies are always free.

Mrs. BOXER. Mr. Speaker, I thank the Congressional Human Rights Caucus for this important and timely special order.

I cannot overstate the joy we continue to feel now that Anatoly Shcharansky is free to live with his wife in his chosen land of Israel. He is a most remarkable person.

Unfortunately, not all of those in the Soviet Union who are in jail, or exile, or simply not allowed to emigrate, are as strong as Mr. Shcharansky. We will continue to focus all of our efforts to see that Andrei Sakharov, Yuri Orlov, Vladimir Lifschitz and all of those who want to leave, will be allowed to leave. We will not rest or be silent on this issue.

Our efforts are made stronger by the knowledge that Anatoly Shcharansky is going to be there fighting alongside of us. Once again, I welcome Mr. Shcharansky and thank him for all he has done for the cause of human rights in the world. He is proof once again that some causes are indeed worth fighting for.

Mr. HERTEL of Michigan. Mr. Speaker, I rise to join with my colleagues in paying tribute to Anatoly Shcharansky.

This individual has sacrificed so much of himself to advance human rights throughout the world.

I am honored to have had the privilege of hearing Mr. Shcharansky address Members of Congress today. He enlightened us today by sharing his compassion and understanding for those throughout the world who are so flagrantly deprived of religious freedom.

Mr. Shcharansky has displayed through his suffering how the Soviet Union continually deprives honorable citizens of the freedom to express their religious beliefs. Moreover, it has been shown through Mr. Shcharansky's courage and dignity that even the Soviet Union must address the issue of religious persecution.

It has been a great privilege to associate myself with the comments of my colleagues and I am certain we are all better prepared to address the issues of religious freedom and

the importance of honoring human rights, now that we have been enlightened by a tremendous human being, Anatoly Shcharansky.

Mr. BIAGGI. Mr. Speaker, I am extremely proud to join my colleagues today in welcoming Anatoly Shcharansky to the United States. His contribution to the Soviet Jewry cause, and the human rights movement worldwide is immeasurable and like so many of my colleagues, I am deeply moved by his presence here today.

The name of Anatoly Shcharansky has been spoken on this House floor during the past 9 years perhaps more than any other. His commitment to human rights is our commitment to human rights; his suffering was our suffering; and, now, his happiness is our happiness. I welcome Anatoly Shcharansky here today with open arms and salute him for his absolute courage, convictions, and compassion.

Anatoly Shcharansky was imprisoned 9 years ago for founding a group that monitored his countries adherence to the human rights issues of the Helsinki accords. His attempt to monitor and consequently ensure human rights for all citizens of the Soviet Union cost him his own freedom, and a 9-year separation from his new wife, Avital. Mr. Shcharansky's release was a great moment that symbolizes for all of us who have followed and supported him throughout the years, the idea of human rights in the face of suppression.

But even as we rejoice for Anatoly Shcharansky we cannot forget the 400,000 Jews who have been refused exit visas by the Soviet authorities. For those Jews who took the risk of requesting an exit visa, their only hope is that we here in the United States do not forget them, for if we do, they are lost forever.

Within the Soviet Union Jews are not allowed to publish Hebrew books or Bibles. Nor are they allowed to study, teach, or practice anything related to their culture, or religion. At the same time, the number of emigration visas permitted each year has declined from a high of 51,320 in 1979 to 896 in 1984. Last year there were 1,139 Jews permitted to emigrate and this year it looks even bleaker. All this has occurred in the face of the Soviet Union's agreement under the Helsinki accords to respect each individuals rights of religious and cultural beliefs.

We must not allow Anatoly's freedom to placate us into a false sense of optimism with regard to the Soviet Union's atrocious human rights policy. Mr. Shcharansky, himself, even after giving up 9 years of his own freedon, is committed to aiding those he left behind.

As he said on the day of his freedom:

I am not going to forget those who I left in the camps, in the prisons, who are still in exile or who still continue their struggle for their right to emigrate for their human rights.

We, too, must continue to push for the freedom of the Slepaks, Andrei Sakharov, Mr. Lifshitz, and all the Jews who wish to emigrate. We cannot allow one small but sweet victory to cause us to lose site of the larger issue, that we are forever committed to seeing that the Jewish people and all peoples are permitted to act on their beliefs and follow their conscience as they best see fit.

Mr. Shcharansky went full circle yesterday when he met with Yelena Bonner, the wife of Andrei Sakharov, a former Nobel Prize winner and leading human rights activist. They were the cofounders of the group to monitor the Soviet Union's performance in regard to the Helsinki accords, and what led to Anatoly's arrest. Yesterday, they declared their solidarity and continued support for their brethren they left behind.

As the two great dissidents reaffirmed their ongoing commitment to the Soviet Jews after such great costs to themselves, so should we reaffirm our continued support for commitment to the Jews of the Soviet Union.

The Soviet Union has little regard for even the most basic of human rights, and it is only through public and private pressure that they are persuaded to adhere to the values that are fundamental to all Americans. We must be certain to keep the Soviet Jewry issue at the forefront of United States-Soviet policy decisionmaking, and must raise the issue at any forum that presents itself, especially at any future summit meetings between United States and Soviet leaders.

If ever there was a reason to press with renewed vigor for the improved plight of Soviet Jews, it is Anatoly Shcharansky's struggle for freedom. He has not forgotten his fellow Soviet Jews, and we certainly must not forget.

Mr. SMITH of Florida. Mr. Speaker, today is a monumentous occasion filled with joy and happiness for all freedom-loving people. Members of Congress welcome Anatoly Shcharansky to the United States as a free man. A little over a year ago, many of my colleagues gathered on the House steps to show our solidarity with Avital Shcharansky and the Soviet Jewish emigration movement as we marked the 8th anniversary of Anatoly Shcharansky's arrest, trial, and imprisonment.

This year the gathering on the House steps will be very different. Our prayers, hopes, and dreams have been answered. After 9 years, we celebrate the release of Anatoly Shcharansky and applaud all the efforts on his behalf as evidence that our pursuit of human rights is not in vain. Shcharansky's freedom illustrates that only constant and consistent public pressure will force the Soviet Union to change its treatment of Soviet Jews.

Anatoly Shcharansky may have been the international symbol of human rights, but let us not forget the symbol of courage and strength, his wife Avital. She is responsible for making "Shcharansky" a household name all over the world. Avital is to be commended for her outstanding achievement—gaining freedom for a fellow human being. Her determination and her devotion exceeds all known bounds. Let us honor Anatoly and Avital Shcharansky in their struggle for freedom to maintain their Jewish identity and live in peace.

As we celebrate this day, let us not forget the thousands of others, such as my adopted refusenik Dr. Yuri Tarnopolsky, who remain in the Soviet Union commiting no crimes other than endlessly awaiting permission to emigrate to Israel. Let us vow to redouble our efforts on behalf of those who remain behind the Iron Curtain.

Mr. FLORIO. Mr. Speaker, I am pleased to be able to join my colleagues in welcoming to Washington, Anatoly (Natan) Shcharansky, a man who has spent the greater part of his life in struggling for freedom and for human rights. For 9 years, Natan Shcharansky withstood torture and degradation in Soviet prisons and labor camps because of his commitment to the fundamental human rights of freedom of speech, of religion, of political expression, and of movement. Today, Natan Shcharansky joins us as one of the fortunate few for he was able to leave the Soviet Union and join his wife, Avital in Israel.

In 1978, Natan was convicted of "treason" and "anti-Soviet agitation and propaganda." For 9 long years, Natan did not give up the struggle to gain freedom not only for himself and for his family but also for the thousands of Soviet Jews that live day to day in fear of persecution. Their human rights are ignored; their religious traditions are suppressed; their right to speak and to be heard is ridiculed by Soviet authorities. For these 9 long years, Natan Shcharansky became a symbol for the hundreds of thousands of Soviet Jews that have sought to leave the Soviet Union and pursue a life of freedom.

Natan's strong persistence through hunger strikes and protests and through the refusal to bend before his torturers and deny his rights to a free life was instrumental in ensuring that he could leave the Soviet Union and live in freedom. But the most important component in this success story is the fact the international community did not forget Natan's troubles and continued to call for his freedom. For years, I and my colleagues in Congress have held special orders, have cosigned letters, have sponsored resolutions and have focused attention on the plight of Natan Shcharansky and the thousands in similar situations. For years, Natan's wife, Avital has agitated for his release and has won the respect and admiration of government leaders for her dedication to this worthy cause. It is this continuation of concern that has resulted in Natan's freedom.

A lesson to be learned from the happy conclusion of the struggle of Avital and Natan Shcharansky is the fact that only through constant pressure and continuous attention can we ever be successful in ensuring that Soviet Jewry will be permitted its day of freedom and that the Soviet authorities will desist from withholding from the Soviet people the fundamental human rights that should not be suppressed by any government.

A tribute to Natan's dedication and concern is the fact that he continues to speak out against the glaring violations of human rights in the Soviet Union and continues to focus attention on the plight of the many thousands that are still trying to leave. I have adopted an elderly refusenik couple, Yosef and Lilya Kalman of Kursk, who have repeatedly requested the right to join their son in Israel where they can be cared for. Their pleas have fallen on deaf ears. We must continue to focus attention on the plight of Soviet Jewry and we have the example of Natan Shcharansky that this method can be successful in helping those in need.

As a member of the Congressional Coalition for Soviet Jews of the 99th Congress, I join my colleagues in congratulating Natan and Avital on their newly found freedom and in

commending them for their efforts in this area. They have truly demonstrated dedication, dignity and compassion and have set an example that should be mirrored by all.

Mr. LENT. Mr. Speaker, as long as there are countries like the Soviet Union, which participate in human rights violations, we will have heroes like Anatoly Shcharansky who persevere. Anatoly Shcharansky has become the undisputed ambassador of hope and freedom for millions around the world who are persecuted for their religious beliefs. His personal triumph transcends language barriers and national borders to become a worldwide human rights victory.

For almost 10 years, Shcharansky endured brutal torture through deprivation at the hands of the Soviet government. Separated from his wife and family, denied all contact to the outside world, he was subjected to months of solitary confinement, death threats, and near-starvation. All this because of his religious beliefs and his desire to be free.

Many people would have succumbed to such savage treatment. That Shcharansky persisted is remarkable. Perhaps that is why the title "modern day hero" so suits the man. For throughout all this, Shcharansky maintained his dignity, his determination, and his conviction that through his perseverance others might be saved.

President Kennedy once said that "if we all can persevere, if we can in every land and office look beyond our own shores and ambitions, then surely the age will dawn in which the strong are just and the weak secure and the peace preserved." Anatoly Shcharansky has brought us closer to that dream.

For Anatoly the long nightmare is finally over. But for others he knows it is still a reality. He offers encouragement to those left behind in the Soviet gulag: "They [the KGB] assured me every month that I would never leave that country. My release without making any concessions proves our struggle can really be successful despite all the pessimism we hear."

The man who comforted and sustained so many during his confinement brings a new message of hope through his freedom. We take time today to recognize his achievement and to welcome Anatoly Shcharansky, at long last, to the free world.

Thank you.

Mr. ERDREICH. Mr. Speaker, today, we in the U.S. Congress took a few moments from our legislative agenda to honor a man in the Capitol rotunda who is a living example that right can ultimately conquer wrong, that infinite strength of convictions and unflagging and enduring faith can make seemingly unattainable dreams a reality.

Anatoly Shcharansky represents the triumph of the human spirit in the face of immeasurable adversity. The story of Anatoly and his wife, Avital, is one that deserves to be told over and over again, not just to pay homage to two truly modern-day heroes who risked everything on behalf of human rights and the need to speak out for religious freedom, but also, to give hope and renewed faith to the thousands who continue to struggle and live under oppressive states that deny them life's basic freedom of religious pursuit.

After all, Anatoly and Avital sought no more from life than to exercise in the Soviet Union a cherished freedom that we here in this country exercise every day: the freedom to gather, recognize, and practice our religious beliefs. Because he dared to speak out against the tyrannies of the police state that denied this God-given right to him and thousands and thousands of other Soviet Jews, he was sentenced to a 13-year imprisonment designed to break not only his spirit, but also, the family that shared his dream.

But this undeserved punishment did not break his spirit, nor tear apart his family. In fact, it only served to strengthen his resolve, as well as that of his wife, mother, and brother, to work with a strong alliance of nations that respects the rights of the individual to secure the freedom of the refuseniks in the Soviet Union who shared a dream unfulfilled.

Today's ceremony in the Capitol in honor of Anatoly Shcharansky is proof of the profound and powerful impact that world opinion can command. But while his is a victory in which we all can share, it is also one that continues to elude the grasp of thousands of others whose desire for freedom is just as great. There are today over 300,000 Soviet Jews who have expressed a desire to emigrate and who are unable to do so because of Soviet governmental refusal to adhere to international treaty obligations.

It is my hope that today's national recognition of this courageous man signals our renewed efforts to redouble our commitment to help those who ask only to exercise their basic human rights, to practice their religion, to emigrate and be reunited with their families. Perhaps in the not too distant future, we will gather again in the rotunda of this great symbol of freedom, not to honor one or two people who endured and triumphed despite the Soviets' refusal to acknowledge basic human freedoms, but to celebrate the fulfillment of the dream of freedom for all refuseniks through the establishment of a true East-West accord that recognizes the inextricable link between international peace and human dignity.

Mr. BOLAND. Mr. Speaker, I am pleased to take part in this special order honoring Anatoly and Avital Shcharansky, and am delighted to join in welcoming them to the Capitol of the United States.

The triumph of Anatoly Shcharansky over the forces of repression is as genuine an example of courage and commitment to cherished values as the world is likely to witness. His was a victory for human rights in a state that chooses to devote a sizable part of its bureaucratic machinery to placing every possible roadblock in the path of the free exercise of those rights.

The Shcharansky's names have become synonymous with unwavering dedication to human rights. By enduring 8 long years of being harassed, interrogated, threatened, and separated, they have demonstrated the kind of strength and spirit of which heroes are made. Each day they were tested, each day they fought to be free and they have prevailed.

We all share in the joy of Mr. Shcharansky's release from prison. That joy is felt not only in these Halls, but in communities throughout the Nation. Last Friday was Shcharansky day in my hometown of Springfield, MA. The Springfield Jewish Federation organized a very meaningful ceremony of tribute and thanksgiving for the triumph of the Shcharansky's and I am sure that similar events have taken place in many other American cities and towns. However, at this time of celebration we must not loose sight of the fact that thousands of Jews continue to be denied the right to emigrate from a country which punishes them for their religious beliefs and belittles their values. This treatment by Soviet authorities makes a mockery of their supposed adherence to the principles of the Helsinki accords and the universal declaration of human rights. As Americans, we must continue to call attention to the treatment of Soviet refuseniks. For it is our vocal concern that provides them with the encouragement, and the confirmation of the justness of their cause, and which helps them to go on.

Mr. Speaker, the Shcharansky's have reminded the world of two great truths; that the yearning for basic human rights is universal, and that to keep silent in the face of repression is to guarantee its perpetuation. I hope that their presence in our citadel of liberty will cause us to redouble our national and individual efforts to extend the precious gift of freedom to all those who seek it.

Mr. DWYER of New Jersey. Mr. Speaker. I would like to join my colleagues today in recognizing former Soviet refusenik Natan Shcharansky. Mr. Shcharansky's quest for freedom has been an inspiration to feedom-loving people of all nations for the past 10 years. His release should be heralded as a wonderful accomplishment of all who have worked so hard to bring it about, particularly his wife Avital.

However, we must not forget over 14,000 other refuseniks and prisoners of conscience currently in the Soviet Union. Immigration of Soviet Jews has slowed to a mere trickle since 1980. Although Soviet leaders have sought to explain this decline by suggesting that few Jews now seek to leave, the Israeli Government has over 375,000 requests from Soviet Jews for vyzov (affadavits) as the first step in the emigration process.

As many as 14,000 refuseniks, that is people whose exit applications have been denied, currently live as internal refugees within the Soviet Union some for as many as 20 years, such as Beniamin Bogonolny who has the dubious distinction of being the world's longest standing refusenik. Many of these prisoners of conscience remain in Soviet labor camps and prisons where they are often subject to especially harsh treatment. Vladikmir Lifshits, a Leningrad refusenik, was arrested shortly after the November Geneva summit meeting for the crime of writing about the Soviet Jewish situation to people in the West. In early February, Lifshits was badly beaten by criminal inmates and suffered a brain concussion.

While the freeing of Natan Shcharansky is a great triumph, we must not forget the others who seek freedom. We must not let these violations of basic human rights go unnoticed. As long as even one refusenik remains in the Soviet Union, we must continue the same

drumbeat which helped in freeing Mr. Shcharansky.

Mr. LEACH of Iowa. Mr. Speaker, I am honored to join with my colleagues today in extending a warm welcome to Anatoly Shcharansky on the occasion of his visit to the United States and in celebrating his long-awaited release from Soviet imprisonment.

Anatoly Shcharansky's name is virtually a household word in every freedom-loving country in the world. During the long years of his harsh prison confinement, thousands of Americans, most of whom he will never meet, took a special interest in the case of this remarkable young computer programmer who, as a monitor of Soviet compliance with the Helsinki human rights accords, displayed enormous courage in confronting the awesome power of the Soviet state. For that, he was eventually charged with treason and sentenced to 13 years in prison.

Happily, his story does not end there. His courage of conviction and the tireless efforts of his wife, Avital, eventually prevailed and stand as an inspiration to free men and women around the world. The Shcharanskys give us faith that man is stronger than the state and that faith is stronger than man.

However, even as we celebrate Anatoly Shcharansky's release from the Soviet Union, we should remember the fate of those who remain incarcerated for standing up for religious and political rights around the world. It is an embarrassment to our age that any government anywhere finds the exercise of free speech and religion a challenge to its legitimacy.

It is accordingly impossible to celebrate too triumphantly Mr. Shcharansky's newly found freedom as long as individuals anywhere, particularly in the Soviet bloc, continue to languish in prison, toil under slavish conditions in labor camps, or suffer persecution and harassment because of a desire to hold their governments accountable to the rule of law and reason. The greatest respect we can pay to Anatoly Shcharansky today is to renew our efforts on behalf of those who remain behind.

Again, I join my colleagues in extending a warm welcome to Mr. Shcharansky and best wishes to him and his wife for every success and happiness in the years ahead.

Mr. MRAZEK. Mr. Speaker, it is with a great deal of pleasure that I join my colleagues today in this special ceremony to welcome Anatoly and Avital Shcharansky to the United States.

As we all know, Mr. Shcharansky spent 9 brutal years in Soviet prisons and work camps, suffering both mental and physical tortures, for the crime of wanting to live freely as a Jew. Today we can all celebrate and honor the strength, determination, and courage of a free man who has come to symbolize the principles of human rights for all who wish to express their beliefs freely—here, in the Soviet Union, and elsewhere. Today we also salute the strength of Mr. Shcharansky's wife, Avital, who fought relentlessly for her husband's release, and their eventual reunification.

Today we celebrate. But we must pause and reflect, however, for we only revel in a victory of the moment. The release of Anatoly Shcharansky cannot be the end of the struggle, but the beginning of an even greater one. We must ask ourselves what the future holds for the thousands of Soviet Jews who also wish to emigrate. Unfortunately, Mr. Shcharansky's release may not portend a change in status for the majority of Soviet Jews. All indications are that the Soviet Union will continue its maltreatment and imprisonment of Jews, as well as its highly restrictive emigration policy.

Perhaps the release of Mr. Shcharansky has given us some cause for hope. Regardless, we must use our Nation's power and influence to continue the battle until the Soviets begin to comply with internationally recognized human rights.

Mr. HEFTEL of Hawaii. Mr. Speaker, this House has been greatly honored by the visit today of Anatoly Shcharansky. Anatoly Shcharansky symbolizes the hope shared by people throughout the world that we may all someday live in liberty and peace. As we record the history of the human struggle for freedom, we must always remember the trials that Anatoly Shcharansky endured during his 9 years in captivity, his triumphant release from imprisonment, his reunification with his family, and his continued dedication to the ideals of human rights.

Protecting human freedoms is an arduous task. Let us learn from Anatoly Shcharansky and take up his quest for human dignity and compassion. Let us use the spark provided us by this man's courage to help light our journey to a world ruled, not by the tyranny of a few, but by the liberty and justice prized by all.

Mr. BEILENSON. Mr. Speaker, today we welcome Natan Shcharansky on the occasion of his first visit to the United States, and we celebrate with him his victory over the Soviet political system. The decision by Soviet authorities last February to release Mr. Shcharansky from prison and allow him to emigrate to Israel and rejoin his wife, Avital, is one that gives hope to those of us all over the world who value human rights.

This joyous event, however, must not make us forget those who have been left behind in the Soviet Union. The plight of Mr. Shcharansky's brother, Leonid, and his mother, Ida, whom the Soviet authorities have denied permission to emigrate, is made even more poignant in the light of Natan's release. Beniamin Bogomolny, Ida Nudel, and Iosif Begun, as well as an estimated 14,000 less-famous "refuseniks," have been denied the permission they seek to leave the Soviet Union. And there are uncounted others who would like to leave, but who are discouraged from seeking exit visas by the Soviet Government's harsh treatment of those who do.

We are therefore obliged, while we honor the triumph of Natan Shcharansky, not to forget those thousands of others who suffer from Soviet repression. It is up to us to do our part by letting the Soviet Government know that we remember these citizens until that Government grants them the basic human rights of choosing where they and their families shall live.

Mr. ANDREWS. Mr. Speaker, I am proud to join my colleagues today in honoring a man of conscience and extraordinary courage—Anatoly Shcharansky. His struggle to speak out on behalf of the refusenik movement in the Soviet Union deserves the praise of free people everywhere.

Yet at the same time as we honor Anatoly Shcharansky, let us take this occasion to remember the 14,000 Soviet Jews who have been refused exit visas and remain in the U.S.S.R. against their will. Let us remember the thousands upon thousands of Soviet Jews who have taken the first step toward emigrating to Israel and are paying for the opening of the gates that bar their freedom. Unfortunately, the arbitrary and insensitive government in Moscow that controls their fate has chosen to reduce the flow of emigrants from the U.S.S.R. to a trickle.

This state of affairs is clearly unacceptable, and each of us needs to do all that is possible to change it. I, like many of my colleagues, have adopted a refusenik family; and I look to the day when the Raiz family of Vilnus can escape the fetters that today bind their fate.

Anatoly Shcharansky embodies courage born of faith. In celebrating his deliverance today, let us renew our faith in and commitment to freedom for all the refuseniks and prisoners of conscience.

Mr. HALL of Ohio. Mr. Speaker, I join my colleagues today in welcoming Mr. Anatoly Shcharansky to the United States. As a spokesperson for Soviet Jewry, Mr. Shcharansky has become an international symbol for the struggle for religious freedoms and basic human rights. Today we recognize Mr. Shcharansky's dedication to justice, and we honor his contributions and personal sacrifices toward the betterment of mankind.

Speaking on behalf of Soviet Jews, Mr. Shcharansky related firsthand knowledge to the outside world concerning the imprisonment, persecution, and emigration denials experienced by Jews currently living in the Soviet Union. As a result of his struggle for liberation from a repressive government, Mr. Shcharansky sympathizes with human rights activists the world over, and hopes to see social change come about in those countries violating fundamental human rights.

Mr. Shcharansky's biographical profile reveals him to be a learned man, and a man of strong moral conviction. He has gained great international respect as both a scholar and a human rights activist. As a student in the Soviet Union, Mr. Shcharansky was awarded high honors from the prestigious Physics and Mathematics Institute in Moscow, and later pursued a career in research. Mr. Shcharansky's professional success, however, was short-lived due to his activism. As a controversial figure in the Soviet Union, Anatoly Shcharansky was barred from social and employment opportunities, and became somewhat of a social outcast.

Unable to realize his spiritual fulfillment in the Soviet Union, Anatoly Shcharansky applied for emigration from the Soviet Union to Israel in 1973. His application was met with denial on unclear terms spurring Mr. Shcharansky to appeal to Soviet law for legal assistance and just representation. Mr. Shcharansky's appeal to justice had the reverse effect, as he was run the gamut of harassment and emigration refusals, and eventually sentenced to 9 years imprisonment for treason and espionage.

As one of the founders of the Congressional Friends of Human Rights Monitors, I have great faith in the power of men and women such as Mr. Shcharansky who monitor and speak out against human rights abuses. As a bipartisan and bicameral coalition of over 130 members, the Congressional Friends of Human Rights Monitors seeks to ensure that human rights monitors remain free and able to carry on their vital work.

Today, in welcoming Mr. Anatoly Shcharansky to our Nation's Capital, we reaffirm our Nation's commitment to the preservation of human rights, not only within the United States, but throughout the world. We thank Mr. Shcharansky for his contributions to humanity, and offer him our continued support in his ongoing efforts to protect international human rights.

Mrs. SCHNEIDER. Mr. Speaker, in the past, Congress has often honored women and men for their outstanding talent, remarkable professional accomplishment, or heroic action in life-threatening circumstances. Today, we recognize two individuals, Anatoly and Avital Shcharansky, who certainly possess each of these qualities. The Shcharanskys are, however, more deserving of our recognition for their integrity than for their talent, more deserving of our respect for their strength than their professional accomplishments. Their perseverance in the face of overwhelming odds makes acts of impulsive heroism seem trivial by comparison.

Perseverance of the spirit is the lesson the Shcharanskys give to the world. They had the courage to defy authority for principles, to risk career, friends, status in the community, and eventually their own freedom as a statement of their beliefs. While we aspire to be as brave and committed as the Shcharanskys, for most of us, it is an ideal that we find frightening to confront. Who among us, if faced with the proposition of standing alone amidst state sanctioned hostility, would sacrifice everything to remain true to our principles?

The Shcharanskys' experience highlights the struggle of Jews in the Soviet Union, but it also has a universal lesson. They have shown the world through their courage and triumph that we must listen to the voices of the oppressed wherever they occur. The invincible spirit of humanity knows no nationality, no race, no ethnicity. Their struggle impresses upon us that even the most repressive forces can be overcome by the self-evident truths of basic human rights.

It is ironic that, as a country founded on the principles of freedom of speech and religion, we recognize these traits most easily when they occur in a foreigner. We should not forget that our Founding Fathers rocked the boat and fearlessly questioned authority; they built a nation which respected human rights. The Shcharanskys' experience should remind us that we have a duty to protect those rights at home and around the globe.

The courage and perseverance of Anatoly and Avital Shcharansky calls for a celebration that goes far beyond our small ability for public recognition. The honor that we bestow commemorates the completion of one struggle. It also marks the beginning of a renewed effort to awaken the world to abuses of human rights wherever they occur.

Mr. CARR. Mr. Speaker, we gather here to pay special tribute to Anatoly Shcharansky, who survived 9 years in Soviet prisons and labor camps and honors us with his presence today.

There are few who do not know the story of this mathematician whose name has appeared in triumphant headlines throughout the free world. His story is one of personal triumph in the face of enormous adversity, of inner strength, and the power of faith.

Mr. Shcharansky is a great champion of human rights and a symbol of courage throughout the world. Yet this cannot truly be called a celebration. For how can we celebrate the freedom of one man when as many as 400,000 Jews remain trapped and persecuted within the Soviet Union?

There are approximately 1.81 million Jews in the U.S.S.R., according to the 1979 Soviet census, making it the third largest Jewish population in the world after the United States and Israel. Our understanding of life for these people paints a dismal picture of persecution and despair:

Not a single Jewish periodical is permitted in the Russian language, which is spoken by over 95 percent of Soviet Jews.

The Hebrew language cannot be taught or studied by Jews.

Many Jewish cemeteries have been and continue to be desecrated and converted to other uses.

Jews are not permitted to have official contacts with coreligionists abroad, to produce or import devotional articles or to publish prayer books, periodicals, and religious calendars.

None of the approximately 50 synagogues are permitted to join one another in regional or national associations.

Because Jews are denied the fight to pass on their traditions to younger generations, the Jewish religion may well face extinction in the Soviet Union. And Jews have little hope of emigrating to freedom. In 1979, the peak year for Jewish emigration, over 51,000 Jews departed. In 1985, only 1,139 were allowed to leave. Soviet authorities claim that those who wanted to leave have already done so. Many find this hard to believe.

The Soviet Union is a signatory to the Helsinki accords and the International Covenant of Civil and Political Rights and subscribes to the principles of the Universal Declaration on Human Rights. They have agreed to honor freedom of worship, freedom of expression, and the right to emigrate to the country of one's choice.

Yet the Soviet Union refuses to allow Jews to emigrate to their homeland and live with dignity and in freedom.

The Soviet Union must honor these agreements and allow Soviet Jews to exercise their basic human rights.

It is most unfortunate that the fate of Soviet Jews has been linked to the ebb and flow of superpower relations, effectively making them hostages and pawns in an international game of strategy. During these days of improved dialog with the Soviet leadership, we can only hope to increase the numbers of Jews allowed to emigrate.

We must call on President Reagan and Soviet Leader Gorbachev to address the human rights of Soviet Jews at their next summit meeting. It is imperative that we, in the United States, make our voices heard and continue to show our concern for the plight of the Soviet Jews.

TRIBUTE TO THE HONORABLE CLAUDE PEPPER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma [Mr. MCCURDY] is recognized for 5 minutes.

Mr. MCCURDY. Mr. Speaker, as a young Member of the other body, CLAUDE PEPPER was one of the most sought-after speakers for Democratic candidates in the 1940 campaign. Forty-six years later, he is more popular and respected than ever. He has become not only a central figure in American politics, but a national folk hero as well. The Almanac of American Politics rightly calls him the least cynical of politicians.

On May 6, together with former Gov. Charles Robb of Virginia, our beloved colleague from Florida received the 1986 Henry M. Jackson Friend of Freedom Award from the Coalition for a Democratic Majority. Everyone who had the privilege, as I did, to hear Chairman PEPPER speak that evening will long remember his stirring message on behalf of the freedoms we all hold so dear.

Surely no Member of this body has been more intimately involved with the great events of the 20th century than CLAUDE PEPPER. No one has a stronger commitment to freedom, and no one has been a more eloquent spokesman and fighter for it, both at home and abroad. I am honored to share Chairman PEPPER'S wise words with his colleagues, who hold him in such high esteem.

COALITION FOR A DEMOCRATIC MAJORITY, 1986 HENRY M. JACKSON FRIEND OF FREEDOM AWARD DINNER, CONGRESSMAN CLAUDE PEPPER, CHAIRMAN, HOUSE COMMITTEE ON RULES, MAY 6, 1986

It is a distinct honor to be associated with this great organization and with the name and illustrious career and character of one of the great men of the past, Senator "Scoop" Jackson. And it is with particular pride this evening that I share the honor of this occasion with one of America's illustrious sons and leaders, former Governor Charles Robb.

I believe it is important that we Democrats again study the past. I think there are many parallels in the attitude of America towards its duty and obligations toward the other peoples of the world between the present time and the period leading up to World War II, when I served on the Foreign Relations Committee as a member of the Senate. There were many occasions during this time when I had the privilege to work with an alert and able young Congressman named Lyndon Johnson. We worked together to try to help President Roosevelt pull America along toward recognizing the necessity for this nation to face the stern facts about the menace of Hitlerism to our country and to freedom in the world. And I remember in those days the almost impenetrable veil of isolationism that prevailed in our country.

Somehow after each war there seems to be a period of reaction. Forty-four years passed between 1870 and 1914, so that by the time World War I began the people's

memories of the Franco-Prussian War had pretty will dimmed. However, it was only 21 years from the end of World War I to the beginning of World War II. So maybe it is not surprising that the people didn't want to get involved in that war. They thought that like the ostrich who reputedly puts his head into the sand, by not looking it would be safe from the danger of the threatened aggression.

I, with my dear wife, had the privilege of attending the Nuremberg Congress in 1938. We heard Hitler speak and we saw manifestations of his character and power. We saw a Nazi flag draped in every window that faced the street. I shall never forget the sight of 200,000 brown shirts goosestepping, 12 abreast, each carrying one of those high flaming torches, singing the Horst Wessel song. You can imagine what a spectacle that presented in the night. In Munich a little later, we had a chance to watch Hitler at close range one afternoon while he was having a late tea at the House of German Art. On these occasions as we saw Hitler with his followers, it became very obvious to me what the evil and fearful portents of the Nazis were for mankind. And already at that time the world was frightened by the proximity of war. Hitler had occupied a great deal of Europe; he had already manifested his cruel and mendacious tendencies and character, and it should have been obvious to anybody what a menace he constituted to mankind.

But here at home President Roosevelt had to pull and tug and strain with every authority that he possessed to try to ensure that America would help the allies before it was too late. Many Members of Congress and Americans of that time didn't understand that the uppermost goal in the heart of Franklin Roosevelt was to help achieve the defeat of Adolph Hitler and eliminate his ominous menace to the world. FDR was not bothered by technicalities, even aspects of international law, when freedom in the world was at stake and in dangerous jeopardy. But it was very difficult for the President to get done what he wanted to do. Congress passed the Neutrality Act to try to keep us out of the War. I was even hanged in effigy one afternoon on a tree in front of the Capitol, with a sign across my chest reading "Claude Benedict Arnold Pepper" because I advocated selective service and aid to the allies.

I see an analogy between that time and this. There is no lack of evidence for the average American, indeed for all the Members of Congress and members of our national government, that one of the nations of the world today is reaching out to increase its domain, to expand its authority, enlarge its control over all the world's area and to exercise more of its power over various parts of the world. When Columbus discovered this great Western Hemisphere the people here thought there had been established a new land that we could keep safe from the oppressions of the European powers which had fomented tragedy throughout so many ages upon so many unfortunate people. We developed what we called the "Monroe Doctrine" whose purpose was to keep this Western Hemisphere, this chosen part of the world, free to develop and grow as God would have it.

Now, however, we are seeing a new aggressive power in spite of its failure at home reaching out more and more into our fertile Western Hemisphere. We see it establishing its system, deploying its arms and personnel, exercising various aspects of power, using coercion in one form or another to influence and repress others. And yet, in the face of all of this, we remain a torn nation, a government divided against itself: house divided against house, parts of Congress divided against the Executive, and our people with very striking differences of opinion about what ought to be done.

In Nicaragua, for example, every time there is an international Communist gathering, the government sends its top people to speak for its Communist Party. When one of the leaders of the Communist world dies, the Nicaraguans must endure three official days of solemn mourning with all the effusions of sorrow that accompany those occasions. And if you go into any of the bookstores and newsstands in Nicaragua you will find a great predominance of the Communist propaganda. There is an old saying that if a fowl waddles like a duck, and quacks like a duck and looks like a duck, it must be a duck. We must not give up our Monroe Doctrine or ignore what must be our response to this intruder in our hempishere. It must be our major effort to marshall the might of the nations in the Western Hemisphere, in concert, to do the job of keeping out the invaders—we should not have to do it alone. As our President said, nine times he has tried to negotiate with the Sandinistas and he has had no success. Therefore he has had to resort to something else. I think we are justified in helping any people in the world who are the victims of aggression and whose human rights are being impaired, whose chance of living a free life under one God is diminished, whether it be in Afghanistan or Angola or Nicaragua, or anywhere else in the world.

I want to say to my distinguished fellow Democrats, that we have every reason to be proud of our illustrious past. It was Thomas Jefferson, our father and founder who wrote in the Declaration of Independence that all men are created equal. Not just the men of the 13 colonies along the Atlantic Seaboard; but all men "are endowed by their creator with certain inalienable rights, among them, life, liberty and the pursuit of happiness". Woodrow Wilson nobly held up the flame of leadership for a new order on earth among nations and men. And the gallant fight that he led is one of the epic struggles of history. After him came others, but President Roosevelt was the personification of our most illustrious dreams. It was he who made possible the salvation of the oppressed peoples and of the cause of freedom in the world against Hitler. He is the author of the Four Freedoms: freedom of worship, everywhere in the world; freedom of speech and expression, everywhere in the world; freedom from want, everywhere in the world; freedom from fear, everywhere in the world. That was the universal, global concept of our greatest leader. And that is where America's heart is still.

Let America again remember the story of the Alamo where Colonel Crockett drew a line across the sand and said to those assembled there, "I challenge all those who will stay here and die with me to walk across that line". And all the men crossed the line with Colonel Crockett. I think that the time has come for America without apology, without embarrassment, without hesitation, without timidity, but with firmness and belief in the righteousness of the cause of freedom, to affirm human dignity and human rights. And where human rights and the right of men to live free under their God are involved, then let us say to those fighting for those rights that you are on our side of the line.

Let those who would demean God's children and strip them of their glorious rights, let them know that in us they have an unremitting, implacable foe—a foe that will stand firm, as long as we still live, for the principles that we hold dear. And so I hope that in America we will soon come to an understanding of what the truths are, and what the facts are and what principles should guide and govern our decisions. And may this mighty America rise up again in the noble spirit that it has shown so many times and again become the leader of mankind to walk on higher ground and in peace.

Thank you very much.

JOINT COMMITTEE ON THE LIBRARY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, on Wednesday, May 7, the Joint Committee on the Library, which I am proud to chair, held hearings on the recent budget reductions at the Library of Congress. The Librarian of Congress, Dr. Daniel J. Boorstin, presented a statement speaking of the three constituencies of the Library—the past, the present and the future. I commend to my colleagues the Librarian's remarks which follow:

STATEMENT BY DANIEL J. BOORSTIN, THE LIBRARIAN OF CONGRESS, BEFORE JOINT COMMITTEE ON THE LIBRARY, MAY 7, 1986

Mr. Chairman and Members of the Committee. We welcome this opportunity to appear before this Committee and share our hopes and concerns and have the benefit of your wisdom and experience. In my statement to the House Subcommittee on Legislative Appropriations, I described the implications of the current budget policy and the double cuts in the appropriations of the Library of Congress, for our nation, for the Congress, and for the world of learning. In my brief remarks today, I would like to share with you some of the problems unique to the Library of Congress which arise when we are forced to make the difficult choices imposed by the cuts in our appropriations. These cuts bring the current resources of the Library of Congress below those appropriated for the 1983 fiscal year.

Of course, our primary responsibility is to the needs of the Congress which this Committee can help us define. But there are two other invisible constituencies, which it is the unique responsibility of the Library of Congress to serve. One is the community of all past Americans who have built our nation and enriched our culture. We are mandated by law to collect and preserve their work in countless ways. We edit the "Letters of the Continental Congress," we preserve the "Notes of James Madison," and other members of the Constitutional Convention, the writings of the Presidents from George Washington to Calvin Coolidge, the draft of Abraham Lincoln's Gettysburg Address, as well as the manuscript of Walt Whitman's "Leaves of Grass," the records of the NAACP, and the National American Woman Suffrage Association, including the personal papers of Elizabeth Cady Stanton, the music of Irving Berlin, George Gershwin, and Aaron Copeland, the photographs of Mathew Brady and Lewis Hine, the photographs of the American continent, the maps

of the growth of all our American communities. We give all these creators and builders of America their voice. We must see that they are not forgotten or neglected, that our nation has a cumulative record of those who came before us.

There is also the constituency of our childen and our grandchildren. It is our responsibility, supported by Congressional appropriations, to preserve the copious and comprehensive record of the American culture past and present, for Americans in future centuries. The pioneering work of the Library of Congress, which you have generously supported, to preserve the books, maps, and photographs and all our other records is climaxed in the appropriation of $11.5 million for building the book preservation facility at Fort Detrick, Maryland. To our pioneering in the world of library science, the cataloging of books, and the computerizing of information you have also given generous support. While these efforts preserve the record of history, they also make history. For no other nation has been so scrupulous in its concern for the knowledge and culture of future citizens.

Our three constituencies, of the past, of the present, and of the future, all make costly demands on us. The recent extreme and disastrous cuts in the budget of the Library of Congress have made the competition among our obligations more than ever apparent and have made our choices more than ever painful. The constituencies of the past and of the future are without a voice. They are easily neglected in favor of the vocal demands of the present generation and the neighborhood. In order to meet the legal mandate of Gramm-Rudman, the Library found it necessary to subtract an additional $626,000 from our budget of current material and $1,280,000 from our appropriations for cataloging. By these cuts we are depriving our children and grandchildren of the ample record of their nation. Some three-fourths of the patrons of the Library tell us that they come to the Library of Congress to find what they cannot find anywhere else.

At the same time that we find it necessary to make the cuts in acquisitions and services for future generations we found it necessary to reduce the hours of service in our reading rooms and to close several entrances to the Library in order to reduce costs. This was one of the most painful decisions I have had to make in my decade as the Librarian of Congress. For my colleagues and I in these years have tried to make the Library of Congress more open and more accessible than ever before. Reducing our hours of service amounted to a savings of $585,000. If we had not made this reduction we would have had to acquire $585,000 less of current material, or catalogued that amount less, or committed some other cut to the damage of future generations. We made a cut of only 2.8 percent in our expense for reader services, as against a 22 percent cut in acquisitions. It would be unfair if the living generation did not share to this small extent in our common sacrifice.

In the past the Congress by its foresight has made it possible for the Library of Congress to serve adequately our three constituencies. But while the ballots of the living can be counted, the makers of our nation—the George Washingtons, the Thomas Jeffersons, the Lincolns, the Whitmans, the Frederick Douglasses, the Clara Bartons, the Mathew Bradys, the Gershwins, and thousands less well known cannot cast ballots and cannot write letters to their congressmen. It is our duty to see that their voices and work will continue to be heard and seen. We would fail them, too, if, in giving in to the vocal demands of the present generation and neighborhood, we spend fewer resources in preserving the historic record of our nation.

An institution which has a duty to three constituencies—the illustrious dead, the vocal living, and the voiceless unborn—has no easy problem. The more the Congress cuts our resources—as it has for some inexplicable reason, doubling the cut imposed on most other Federal agencies—the more difficult and more painful and less satisfying are our priorities in service to one or another of our constituencies.

Our nation is unique in many ways. In the way it was founded—in the bright light of history—so that we at the Library of Congress can preserve the visible and vivid record. And in the fact that the founders and builders of our nation have been so vividly aware of the duty of this New World to posterity. We enlist your sympathy, your wisdom and your assistance in helping us make the difficult choices. We hope that in providing the Library adequate resources, Congress can keep this great institution alive and flourishing—and continue to allow us, as we serve you today, to fulfill our duties to those who made America in the past—and those who will build America in the future.

We will be happy to answer any questions you may have.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Colorado [Mrs. SCHROEDER] is recognized for 5 minutes.

Mrs. SCHROEDER. Mr. Speaker, I was absent yesterday for roll No. 122, House Resolution 450, the rule on H.R. 1, the Housing Act. Had I been present, I would have voted "yea."

LEGISLATION TO ESTABLISH PILOT PROGRAM FOR MILITARY RENTERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

Mr. PANETTA. Mr. Speaker, I am pleased to rise today to introduce legislation which directs the Secretary of Defense to establish a pilot program involving military personnel and their civilian landlords. This program, if implemented, would remove perhaps the largest financial burden imposed on our military families.

I would like to take a few minutes today to describe what this legislation would do. First of all, it would give the Secretary of each military department the authority to designate one military installation in the United States for participation in this program. Second, as part of this pilot program, civilian landlords who rent to military personnel would agree to waive security deposits when renting housing units to military personnel.

In return, the military post would agree that if for any reason the service member leaves without making final payments for rent or damage, the post would make those final payments. These payments could not exceed, however, the amount of an ordinarily required security deposit. Any outlay of funds on the part of the military post would then be deducted from the service member's paycheck.

In other words, let us say that a service member wants to rent an apartment for $500 per month. Under this program, the landlord would agree to accept only a first month's rent without any required security deposit or last month's payment. Right away, we are saving the service member up to $1,000. If the service member is transferred to another post or is assigned to onpost housing and leaves his apartment without paying his last month's rent, the post to which he is assigned would meet the last month's rent payment of $500. This $500 would then be deducted from the service member's paycheck.

This pilot program would run for 1 year, and at the end of that time we could evaluate its results and consider the possibility of enlarging the program.

All of my colleagues are aware of the tremendous financial and emotional pressures inflicted on our military personnel and their families. This already tense situation is made even worse during a permanent change of station move. Travel and relocation expenses come out of the pockets of our servicemen and women. Reimbursement comes later, although in the past only $1 out of every $4 spent on a PCS move has been reimbursed, according to an Air Force study. And when military families arrive in a new location, they must meet the immediate costs of security deposits, first and last month's rent, utility deposits, and more. Before you can even blink, a military family can be thousands of dollars in debt. And 2 years later the whole process is repeated.

In this Congress, we have come a long way in dealing with the pressures and inequities inflicted on our men and women in uniform and their families. I am pleased that my own legislation, H.R. 1371, was the first legislative effort in this area. Many of my proposals regarding PCS moves and travel expenses were incorporated in the Department of Defense authorization for last year.

This year, however, I am reintroducing this proposal to initiate a pilot program involving military personnel and their landlords. No appropriation of funds is necessary because the service member would be ultimately responsible for meeting the costs of any damage or breach of lease.

I know that the landlords on the Monterey Peninsula are interested in this program. They understand the hardships imposed on the military family, and they understand that this program guarantees payment for damages and breach of lease, up to the amount of the usual security deposit. They realize, also, that this program would relieve some of the difficulties they experience in renting to military personnel. This program would give landlords one point of contact for all their military tenants and a source of information regarding military personnel who may soon be transferred, thus

enabling landlords to prepare for a change in the lease.

Mr. Speaker, I believe the success of this pilot program could lead to service-wide program that would solve one of the major problems facing our military personnel, and do away with certainly one of their largest financial burdens. What is more, no one loses in this program; everybody wins. Landlords are guaranteed payment, our military personnel are able to use their hard-earned dollars for necessities, and the services are guaranteed reimbursement for any outlays to landlords.

When the House voted in the last session to accept many of my proposals to ease the burdens on our military personnel, servicemen and women all over the world breathed a sigh of relief. But we have not yet addressed one the most pressing, and financially disabling, issues. The test program I propose would address this issue, and I urge my colleagues to support it, so that one day our military men and women will not look on military service as a financially crippling experience.

H.R. 4840

A bill to provide a rental housing lease indemnity program by the Department of Defense

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. OFF-POST RENTAL HOUSING LEASE INDEMNITY PILOT PROGRAM.

(a) ESTABLISHMENT OF PROGRAM BY SECRETARY OF DEFENSE.—(1) The Secretary of Defense shall establish a pilot program to test the feasibility of implementing a program under which each Secretary of a military department may guarantee compensation of any person who leases a rental unit to any member of the armed forces under the jurisdiction of the Secretary for any breach of the lease or any damage to the rental unit by the member.

(2) The program referred to in paragraph (1) shall be established before the expiration of the 90-day period following the date of the enactment of this Act, but not before October 1, 1986.

(b) ACTIONS BY SECRETARIES OF MILITARY DEPARTMENTS.—(1) In accordance with action taken by the Secretary of Defense under subsection (a), each Secretary of a military department shall designate one military installation in the United States that is under the jurisdiction of such Secretary to participate in the program established under subsection (a).

(2) For purposes of carrying out this section, any Secretary of a military department may, to the extent approved in advance in appropriation Acts, enter into an agreement with any person who leases a rental unit to any member of the armed forces who is under the jurisdiction of the Secretary. Any agreement under this paragraph shall provide that—

(A) the term of the agreement shall not be for more than one year;

(B) the member shall not pay a security deposit;

(C) the Secretary (except as provided in subparagraphs (D) and (E)) shall compensate the lessor for any breach of the lease by the member and for any damage to the rental unit caused by the member or by any guest or dependent of the member;

(D) the total liability of the Secretary for any breach of the lease or for any damage described in subparagraph (C) shall not exceed an amount equal to the amount that the Secretary determines would have been required by the lessor as a security deposit absent the agreement authorized in this paragraph;

(E) the Secretary shall not compensate the lessor for any breach of the lease or for any damage described in subparagraph (C) until the lessor exhausts any remedies available to the lessor against the member for the breach or damage; and

(F) the Secretary shall be subrogated to the rights of the lessor in any case in which the Secretary compensates the lessor for any breach of the lease or for any damage described in subparagraph (C).

(3) Any authority of a Secretary of a military department under this subsection shall be exercised pursuant to regulations issued by the Secretary of Defense.

(c) GARNISHMENT OF PAY OF MEMBER OF ARMED FORCES.—Any Secretary who compensates any lessor under subsection (b) for any damage to a rental unit or any breach of a lease by a member of the armed forces may issue a special order under section 1007 of title 37, United States Code, to authorize the withholding from the pay of the member of an amount equal to the amount paid by the Secretary to the lessor as compensation for the breach or damage.

(d) REPORT REQUIREMENT.—(1) The Secretary of Defense shall submit to the Congress a report concerning the pilot program established under subsection (a), including—

(A) findings and conclusions of the Secretary with respect to the pilot program; and

(B) recommendations as to the feasibility of implementing a program similar to the pilot program on all military installations.

(2) The report referred to in paragraph (1) shall be submitted before the expiration of the 18-month period following the date of the establishment of the pilot program under subsection (a).

(e) TERMINATION OF AUTHORITY.—The authority of any Secretary of a military department to enter into any contract under subsection (b) shall terminate upon the expiration of the 18-month period following the date of the establishment of the pilot program under subsection (a).

(f) DEFINITIONS.—For purposes of this section:

(1) The term "armed forces" has the meaning given such term in section 101(4) of title 10, United States Code.

(2) The term "military department" has the meaning given such term in section 101(7) of title 10, United States Code.

NEW YORK TIMES DETAILS LOAN TO ECUADOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. CHAPMAN] is recognized for 5 minutes.

Mr. CHAPMAN. Mr. Speaker, according to the New York Times, the Reagan administration yesterday agreed to lend $150 million to Ecuador—a member of OPEC—in so-called bridge financing to help it through the tough financial times resulting from the oil price slump while Ecuador negotiates final details on a new loan accord with the International Monetary Fund, the World Bank, and commercial lenders.

The New York Times article indicates that this $150 million loan may only be the beginning of the administration's efforts to assist foreign nations, most significantly Mexico, that have been battered by the oil slump.

It is apparent from the Times article and other news accounts that the Reagan administration is prepared to lead the cavalry charge to assist nations, even OPEC nations, that are hurt by a slumping oil economy through the Department of the Treasury, the IMF, and the World Bank.

Why is the administration willing to help OPEC nations in trouble because of the oil collapse when it is unwilling to lift a finger to assist our domestic oil producers? Does the administration have a program for the domestic producers?

On April 3 of this year, the Dallas Morning News reported the White House program to assist the domestic petroleum industry. Reagan spokesman Larry Speakes told reporters, "We have a number of programs in place that certainly help those who have been displaced by various economic forces." Specifically, when asked to be specific, Larry Speakes said that the White House program to help domestic producers in trouble because of the oil decline included, and I quote, "Unemployment, welfare programs, things like that."

Mr. Speaker, it is a sad day when the priorities of an American administration in dealing with the oil price plunge are that much out of sync. The administration opens the U.S. Treasury for OPEC nations to help them through the tough times in international oil prices and the oil price collapse, but when it comes to our domestic energy producers, this administration's answer is, "Tough luck."

I could not disagree more with those policies. We need to help our own before we trot off to the rescue of OPEC nations. The callous, snide response of the White House to the pleas of American producers being crushed by an oil collapse—while throwing U.S. taxpayers' money at OPEC—cannot, and should not, be condoned.

TORT REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. LUNGREN] is recognized for 60 minutes.

Mr. LUNGREN. Mr. Speaker, this evening the subject of my special order is on tort reform.

Before I get into that subject, I must just make some comment on the two previous special orders. I am really confused. The speaker before the last one said that we have embarrassed Mexico and we owe them an apology. Now I hear from the last speaker that in fact we are trying to help out Mexico and not help our own out. It is

in fact a confusing time we find ourselves in.

I would say with respect to the question of comments made to two members of the administration concerning the Mexican Government that I think that we ought to just flesh out that whole question. I think that we ought to have a full-ranging debate on what in fact is the participation by the Mexican Government, if any, in drug-running or allowing drug-running to go on in that country. I think that we ought to have a full investigation of a DEA agent who was tortured to death under excruciating circumstances, and some suggest with the aid and abetting of certain members of the Mexican local police on the border there. I think that we ought to have a full debate on what the consequences are for the United States in terms of the lenient attitude expressed thus far by the Mexican Government on drug-running through that country as it comes into the United States.

□ 1745

Rather than ordering an apology, I think we ought to have a full hearing of the issue. It seems to me that if the problem is as asserted by the gentleman who appeared before the Senate committee just the other day that instead of owing an apology to Mexico, we owe an apology to the young people of America, because by not standing up to what the reality is, we are allowing more and more of the poison to go into the veins of our children. That to me is a concern that we ought to have in this House, not that we are somehow reluctant to criticize our neighbor if the neighbor in fact is not acting as a neighbor should, but rather because we are not doing all we should to eradicate the problem of drugs in this country.

Mr. Speaker, let me speak today on my special order on tort reform.

There is no doubt that few private attorneys in America equal the fame of Melvin Belli, the celebrated "king of torts." Mr. Belli has earned millions of dollars for himself and his clients through decades of litigation. Yet today even Mr. Belli can no longer afford insurance premiums, a development he blames on the insurance agencies who have "milked us long enough."

Mr. Belli has contributed to the conflicting crescendo of allegations, anecdotes, statistics, and ostensible solutions that, by their sheer volume, mandate an investigation into the liability panic and its sources. Waves of anecdotal evidence suggest that even the most essential insurance services now lie beyond the grasp of many Americans. Prominent businessmen, journalists and legislators place the onus for that scenario at the feet of the legal system. Yet attorneys continue to question both the evidence and these conclusions. The existence of such a strenuous dispute between the most influential groups in America may lead to severe and destructive societal tensions. If not resolved by careful evaluation, it may also bring about inappropriate—and therefore dangerous—legislative responses.

Thanks to Time, the Wall Street Journal, and Peter Jennings, America has discovered the national liability crisis. Yet, Mr. Speaker, average citizens, workers and employers alike, have felt the impact of this crisis on the local level long before it caught the attention of our national elite.

Municipalities, physicians, and businessmen have deluged the media with tales of woe that would rival Job. I fear these anecdotes suggest that if insurance premiums are not lowered and if the legal system does not accept some restraints on its tort system, the superstructure of American society may become paralyzed. Cities may have to shut down services, physicians may have to stop performing needed but risky operations, and businesses may have to stop making products that could, under the most bizarre circumstances, conceivably cause injury to someone, somehow, sometime.

The President's Tort Policy Working Group, which issued its report in February, voiced specific alarm over such eventualities. The Working Group noted that some cities presently face insurance premium increases of up to 1,000 percent. Other localities confront renewal rates that have climbed by as much as 40 percent, and report that the availability of insurance for cities is "diminishing to nothing." The Working Group adds that a survey by the U.S. Conference of Mayors revealed that over half of the cities polled expected premium increases of 100 percent or more.

According to a March edition of Time magazine, even the capital city of America's insurance companies, Hartford, CT, has suffered from rising insurance premiums. Its own municipal liability coverage was slashed to only $4 million, as compared with $31 million in the 1984-85 fiscal year, despite a 20 percent rise in total premiums. This rise is to the neighborhood of $1.8 million. The city of Dallas, once the symbol of Southwestern economic vitality, experienced premium increases of 1,000 percent, and opted instead for self-insurance, mid-size cities like Greeley, CO, population 55,000, fared no better, Greeley canceled its liability policies last summer. Although Greeley paid for expensive insurance coverage for its police service, the rest of the city's services are "going bare." On a smaller level, Time reports that hundreds of small towns in New York State and my home State of California have decided to do without insurance that they can no longer afford. And the fear of lawsuits has apparently led the town of Blue Lake, CA to shut its skating rinks, parks, and tennis court. If this evidence conforms to a nationwide pattern, it seems that expensive insurance and expensive lawsuits have placed cities either in fiscal straitjackets or on financial precipices.

Physicians, unfortunately, have frequently found themselves in such positons thanks to the mercurial premiums of malpractice insurance. We all laughed at the thought of the Philadelphia woman who recently won a $1 million claim against doctors who had done nothing more than perform a CAT scan on her and had thereby, she claimed and thereby a jury believed, eliminated her psychic powers. Yet I find nothing amusing about the fate of the woman of Molokai, who must fly to Oahu or Maui to give birth with a physician in attendance. What is the reason for their inconvenience? According to Time magazine, the five Molokai doctors who once delivered babies have stopped doing so because malpractice insurance would cost them more than the total of any obstetrical fees they could hope to collect." Time goes on to add even more depressing statistics:

> Six out of every ten babies born in Rhode Island draw their first breath in the Women and Infants' Hospital of Providence, a 102-year-old institution that handles only obstetrical and gynecological cases. The facility also takes high-risk cases from nearby hospitals, a practice not of course calculated to attract insurance salemen. Women and Infants' has managed to hold on to a $3 million primary malpractice policy, but it has been trying vainly since last October to renew its $10 million supplemental coverage.
>
> No field in medicine has been harder hit by the insurance crisis than obstetrics. According to the American College of Obstetricians and Gynecologists, 73 percent of its 24,500 members have been sued for malpractice at least once—almost three-quarters. To escape the soaring cost of malpractice protection, some 3,000 Ob-Gyns have abandoned the specialty.

Close to home, my wife found that her own ob-gyn several years ago decided no longer to be involved in obstetrical operations. Then in just the last year and a half he abandoned practice altogether. Now, even though he may have retired to a comfortable position, the fact of the matter is he was an outstanding ob-gyn in our community. He was still healthy. He was still capable of providing services. He had many patients who were desirous of those services, but in fact the malpractice rates became onerous and in fact he abandoned that specialty.

Physicians, not surprisingly, have created their own statistical facts. According to the AMA News, one-third of California obstetricians now limit the number of deliveries they perform and 46 percent restrict the number of high-risk cases they handle. Almost 40

percent of surgeons across America, the publication reports, now refuse to accept high-risk cases because of liability fears.

The President's Tort Policy Working Group contends that these figures reflect a malpractice insurance crisis across America. Malpractice insurers for pediatricians, dentists, nurse/midwives and obstetricians/gynecologists have reduced coverage limits by 50 percent. St. Paul's Insurance Co., which writes coverage for approximately 20 percent of the Nation's doctors, has placed a moratorium on new policies. In a related development, certain nurse/midwives have also found themselves playing financial jeopardy. The American College of Nurse/Midwives includes some 2,500 individuals. Of this number, 1,400 were covered by a blanket insurance policy through the association. In July of last year, that policy was cancelled. The association has been unable to obtain other coverage.

Over 50 percent of the medical liability coverage in America is now managed by doctor-held mutual insurance companies. But can doctors function more effectively as insurers than insurance agencies? Reporters for Time doubt that they can. They note that 10 years ago, "doctors organized a number of companies, promptly dubbed 'bedpan mutuals', to write malpractice insurance at lower premiums. But several of the bedpan mutuals are said to be in financial trouble, and as a group they too are raising premiums rapidly." It seems that like characters in a famous existentialist play, doctors increasingly find themselves with "no exit."

Apparently, American businesses have also found roles to play in this theater of the absurd. The President's Tort Policy Working Group has compiled a phalanx of dismal statistics to confirm this view. Their surveys note severe insurance difficulties among grocers, architects, engineers, day care centers, toy manufacturers, household appliance manufacturers, automobile repair firms, medical equipment manufacturers, biotechnology companies, oil and gas drilling contractors, construction contractors, national gas transportation firms, machine tool manufacturers, battery recycling companies, power equipment manufacturers, general aviation manufacturers, ski facility operators and aerospace manufacturers. If we look more closely at two of the most important of these business sectors, the picture becomes even more bleak.

The National Association for Education of Young Children conducted a survey of day care providers. They covered family day care providers who care for children in a home setting, day care centers and head-start programs. The survey found that 40 percent of the respondents had had their insurance canceled or not renewed and the majority of those with coverage had premium increases, most of which rose 200 percent to 300 percent.

The Working Group paper also notes that 20 percent of the members of the Health Industry Manufacturers Association have recently lost insurance coverage, and premium increase of five to tenfold have led other members to seek alternative insurance solutions.

Two months ago, the AMA News featured a series of reports on the growing consensus behind the need for action vis-a-vis the liability crisis. The publication noted a wide variety of individual cases of the insurance plague.

A Pennsylvania couple who run a tiny auto salvage yard had to take out a bank loan this year to pay their liability insurance premium, which increased by 100 percent * * *. A motorized wheelchair manufacturer in Bridgeport, Michigan, which has never had a successful claim brought against it, saw its liability rates increase from $30,000 to $150,000 * * *. An Omaha manufacturer of manlift cranes saw his coverage decrease while his premiums increased 500 percent—from $43,000 per year to $216,000 per year * * *. Operators of Soldier Field, home of the Chicago Bears, found their insurance coverage canceled just before the Bears' first playoff game against the Los Angeles Rams. The Bears went bare until the next playoff game with the New York Giants, when they purchased one-game coverage from Lloyds of London for $100,000 * * *. A Fort Worth, TX, machinery manufacturer paid $7,800 for $5 million in liability coverage 2 years ago. This year, after going bare for 38 days while searching for someone who would insure him, he finally bought $500,000 worth of coverage for $132,000 * * *. A few years ago, 13 companies made football helmets. After an avalanche of lawsuits brought on behalf of players who suffered head, neck or back injuries, only three manufacturers still produce helmets.

Mr. Speaker, if such incidents do reflect a widespread insurance famine, they may suggest why the U.S. Chamber of Commerce has identified tort reform as its No. 1 priority for 1986.

In addition to the AMA, the Chamber of Commerce and a variety of other business groups, leading newspapers and magazines have now endorsed tort reform as an answer to the apparent crisis in insurance availability. Citing one horror story after another, the Wall Street Journal has repeatedly concluded in its editorials that softhearted judges must share the blame for rising insurance rates.

The current "Journal of Legal Studies," published at the University of Chicago, describes how fault has been replaced by a notion called "enterprise liability." This scheme, devised by liberals in the early 1960's, says that business enterprises should be responsible for any injuries caused by products they introduce into commerce, no matter if the products were as safe as technology allowed or were misused.

The Journal asserts that these policies led to crushing lawsuits and escalating insurance premiums more damaging to the poor and small businesses than anyone else. The tiny ski lodge in Tennessee may crumble under the weight of insurance, but the resorts of Aspen will muddle through.

Even Business Week magazine, though skeptical of the actions of insurance companies, has criticized excesses in the legal system and called for tort reform. Its editors have supported caps on pain and suffering awards; a restriction of strict liability to those products that are demonstrably hazardous; the encouragement of alternative dispute mechanisms. These editors have also called for a modification of the "joint and several liability" practice, whereby persons sharing a small portion of the blame for an incident may have to pay the entire amount of damages. According to Business Week, "this encourages plaintiffs to sue everybody in sight who can in any way be dragged into the case, especially those with deep pockets." Business Week thus advises that the amount of payment for damages be linked to the degree of responsibility.

The State governments and Washington have not ignored the pleas of the U.S. Chamber of Commerce, the American Medical Association, and other organizations. Political leaders across the country now accept the view that the Nation faces a crisis of insurance availability. And many also accept the view that the legal system is largely responsible for this crisis. Tort reform measures have passed or are pending in 42 State legislatures this year. Legislation to cap damages has been introduced in 31 States and the District of Columbia. Five States have passed such legislation, while three have rejected it. New regulation of attorney contingency fees has been introduced in 18 States and the District of Columbia. Three States have passed such bills, and one has rejected it. Joint and several liability measures are under consideration in 20 States.

Members of the U.S. House and Senate have introduced a wide variety of bills affecting tort reform. But they may be superseded in fact, by President Reagan, who last week proposed three bills. They affect the liability of government contractors, product liability and Federal tort claims. Provisions in these bills include the elimination of joint and several liabilities (except in cases where concerted action was the cause of injury); a $100,000 cap on noneconomic damages; the use of periodic payments when damages exceed $100,000; the imposition of a sliding scale on contingency fees; the encouragement of alternative forms of dispute resolution; and the rejection of product liability when unreasonable or unforeseeable use occurs or where there is adequate warning.

The President's Tort Policy Working Group laid the foundations for these legislative recommendations. Its

report concluded that three afflictions of the present judicial system represent the major sources of the apparent liability crisis. First, it called the growth of the number of product liability suits "astounding." The number of these cases filed in Federal district courts has increased from 1,579 in 1974 to 13,554 in 1985. Similarly, the number of medical malpractice suits filed against physician-owned companies has climbed from 10,568 in 1979 to 23,545 in 1933. The study adds that "the number of medical malpractice lawsuits per 100 physicians more than doubled from 1976 to 1981, and for obstetricians/gynecologists actually tripled during this period." Municipalities, according to a survey of over 1,200 cities, experienced a 141-percent growth in suits between 1979 and 1981.

The President's study places great emphasis on the growth in the amount of damages awarded. While one might attribute the increase in the numbers of suits to increased recklessness on the part of businesses and professionals, it is far more difficult to explain away a significant rise in the money given to plaintiffs in the cases. Victims of product malfunctions or medical malpractice suffered just as much before the trend of increased lawsuits as after. Why then is it that the average medical malpractice jury verdict rose from $220,000 in 1975 to $1,017,000 in 1985? Why is it that average product liability awards darted in the same period from $393,000 to $3,850,000? Why is it that there were just 3 medical malpractice awards of over $1 million in 1975, and 71 in 1984? Finally, why is it that there were only $9 million in verdicts in product liability cases in 1975 and a whopping $86 million in 1984?

The President's Working Group made the obvious conclusions from this information, incomplete though it may be. If the amount of awards and the number of cases are rising sharply, then insurance companies face a sharp reduction in their reserves. They therefore must increase premiums and avoid risky policies to compensate for these losses. Since potential losses appear severe, these companies must be severe in their adoption of policies and imposition of premiums. The tumult that has characterized tort law has generated an uncertainty that only accentuates these difficulties. The study group regarded this instability as the third of the critical afflictions facing the judicial system.

Based on these conclusions, the Working Group derived recommendations used by the President. It contended, for example, that joint and several liability can lead to highly inequitable results. "Joint and several liability," the report states, "has led to the inclusion of many 'deep pocket' defendants such as governments, larger corporations, and insured entitities whose involvement is only tangential and who probably would not be joined except for the existence of joint and several liability." The existence of these practices, in the Justice Department's view, thus allows for an unfair gauging of defendants like cities or counties that inevitably drives up their insurance premiums.

The Working Group cited noneconomic damages as another important area of necessary reform. It emphasized that such awards are subjective, open-ended, unpredictable and potentially obstructive in the settlement process. In regard to the latter charge, the report notes that plaintiffs and defendants may quickly come to an agreement on economic damages, but disagree on others. Thus legal conflicts may lengthen, even when it would be to the clients' interest to obtain a quick settlement.

In the Justice Department's view, one should also be concerned with potential abuses of the punitive damages practice. The Working Group cited the case of Johnson versus American Cyanamid Co., where the jury awarded $8 million in punitive damages against the defendant for its decision to produce the Sabin vaccine. The Working Group's report states:

> Despite the fact that the defendant had complied in this decision with the well-established judgment of the U.S. Government and virtually the entire medical community, the jury apparently decided to use punitive damages to overrule this judgment and to force the Sabin vaccine off the market. Ironically, the Sabin vaccine has proven far more effective than the Salk vaccine in combatting polio. The case presently is on appeal to the Kansas Supreme Court, and the Federal Government has filed an amicus brief urging reversal.

If Federal and State judges should not make social engineering decisions, it seems unreasonable to give juries in civil suits absolute power over medical and business decisionmaking, particularly in the area of awards which may be designated as punitive.

Third, the President's legislative recommendations concur with recommendations of the Working Group for periodic rather than lump-sum payment of damages. Periodic payments allow defendants to digest large judgments. They benefit society by providing plaintiffs with a guaranteed stream of income. Such a continuous line of funds insures that even plaintiffs with severe injuries will not become wards of the State.

□ 1800

Mr. Speaker, I might say in one of the last years I was practicing law before I was elected to this body I had the pleasure of being involved in a case where we had one of the very first periodic-payment schedules established in a major accident case. I would just say, Mr. Speaker, that as far as the client is concerned, in most cases it is more beneficial than a lump-sum payment, and that is because oftentimes when someone is severely injured and they get a lump-sum payment, there may be a tendency to spend it all at one point in time, or they may be unable to do that type of work that they were used to doing and therefore use that lump sum perhaps in a venture in which they are not very well trained. In other words, there is a tendency in some cases to lose the money right away.

Where you have a periodic payment, the requirement is that a specified amount of money is given to that individual and guaranteed to that individual for the rest of his or her life and, therefore, they are protected with a continuous stream of income.

Not so coincidentally, however, that purchase, or the purchase of such an annuity, is of a lesser cost to the insurance company or the defendant, if he or she is paying individually, than a lump-sum payment. So the societal costs are less because obviously if an insurance company pays less for an annuity than they would in a lump-sum payment, the amount they will have to charge for insuring individuals in the future will be less than it would otherwise be.

The President recommends that a limitation be placed on the consideration of collateral sources of compensation. When collateral sources of income were provided by the plaintiff himself, the Working Group states, it was justifiable to take the effect of injury on them into account in awarding damages. But today governments and employers often provide such sources of income. The Working Group objected in particualr to consideration of collateral sources of income from State or Federal Governments. When this factor is introduced into the calculation of awards, citizens must pay for the award made in two instances: First as taxpayers, and second as consumers of the product causing injury. The Working Group charged that such provisions too often allow for windfall recoveries by plaintiffs.

The President adopted the schedule for contingency fees advocated by the Working Group. The latter justified these changes for four reasons:

> Verdicts often are inflated by judges and juries to compensate plaintiff for what is well understood to be high attorneys' fees. Defendants thus pay for such fees through higher insurance premiums for awards which, in turn, are passed on to consumers through higher prices. It is difficult to justify placing such a burden on American consumers for the purpose of paying what often amounts to exorbitant attorneys' fees.
>
> Similarly, in order to compensate plaintiffs for very high contingency fees, settlements often are higher than otherwise would be the case. As with high awards, these payments ultimately are passed through to the consumer. More problemat-

ic, however, is that attorneys' fees often can become a major impediment to settlements since defendants may balk at paying a higher than justified award in order to compensate plaintiffs for exorbitant attorneys' fees. In such situations, attorneys' fees create an additional burden by causing cases not to be settled that otherwise would be settled.

Contingency fees also distort the incentives of attorneys. Such fees may lead plaintiffs' attorneys to hold out for high noneconomic damages (and, potentially, windfall profits for the attorney requiring only minimal additional work on the attorney's part), while the clients may be best served with obtaining economic damages and more limited noneconomic damages as promptly as possible.

Scheduling contingency fees also should substantially reduce the excessive transaction costs presently plaguing the tort system. This is particularly important in such areas as the asbestos litigations where there are only limited resources available to compensate a large pool of plaintiffs.

□ 1810

Of the major recommendations of the Tort Policy Working Group, the President bypassed only one. The Working Group strongly criticized laxity in the evaluation of witnesses in lawsuits, arguing that unqualified individuals often lent undue credibility to the arguments of plaintiffs. The study also noted that judges do not possess adequate familiarity with scientific issues, although they handle many cases requiring such knowledge. The Working Group advised that courts give greater deference to organizations and agencies that have long-standing familiarity with complex scientific affairs. It also suggested that "studies and opinions that have not been subjected to the peer review process should be presumed invalid." While the President did not adopt these proposals, it remains highly significant that he accepted all the other suggestions of a commission highly critical of the present judicial system.

Flooded with one tale of woe after another, America's political leaders have responded with a deluge of legislation. Yet certain elements of the attorneys bar, the group that would be the most affected by these initiatives, have stood aloof. Some lawyers argue that claims of an insurance debacle are exaggerated, and that the data so far presented on the question is unreliable. These attorneys also claim that the insurance companies must bear the blame for whatever ills may in fact exist in the liability system. These firms, it is alleged, have mismanaged their investments and now manipulate Americans on a grand scale.

Aside from the fact that the stories reflect isolated incidents, are there other reasons to doubt the reliability of the anecdotal evidence heretofore presented? The complexity of the cases involved may provide some reason. In its March 24 cover story on the liability insurance issue, Time magazine provided four possible illustrations of this complexity. It will suffice to bring the key point home:

According to the frequently cited tale, a body builder competing in a foot race with a refrigerator strapped to his back was injured when one of the straps came loose; he sued several defendants, including the strapmaker, and won $1 million.

Now some have said this is not as atrocious or unreasonable an example as might be expected, and they explain it this way:

The facts, according to [the Association of Trial Lawyers of America]: ten athletes competed in a televised stunt race, each with a 400 pound refrigerator strapped to his back; each received a written contract guaranteeing that the equipment had been tested for safety. Franco Columbo, a world-champion body builder, did fall and suffered total knee displacement that required extensive knee surgery. At the trial, testimony showed that the equipment had never been tested on anyone of Columbo's size while running. In fact, the engineer for the fitness center that developed the contest said that he had warned the organizer, Trans World International, that the whole race was unsafe. Columbo did win slightly less than $1 million from Trans World, but the strapmaker was not sued because the strap never broke.

The Association of Trial Lawyers provided Time with the details of an equally famous case in Pennsylvania:

Another tale allegedly involves a fat man with a history of coronary disease who suffered a heart attack while trying to start a Sears lawn mower, sued Sears and the manufacturer, contending that too much force was required to pull the rope, and won $1,750,000. The real story is that a 32-year-old doctor, who had no history of heart trouble, fell victim to a heart attack after futilely yanking the lawn mower's starter cord 15 times. A Philadelphia jury found that the mower's exhaust valve failed to meet the manufacturer's own specifications, hindering start-up to the extent that the rope had indeed to be pulled with excessive force. The jury did award $1,750,000, but the case was subsequently settled for an undisclosed amount.

Now, the Association of Trial Lawyers used these two and two more examples to show that, in fact, the stories about gross abuse of the judicial system make sensational headlines, but sometimes prove to be an unreliable source of information about the system. I would leave it to the other Members of Congress and others, average American citizens, to see whether or not they think that these cases show that the tort system is working the way it should be working.

I would ask other Members of Congress whether or not these two cases suggest that perhaps we have become too litigious a society and that we in Congress, as informed lawmakers, ought not to make some changes in the system.

Leaving aside refrigerators and lawn mowers, opponents of an overhaul of the tort system have marshaled more general criticisms of the data I described earlier. First, they insist that stories or statistics about huge awards often reflect only one part of the possible proceedings in a case. It is quite possible that such awards could be lowered during the appeals process. Second, they stress that the use of averages in describing the level of awards misleads the public. Figures prepared by jury verdict research, opponents of reform say, reflect a relatively small number of substantial awards.

I might just interject at this point, Mr. Speaker, that when I was practicing law and doing some defense work, I recall we used the jury verdict research figures not because we wanted to assault the system, but so that we would have a better understanding of what the verdicts were, so that we might be better prepared when we went to settlement conference to compromise a case, and that we might advise our clients about what they might expect in terms of jury verdicts.

Let me just assure my colleagues that members of the bar take those figures very, very seriously as prepared by the jury research organization.

The Association of Trial Lawyers of America also contends that more than two-thirds of the million dollar verdicts benefit victims or relatives of victims of genuinely serious injuries, such as death or permanent paralysis.

A recent court case in Houston illustrates the severe difficulties in passing judgment on awards. The families of Joseph Valley, William McKinnon and Jennie Jones sued the owner of the Blalock Nursing Home in Houston. The plaintiffs received an award of $4.5 million, the largest in the history of nursing home lawsuits. The plaintiffs alleged that extreme negligence on the part of the home had led to the deaths of their loved ones. More specifically, AMA News states that:

Blalock North and its owners were accused of understaffing the facility, failing to provide adequate health care, and failing to abide by Federal standards governing facilities receiving Medicaid payments. The home was accused of neglecting to feed patients adequately and of being remiss in reporting abuse and patient neglect. In addition, corporation employees allegedly failed to transfer patients to hospitals when their conditions became too critical to treat at the facility.

Significantly, six other suits are currently pending against the home. One may argue that the amount of the award is huge and will more likely raise costs at the home than bring real comfort to those who are now grieving. Yet the apparently extreme degree of negligence at Blalock leads one to wonder if a lesser amount would have really communicated anything to the multibillion-dollar corporation that owns it. Subjectivity may not only be a factor in individual lawsuits, but in our ability to decide the

level of awards courts should have at their disposal.

Mr. Speaker, I might just say that I am not suggesting in any way that certain of these cases are not legitimate and are not justified, and are not meritorious. What I am suggesting is the overall trends in my view very firmly places the evidence on the side of those who suggest that the system needs to be revamped in some serious ways.

The American Bar Foundation, a research branch of the American Bar Association, recently released a study of punitive damages that challenges earlier conclusions. The ABF surveyed six cities: Houston, Phoenix, Los Angeles, New York, Atlanta, and Chicago. In those localities, the ABF found that punitive awards are not routine, seldom involve huge sums, and occur infrequently in product liability cases. Judge and juries awarded such verdicts in these cities in less than 20 percent of cases, the study says. Jurors in New York are particularly stingy, recommending punitive damages in only 1.6 percent of cases. In five of the six cities, the median value of awards with punitive damages did not exceed $100,000. Further, the percentage of product liability cases with punitive damages fell well below the 20-percent margin in five of the cities.

□ 1820

The ABF concludes that media and government sources have exaggerated the scope of the punitive damage problem.

Attorneys, consumer advocates, and other opponents of wide-ranging tort reform have not been satisfied, however, with a mere rebuttal of charges about the judicial system. They have counterattacked with severe criticism of the insurance industry. Insurance agencies, in this view, engaged in poor management and investment practices in recent years and now gouge consumers of insurance in order to compensate. The March 10 edition of Business Week summarized this argument:

The price hikes on liability coverage are coming just as the industry is engaged in a desperate attempt to repair the damage from a fratricidal 8-year price war that ended only in the autumn of 1984. Although the higher premiums and reduced coverage since are boosting stock prices, insurers' traumas are far from over.

Even company insiders were stunned when insurance giant Cigna Corp. announced that it had underestimated its need to reserve against future claims on policies issued before 1985. Cigna charged a massive $1.2 billion against last year's fourth quarter earnings, though it put aside only half that amount—raising commensurately big questions. "When some other corporations have managed their balance sheets better, what else do you call it but some type of mismanagement?" Demands Myron Picoult, an insurance analyst at Oppenheimer & Co.

During the price war, a popular technique called cash-flow underwriting probably caused the most damage to insurance balance sheets. Abandoning traditional underwriting standards, insurers competed fiercely for premium dollars, which they could invest in high yield debt. They planned to pay losses against policies with the earnings generated by high interest rates. When interest rates fell just as claims began to pour in, the party ended. Insurers are widely thought to be underreserved for future losses by as much as 20 percent.

Mr. Speaker, not everyone concurs with this gloomy assessment. Gerry Spence, a famous Wyoming trial lawyer, argues that the insurance companies have actually recovered financially, but continue to hike premiums up out of sheer greed, "What the insurance companies have done," Spence says," Is to reverse the business so that the public at large insures the insurance companies," To support their position, Spence and other consumer advocates say that the industry achieved an after-tax profit of $5 billion last year, and that Wall Street stock traders have consistently bid up the price of property-casualty insurance shares.

As attorneys replied to criticisms of the legal system, so too have proponents of tort reform replied to charges that the insurance system requires overhaul. The President's Tort Policy Working Group rejected blanket assertions that insurance firms must bear the burden of blame for the effects of sharply increasing premiums. The report states:

The reasons why the loss recoupment (or excessive pricing) theories advocated by some make little economic sense can briefly be summarized as follows:

1. Insurers, like all profit maximizing companies, charge the price which maximizes their profits. Past gains or past losses are irrelevant to setting the price today which will maximize profits tomorrow. The argument that insurers are charging higher premiums to recoup past losses suggests that absent such losses their premiums would be lower—that it, that they would not be charging premiums that maximize their profits. That makes little sense.

2. Even if excessive premiums were being charged by some insurers to recoup their past losses * * * other insurers would offer the same coverage at lower price reflecting the actual risk, or insured would retain such excess profits for themselves through self-insurance or the formation of captives.

3. The commercial lines of insurance, which are at the center of the availability/affordability crisis, in fact are relatively competitive. For example, the 1977 report of the Task Force on Antitrust Immunities found that the property liability insurance industry "appears to possess an atomistic market structure," including over 900 companies. The Task Force also found that the restrictions to entry do not appear significant in the property liability insurance industry, and that there appears to be price competition in this line as a result of "an industry structure that favors competition." It is, of course, difficult to conceive how premiums are being kept at artificially high levels for a line of insurance in which prices appear to be competitively determined.

4. Finally, many of the strongest proponents of the loss recoupment theory also contend that these losses were the result of excessive price competition in the industry. Obviously, it is difficult to reconcile these arguments."

The Working Group has thus demonstrated that in addition to legal complexities, legislators who wish to deal intelligently with the insurance issue must cross the barriers of economics.

The national media, State and Federal political leaders, powerful private sector interest groups and an array of angry individual citizens have spun a tangled web of allegations and data that appears extremely intimidating. Yet Congress has no choice but to attempt to sort through this web by means of comprehensive and consistent analyses of the situation. If we allow a huge amalgam of anger and conflicting information to persist, we run the risk of permitting the generation not only of deep distrust between the constituents or our society, but of increasing cynicism. This would be especially disastrous for our legal system, which relies so heavily on the confidence of our citizens for its proper operation.

As a starting point, Congress might wish to consider an evaluation of the effect of changing insurance rates on the productivity and global competitiveness of U.S. companies.

At a time when we are discussing certain trade policies, would it not be interesting for us to also have an analysis of the impact, if any, of this increase in litigation, increase in insurance policy rates and in fact unavailability of insurance coverage for many actors in our economic system.

At bottom, Mr. Speaker, it is essential that Congress begin this process soon. Public pressure may force the House and Senate to act quickly, without the benefit of independent and thorough studies. Inappropriate revisions of either the judicial system or the insurance system might have disastrous consequences, given the critical roles they both play in the health, welfare and economic prosperity of Americans. The recent insurance turmoil in West Virginia may be suggestive of such consequences.

Some 7 or 10 years ago, Mr. Speaker, in my home State of California, we faced an immediate problem of crisis proportions concerning medical malpractice. We made major changes. It has taken over 7 years for us to go through the entire court process, to make sure that in fact the changes made by the legislature were constitutional.

Those changes now have been determined to be constitutional and in spirit and in fact parallel the very recommendations the President has made in the legislation that has been introduced.

Mr. Speaker, it seems to me this is a challenge which is upon us of crisis proportions; we are hearing from constituencies all across the board, all across the country. We must act; we must act now.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. HENDON (at the request of Mr. MICHEL), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BURTON of Indiana, for 60 minutes, on May 20.

(The following Members (at the request of Mr. GEKAS) to revise and extend their remarks and include extraneous material:)

Mr. GEKAS, for 5 minutes, today.

Mr. JEFFORDS, for 15 minutes, today.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 5 minutes, today.

Mr. BROOKS, for 5 minutes, today.

Mr. LANTOS, for 5 minutes, today.

Mr. MCCURDY, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mrs. SCHROEDER, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. CHAPMAN, for 5 minutes, today.

Mr. COLEMAN of Texas, for 60 minutes, on May 21.

Mr. CROCKETT, for 60 minutes, on June 12.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DANNEMEYER, to include extraneous matter on House Concurrent Resolution 337, in the Committee of the Whole, today.

Mr. GARCIA, prior to the vote on the Leland amendment to House Concurrent Resolution 337 in the Committee of the Whole today.

(The following Members (at the request of Mr. GEKAS) and to include extraneous matter:)

Mr. COATS.

Mr. DENNY SMITH.

Mr. SUNDQUIST.

Mr. RITTER.

Mr. MCGRATH.

Mr. KEMP in two instances.

Mr. WYLIE.

Mr. HUNTER.

Mr. JEFFORDS.

Mr. GILMAN in three instances.

Mr. DANNEMEYER.

Mr. COURTER.

Mr. TAUKE.

Mr. CRANE in two instances.

Mr. GOODLING.

Mr. CHENEY.

Mr. DORNAN of California.

Mr. HORTON.

Mr. GALLO.

Mrs. SCHNEIDER.

Mr. CRAIG.

Mr. BROOMFIELD.

Mr. LIGHTFOOT.

Mrs. JOHNSON.

(The following Members (at the request of Mr. GONZALEZ) and to include extraneous matter:)

Mr. COLEMAN of Texas.

Mr. LIPINSKI.

Mr. SKELTON in two instances.

Mr. YOUNG of Missouri.

Mr. BARNES in two instances.

Mr. ANNUNZIO.

Mr. MINETA.

Mr. STUDDS in two instances.

Mrs. LLOYD.

Mr. DOWNEY of New York.

Mr. HAWKINS.

Mr. RAHALL in two instances.

Mr. TRAFICANT.

Mr. PANETTA.

Mr. KANJORSKI in three instances.

Mr. FAZIO.

Mr. MONTGOMERY in two instances.

Mr. RODINO in two instances.

Mr. BOLAND.

Mr. MANTON.

Mr. WAXMAN.

Mr. STARK.

Mr. DORGAN of North Dakota.

Mr. BONKER.

Mr. FORD of Michigan

Mr. HOYER.

Mr. HERTEL of Michigan

Mr. TRAXLER.

Mr. MURTHA.

Mr. BOSCO.

Mr. DYMALLY.

Mr. DURBIN.

Mr. JONES of Tennessee.

ENROLLED BILL SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 1349. An act to reduce the costs of operating Presidential libraries, and for other purposes.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 974. An act to provide for protection and advocacy for mentally ill individuals, and for other purposes.

BILL PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following day present to the President, for his approval, a bill of the House of the following title:

On May 14, 1986:

H.R. 4767. An act to deauthorize the project for improvements at Racine Harbor, WI.

ADJOURNMENT

Mr. LUNGREN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 28 minutes p.m.) under its previous order, the House adjourned until Monday, May 19, 1986, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3509. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report of the value of property, supplies and commodities provided by the Berlin Magistrate for the quarter January 1, 1986, through March 31, 1986, pursuant to Public Law 99-190, section 8014; to the Committee on Appropriations.

3510. A letter from the Secretary of Education, transmitting a copy of final regulations for the assistance to States for education of handicapped children—State plan disapproval, pursuant to 20 U.S.C. 1232(d)(i); to the Committee on Education and Labor.

3511. A letter from the Secretary of Education, transmitting a copy of the notice of final funding priorities for postsecondary education programs for handicapped persons—regional centers for deaf individuals, pursuant to 20 U.S.C. 1232(d)(i); to the Committee on Education and Labor.

3512. A letter from the Secretary of Commerce, transmitting the annual report on the activities of the U.S. Travel and Tourism Administration for fiscal year 1985, pursuant to 22 U.S.C. 2123a; to the Committee on Energy and Commerce.

3513. A letter from the Director, Federal Mediation and Conciliation Service, transmitting a report of the agency's activities under the Freedom of Information Act during calendar year 1985, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3514. A letter from the Deputy Associate Director for Royalty Management, Department of the Interior, transmitting notification of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

3515. A letter from the Trustee of the St. George Island Trust, transmitting a copy of the audited financial statement of the St. George Island Trust, as of December 31, 1985, pursuant to 16 U.S.C. 1166(g) (Pub. L. 89-702, sec. 206(g) (97 Stat. 842)); to the Committee on Merchant Marine and Fisheries.

3516. A letter from the Director, Office of Personnel Management, transmitting the interim report on the Senior Executive Service; in addition to the nine required parts, a tenth part covering 5 U.S.C. 4314 is attached, pursuant to 5 U.S.C. 3135 and

4314(d); Public Law 95-454, section 415(b)(4); to the Committee on Post Office and Civil Service.

3517. A letter from the Administrator, General Services Administration, transmitting a copy of a lease prospectus to acquire 132,000 occupiable square feet of space for the Internal Revenue Service in Philadelphia, PA, pursuant to Public Law 86-249, section 7(a) (86 Stat. 217); to the Committee on Public Works and Transportation.

3518. A letter from the Administrator of Veterans Affairs, Veterans Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to eliminate or modify statutory requirements for the Veterans' Administration [VA] to prepare reports which no longer serve their original purposes; to the Committee on Veterans' Affairs.

3519. A letter from the Administrator of Veteran's Affairs, Veterans' Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to make certain improvements in the educational assistance programs for veterans eligible persons; to repeal the education loan program; and for other purposes; to the Committee on Veterans' Affairs.

3520. A letter from the Archivist, National Archives and Records Administration, transmitting a report on the plan for improving the management, maintenance, storage and preservation of military records, pursuant to Public Law 99-145, section 1626(b) (99 Stat. 778); jointly, to the Committees on Armed Services and Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WOLPE: Committee on Foreign Affairs. H.R. 4276. A bill to require that any United States Government support for military or paramilitary operations in Angola be openly acknowledged and publicly debated (Rept. 99-508, Pt. 2). Referred to the Committee of the Whole House on the State of the Union.

Mr. GLICKMAN: Committee on the Judiciary. H.R. 4588. A bill to authorize appropriations for the Administrative Conference of the United States, and for other purposes. (Rept. 99-603). Referred to the Committee of the Whole House on the State of the Union.

Mr. BEILENSON: Committee on Rules. H. Res. 456. Resolution providing for the consideration of H.R. 4800, a bill to enhance the competitiveness of American industry; and for other purposes. (Rept. 99-604). Referred to the House Calendar.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 4775. A bill to amend title 38, United States Code, to provide an exemption for the veterans' housing loan programs from any provision of law providing for the sequestration of budget authority generally throughout the Federal Government, and for other purposes. (Rept. 99-605). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GLICKMAN (for himself, Mr. FRANK, Mr. BERMAN, Mr. BOUCHER, Mr. STAGGERS, Mr. BRYANT, Mr. IRELAND, Mr. BEDELL, and Mr. STARK):

H.R. 4827. A bill to amend title 31, United States Code, with respect to the fraudulent use of public property or money; to the Committee on the Judiciary.

By Mr. BARTON of Texas (for himself and Mr. STENHOLM):

H.R. 4828. A bill to amend the Internal Revenue Code of 1954 to impose a tax on the importation of crude oil and petroleum products; to the Committee on Ways and Means.

By Mr. BOLAND (for himself, Mr. CONTE, and Mr. MINETA):

H.R. 4829. A bill to repeal Public Law 87-186 relating to the National Armed Forces Museum Advisory Board of the Smithsonian Institution; to the Committee on House Administration.

By Mr. MICHEL (for himself, Mr. LOTT, Mr. CHENEY, Mr. LEWIS of California, Mrs. MARTIN of Illinois, Mr. LAGOMARSINO, Mr. VANDER JAGT, Mr. DUNCAN, Mr. MADIGAN, Mr. HILLIS, Mr. CRANE, Mr. ROTH, Mr. BROOMFIELD, Mr. THOMAS of California, Mr. FRENZEL, Mr. ARCHER, Mr. LOEFFLER, Mr. KINDNESS, Mr. BROYHILL, Mr. CAMPBELL, and Mr. DAUB):

H.R. 4830. A bill to reform the trade laws; and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs; Ways and Means; Foreign Affairs; Energy and Commerce; Agriculture, and the Judiciary, for consideration of such portions of the bill as fall within the jurisdiction of those committees pursuant to paragraphs (d), (v), (i), (h), (a), and (m) of rule X, respectively.

By Mr. BROOKS:

H.R. 4831. A bill to provide for antitrust law violators to be subject to individual responsibility for treble the amount of damages attributable to their violations, and to assure fairness in the allocation and award of antitrust damages; to the Committee on the Judiciary.

By Mr. DANNEMEYER:

H.R. 4832. A bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes; jointly, to the Committees on the Judiciary and Energy and Commerce.

By Mr. DASCHLE:

H.R. 4833. A bill to integrate the West Potter Water Project District, SD, into the Pick-Sloan Missouri Basin program; to the Committee on Interior and Insular Affairs.

By Mr. DAVIS:

H.R. 4834. A bill to enhance boating safety by requiring the display on gasoline pumps of the type of alcohol, the percentage of each type of alcohol, and the percentage of cosolvents, if any, contained in the gasoline, and for other purposes; jointly, to the Committees on Energy and Commerce and Merchant Marine and Fisheries.

By Mr. GEJDENSON:

H.R. 4835. A bill to amend the Energy Reorganization Act of 1974 to create an Office of Inspector General in the Nuclear Regulatory Commission; to the Committee on Interior and Insular Affairs.

By Mr. HAMMERSCHMIDT:

H.R. 4836. A bill to amend section 403 of the Federal Aviation Act of 1958 to ensure fair treatment of airline employees in airline mergers and similar transactions; to the Committee on Public Works and Transportation.

By Mrs. JOHNSON:

H.R. 4837. A bill to exclude from importation for certain periods all goods and services of persons who engage in the dumping of goods into the United States; to the Committee on Ways and Means.

By Mr. MINETA (for himself, Mr. HOWARD, Mr. SNYDER, Mr. ANDERSON, Mr. STANGELAND, Mr. ROE, Mr. CLINGER, Mr. BREAUX, Mr. MOLINARI, Mr. OBERSTAR, Mr. MCEWEN, Mr. NOWAK, Mr. SUNDQUIST, Mr. EDGAR, Mrs. JOHNSON, Mr. YOUNG of Missouri, Mr. BOEHLERT, Mr. RAHALL, Mr. GALLO, Mr. APPLEGATE, Mrs. BENTLEY, Mr. DE LUGO, Mr. ROWLAND of Connecticut, Mr. SAVAGE, Mr. BOSCO, Mr. MOODY, Mr. BORSKI, Mr. KOLTER, Mr. TOWNS, Mr. LIPINSKI, Mr. WISE, Mr. GRAY of Illinois, Mr. VISCLOSKY, Mr. TRAFICANT, Mrs. LONG, and Mr. PERKINS):

H.R. 4838. A bill to amend section 408 of the Federal Aviation Act of 1958 to ensure fair treatment of airline employees in airline mergers and similar transactions; to the Committee on Public Works and Transportation.

By Mr. MONTGOMERY (for himself and Mr. HAMMERSCHMIDT):

H.R. 4839. A bill to establish a pilot program for the improvement of the efficiency and economy of Veterans' Administration medical centers; to the Committee on Veterans' Affairs.

By Mr. PANETTA:

H.R. 4840. A bill to provide a rental housing lease indemnity program by the Department of Defense; to the Committee on Armed Services.

By Mr. PERKINS (for himself and Mr. GOODLING):

H.R. 4841. A bill to amend the Carl D. Perkins Vocational Education Act with respect to State allotments under the Act; to the Committee on Education and Labor.

By Mrs. SCHROEDER (for herself and Mr. DORGAN of North Dakota):

H.R. 4842. A bill to provide for a phased reduction in the number of members of the United States Armed Forces stationed ashore outside the United States; to the Committee on Armed Services.

By Mr. SHARP (for himself, Mr. BRYANT, Mr. EDGAR, Mr. RALPH M. HALL, Mr. LELAND, Mr. RICHARDSON, Mr. SHELBY, Mr. SYNAR, Mr. TAUZIN, and Mr. WALGREN):

H.R. 4843. A bill to amend the Energy Policy and Conservation Act for the purpose of improving national energy policy; jointly, to the Committees on Armed Services and Energy and Commerce.

By Mr. STALLINGS:

H.R. 4844. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the North Side Pumping Division Extension, Minidoka Project, ID, for irrigation, fish and wildlife, and other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HOWARD (for himself, Mr. SNYDER, Mr. ANDERSON, and Mr. SHUSTER):

H.J. Res. 636. Joint resolution designating June 26, 1986, as "National Interstate Highway Day"; considered and passed.

By Mr. CARPER:

H.J. Res. 637. Joint resolution proposing an amendment to the Constitution relating to Federal budget procedures; to the Committee on the Judiciary.

By Mr. ROBERTS:

H.J. Res. 638. Joint resolution to designate the week beginning November 9, 1986, as "National Reye's Syndrome Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. SCHULZE:

H. Res. 457. Resolution amending the Rules of the House of Representatives to reduce the number of pieces of franked mass mail that may be sent by each Member and to authorize each Member to establish a newsletter fund as a special office account; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, a memorial was presented and referred as follows:

378. The SPEAKER presented a memorial of the Senate of the State of Hawaii, relative to peaceful uses of space by the United States and the Soviet Union; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 128: Mr. FRENZEL.

H.R. 585: Mr. BOSCO.

H.R. 1029: Mr. BUSTAMANTE and Mr. TORRICELLI.

H.R. 1059: Mr. WEBER.

H.R. 1219: Mr. RAY and Mr. SILJANDER.

H.R. 1575: Ms. SNOWE, Mr. GLICKMAN, Mrs. MARTIN of Illinois, Mr. DELLUMS, Mr. WEISS, Mr. OBERSTAR, Mr. MATSUI, Mr. HEFTEL of Hawaii, Mr. BARNES, Mr. KOSTMAYER, and Mr. PURSELL.

H.R. 1840: Mr. SWIFT.

H.R. 1946: Mr. ROE, Mr. PURSELL, and Mr. WHITTAKER.

H.R. 2109: Mr. JEFFORDS.

H.R. 2127: Mr. DORGAN of North Dakota.

H.R. 2361: Mr. RAHALL, Mr. MCHUGH, and Ms. MIKULSKI.

H.R. 2406: Mrs. BURTON of California, Mr. MINETA, AND Mrs. BOXER.

H.R. 2573: Ms. MIKULSKI.

H.R. 2697: Mr. ROWLAND of Georgia.

H.R. 2793: Mr. YATES and Mr. SKEEN.

H.R. 3388: Mr. ROBERTS, Mr. SLAUGHTER, Mr. BARNARD, Mrs. BYRON, Mr. JENKINS, Mr. TAYLOR, Mr. DWYER of New Jersey, Mr. MOLINARI, Mr. BROOMFIELD, Mr. HOPKINS, Mr. STENHOLM, Mrs. LLOYD, Mr. MONTGOMERY, Mr. ANTHONY, Mr. EMERSON, Mr. SPENCE, Mr. RALPH M. HALL, Mr. YOUNG of Alaska, Mr. WEBER, Mr. MACK, Mr. ARMEY, Mr. DANNEMEYER, Mr. LEWIS of California, Mr. BADHAM, Mr. DREIER of California, Mr. LOTT, Mr. LEATH of Texas, and Mr. MICHEL.

H.R. 3799: Mr. TRAFICANT, Mr. DONNELLY, Mr. PEPPER, Mr. BRYANT, Mr. DOWNEY of New York, Mr. DOWDY of Mississippi, Mr. COYNE, Mr. MITCHELL, and Mr. LEVINE of California.

H.R. 3814: Mr. HYDE.

H.R. 3817: Mrs. LONG, Ms. MIKULSKI, and Mr. TAUZIN.

H.R. 3906: Mr. SHELBY.

H.R. 3950: Mr. BARNES and Mr. ANDERSON.

H.R. 4003: Mr. HEFTEL of Hawaii, Ms. MIKULSKI, and Mr. LOWERY of California.

H.R. 4096: Mr. SAVAGE, Mr. GINGRICH, Mrs. VUCANOVICH, Mr. LEVINE of California, Mr. MONSON, Mr. BADHAM, Mr. STANGELAND, Mr. FORD of Tennessee, Mr. HOPKINS, and Mr. RICHARDSON.

H.R. 4182: Mr. FRANK, Mr. TOWNS, Mr. LELAND, Mr. LAFALCE, Mr. BONIOR of Michigan, Mrs. BENTLEY, Mr. FAZIO, Mr. RANGEL, Mr. BARNES, Mr. RAHALL, Mr. VENTO, Mr. ROE, Mr. NEAL, Mr. HAYES, Mr. MARTINEZ, and Mr. KOLBE.

H.R. 4278: Mr. PURSELL.

H.R. 4391: Mr. WILLIAMS, Mr. ANDERSON, Mr. RICHARDSON, Mr. MOORE, Mr. BOEHLERT, and Mr. MCCLOSKEY.

H.R. 4442: Mr. OXLEY and Mr. PACKARD.

H.R. 4460: Mr. BARTON of Texas.

H.R. 4488: Mr. DICKS, Mr. LAFALCE, Mr. TRAFICANT, Mr. MARKEY, Mr. EDWARDS of California, and Mr. FAUNTROY.

H.R. 4524: Mr. SMITH of New Jersey, Mr. LIGHTFOOT, Mr. MONSON, and Mr. MITCHELL.

H.R. 4538: Mr. MCEWEN, Mr. DAUB, Mr. SHUMWAY, Mr. ECKERT of New York, Mr. VENTO, Mr. COATS, Mr. SAXTON, Mrs. HOLT, Mr. LIVINGSTON, Mr. WYLIE, Mrs. JOHNSON, Mr. LOTT, Mrs. MARTIN of Illinois, Mr. STENHOLM, Mr. RIDGE, Mr. RITTER, and Mr. TAUKE.

H.R. 4604: Mr. ANTHONY, Mr. WILSON, Mr. WALKER, Mr. VANDER JAGT, Mr. DORNAN of California, Mr. SKEEN, Mr. PORTER, Mr. ARMEY, and Mr. GINGRICH.

H.R. 4630: Mr. SPENCE, Mr. YATES, Mr. GEJDENSON, Mr. MOAKLEY, and Mr. ATKINS.

H.R. 4638: Mr. YATRON, Mrs. SCHNEIDER, Mr. RIDGE, Mr. LAFALCE, Mr. DOWNEY of New York, Mr. MRAZEK, Mr. PENNY, Mr. MILLER of Washington, Mr. MACKAY, Mr. PANETTA, Mr. LEACH of Iowa, Mr. HOWARD, and Mrs. KENNELLY.

H.R. 4650: Mr. MCCLOSKEY, Mr. OWENS, and Mr. LELAND.

H.R. 4668: Mr. RAY, Mrs. SCHNEIDER, Mr. SENSENBRENNER, and Mr. VALENTINE.

H.R. 4675: Mr. WORTLEY, Mr. DORNAN of California, and Mr. RALPH M. HALL.

H. Res. 454: Mr. MINETA, Mr. EDWARDS of California, Mr. LUJAN, Mr. ZSCHAU, Mr. MORRISON of Connecticut, Mr. BEDELL, Mr. KINDNESS, Mr. WEAVER, Mr. FRANK, and Mr. UDALL.

PETITIONS, ETC.

Under clause 1 of rule XXII,

353. The SPEAKER presented a petition of the Board of Education, Unit District No. 205, Elmhurst, IL, relative to certain provisions of H.R. 3838, the Tax Reform Act; which was referred to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4800

By Mr. AUCOIN:

—Page 185, between lines 10 and 11, insert the following:

SEC. 179. SENSE OF CONGRESS REGARDING ACCESS TO THE JAPANESE SEMICONDUCTOR MARKET.

(a) CONGRESSIONAL FINDINGS.—The Congress finds that—

(1) the maintenance of a healthy domestic semiconductor industry is essential to the development of the United States economy and the preservation of the national security of the United States;

(2) the United States semiconductor industry is a world leader in semiconductor technology and has demonstrated its competitiveness in all markets to which it has had free access;

(3) in 1983, the Department of Commerce and the United States Trade Representative concluded that evidence "suggested that the intent of the Government of Japan . . . has been to offset the effects of liberalization" of the semiconductor market;

(4) on June 14, 1985, the Semiconductor Industry Association filed a petition with the United States Trade Representative requesting the President to take action to open the Japanese semiconductor market to United States semiconductor manufacturers, and, on July 11, 1985, the United States Trade Representative initiated an investigation into the allegations supporting such request;

(5) negotiations are underway with the Government of Japan to resolve the issue of free access to the Japanese semiconductor market, but such negotiations have not progressed; and

(6) the semiconductor trade issue should be resolved through a program to increase, rather than restrict, international semiconductor trade.

(b) SENSE OF CONGRESS.—In view of the findings under subsection (a), it is the sense of Congress that—

(1) the Government of Japan should allow United States semiconductor manufacturers full and substantial access to the Japanese semiconductor market; and

(2) the President should immediately—

(A) take all appropriate and feasible action in his power to achieve full and substantial access to the Japanese semiconductor market for United States semiconductor manufacturers, and

(B) determine if the actions of the Government of Japan in restricting access to its semiconductor market warrant Presidential action under section 301 of the Trade Act of 1974.

Amend the table of contents of the bill by inserting after the entry for section 178 the following:

"Sec. 179. Sense of Congress regarding access to the Japanese semiconductor market.".

By Mr. BONKER:

—Strike section 452 and insert the following:

SEC. 452. AMENDMENTS TO TRADE AND DEVELOPMENT ENHANCEMENT ACT OF 1983.

(a) FUNCTIONS OF NATIONAL ADVISORY COUNCIL ON INTERNATIONAL MONETARY AND FINANCIAL POLICIES.—Section 646 of the Trade and Development Enhancement Act of 1983 (12 U.S.C. 635s) is amended—

(1) in subsection (a)(2) by striking "without the unanimous consent of the members of the National Advisory Council on International Monetary and Financial Policies" and inserting "unless a majority of the members of the National Advisory Council on International Monetary and Financial Policies approve the financing"; and

(2) by adding at the end the following:

"(b)(1) It shall be the duty of the National Advisory Council on International Monetary and Financial Policies to—

"(A) establish policy and procedure guidelines for the development, implementation, and coordination of the programs authorized by sections 644 and 645;

"(B) oversee the operation of those programs;

"(C) recommend improvements in the manner in which those programs are carried out;

"(D) encourage private financial institutions to participate in those programs; and

"(E) develop a system, incorporating both public and private sources of information, for monitoring the use of tied aid credits by foreign governments.

"(2) In connection with the establishment of policy and procedure guidelines pursuant to paragraph (1)(A), the National Advisory Council shall—

"(A) recommend procedures which would assure that if an application is submitted to the Export-Import Bank or the Agency for International Development for assistance under section 644 or 645, the application can be processed and the assistance made available within 30 calendar days after the application is submitted;

"(B) establish a policy with regard to—

"(i) the degree to which proof is required, in order to receive assistance under section 644 or 645, that a foreign offer of a tied aid credit has been made or (on the basis of past practice or a course of dealing) can reasonably be expected; and

"(ii) the time at which and the manner in which evidence of such offer shall be submitted;

"(C) devise a method for determining the number of American jobs which will be created or retained through assistance under this Act, and give such factor consideration in making assistance available; and

"(D) describe the method of publicizing the availability of financing under sections 644 and 645, and the terms and conditions under which such assistance is available to both large and small exporters.".

(b) REPORT TO CONGRESS AND TERMINATION OF ACT.—The Trade and Development Enhancement Act of 1983 is amended by adding at the end the following new sections:

"SEC. 648. REPORT TO CONGRESS.

"The President shall transmit to the Congress, on a quarterly basis, a report setting forth the activities carried out under sections 644 and 645. Each such report shall include—

"(1) information on applications used by the Export-Import Bank and the Agency for International Development for making as-

sistance available under sections 644 and 645;

"(2) information on the disposition of such applications;

"(3) an identification of the foreign governments whose behavior the President is trying to influence by the use of such assistance, and an explanation of why the assistance involved is deemed likely to influence that behavior;

"(4) evidence that clearly demonstrates that assistance under sections 644 and 645 has been used for the purposes of this Act;

"(5) information on any progress that has been made in negotiations on agreements within the Organization for Economic Cooperation and Development to limit the use of tied aid credits;

"(6) information on the extent to which tied aid credits are being used at the time of such report by major trading countries within such Organization, the terms of any such credits, and the market sectors with respect to which such credits are being used; and

"(7) information on the extent to which assistance under this Act has been effective—

"(A) in discouraging the use of tied aid credits for commercial purposes by other countries; and

"(B) in helping to protect United States exporters from unfair and predacious official export competition.

"SEC. 649. TERMINATION OF AUTHORITIES.

"The authorities contained in this Act shall cease to be effective upon a certification by the President to the Congress that a majority of the members of the National Advisory Council on International and Monetary Financial Policies have determined that—

"(1) the United States has reached an agreement with the governments of the other member countries of the Organization for Economic Cooperation and Development which ends abuse of tied aid credits in pursuit of national commercial benefits; and

"(2) these governments are honoring the terms of that agreement.".

(c) FUNDING BY THE AGENCY FOR INTERNATIONAL DEVELOPMENT.—Section 645(d) of Trade and Development Enhancement Act of 1983 (12 U.S.C. 635r(d)) is amended by striking "allocated for Commodity Import Programs".

—Add the following at the end of title IV (page 324, after line 18):

Subtitle E—Export Trading Companies

SEC. 481. EXPORT TRADING COMPANIES.

(a) REPORT ON EXPORT TRADING COMPANIES.—The Export Trading Company Act of 1982 (15 U.S.C. 4001 et seq.) is amended by inserting after section 104 the following new section:

"SEC. 105. REPORT ON EXPORT TRADING COMPANIES.

"Not later than one year after the date of the enactment of the Trade and International Economic Policy Reform Act of 1986 and annually thereafter, the Secretary of Commerce shall submit a report to the Congress on the activities of the Department of Commerce to promote and encourage the formation of export trade associations and export trading companies. The report shall include a survey of the activities of export management companies and export trade associations, as well as an analysis of the operating experiences of those export trading companies established pursuant to this Act. The report shall not contain any information subject to the protections from disclosure provided in this Act.".

(b) DEFINITION OF EXPORT TRADING COMPANY.—Section 4(c)(14)(F)(i) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(F)(i)) is amended by striking "for purposes of exporting goods or services produced in the United States" and inserting "for purposes of exporting goods or services produced in the United States by that company, its affiliates, or unaffiliated persons,".

(c) DEFINITION OF PRINCIPALLY ENGAGED IN EXPORTING.—Section 4(c)(14)(F) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(F)) is amended—

(1) by striking the period at the end of clause (i) and inserting a semicolon;

(2) By striking "and" at the end of clause (iii);

(3) by striking the period at the end of clause (iv) and inserting a semicolon; and

(4) by inserting after clause (iv) the following new clauses:

"(v) an export trading company shall be treated as organized and operated principally for the purposes described in clause (i) if that company derives more than one-half of its revenues in each consecutive five-year period from—

"(I) the export of goods or services produced in the United States by that company, its affiliates, or unaffiliated person, or

"(II) from facilitating the export of goods or services produced in the United States by unaffiliated persons by providing one or more export trade services; and

"(vi) for the purpose of clause (v), revenues from third party trade, and the value of goods or services taken back by the export trading company as part of a countertrade transaction, shall be treated as export revenues if such third party trade or countertrade transaction (as the case may be) involves the export of goods or services produced in the United States.".

(d) RELATIONS WITH AFFILIATES.—Section 23A(d) of the Federal Reserve Act (12 U.S.C. 371c(d)) is amended—

(1) by striking "and" at the end of paragraph (6);

(2) by striking the period at the end of paragraph (7) and inserting "; and"; and

(3) by adding at the end the following:

"(8) transactions with an affiliate which is an export trading company, as defined in section 4(c)(14)(F)(i) of the Bank Holding Company Act of 1956.".

(e) INVENTORY.—Section 4(c)(14)(A) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(A)) is amended—

(1) by redesignating clauses (v) and (vi) as clauses (vi) and (vii), respectively; and

(2) by inserting after clause (iv) the following:

"(v) The Board may not impose, by regulation, a dollar limit on the amount of goods which export trading companies may maintain in inventory; except that the Board may impose, by order, a dollar limit on the amount of goods which a particular export trading company may maintain in inventory after such company has been operating for a reasonable period of time if, under the particular facts and circumstances, it finds that such limit is necessary to prevent risks that would affect the financial or managerial resources of an investor bank holding company to an extent which is likely to have a materially adverse effect on the safety and soundness of any subsidiary bank of such bank holding company.".

By Mr. BROYHILL:

—Page 382, strike out lines 20 and 21 and insert the following:

PRACTICES, ADJUSTMENT PLAN REVIEW, AND TEXTILE IMPORT ADJUSTMENTS

Page 407, between lines 3 and 4, insert the following:

SEC. 703. ENTRY PROCESSING FOR TEXTILES AND APPAREL.

The Congress determines that it is vital to the purposes of the Multi-Fiber Arrangement that bilateral limitations on shipments of textiles and apparel, and periodic adjustments to those limitations, be carried out on a timely basis in order to respond to the changing United States market for textiles and apparel. The Secretary of Commerce shall, within 90 days after the date of the enactment of this Act, institute procedures to expedite the interagency process for recommending and approving the issuance of notices requesting consultations and negotiations on such limitations and periodic adjustments.

Amend the table of contents to the bill accordingly.

By Mr. COLEMAN of Texas.

—Page 255, after line 9, insert the following new section (and redesignate existing section 352 as section 353):

SEC. 352. RELATIONS WITH MEXICO.

(a) FINDINGS.—The Congress finds that—

(1) Mexico and the continued stability of its governing structure is of vital strategic importance to the national security interests of the United States;

(2) while the economic, cultural, and historical ties between Mexico and the United States are both varied and strong, foreign relations between the governments of these countries continue to be carried out on an ad hoc basis and in a crisis-to-crisis context;

(3) the failure by the United States to establish a comprehensive and ongoing foreign policy with respect to Mexico manifests itself in legislative and administrative policies which often have unintended adverse or contradictory results in the two countries;

(4) the absence of an established United States foreign policy with respect to Mexico also works against the possible resolution of myriad bilateral issues now confronting the two countries; and

(5) in order to improve relations with Mexico, the United States Government must take actions, conducted in the spirit of mutual respect and cooperation, which prioritize its foreign and economic policies toward Mexico.

(b) UNITED STATES-MEXICO BILATERAL COMMISSION.—(1)(A) The President shall establish an interagency group to be known as the "United States-Mexico Bilateral Commission" (hereafter in this subsection referred to as the "Commission").

(B) Membership on the Commission shall be composed of the Secretary of State, the Secretary of the Treasury, the Attorney General, the Secretary of Commerce, and the United States Trade Representative.

(C) The Chairman of the Commission shall be the Secretary of State (or a delegate of the Secretary).

(D)(i) The members of the Commission shall (not later than 3 months after the date of enactment of this Act) execute a written memorandum of understanding which includes the goal of the Commission. The goal of the Commission shall be—

(I) to serve as a formal mechanism by which economic relations between the United States and Mexico are conducted in a comprehensive manner which allows input from any concerned agency of the United States; and

(II) to provide a channel of communication between the Government of the United States and the Government of Mexico pertaining the economic relations.

(ii) Not later than six months after the execution of the memorandum of understanding, each member of the Commission shall present to the Commission a review of all United States-Mexico issues which affect that member's agency. Each presentation shall include an assessment of, as well as recommendations for, action by that member.

(2)(A) Not later than three months after the date of the enactment of this Act, the President shall report to the Congress on the actions taken and the progress made to establish the Commission. The report shall include any necessary legislative recommendations to assist the President in establishing the Commission as well as a time certain for the Commission's establishment.

(B) Not later than six months after the date of enactment of this Act and every three months thereafter, the Chairman of the Commission shall report to the Congress on the activities of the Commission. Each such report shall include the specific projects, issues, and agency actions taken to achieve the goal of the Commission which occurred in the three-month period preceding the last such report as well as proposed projects, issues, and agency actions.

(3) The Commission shall endeavor to meet semiannually with representatives of Mexico in order to carry out the goal of the Commission.

(d) BILATERAL SUMMIT ON ECONOMIC RELATIONS.—(1) It is the sense of the Congress that, consistent with the goal of strengthening political and commercial relations between the United States and Mexico, a bilateral summit on economic relations as they pertain to trade and commerce, between these two countries should be held. The objectives of the summit should include—

(A) a discussion of the question of Mexico as a contracting party to the General Agreement on Tariffs and Trade;

(B) a discussion of the pending graduation from the Generalized System of Preferences of those Mexican products currently covered under such System;

(C) the promotion of direct investment in Mexico by United States businesses;

(D) the resolution of problems related to United States fishing rights within the territorial waters of Mexico;

(E) the resolution of problems related to the trucking and transportation of products between the United States and Mexico, including a discussion of the construction of international bridges as a means to help alleviate these trucking and transportation problems;

(F) a discussion of the possibility of eventually establishing a free-trade zone along both sides of the United States-Mexico border;

(G) promotion of the development of industry along the United States-Mexico border regions in order to encourage increased employment opportunities;

(H) a discussion of the policies related to the development of the petroleum industry and alternative energy sources in the United States and Mexico;

(I) a discussion of the issues related to pollution arising from sources within the United States or Mexico which affects the other country, including water pollution, air pollution, soil pollution, and sewage treatment;

(J) a discussion on the development and coordination of border crossings between the United States and Mexico;

(K) a review and evaluation of all joint research and development projects currently being conducted between the United States and Mexico at both private and public levels, including projects in the areas of business, health, technology, and public policy;

(L) a discussion of mutual problems and concerns that confront both the United States and Mexico in the development of a comprehensive national policy regarding immigration; and

(M) a discussion of mutual problems and concerns that confront both the United States and Mexico on the issues of external debt and foreign investment.

(2) The President is urged to enter into negotiations with representatives of the Government of Mexico for the purpose of commencing talks between the United States and Mexico in order to achieve the objectives described in paragraph (1).

By Mr. CRANE:

—Amend subtitle A of title I. On page 12, line 18, strike the word "because" and all that follows thereafter through line 24, and insert in lieu thereof: ", in which case the President must announce alternative measures which may include a continuation of negotiations".

On page 13, strike lines 6 through 14; on line 18, place a period after the word "targeting" and strike all that follows through line 21 on page 14. On page 21, beginning on line 4, strike section 113.

On page 19, strike line 9 and all that follows thereafter through line 9 on page 20.

Beginning on page 37, strike section 119.

By Mr. DINGELL:

—Page 195, line 23, insert before the period at the end of subparagraph (B) of section 205(b)(3) the following: ", and for purposes of applying this subparagraph, references in subsections (c) and (e)(6) of such section to services and to service sectors shall be considered to include telecommunications products and services and telecommunications product and service sectors, respectively".

By Mr. EVANS of Illinois:

—Page 355, line 14, after "international trade" insert the following: ", including the mass layoffs and plant closings that are caused by or substantially related to the conduct of government procurements in accordance with title III of the Trade Agreements Act of 1979".

By Mr. FRENZEL:

—Amend subtitle B of title I. On page 57, strike line 17 and all that follows thereafter through line 13 on page 61. On page 404, strike line 14 and all that follows thereafter through line 3 on page 407.

On page 68, lines 12 and 22, and on page 69, lines 1, 10 and 17, strike "Trade Representative" and insert "President". Make conforming changes to maintain Presidential authority to provide relief.

On page 94, beginning on line 9, strike section 122.

—Amend subtitle B, chapter 2, of title I. On page 111, beginning on line 12, strike section 135.

On page 19, between line 15 and 16, insert the following:

"(A) constitutes unfair government pricing of natural resources or of the right to remove or extract natural resources."

On page 119, beginning on line 1, strike section 137.

On page 123, beginning on line 5, strike section 138.

By Mr. JEFFORDS:

—Strike out all of title V of the bill and insert in lieu thereof the following:

TITLE V—EDUCATION AND TRAINING

Subtitle A—Education

SEC. 501. REPLACEMENT AND MODERNIZATION OF COLLEGE RESEARCH FACILITIES.

(a) PURPOSE.—It is the purpose of this section to assist in revitalizing the Nation's academic research programs through capital investments in laboratories and other research facilities at universities and colleges.

(b) PROGRAM ESTABLISHMENT.—To carry out this purpose, the Secretary of Education shall, from the sums available under subsection ( ) to carry out this section in any fiscal year, establish and carry out a new university research laboratory modernization program that will provide assistance for the replacement or modernization of such institutions' obsolete laboratories and other research facilities.

(c) COMPETITIVE GRANTS; REGULATIONS.—The university research laboratory modernization program established pursuant to subsection (b) shall be carried out through projects which involve the replacement or modernization of specific research facilities at the universities and colleges involved and for which funds are awarded in response to specific proposals submitted by such universities and colleges, in accordance with regulations prescribed by the Secretary of Education to carry out the purpose of this part. The regulations so prescribed shall contain such terms, conditions, and guidelines as may be necessary in the light of that objective, but shall in any event provide that funds to carry out the program will be awarded on a competitive basis, and that the funds so awarded to any university or college will be in an amount not exceeding 50 percent of the cost of the replacement or modernization involved (with the funds required to meet the remainder of such cost being provided by the institution involved or from other non-Federal public or private sources).

(d) CRITERIA FOR AWARD.—Criteria for the award of funds to any institution for a project under a university research laboratory modernization program shall include—

(1) the quality of the research and training to be carried out in the facility or facilities involved;

(2) the congruence of the institution's research activities with the future research mission of the agency making the award; and

(3) the contribution which the project will make toward meeting national, regional, and State research and related training needs.

(e) EQUALIZATION OF FEDERAL FUNDS.—At least 15 percent of the amount available under this section in any fiscal year shall be available only for awards to universities and colleges that received less than $10,000,000 in total Federal obligations for research and development (including obligations for the university research laboratory modernization program) in each of the two preceding fiscal years.

(f) CONSULTATION.—In prescribing regulations and conducting the program under this section, the Secretary of Education shall consult with—

(1) the National Science Foundation;

(2) the Department of Health and Human Services;

(3) the Department of Defense;

(4) the Department of Energy;

(5) the National Aeronautics and Space Administration; and

(6) the Department of Agriculture.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $185,000,000 for each of the fiscal years 1987 and 1988.

SEC. 502. EDUCATIONAL PARTNERSHIP PROGRAMS AUTHORIZED.

(a) PROGRAM AUTHORIZED.—From the funds available to carry out this subtitle, the Secretary shall make grants in accordance with the requirements of this subtitle to institutions of higher education to establish and operate educational partnership programs in accordance with the requirements of this section.

(b) COMPETITIVE SELECTION OF GRANT RECIPIENTS.—The Secretary shall award grants under this section competitively, on the basis of the quality of the proposal contained in the institution's application under subsection (d).

(c) LIMITATIONS ON AWARDS.—In making awards under subsection (a), the Secretary shall ensure that—

(1) there is an equitable geographic distribution of the funds awarded under this subtitle; and

(2) the award to any institution or consortium of institutions is not less than $100,000 or more than $500,000 for any fiscal year.

(d) APPLICATIONS.—An institution of higher education or consortium of such institutions that desires to obtain a grant under this subtitle shall submit an application to the Secretary that contains—

(1) a description of the activities that will be performed with funds made available under this section;

(2) assurances that the institution will obtain from donors, or otherwise provide from non-Federal sources, not less than one-half of the costs of the programs conducted with funds made available under this section;

(3) a description of the resources available to meet the requirements of paragraph (2); and

(4) such other information and assurances as the Secretary may require by regulation.

(e) USE OF FUNDS.—Funds made available pursuant to this section may be used for costs associated with establishment and operation of educational partnerships between institutions of higher education and local educational agencies to provide advanced instruction to students in—

(1) mathematics, science, or computer technology;

(2) a language determined by the Secretary to be critical to the capability of American business to compete in international trade; or

(3) another area of national need as determined by the Secretary.

(f) SPECIFICALLY PERMITTED USES.—Permissible uses of funds under this section include—

(1) costs associated with entering into resource sharing with government, private business, industry, and institutions;

(2) stipends or salary supplements for university faculty and staff involved in the educational partnership program under this title;

(3) development of curriculum that provides superior preparation in any one or more of the areas of mathematics, science, and technology;

(4) acquisition of textbooks, materials, and supplies to be utilized in instructional programs to be used under this title; and

(5) additional transportation costs for students as a result of their participation in the educational partnership program under this title.

(g) USE FOR GENERAL OVERHEAD PROHIBITED.—Funds made available pursuant to a grant under this section may not be used in connection with the general overhead costs of the applicant.

(h) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $50,000,000 for each of the fiscal years 1987 and 1988.

Subtitle B—Training

SEC. 521. WORKER READJUSTMENT AND PLACEMENT COMMITTEES.

(a) GRANTS TO WORKER READJUSTMENT AND PLACEMENT COMMITTEES.—From the funds available to carry out this section, the Secretary shall award, on a competitive basis, grants to worker readjustment and placement committees to provide not more than one-half of the cost of establishing and operating programs of training, retraining, and education for eligible workers.

(b) ELIGIBILITY FOR GRANTS.—To be eligible for a grant under this section, a worker readjustment and placement committee shall demonstrate to the Secretary in its application that—

(1)(A) the committee was established by a voluntary cooperative agreement, between the employer and the employees employed at or operating out of a single site, that complies with the requirements of subsection (e), and (B) the employer has certified that it will comply with the terms of such agreement;

(2) the committee does not have, as one of its purposes, the discouragement of the exercise of rights contained in section 7 of the National Labor Relations Act (29 U.S.C. 157) or the interference with collective bargaining in any plant or industry;

(3) the employer is undertaking a modernization or other production adjustment program in order to remain or become competitive in international markets;

(4) the employer has undertake to provide or to secure from non-Federal sources the remaining one-half of the costs of program under this section;

(5) the programs to be provided will be in addition to training programs already provided or required to be provided;

(6) an identification of (A) the persons or agencies from whom services will be obtained for employees under this section and (B) the specific services that will be provided; and

(7) a description of any arrangements that have been made with the administrative entity for a service delivery area in the vicinity for the purpose of—

(A) obtaining information concerning (and improved access to) educational and training services available in the locality, such as institutional skill training, on-the-job training, training programs operated by employers or labor organizations, or on-site, industry-specific training supportive of industrial or economic development;

(B) providing, through the service delivery area, local providers of education and training with information concerning the needs of the committee for their services; and

(C) assessing such training and educational needs, providing information and recommendations regarding such needs to local educational and training service providers, and matching such training needs to the programs available.

(c) ELIGIBLE WORKERS.—For the purpose of programs under this section, an eligible worker is a worker who is or may be at risk of losing employment because of skill obsolescence or because of a moderization or other production adjustment program which his or her employer is undertaking in order to remain or become competitive in international markets.

(d) USE OF FUNDS FOR SERVICES.—A worker readjustment and placement committee may use funds under this section to provide to or obtain for eligible workers any one or more of the following services:

(1) early warning adjustment services in the event of mass layoffs or plant closings including such services as personal and financial counseling, referral to community services, career counseling, job search assistance, job development, retraining, and relocation assistance;

(2) aptitude testing and career counseling;

(3) on-the-job training;

(4) institutional training;

(5) tuition assistance;

(6) upgrading of skills; and

(7) education, including basic skills and literacy training as well as more advanced education intended to increase the proficiency and adaptability of workers in a changing work environment.

(e) REQUIREMENTS FOR AGREEMENTS.—The cooperative agreement providing for the establishment of a worker readjustment and placement committee meets the requirements of this subsection if the agreement—

(1) provides that there shall be at least as many representatives of employees on the committee as there are representatives of the employer;

(2) provides that where eligible employees have designated one or more exclusive representatives under the National Labor Relations Act, each of those representatives shall serve on the committee as representatives of those employees;

(3) provides that eligible employees who have not designated an exclusive representative under the National Labor Relations Act may be represented on the committee by such a representative or by one of such employees as chosen in a secret ballot election, except that the ratio of the number of employee representatives chosen pursuant to this paragraph to the number of representatives selected under paragraph (2) may not exceed the ratio of the number of employees who are not represented by an exclusive representative as provided under the National Labor Relations Act to the number of employees who are so represented;

(4) provides that all decisions of the committee shall be by mutual agreement of a majority of the employer representatives and a majority of employee representatives on the committee; and

(5) provides that (A) committees may designate, by mutual agreement of employer and employee representatives on the committee, one individual, not otherwise employed by or under contract to the employer, to act as chairperson of the committee, and (B) where such an individual is not so designated, the chairperson shall be designated by mutual agreement of the employer and employee representatives on the committee from among the employee representatives on the committee.

(f) CONTRACT FOR PERFORMANCE OF SERVICES.—Upon approval of a grant request but prior to providing any funds, the Secretary shall require the committee and the employer to enter into a contract with the Secretary to perform the services for which the Secretary is providing funds under this section.

(g) TERMINATION OF FUNDING.—The Secretary shall not provide any additional financial assistance to any committee after receiving notice from the chairperson selected under subsection (e)(5) that the representatives of either the employer or the employees on the committee, or both, have expressed, in writing, an unwillingness to participate in the further activities of the committee. A chairperson shall so notify the Secretary within 10 days after receiving an expression of such unwillingness, unless it is earlier withdrawn.

(h) REGIONAL TECHNICAL ASSISTANCE.—The Secretary shall identify individuals, including employees of the Department of Labor, who shall be available on a regional basis to provide planning, operational, and technical assistance to worker readjustment and placement committees described in subsection (b).

(i) NO DISCRIMINATION BASED ON EMPLOYEE REPRESENTATION.—In administering the assistance authorized under this section, the Secretary shall not discriminate on the basis of employee representation or the lack thereof.

(j) AFFECT ON COLLECTIVE BARGAINING RIGHTS.—(1) Nothing in this subsection shall be construed to affect the terms or conditions of any collective bargaining agreement, whether entered into before or after the date of entry into an agreement under subsection (d).

(2) No money or other things of value provided by an employer to a committee pursuant to this section shall be held to be a violation of paragraph (1) or (2) of section 302(a) of the Labor Management Relations Act, 1947, or section 8(a)(2) of the National Labor Relations Act.

(k) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $10,000,000 for fiscal year 1987 and $15,000,000 for fiscal year 1988.

SEC. 522. TRANSFERS TO APPROPRIATIONS FOR CERTAIN PROGRAMS UNDER THE LABOR MANAGEMENT RELATIONS ACT.

Section 205A of Labor Management Relations Act, 1947 is amended—

(1) in subsection (a)(1), by striking out subparagraph (A) and inserting in lieu thereof the following:

"(A) have been organized jointly by employers and (i) labor organizations representing employees in that plant, area or industry, or (ii) representatives selected by such employees in a secret ballot election, in the case of employees not represented by a labor organization; and";

(2) in subsection (b), by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively;

(3) by striking out subsection (d) and inserting in lieu thereof the following:

"(d) There are authorized to be appropriated to carry out the provisions of this section, $5,000,000 for fiscal year 1987, $8,000,000 for fiscal year 1988, and such sums as may be necessary for each succeeding fiscal year.".

—Strike out all of title V of the bill and insert in lieu thereof the following:

TITLE V—EDUCATION AND TRAINING

Subtitle A—Education

SEC. 501. REPLACEMENT AND MODERNIZATION OF COLLEGE RESEARCH FACILITIES.

(a) PURPOSE.—It is the purpose of this section to assist in revitalizing the Nation's academic research programs through capital investments in laboratories and other research facilities at universities and colleges.

(b) PROGRAM ESTABLISHMENT.—To carry out this purpose, the Secretary of Education shall, from the sums available under subsection () to carry out this section in any fiscal year, establish and carry out a new university research laboratory modernization program that will provide assistance for the replacement or modernization of such institutions' obsolete laboratories and other research facilities.

(c) COMPETITIVE GRANTS; REGULATIONS.—The university research laboratory modernization program established pursuant to subsection (b) shall be carried out through projects which involve the replacement or modernization of specific research facilities at the universities and colleges involved and for which funds are awarded in response to specific proposals submitted by such universities and colleges, in accordance with regulations prescribed by the Secretary of Education to carry out the purpose of this part. The regulations so prescribed shall contain such terms, conditions, and guidelines as may be necessary in the light of that objective, but shall in any event provide that funds to carry out the program will be awarded on a competitive basis, and that the funds so awarded to any university or college will be in an amount not exceeding 50 percent of the cost of the replacement or modernization involved (with the funds required to meet the remainder of such cost being provided by the institution involved or from other non-Federal public or private sources).

(d) CRITERIA FOR AWARD.—Criteria for the award of funds to any institution for a project under a university research laboratory modernization program shall include—

(1) the quality of the research and training to be carried out in the facility or facilities involved;

(2) the congruence of the institution's research activities with the future research mission of the agency making the award; and

(3) the contribution which the project will make toward meeting national, regional, and State research and related training needs.

(e) EQUALIZATION OF FEDERAL FUNDS.—At least 15 percent of the amount available under this section in any fiscal year shall be available only for awards to universities and colleges that received less than $10,000,000 in total Federal obligations for research and development (including obligations for the university research laboratory modernization program) in each of the two preceding fiscal years.

(f) CONSULTATION.—In prescribing regulations and conducting the program under this section, the Secretary of Education shall consult with—

(1) the National Science Foundation;

(2) the Department of Health and Human Services;

(3) the Department of Defense;

(4) the Department of Energy;

(5) the National Aeronautics and Space Administration; and

(6) the Department of Agriculture.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $185,000,000 for each of the fiscal years 1987 and 1988.

SEC. 502. EDUCATIONAL PARTNERSHIP PROGRAMS AUTHORIZED.

(a) PROGRAM AUTHORIZED.—From the funds available to carry out this subtitle, the Secretary shall make grants in accordance with the requirements of this subtitle to institutions of higher education to establish and operate educational partnership programs in accordance with the requirements of this section.

(b) COMPETITIVE SELECTION OF GRANT RECIPIENTS.—The Secretary shall award grants under this section competitively, on the basis of the quality of the proposal contained in the institution's application under subsection (d).

(c) LIMITATIONS ON AWARDS.—In making awards under subsection (a), the Secretary shall ensure that—

(1) there is an equitable geographic distribution of the funds awarded under this subtitle; and

(2) the award to any institution or consortium of institutions is not less than $100,000 or more than $500,000 for any fiscal year.

(d) APPLICATIONS.—An institution of higher education or consortium of such institutions that desires to obtain a grant under this subtitle shall submit an application to the Secretary that contains—

(1) a description of the activities that will be performed with funds made available under this section;

(2) assurances that the institution will obtain from donors, or otherwise provide from non-Federal sources, not less than one-half of the costs of the programs conducted with funds made available under this section;

(3) a description of the resources available to meet the requirements of paragraph (2); and

(4) such other information and assurances as the Secretary may require by regulation.

(e) USE OF FUNDS.—Funds made available pursuant to this section may be used for costs associated with establishment and operation of educational partnerships between institutions of higher education and local educational agencies to provide advanced instruction to students in—

(1) mathematics, science, or computer technology;

(2) a language determined by the Secretary to be critical to the capability of American business to compete in international trade; or

(3) another area of national need as determined by the Secretary.

(f) SPECIFICALLY PERMITTED USES.—Permissible uses of funds under this section include—

(1) costs associated with entering into resource sharing with government, private business, industry, and institutions;

(2) stipends or salary supplements for university faculty and staff involved in the educational partnership program under this title;

(3) development of curriculum that provides superior preparation in any one or more of the areas of mathematics, science, and technology;

(4) acquisition of textbooks, materials, and supplies to be utilized in instructional programs to be used under this title; and

(5) additional transportation costs for students as a result of their participation in the educational partnership program under this title.

(g) USE FOR GENERAL OVERHEAD PROHIBITED.—Funds made available pursuant to a grant under this section may not be used in connection with the general overhead costs of the applicant.

(h) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $50,000,000 for each of the fiscal years 1987 and 1988.

Subtitle B—Training

SEC. 521. WORKER READJUSTMENT AND PLACEMENT COMMITTEES.

(a) GRANTS TO WORKER READJUSTMENT AND PLACEMENT COMMITTEES.—From the funds available to carry out this section, the Secretary shall award, on a competitive basis, grants to worker readjustment and placement committees to provide not more than one-half of the cost of establishing and operating programs of training, retraining, and educaton for eligible workers.

(b) ELIGIBILITY FOR GRANTS.—To be eligible for a grant under this section, a worker readjustment and placement committee shall demonstrate to the Secretary in its application that—

(1)(A) the committee was established by a voluntary cooperative agreement, between the employer and the employees employed at or operating out of a single site, that complies with the requirements of subsection (e), and (B) the employer has certified that it will comply with the terms of such agreement;

(2) the committee does not have, as one of its purposes, the discouragement of the exercise of rights contained in section 7 of the National Labor Relations Act (29 U.S.C. 157) or the interference with collective bargaining in any plant or industry;

(3) the employer is undertaking a modernization or other production adjustment program in order to remain or become competitive in international markets;

(4) the employer has undertaken to provide or to secure from non-Federal sources the remaining one-half of the costs of programs under this section;

(5) the programs to be provided will be in addition to training programs already provided or required to be provided;

(6) an identificaton of (A) the persons or agencies from whom services will be obtained for employees under this section and (B) the specific services that will be provided; and

(7) a description of any arrangements that have been made with the administrative entity for a service delivery area in the vicinity for the purpose of—

(A) obtaining information concerning (and improved access to) educational and training services available in the locality, such as institutional skill training, on-the-job training, training programs operated by employers or labor organizations, or on-side, industry-specific training supportive of industrial or economic development;

(B) providing, through the service delivery area, local providers of education and training with information concerning the needs of the committee for their services; and

(C) assessing such training and educational needs, providing information and recommendations regarding such needs to local educational and training service providers, and matching such training needs to the programs available.

(c) ELIGIBLE WORKERS.—For the purpose of programs under this section, an eligible worker is a worker who is or may be at risk of losing employment because of skill obsolescence or because of a modernization or other production adjustment program which his or her employer is undertaking in order to remain or become competitive in international markets.

(d) USE OF FUNDS FOR SERVICES.—A worker readjustment and placement committee may use funds under this section to provide to or obtain for eligible workers any one or more of the following services:

(1) early warning adjustment services in the event of mass layoffs or plant closings including such services as personal and financial counseling, referral to community services, career counseling, job search assistance, job development, retraining, and relocation assistance;

(2) aptitude testing and career counseling;

(3) on-the-job training;

(4) institutional training;

(5) tuition assistance;

(6) upgrading of skills; and

(7) education, including basic skills and literacy training as well as more advanced education intended to increase the proficiency and adaptability of workers in a changing work environment.

(e) REQUIREMENTS FOR AGREEMENTS.—The cooperative agreement providing for the establishment of a worker readjustment and placement committee meets the requirements of this subsection if the agreement—

(1) provides that there shall be at least as many representatives of employees on the committee as there are representatives of the employer;

(2) provides that where eligible employees have designated one or more exclusive representatives under the National Labor Relations Act, each of those representatives shall serve on the committee as representatives of those employees;

(3) provides that eligible employees who have not designated an exclusive representative under the National Labor Relations Act may be represented on the committee by such a representative or by one of such employees as chosen in a secret ballot election, except that the ratio of the number of employee representatives chosen pursuant to this paragraph to the number of representatives selected under paragraph (2) may not exceed the ratio of the number of employees who are not represented by an exclusive representative as provided under the National Labor Relations Act to the number of employees who are so represented;

(4) provides that all decisions of the committee shall be my mutual agreement of a majority of the employer representatives and a majority of employee representatives on the committee; and

(5) provides that (A) committees may designate, by mutual agreement of employer and employee representatives on the committee, one individual, not otherwise employed by or under contract to the employer, to act as chairperson of the committee, and (B) where such an individual is not so designated, the chairperson shall be designated by mutual agreement of the employer and employee representatives on the committee from among the employee representatives on the committee.

(f) CONTRACT FOR PERFORMANCE OF SERVICES.—Upon approval of a grant request but prior to providing any funds, the Secretary shall require the committee and the employer to enter into a contract with the Secretary to perform the services for which the Secretary is providing funds under this section.

(g) TERMINATION OF FUNDING.—The Secretary shall not provide any additional financial assistance to any committee after receiving notice from the chairperson selected under subsection (e)(5) that the representatives of either the employer or the employees on the committee, or both, have expressed, in writing, an unwillingness to participate in the further activities of the committee. A chairperson shall so notify the Secretary within 10 days after receiving an expression of such unwillingness, unless it is earlier withdrawn.

(h) REGIONAL TECHNICAL ASSISTANCE.—The Secretary shall identify individuals, including employees of the Department of Labor, who shall be available on a regional basis to provide planning, operational, and technical assistance to worker readjustment and placement committees described in subsection (b).

(i) NO DISCRIMINATION BASED ON EMPLOYEE REPRESENTATION.—In administering the assistance authorized under this section, the Secretary shall not discriminate on the basis of employee representation or the lack thereof.

(j) EFFECT ON COLLECTIVE BARGAINING RIGHTS.—(1) Nothing in this subsection shall be construed to affect the terms or conditions of any collective bargaining agreement, whether entered into before or after the date of entry into an agreement under subsection (d).

(2) No money or other things of value provided by an employer to a committee pursuant to this section shall be held to be a violation of paragraph (1) or (2) of section 302(a) of the Labor Management Relations Act, 1947, or section 8(a)(2) of the National Labor Relations Act.

(k) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $10,000,000 for fiscal year 1987 and $15,000,000 for fiscal year 1988.

SEC. 522. TRANSFERS TO APPROPRIATIONS FOR CERTAIN PROGRAMS UNDER THE LABOR MANAGEMENT RELATIONS ACT.

Section 205A of Labor Management Relations Act, 1947 is amended—

(1) in subsection (a)(1), by striking out subparagraph (A) and inserting in lieu thereof the following:

"(A) have been organized jointly by employers and (1) labor organizations representing employees in that plant, area or industry, or (ii) representatives selected by such employees in a secret ballot election, in the case of employees not represented by a labor organization; and";

(2) in subsection (b), by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively;

(3) by striking out subsection (d) and inserting in lieu thereof the following:

"(d) There are authorized to be appropriated to carry out the provisions of this section, $5,000,000 for fiscal year 1987, $8,000,000 for fiscal year 1988, and such sums as may be necessary for each succeeding fiscal year.".

Subtitle C—Import Surcharge

SEC. 531. TRUST FUND.

(a) ESTABLISHMENT.—There is hereby established in the Treasury of the United States a trust fund to be known as the Education and Training for American Competitiveness Trust Fund (hereinafter referred to as the "trust fund"), consisting of such amounts as may be credited to the Trust Fund as provided in this section.

(b) TRANSFERS TO FUND; MANAGEMENT.—(1) The Secretary of the Treasury shall transfer, at least monthly, to the trust fund out of the general fund of the Treasury of the United States amounts determined by the Secretary of the Treasury to be equivalent to the amounts received into the general fund that are attributable to the import surcharge imposed by section 532.

(2)(A) The Secretary of the Treasury shall invest such portion of the Trust Fund as is not, in his judgment, required to meet cur-

rent expenditures. Such investments may be made only in interest-bearing obligations of the United States. For such purpose, such obligations may be acquired—

(i) an original issue at the issue price, or

(ii) by purchase of outstanding obligations at the market price.

(B) Any obligation acquired by the Trust Fund may be sold by the Secretary of the Treasury at the market price.

(C) The interest on, and the proceeds from the sale or redemption of, any obligations held in the Trust Fund shall be credited to and form a part of the Trust Fund.

(c) EXPENDITURES FROM FUND.—(1) Amounts in the Trust Fund shall be available in accordance with section 533.

SEC. 532. IMPORT SURCHARGE.

(a) IN GENERAL.—Except as provided in subsection (b), there is imposed on the entry, or withdrawal from warehouse for consumption, in the customs territory of the United States of each article an import surcharge which is equal to the lesser of—

(1) 0.3 percent ad valorem, or

(2) a percentage that is sufficient to provide funding necessary to carry out the provisions of this Title.

(b) EXCEPTION.—Subsection (a) does not apply to any article that is, without regard to this section, duty-free.

(c) TREATMENT OF IMPORT SURCHARGES.—An import surcharge imposed under subsection (a)—

(1) shall be treated as a regular customs duty for the purposes of the administration of the customs laws; and

(2) is in addition to any other duty imposed under law on an article.

(d) EFFECTIVE PERIOD.—This section shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.

SEC. 533. ALLOCATION OF PROCEEDS.

(a) ALLOCATIONS.—From the amount deposited in the Trust Fund as of October 1, 1987, and as of October 1 of each succeeding fiscal year, the Secretary of the Treasury shall make available such sums as may be appropriated for the programs in Title V of this Act.

(b) RATABLE REDUCTIONS.—If the amount deposited in the Trust Fund as of October 1 of any fiscal year is not sufficient to make available all the appropriated amounts for the programs established by Title V of this Act, then each of such amounts shall be ratably reduced.

—Page 327, line 17, strike out "80 percent" and insert "50 percent"; on line 18, strike out "chapter 1" and insert "chapters 1 and 4"; and on line 19, strike out "20 percent" and insert "50 percent".

Page 335, line 14, strike out "or", and after such line insert the following new paragraphs (and redesignate the succeeding paragraph accordingly):

(4) for the modernization of research laboratory equipment under section 537;

(5) to operate a graduate work-study program under section 449 of the Higher Education Act of 1965 (as added by section 538 of this Act); or

Page 336, strike out lines 1 through 3 and insert in lieu thereof the following:

(1) 15 percent of such funds will be used for activities under sections 534 and 536, 55 percent for activities under sections 535 and 537, and 30 percent for activities under section 538;

Page 339, after line 23 insert the following new sections:

SEC. 537. REPLACEMENT AND MODERNIZATION OF COLLEGE RESEARCH FACILITIES.

(a) PURPOSE.—It is the purpose of this section to assist in revitalizing the Nation's academic research programs through capital investment in laboratories and other research facilities at universities and colleges.

(b) PROGRAM ESTABLISHMENT.—To carry out this purpose, the Secretary of Education shall, from the sums available under section 532(b) to carry out this section in any fiscal year, establish and carry out a new university research laboratory modernization program that will provide assistance for the replacement or modernization of such institutions' obsolete laboratories and other research facilities.
